# Table of Contents

Research on Large Area Soldering Process for Microwave RF Module Based on DOE Method

*Dayuan Jin, Xin Xie and Yun Wan*

MDS Investigation on the Melting and Solidification of Silver Nanoparticles

*Yan Zhang, Guoqiang Zhang, Qiaoran Zhang, Xiuzhen Lu and Johan Liu*

Effect of Temperature on Electrochemical Corrosion of Zn-30Sn Lead-free Solder

*Zhenghong Wang, Zelin Yang, Shenbo Zeng, Gong Zhang, Jianchun Liu, Chuantong Chen and Katsuaki Suganuma*

Effect of Oxygen on the Ag Sintering Technology with Low Temperature Pressureless

*Chuantong Chen, Chanyang Choe, Zheng Zhang, Shijo Nagao and Katsuaki Suganuma*

The Design and Optimize of Glass Diode Sealing Graphite Boat by Thermal-electric Coupling Analysis

*Peng Wu, Chenyi Dai and Ruiqiang Mu*

Thermal Networks Generation and Application in IGBT Module Packaging

*Daohui Li and Xiang Li*

Novel 3.3kV Si-SiC Hybrid Power Module

*Daohui Li and Xiang Li*

Research on Reliability of LED Luminaires in Extreme Natural Environment

*Zhonghong Shen, Chunxia Wang, Xiaojun Dong, Huawei Xu, Jiang Xia and Jianyao Hu*

Plasma Treatment Technology in Microwave Printed Circuit Board Manufacturing

*Guangqian Dai, Ce Zeng, Xiaolin Gong, Fangsheng Bian, Yumin Lin and Zhihui Liu*

A Strain Controllable Board Level Bending Method for PoP Package Reliability Validation

*Jeffrey Lee, Lane Brown and Feng Lu*

Optimal design of Reliability and Signal integrity for Embedded micro-scale BGA Solder Joint

*Liangkun Lu, Chunyue Huang, Jianpei Wang and Wei He*

Gallium Arsenide Power Amplifier Failure Analysis

*Pengbo Jiang, Jie Chen, Zongzhi Duan, Shengxiang Bao, Yongda Hu, Qiang Li, Chuan Luo, Tao Hong, Libo Ai and Huan Liu*

Mechanical and Warpage Characterization of Glass Carrier in Fan-out Technology Development

*Janae Ho and Ryan Chen*
Design and Fabrication of Glass-based Integrated Passive Device ........................................... 59
Peng Sun, Yuhong Zhou, Sima Ge and Liqiang Cao

Sidewall Protection for a Wafer Level Chip Scale Package ......................................................... 64
Peng Sun, Jun Liu, Xu Cheng and Liqiang Cao

Effect of Active Agents on the Rheological Properties of SnAgCu Solder Pastes Used for Jetting Printing ................................................................. 69
Saipeng Li, Xuemei Zhang, Jian Hao, Jian Zhou and Feng Xue

Fabricating Additive Fine Lines through Selective Surface Modification for WLP-PI layer ............ 74
Yuefeng Wang, Yan Hong, Guoyun Zhou, Wei He*, Zhengping Gao*, Shouxu Wang, Xin Zhou, Xinhong Su and Yongsuan Hu

Molecular Dynamics Simulation on Grinding Process of Cu-Si and Cu-SiO2 Composite Structures .................................................. 79
Yixin Xu, Fulong Zhu, Miaocao Wang, Xiaojian Liu and Sheng Liu

Development of Auto Infrared Photoelastic Microscope for Stress Measurement of Silicon .......... 84
Tenghui Li, Ruixia Yao, Chuan Yu and Fei Su

Bosch Etching Study with Large Open Rate and Depth Application ........................................... 89
Yulong Ren, Zhen Huang, Fei Geng and Peng Sun

Thermal Shock Reliability of GaN Die-attached on DBA with Ag Sinter Paste ............................. 93
Dongjin Kim, Chuantong Chen, Pei Chun, Zheng Zhang, Shijo Nagao, Aiji Suetake, Tohru Sugahara and Katsuaki Suganuma

Failure Analysis of a Chip Carrier Board ...................................................................................... 97
Xiaoyu Fang and Yue Dong

Research on Vibration Suppression of High-speed IC Packaging Mechanism Based on Cross-Bee PID Algorithm .................................................................................. 100
Lezhi Ye, Hongtao Wang, Haiming Wang and Desheng Li

Thermal Stress Analysis of BGA Solder Joint Power Load Based on COMSOL ............................. 104
Jianpei Wang, Chunyue Huang, Liangkun Lu and Wei He

Hetero-connecting Materials Effect on the Electromigration and Thermal Migration of SnBi Solder Joints ............................................................... 109
Ming Liu, Limin Ma, Fu Guo, Yishu Wang and Jing Han

Using RBF Algorithm for Scanning Acoustic Microscopy Inspection of Flip Chip .......................... 112
Fan Liu, Mengying Fan, Zhenzhi He and Xiangning Lu

Transient Thermal Characterization of Junction to Case Thermal Resistance for 2.5D Packages .......... 115
Hengyun Zhang, Yang Sui, Tingyu Lin and Haiyan Liu
High Mechanical Dual-Interface FSID COB Development for 15N 3Wheel Test .......................... 121

Haomin Bao, Lei Xu, Yonghua Zhou and Jianfeng Zeng
Cantilever Gold Ribbon Bonding used in MMCM .................................................................. 125

Zongjie Han, Le Jie, Wei Yan, Yongfang Hu and Xiaoxuan Li
Process Development and Failure Analysis for Chip-Last Panel Level Fan-out Packaging (PLP) .... 129

Haiyan Liu, Tingyu Lin, Fengze Hou, Feng Chen, Hengyun Zhang and Liqiang Cao
Influence of Cu Nanoparticles on Interfacial Reaction and Cu6Sn5 Growth Behavior in Sn/Cu Joints 135

Shengyan Shang, Anil Kunwar, Yanfeng Wang, Jinye Yao, Haitao Ma and Yunpeng Wang
Application of AOI Light Source Modes in Multi-Chip Modules Inspection .............................. 141

Yilong Wu, Junling Wen and Pingsheng Zhang
Fabrication of Anti-Counterfeiting Micro-fingerprints on Signatures Based on Ion Wind ................ 144

Shangru Zhou, Yuping Yan, Jie Liu, Huai Zheng and Sheng Liu
Failure Analysis Examination of the Effect of Thermal Cycling on Copper-filled TSV Interposer Reliability 148

Yuan Chen, Peng Zhang, Wei Su and Xiaoling Lin
Thermal Simulation into the Effect of Varying Encapsulant Media on Wire Bond Stress Under Temperature Cycling ................................................................. 152

Matt Packwood, Daohui Li and Paul Mumby-Croft
An Numerical Method for the Optimization of IGBT Modules .............................................. 156

Hua Lu, Pushparajah Rajaguru and Chris Bailey
Study of the Fabrication and Organization Properties of Copper-based Ba1-xSrxCaCO3 Composites 161

Shouwei Li, Pei Liang, Xuefei Ming and Zhiqiang Xiao
Study of the Fast Sintering of Silver Nanoparticle Ink Induced by Sodium chloride solution at Room Temperature ................................................................. 165

Yong Xiao, Zhihao Zhang, Ming Yang, Haifeng Yang, Mingyu Li and Yong Cao
Electrical Stressing and Self-Heating Effects on GaN-based LEDs' Degradation Under Extremely Low Temperature ................................................................. 168

Bing Yan, Dongdong Teng, Lilin Liu and Gang Wang
Study on Bonding Strength of Sintered Nano-silver Joint on Bare Copper Substrates with Different Grain Sizes 176

Cheng-Jie Du, Xin Li and Yun-Hui Mei
Failure Localizations on the Open Circuit for a High Density Ceramic Flip-Chip Package after Reliability Test

Han Li, Hongyu Zheng and Xiaojun Zhang

Study on Characterization of Light Aging of RGB LED Packaging Materials

Zhentao Deng, Dayong Gui, Menglong Tu, Lin Xie and Mingliang Wang

A Low-Pass Filter Made Up of the Cylindrical Through-Silicon-Via

Fengjuan Wang, Jia Huang and Ningmei Yu

An Online-Sintering Approach for Bonding High-Power Devices Using Nanosilver Paste

Haidong Yan, Weiyong Ma, Yunhui Mei and Daoguo Yang

Effect of Ag Element on Microstructure and Mechanical Properties of Sn-Bi-xAg solders designed by Cluster-Plus-Glue-Atom Model

Jing Ren, Mingliang Huang and Xudong Yang

Polypyrrole Hollow Nanosphere Intercalated Graphene-based Flexible Supercapacitor

Yuanyuan Yang, Pengli Zhu, Leicong Zhang, Tingxi Li, Qing Wang, Rong Sun and Chingping Wong

A Stretchable Translucent Conductive Film Based on Polymer Microspheres Lithography Technology

Xinyu Zhang, Yougen Hu, Wenlong Jiang, Pengli Zhu and Rong Sun

Design and Fabrication of the Silicon-based Integrated MIM Capacitors

Rongzhen Zhang, Qing Zhang, Xiufeng Zhou, Yetao Zhu, Xuefei Ming and Nayan Gao

Failure Analysis Technology of Lead-free BGA Solder Joints and Relevant Cases

Wanchun Tian, Qin Wu and Liang Zhou

Micropypamid Silicon Wafer with ZnO Nanowires as High Efficiency Piezoelectric Nanogenerator

Xuecheng Yu, Leicong Zhang, Wen Jiang, Pengli Zhu, Rong Sun and Ching-Ping Wong

Effect of Nickel-plating on Laser Welding of Aluminum Packages

Jie Chen and Bihui Wang

Warpage Simulation and Optimization of Fan-Out Wafer Level Package(FO-WLP) with TMV under Different Processes

Yanhui Guo, Guohua Zhang and Jianfeng Wang

Thermal Error Analysis and Compensation of Die Attach Equipment for Fan-out Package

Junshuai Wang, Lezhi Ye, Haiming Wang, Ping Lang and Zhiyue Wang

Metal-Organic Framework Derived PdCu/C as an Efficient Catalyst for Electroless Copper Deposition
Jiahui Chen, Huangqing Ye, Jinqi Xie, Changzeng Yan, Rong Sun and Ching-Ping Wong
Research on Key Process Technology of RDL-first Fan-out Wafer Level Packaging .......................... 309

Jiachang Zhu and Xuefei Ming
Verification and Optimization of the Thermal Design for The Power Stack with Three IGBT Modules ...... 314

Jianrui Xue, Xinyu Sun, Liming Gao, Ming Li
Preparation and Characterization of the Double-Side Adhesive Tape with Reactive Properties and High Thermal Conductivity for Electronic Packaging ................................................................. 319

Hao Chang, Baotan Zhang and Rong Sun
Low and Cryogenic Temperature Mechanical Performance and Fracture Behavior of Micro-Scale Cu/Sn-3.0Ag-0.5Cu/Cu Joints with The Decreasing Dimension ......................................................... 324

Wangyun Li and Xinpeng Zhang
A High Performance and Low Cost Half Bridge IGBT Planar Power Module ..................................... 329

Jianfeng Li, Jingru Dai, Xi Lin, Ke Li and Christopher Mark Johnson
Investigation on the Reliability of Chips onto the Flex Substrate with a Non-Conductive Paste for Flex Substrates Pretreated by Argon Plasma ................................................................. 338

Chengli Chuang and Yirong Jiang
Study of Capillary Tip States on the Reliability of Al Wire Bonding in Microelectronic Package ................. 343

Dezhi Su, Dan Zhao, Quanwen Wang, Changcheng Wang, Yucheng Niu and Peijie Guan
SiC MOSFET Threshold-Voltage Instability Under High Temperature Aging ........................................ 347

Yang Liu, Huaiyu Ye, Xianping Chen, Zhaohui Zhao, Zhigang Li, Caitao Lu, Jingguo Zhang, Sau Wee Koh, Ligen Wang and Guoqi Zhang
Random Vibration Simulation on Electronic Equipment with Micro-Systems Using Substructure Method ..... 351

Fang Yu, Ning Zhang, Jun Li and Lan Zhan
Tin Nanoparticles Modified Nano-Silver Paste for Pressureless Low-Temperature Sintering Process ........ 356

Qiwang Chen, Xiao Ma, Haijun Huang, Can Yin, Minbo Zhou and Xinpeng Zhang
Three-Dimensional Simulation of the Effects of Cu Protrusion of Cu-filled TSVs on Thermal Fatigue Behavior of Micro-Bump Joints in 3D Integration ................................................................. 361

Jieying Zhou, Cheng Wei, Shuibao Liang, Han Jiang, Xiao Ma and Xinping Zhang
A Risk Assessment Method for Void in SnAg Solder Bump Influence on Reliability of Flip Chip Packaging ... 367

Jun Chen, Anmin Hu, Xinjiang Long and Ming Li
Reliability of High Density Wire Bonding in X Band T/R Module .................................................. 372
Dongliang Wang, Lihua Chen and Feifan Yan

Phase Field Study of the Combined Effects of Electromigration and Thermomigration On Phase Segregation and Physical Properties of Sn58Bi Solder Joints Under Electric Current Stressing Coupled with Temperature Gradient .................................................................................................................. 376
Shuibao Liang, Changbo Ke, Cheng Wei, Minbo Zhou and Xiping Zhang

Mechanism of Cu5Zn8 Layer Act as A Diffusion Barrier Layer .................................................. 383
Jinye Yao, Hua Li, Ru Huang, Xiao Qi, Boyin Wang, Junshan Qiao, Yunpeng Wang and Haitao Ma

Study on Electrochemical Migration of Sn-0.7Cu .............................................................................. 387
Xiao Qi, Haoran Ma, Ru Huang, Jinye Yao, Shengyan Shang, Anil Kunwar, Yunpeng Wang and Haitao Ma

Effect of Solder Volume on Interfacial Reactions between Sn-0.7Cu solder Balls and Cu Pads Under Multiple Reflow .................................................................................................................. 391
Ru Huang, Mengrou Xia, Jinye Yao, Xiao Qi, Boyin Wang, Junshan Qiao and Haitao Ma

Stability of Multilayered Ag/Ag3Sn/Sn Films Non-cyanide Electroplateded for LED Leadframe .......... 396
Shengnan Ji, Chen Wang, Yunpeng Wang, Haitao Ma and Ning Zhao

Synthesis of Ba\([((\text{Mg}_{0.8}\text{Zn}_{0.2})_{0.98}\text{Y}_{0.02})_{1/3}\text{Ta}_{2/3})_3\text{O}_3\) Microwave Dielectric Ceramics with La2O3-B2O3-ZnO Glass for LTCC Application ...................................................................................................................................................... 400
Leiyu Yang, Shuren Zhang, Chengli Sun and Xue Dong

FE Modeling and Analysis on Thermosonic Flip Chip Bonding Process for Cu/low-k Wafer .......... 404
Xuezhi Zhang, Jian Gao, Yun Chen, Yunbo He and Xin Chen

Effects of Reflow Time on the Morphology of Cu6Sn5 in Solder Balls at 250 °C ................................ 409
Shuo Zhang, Jing Han and Fu Guo

Effect of EFO Parameters on the HAZ and Bondability of Gold Wire .............................................. 413
Wenyuan Zhou, Jianwen Kong, Feifei Kang, Yongjin Wu, Guoxiang Yang, Hongying Pei, Jialin Chen, Jian Lu and Jianhong Yi

Investigation on Solid State Bonding and IMC Reaction of Cu Pillar Bump/Ni Micro Cones ............. 419
Yukun Guo, Anmin Hu and Ming Li

Effect of Defected Behavior on Interfacial Heat Transferring Performance for HP-LED Packaging Based On Entropy Generation Analysis ................................................................................................. 423
Peng Cui, Miao Cai and Daoguo Yang
Reliabilities and Stress Analysis of Printed Circuit Boards Interconnect Stress Test  ........................................ 428
Ying Yang

Investigation of Elastic Fields within Through silicon Vias using a Finite Element Model with Thermal Stresses and Joule Heating Present ................................................................. 432
Qibiao Zeng, Yuan Gao, Yubao Zhen and Peng Zhou

Study on Cu-Cr-Zr Alloy Based High Performance Copper Interconnects Technology for Next Generation Flexible Display ........................................................................................................... 438
Honglong Ning, Kuankuan Lu, Shiben Hu, Fuxiang Huang, Xianzhe Liu, Hua Xu, Miao Xu, Lei Wang, Rihui Yao and Junbiao Peng

Effect of Ag Content on Cu6Sn5 Growth Behavior at Sn-Ag/Cu Interface During Multiple Reflows  ........................................... 441
Haoran Ma, Jinye Yao, Chen Wang, Shengyan Shang, Yunpeng Wang and Haitao Ma

Effect of Soldering Temperature on Cross-Interaction at L-S Interface of Linear Cu/SAC305/Ni Solder Joints  ........................................ 445
Bingfeng Guo, Ru Huang, Jinye Yao, Xiao Qi, Anil Kunwar, Yupeng Wang and Haitao Ma

Study on Preparation Process of Au80Sn20 Eutectic Solder on Thin Film Substrate ................................................................. 450
Chunyan Yang, Lihui Li and Yahui Xue

Fabrication and Properties of Silver Nanowire Flexible Transparent Electrode ................................................................. 454
Rihui Yao, Xiaoqing Li, Zhiqiang Fang, Zhihang Li, Muyang Shi, Shangxiong Zhou, Weijian Yuan, Honglong Ning and Junbiao Peng

Effects of Sb addition on the microstructure and mechanical performance of Sn58Bi based alloys and the solder joints ................................................................. 457
Jingang Li, Xiao Ma, Minbo Zhou, Xiang Ning and Xinping Zhang

Influence of Aging Temperature and Time on the Intermetallic Reaction in 15μm Cu/Sn Copper Pillar Bump ................................................................. 462
Lei Ye, Chao Huang, Huiqin Ling, Anmin Hu and Ming Li

Estimating the Constitutive Behaviour of Sintered Silver Nanoparticles by Nanoindentation ................................................................. 466
Xu Long, Wenbin Tang, Xuzhen Lu, Johan Liu, Weijuan Xia, Yanpei Wu and Cheng Zhou

Porosity Effect on the Constitutive Model of Porous Material Under Nanoindentation ................................................................. 472
Hongcun Guo and Xu Long

Material and Structural Optimization of Fatigue Life of PBGA Under Temperature Cycling ................................................................. 477
Wenjie Wang, Yao Yao, Zhenghu Zhu and Xu Long
Preparation of a Low Temperature Sintering Silver Nanoparticle Ink and the Fabrication of Conductive Patterns on PET Substrate .......................................................... 482

Haijun Huang, Minbo Zhou, Can Yin, Qiwang Chen and Xinping Zhang

Failure Analysis for Vibration Stress on Ball Grid Array Solder Joints .............................................. 486

Zhiqiang Zhao, Chaohui Hu and Fengwei Yin

Fabrication of an Oxidation-Resistant Submicron Copper Particle Based Conductive Ink and its Sintering Behavior On the Flexible Substrate .......................................................... 491

Haijun Huang, Minbo Zhou, Can Yin, Qiwang Chen and Xinping Zhang

Facile Synthesis of Silver Nanoparticles Decorated Boron Nitride Nanotube Hybrides ............................. 496

Chenjie Fu, Xiaoliang Zeng, Rong Sun, Jianbin Xu and Ching-Ping Wong

A Wet Process to Fabricate Silicon Oxide Layer for Through-Silicon-Via Insulator Application ........ 501

Haoze Duan, Shuai Zheng, Liming Gao and Ming Li

Radiation Source Reconstruction based on Artificial Neural Network for Radio Frequency Interference (RFI) Analysis in Complex System ............................................................................. 506

Yufei Shu and Xingchang Wei

Interconnecting the Promising Mxenes via Ag Nanowire in Epoxy Nanocomposites for High-Performance Thermal Management Applications .............................................................. 510

Changzeng Yan, Chao Ji, Jiahui Chen, Xiaoliang Zeng, Rong Sun and Ching-Ping Wong

The Impact of Bumping Stress on Cu RDL Structure ............................................................................. 513

Yulong Xie, Liming Gao, Tony Chen and Ming Li

Research on Heat Dissipation of a New Rectangular Microchannel Structure Based on Thermal Bimetal .................. 517

Weikang Wan, Haihua Li, Qidong Wang and Xiaoxin Liang

Room Temperature GaN Bonding by Surface Activated Bonding Method .................................................. 521

Fengwen Mu and Tadatomo Suga

Study of Ultraviolet Assisted Cure Mechanism of the Phosphor/Silicone Composites Used in White LEDs ... 525

Zhen Wang, Jiajie Fan, Jie Liu, Anhua Hu, Cheng Qian, Xuejun Fan and Guoqi Zhang

Effect of Electromigration on the Microstructural Evolution and Shear Fracture Behavior of Mixed Assembled Cu/Sn–3.0Ag–0.5Cu-ball/Sn–58Bi-paste/Cu Joints in Board-Level Packaging ........................................ 531

Jiaqiang Huang, Minbo Zhou, Xingfei Zhao and Xinping Zhang

A Modified MEMS-Casting Based TSV Filling Method with Universal Nozzle Piece That Uses Surface
Trenches as Nozzles .......................................................... 536

Jiebin Gu, Xiaoyuan Xia, Weibo Zhang and Xinxin Li

Effect of Some N-heterocyclic Inhibitors in the soldering Flux on the Corrosion Behavior of Eutectic Sn–58Bi Alloy and Its Solder Paste ................................................................. 540

Xiang Ning, Minbo Zhou, Jingang Li and Xinping Zhang

A Novel Graphene Oxide Millispheres/ Epoxy Resin Composite with Improved Thermal Conductivity 546

Chen Li, Xiaoliang Zeng, Deliang Zhu, Rong Sun, Jianbin Xu and Ching-Ping Wong

A Novel Method for Alignment Deviation Automatic Correction in Wafer-level Flip-chip Direct Packaging 551

Junming Guan, Hui Tang, Sifeng He, Jian Gao, Xin Chen and Chengqiang Cui

Plastic Deformation Behavior of IMCs in Solder Joints During Nanoindentation ............................................... 556

Fan Yang, Sheng Liu, Li Liu and Zhiwen Chen

Size Effect on the Interfacial Reaction and IMC Growth of Sn–3.0Ag–0.5Cu/Cu Joints with the Decreasing Joint Size to several Tens of Microns During Reflowing Soldering ........................................ 562

Xingfei Zhao, Minbo Zhou, Tao Sun and Xinping Zhang

Research and Introduction of the Process Flow of Full-Automatic Wafer Level Flip Chip Machine 566

Yunbo He and Wentao Ye

Hydrothermal Assembly of One-Dimensional Boron Nitride Nanostructures ........................................ 573

Guang Yang, Haixu Wang, Ning Wang, Rong Sun and Ching-Ping Wong

Effect of Catalysts on Hydrothermal Preparation of Boron Nitride Nanostructures ........................................ 579

Haixu Wang, Guang Yang, Ning Wang, Rong Sun and Chin-Ping Wong

Thermal Management Technology of IGBT Modules Base on Two-Dimensional Materials 585

Jie Bao, Yuan Xu, Nan Jing, Hao Zhao, Yuhai Fu, Yunjie Zhang, Piao Yang, Renxia Ning, Ju He, Zhenhai Chen and Wenyi Xu

Diffusion Barrier Properties of Electroless Ni-Fe-P coatings in Zn-5Al Solder Joints ................................. 589

Han Zhang, Zhiwen Chen, Juan Peng and Li Liu

Rapid Transient Liquid Phase Sintering by Ag-In Solder Pastes for High-temperature Power Electronics .......................................................... 593

Dongxiao Zhang, Shengfa Liu, Zhiwen Chen and Li Liu

Application of Non-UV BG Tape on Assembly of Flip-Chip Package with Copper Pillar Bump 599

Yang Yang, Tuobei Sun, Jian Pang and Xiaoli Ren
Regular and Rapid Growth of Cu₆Sn₅ Grains at Liquid-phase Sn/(001)Cu Interface by Imposing Temperature Gradient ................................................................. Ning Zhao, Shi Chen, Chunying Liu, Yi Zhong, Haitao Ma and Yunpeng Wang

The Characters of WO₃ Electrochromic Film Prepared by Sol-gel Method .................................................................................. Honglong Ning, Xiaochen Zhang and Guanguang Zhang

Effect of Electric Current Stressing on the Shear Strength and Fracture Behavior of Micro-scale BGA Structured Cu/Sn–3.0Ag–0.5Cu/Cu Joints ......................................................................... Wenkai Le, Xiang Ning, Jiaqiang Huang, Minbo Zhou and Xinpeng Zhang

Reliability Analysis of System-in-Package Module Based on Physics of Failure ................................................................. Hui Xiao, Shuqiang Liu and Yong Li

Shear Creep and Fracture Behavior of Micro-scale BGA Structured Cu/Sn–3.0Ag–0.5Cu/Cu Joints Under Electro-thermo-mechanical Coupled Loads ......................................................................... Wenkai Le, Zhiwei Zhu, Shanshan Cao and Xinpeng Zhang

The Study of MLCC Assembly Reliability Based on PCB Strain Measurement ........................................................................ Weiina Gao, Jingming Fei, Jun Wang and Binbin Zhang

Low Interconnection Loss and Low-cost Approach for Antenna in Package of 77GHz Automotive Radar Applications .................................................................................................................. Chengyu Ho, Chenchao Wang, Shengchi Hsieh and Chunyen Ting

Study of the Curing Kinetics and Heat Resistance of Isotropic Conductive Adhesive .................................................................................. Jiang Han, Minbo Zhou and Xinpeng Zhang

The application and case study of FIB system in the PCB with OSP final finish failure analysis ................................................. Jianghua Shen, Xiao He and Enliang Li

A Cost-Effective and High Performance Assembly Technology for Interconnecting the Cu/Al Bilayer Electrode and Leadwire of ZnO Varistor Using a Low Ag-containing Solder Paste ........................................................................ Kai Wang, Guoliang Chen, Minbo Zhou and Xinpeng Zhang

Frequency-domain Lifetime Prediction Methods for the PoP Under Wide-band Random Vibration Loading ................................................................ Jiang Xia, Zhonghong Shen, Guoyuan Li, Qi Peng, Huawei Xu, Yajiao Yue, Linyi Huang and Binhui Liu

Fluxless Bump Reflow in Activated Hydrogen Atmosphere ........................................................................................................... Fluxless Bump Reflow in Activated Hydrogen Atmosphere

Reliability Improvement of CBGA Solder Ball Joint in LTCC-based SiP Module .............................................................................. Reliability Improvement of CBGA Solder Ball Joint in LTCC-based SiP Module

C. Christine Dong, Fisher Yu, Tim Bao, Wenqi Zhang, Fengwei Dai and Dengfen Yang

Reliability Improvement of CBGA Solder Ball Joint in LTCC-based SiP Module
Yangyang Li, Yuanqi Zeng, Dong Dong, Hui Wang, Jiyong Tan and Jifan Zhang
Research on the Thermal Fatigue Life of CQFN Packaging ........................................ 662

Zhentao Yang, Bo Peng and Ling Gao
Effect of Ni Thickness on the IMC and Reliability of Ultrathin NiPdAu .......................... 667

Hongfa Pan, Yibo Wang, Weiguo Luo, Ming Li and Liming Gao
Effect of Pretreatment on Copper Filling of High Aspect Ratio Through-Silicon Via (TSV) ........ 672

Hongfa Pan, Yumei Zhang, Ming Li and Liming Gao
Corrosion Resistance of Electrodeposited Nanocrystalline Ni from Citrate Baths ................ 676

Jiangbing Xia, Hongmo Li, Yuequan Wang, Tao Hang and Ming Li
Study on Droplet Movement on Superhydrophobic Surfaces under Electric Fields ................ 681

Jie Liu, Shangru Zhou, Yuping Yan, Huai Zheng and Sheng Liu
An Effective Way to Solve the Void Problem of Traditional Underfill Based on NCP Technology .. 687

David Liu, Jianrui Xue, Ming Li and Liming Gao
Application of Finite Element Simulation Analysis and Calculation in Process Design Optimization .. 691

Yabing Zou, Tao Lu and Xiao He
Failure Analysis of Insufficient Bonding Strength of Electrolytic Nickel Gold Spring Soldering Interface ..... 696

Hui Xu and Feng Xiong
Effect of Grain Boundary Character and Grain Orientation on Electromigration in Lead-Free Solder Interconnects with Cyclic Twinning Structure ................................................................. 701

Xing Fu, Hongtao Chen, Bin Zhou, Si Chen, Ruohe Yao and Xiaoqi He
Design, Fabrication and Characterization of Si-based Microfluidic Structures for High Heat-flux Cooling Application ................................................................. 704

Yangyang Li, Xiancai Chen, Jia Lin, Qian Lu, Jian Zhang and Weiwei Xiang
Simulation and Optimization of High Performance On-Chip Solenoid MEMS Inductor .................. 710

Shengrui Zhou, Jicun Lu and Ling Xu
Simulation and Low Cost Process Development for Thin Wafer Level TSV Last Integration Scheme for RF Applications ................................................................. 716

Directional Solidification Structure and Deformation Behavior of Silver Bonding Wire .................. 722

Feifei Kang, Wenyan Zhou, Jianwen Kong, Yongjin Wu, Guoxiang Yang, Hongying Pei and Kunhua Zhang
Failure Analysis and Case Study of Wire Bonding ................................................. 728
Lili Ma and Hang Chen

Investigation of ENEPIG/Sn-10Sb Solder Joint ...................................................... 731
Xin Gu, Liangsong Huang and Guihui Wang

Research on Motion Simulation of Wafer Handling Robot Based on SCARA .................. 734
Yunbo He and Jiajun Chen

Simulation Analysis on Thermal Drift of MEMS Sandwich Accelerometer ....................... 740
Wei Mei, Qifang Hu, Chaoyang Xing, Nannan Li and Yuxin Xu

The Mechanical Simulation of a Special Biosensor ................................................. 745
Shuaipeng Wang, Hongxun Tian, Xinghui Zhang, Jianqiang Li, Yanning Chen, Wenhe Wang, Yidong Yuan, Haifeng Zhang, Yubo Wang and Dongyan Zhao

A Micro-hotplate for MEMS Based Gas Sensor ...................................................... 749
Gaoqiang Niu, Lingxiang He, Zhitao Yang, Changhui Zhao, Huimin Gong, Wei He and Fei Wang

Effects of Nano-SiO2 Additions on Wettability and Interfacial IMC Growth of SAC Solder on Ni-xSiO2 Composite Electroless Clad Layer ................................................. 753
Yong Wang, Xiaochen Xie, Ying Liu and Xiuchen Zhao

Effect of Chip Layout in Wafer on Molding and Fan-Out Wafer Level Packaging (FO-WLP) Technology ................................................................................................. 757
Yang Li, Xuefei Ming and Yong Ji

Thermo-mechanical Modelling of Cu Wire Parallel Gap Micro-Resistance Welding Process ................................................................. 761
Bingying Wu, Chunjin Hang, Yue Li, Yang Liu, Weiwei Zhang and Yanhong Tian

Leveraging 3D Packaging Technology to Enhance Integrated Circuits Security and Reliability .............. 766
Chunsheng Zhu, Yingjian Yan, Pengfei Guo and Junwei Li

Packaging Flat Micro Heat Pipe Using Low Melting Point Alloy ...................................... 770
Yi Luo, Chen Jia, Congming Li and Xiaodong Wang

Design and Implementation of High Power Semiconductor Laser Reliability Testing Platform .................. 774
Meng Su, Guoguang Lu, Huawei Xu and Linyi Huang

High Density On-Package Direct Cable Attachment for Hundred-Gbps Chip-to-Chip Interconnects .... 777
Boping Wu

Improvement of Barrier Performance for Thin Film Encapsulation of Organic Light-Emitting Diodes by A
Prior Planarization Process ........................................................................................................ 780

Cunping Qin, Jun Yang, Tao Xu, Xingwei Ding and Jianhua Zhang
Temperature and Stress Distribution of IGBT Module in DC Power Cycling Test with Different Switching Frequencies ........................................................................................................ 785

Chao Fang, Tong An, Fei Qin, Jingyi Zhao and Xuequan Yuan
Case Study of SBD Burnout Failure Caused by non Electric Overstress .................................. 791

Guangning Xu and Jian Zhou
Design and Optimization of a Novel Silicone Rubber Elastic Button based on BPNN Model .... 795

Siyu Wang, Zhi Liang, Zhangping Yang, Miao Cai, Daoguo Yang and Jinyang Li
Failure Analysis on Insufficient ACF Bonding Strength ............................................................. 801

Weiming Li
Effect of Zincate Immersion Pretreatment on Corrosion Resistance of Electroless Plated Nickel-Phosphorus Film For Advanced Packaging ................................................................. 804

Weixing Gan, Tao Hang and Ming Li
High Density Silicon Substrates for Processor-Memory Integration ........................................ 808

Baoxia Li, Zongxi Liu and Yanyan Su
Method to Prevent Thin Film Cracking of Thin Film Encapsulation in Flexible AMOLED ....... 812

Wei Ao, Yinghui Zhu, Jianhua Zhang, Yan Wang, Xiangchao Liu, Xiaogang Xin, Feng Gao and Chaochi Peng
Effect of Rapid Inducted Heating on the Microstructure of Solder Joint in IC ......................... 815

Jibing Chen, Nong Wan and Juying Li
Effect of Eddy Current Inducted Heating on Optical Property and Thermostability of High Power LED ...................................................................................................................... 819

Jibing Chen, Nong Wan, Juying Li and Yiping Wu
Light Extraction Efficiency Enhancement of 265nm UVC-LED with Micro-Array Structure .... 823

Lei Wang, Daoguo Yang and Zhangping Yang
Effect of Different Material Systems on the Joint Properties of 30μm Pitch Micro Bumps ......... 828

Fengwei Dai, David Wei Zhang, Weni Zhang, Guojun Wang, Dengfeng Yang, Lin Chen, and Liqiang Cao
3D Module in Fan-out Packaging ............................................................................................... 832

Lihua Zhan, Hao Li, Fuguo Zhu and Zhipeng Zhou
A Highly Reliable Cleaning Process ........................................................................................... 834
Jun Zhang, Xiaofei Ye and Hailin Shi
Research on LTCC-Based Flat Optocoupler Assembly Technology ........................................... 841

Jun Zhang, Xiaofei Ye, Hailin Shi and Menglin Li
Microstructure and Properties of AuSn20 Solder Ribbons Prepared by Rapid Solidification Process .... 850

Chen Chen, Xuemei Zhang, Zhenhua Chen, Mingzhen Wei, Jian Zhou and Feng Xue
Multi-chip Power Distribution Network Modeling and Analysis Based on Multi-Input Impedance .... 854

Jincan Zhang, Min Miao and Xiaole Cui
Plasma Impact on PI Roughness ........................................................................................................ 860

Qiang Cheng, Liming Guo and Li Zhang
Fast Room-Temperature Sintering of Ag Nanoparticles on Polyethylene Terephthalate Film .......... 863

Zhihao Zhang, Cunwei Wei, Jiajia Han, Huijun Cao, Yinggan Zhang, Yuan Gao and Yuping Xu
Aging Effect on Defect Evolution and Shear Strength of Nano-silver Solder Joint ....................... 867

He Gong, Yao Yao, Jundong Wang, Shaobin Wang and Xu Long
Design and Analysis of Microchannel for the Thermal Management of Multi-stacked LTCC Laminates 872

Hejie Yu, Min Miao and Kai Zhao
Thermal analysis and optimization of a thermally tunable grating filter with air trench structure .......... 876

Fei Duan, Kai Chen and Yonglin Yu
Research on the Influence of Dimpled Ceramic SMD on Mechanical Strength of Solder Joint in LTCC-based BGA Packages .......................................................... 879

Yuanqi Zeng, Yangyang Li, Hui Wang and Dong Dong
Thermal Stress Analysis and Design Guidelines for Through Silicon Via Structure in 3D IC Integration 883

Yuanxiang Zhang, Jiankun Wang and Sijia Yu
Numerical Simulation on Wafer Warpage During Molding Process of WLCSP ............................... 886

Mengke Yang, Fei Qin and Daquan Yu
Research on Evolution Behaviors of SnPb Solder Under High Current Stressing .......................... 891

Huijun Cao and Zhihao Zhang
Interconnection Reliability for MCM of Large Micromirror Arrays and High Voltage Driving ASIC Based on High-density Substrate ........................................................................... 895

Zhenggao Hu, Gaowei Xu and Yaming Wu
Research on Thermal Analysis of Iris Recognition Module Package Structure ........................................ 899

Zhangping Yang, Daoguo Yang, Lei Wang, Xiyou Wang and Miao Cai

Thermal Simulation Modeling of IGBT Module Using Silver Nanoparticle Sintering Material .......... 904

Hu Wang, Daoguo Yang, Xiyou Wang and Zhi Liang

Effect of Magnetic Field on Activation Performance of Silicon/Glass Dielectric Barrier Discharge .... 908

Mingqiang Pan, Furong Yao, Jizhu Liu, Yangjun Wang and Lining Sun

Case Study of Resistor Failure Caused by Bi Migration and Preventive Measures .......................... 1720
Jintao Chen, Liyuan Liu, Fuyao Mo, Binruo Zhu, Yin Zhang and Zhen Gu

Research on the Photoelectric Properties of Flexible Photodetectors ............................................. 1723
Xiaoyong Chen, Dejian Zhou, Yulai She and Tianshou Liang

Research of Inkjet Printing Process for Flexible Electronic Interconnect Structures ..................... 1728
Siming Gong, Kailin Pan, Wenhui Wang, Kai Fan, Hao Cheng and Chen Guo

Study of the Interaction Energy at the Composite Interface between PDMS and Functionalized Graphene Using Molecular Dynamics Simulations ................................................................. 1735
Kai Fan, Kailin Pan, Siming Gong, Wenhui Wang, Hao Cheng and Chen Guo

Design and Analysis of Self-Similar Serpentine Interconnects for Stretchable Electronics ................ 1741
Fan Yang, Yasong Wang, Xiaole Kuang, Yaoyao Nie and Wei Xia

Effect of Temperature Gradient on Interfacial Reactions in Cu/Sn-9Zn/Ni Solder Joints during Aging .... 1744
Ning Zhao, Mingyao Wang, Yi Zhong, Haitao Ma and Yunpeng Wang
Yi Zhong, Ning Zhao, Wei Dong, Yunpeng Wang and Haitao Ma
