8th CIRP Conference on High Performance Cutting (HPC 2018)

Procedia CIRP Volume 77

Budapest, Hungary
25 – 27 June 2018

Editors:

Laszlo Monostori
Gabor Stepan
Dsniel Bachrathy

ISBN: 978-1-5108-7247-9
Some format issues inherent in the e-media version may also appear in this print version.
TABLE OF CONTENTS

DAWN OF NEW MACHINING CONCEPTS: COMPENSATED, INTELLIGENT, BIOINSPIRED ............... 1
Konrad Wegener, Thomas Gittler, Lukas Weiss

MILLING FORCE IDENTIFICATION FROM ACCELERATION SIGNALS USING
REGULARIZATION METHOD BASED ON TSVD IN PERIPHERAL MILLING ........................................ 18
Chenxi Wang, Xingwu Zhang, Bajije Qiao, Xuefeng Chen, Hongrui Cao

VIRTUAL MILLING FORCE MONITORING METHOD BASED ON IN-PROCESS MILLING
FORCE PREDICTION MODEL TO ELIMINATE PREDETERMINATION OF CUTTING
COEFFICIENTS .......................................................................................................................... 22
Kazuaki Kaneko, Isamu Nishida, Ryuta Sato, Keiichi Shirase

USING AN INVERSE CUTTING SIMULATION-BASED METHOD TO DETERMINE THE
JOHNSON-COOK MATERIAL CONSTANTS OF HEAT-TREATED STEEL ........................................ 26
Rocco Eisseler, Konstantin Drevle, Karl Christoph Grözing, Hans-Christian Möhring

DETERMINATION OF SPECIFIC CUTTING FORCE COMPONENTS AND EXONENTS
WHEN APPLYING HIGH FEED RATES ......................................................................................... 30
Bernhard Karpuschewski, János Kundrák, Gyula Varga, István Deszpoth, Dmytro Borysenko

EVALUATION OF ON-MACHINE MEASURING METHOD FOR DYNAMIC STIFFNESS OF
THIN-WALLED WORKPIECES ......................................................................................................... 34
Takuma Umezu, Daisuke Kono, Atsushi Matsubara

ON-SITE ESTIMATION OF FLOOR STIFFNESS FOR MODELLING MACHINE TOOL
SUPPORTS ........................................................................................................................................ 38
Daisuke Kono, Kotato Mori

IN-PROCESS WORKPIECE BASED TEMPERATURE MEASUREMENT IN CYLINDRICAL
GRINDING ...................................................................................................................................... 42
Christoph Baumgart, Viktor Heizer, Konrad Wegener

MINIATURIZED INTERFEROMETRIC 3-D SENSOR FOR SHAPE MEASUREMENT INSIDE
OF CUTTING LATHES .................................................................................................................. 46
Hao Zhang, Robert Kuschmierz, Jürgen Czarske

DEVELOPMENT OF INCLINED PLANETARY MILLING MACHINE WITH AUTOMATIC
TOOL AXIS INCLINATION INSTRUMENT .................................................................................. 50
Kazoru Fukushima, Hidetake Tanaka

TOOL-BASED INVERSE DETERMINATION OF MATERIAL MODEL OF DIRECT AGED
ALLOY 718 FOR FEM CUTTING SIMULATION .............................................................................. 54
F. Klocke, B. Döbbeler, B. Peng, S. A. M. Schneider

HIGH SPEED TURNING OF Ti6Al4V ALLOY IN MICRO CUTTING CONDITIONS .................. 58
K. Aslantas, A. Çiçek

DRY AND SEMI-DRY TURNING OF TITANIUM METAL MATRIX COMPOSITES (Ti-MMCS) .......... 62
Seyed Ali Niknam, Jules Kouam, Victor Songmene, Marek Balazinski

INFLUENCE OF COOLING NOZZLE ORIENTATION ON THE MACHINABILITY OF TiAl6V4
AND 42CrMo4+QT IN ROUGH MILLING ...................................................................................... 66
F. Klocke, B. Döbbeler, T. Lakner

THE EFFECTS OF COOLING/LUBRICATION TECHNIQUES ON CUTTING PERFORMANCE
IN MICRO-MILLING OF INCONEL 718 SUPERALLOY ................................................................. 70
K. Aslantas, A. Çiçek

HIGH-PRESSURE COOLING IN TURNING OF INCONEL 625 WITH CERAMIC CUTTING
TOOLS ......................................................................................................................................... 74
Knut Sørby, Zydrunas Vagnorius

TRANSIENT SIMULATION OF COOLING-LUBRICANT FLOW FOR DEEP-HOLE DRILLING-
PROCESSES ............................................................................................................................. 78
Dirk Schnabel, Ekrem Özkaya, Dirk Biermann, Peter Eberhard

QUANTIFICATION OF UNCERTAINTY IN MACHINING OPERATIONS BASED ON
PROBABILISTIC AND ROBUST APPROACHES ......................................................................... 82
David Hajdu, Tamas Insperger, Gabor Stepan

EXPERIMENTAL ANALYSIS OF CUTTING FORCE REDUCTION DURING ULTRASONIC
ASSISTED TURNING OF Ti6Al4V ................................................................................................. 86
Iñigo Llanos, Angela Campa, Ariane Iturbe, Pedro J. Arrazola, Oier Zelaieta

PROBABILISTIC PREDICTION OF CUTTING AND PLOUGHING FORCES USING
EXTENDED KIENZLE FORCE MODEL IN ORTHOGONAL TURNING PROCESS ......................... 90
M. Salehi, T. L. Schmitz, R. Copenhaver, R. Haas, J. Ovtcharova

CUTTING FORCE AND VIBRATION ASSISTED HARD MACHINING OF AISI 52100 STEEL

COOLING...

SPINDLES

AUTOMATED MICROFLUIDIC BALANCING SYSTEM FOR HIGH SPEED AIR-BEARING INVESTIGATING HIGH PRODUCTIVITY CONDITIONS FOR TURN-MILLING IN EFFECTS OF PROCESS PARAMETERS DURING TURN-MILLING OF MICROSTRUCTURED STUDY ON CUTTING MARKS BY TURN MILL PROCESS

SURGICAL DIAMOND WHEELS FOR MINIMALLY INVASIVE SURGERY IN BONE

THE INFLUENCE OF ABRASIVE GRIT MORPHOLOGY ON WHEEL TOPOGRAPHY AND CUTTING PROCESS MONITORING WITH AN INSTRUMENTED BORING BAR MEASURING

MILLING OF DUCTILE SPHEROIDAL CAST IRON COMPONENTS FOR WIND INDUSTRY QUANTITY NANOLUBRICANT

MACHINING NICKEL TITANIUM SHAPE MEMORY ALLOY ASTM F2063 UNDER MINIMUM

THE EFFECT OF CUTTING PARAMETERS ON CUTTING FORCE AND TOOL WEAR IN MACHINING NICKEL TITANIUM SHAPE MEMORY ALLOY ASTM F2063 UNDER MINIMUM

RESIDUAL STRESSES AND CUTTING FORCES IN CRYOGENIC MILLING OF INCONEL 718

Gleitron De Paula Oliveira, Maria Cindra Fonseca, Anna Carla Araujo

HYBRID COOLING AND LUBRICATING TECHNOLOGY FOR CNC MILLING OF INCONEL 718 NICKEL ALLOY

Alborz Shokrani, Stephen T Newman

HYBRID SUPPLY SYSTEM FOR CONVENTIONAL AND CO2/MQL-BASED CRYOGENIC COOLING...

An experimental study of the white layer formation during cryogenic assisted hard machining of AISI 52100 steel

Guang-Chao Nie, Xiao-Ming Zhang, Dong Zhang, Han Ding

THE EFFECT OF CUTTING PARAMETERS ON CUTTING FORCE AND TOOL WEAR IN MACHINING NICKEL TITANIUM SHAPE MEMORY ALLOY ASTM F2063 UNDER MINIMUM QUANTITY NANOLUBRICANT

Ahmad Nabil Mohd Khalil, Azwan Iskandar Azmi, Muhamad Nasir Murad, Mohd Asyraf Mahboob Ali

A MECHANISTIC MODEL FOR THE PREDICTION OF CUTTING FORCES IN THE FACE-MILLING OF DUCTILE SPHEROIDAL CAST IRON COMPONENTS FOR WIND INDUSTRY APPLICATION

Alessandro Checchi, Giuliano Bissacco, Hans Nargzaad Hansen

CUTTING PROCESS MONITORING WITH AN INSTRUMENTED BORING BAR MEASURING

Dan Östling, Tormod Jensen, Mathias Tjomsland, Oddvar Standal, Terje Mugaas

THE INFLUENCE OF ABRASIVE GRIT MORPHOLOGY ON WHEEL TOPOGRAPHY AND GRINDING PERFORMANCE

Jack Palmer, David Curtis, Donka Novovic, Hassan Ghadheigi

SURGICAL DIAMOND WHEELS FOR MINIMALLY INVASIVE SURGERY IN BONE RESECTION UNDER SALINE SUPPLY

Takeru Mizutani, Toshiyuki Enomoto, Urara Satake

A NOVEL APPROACH TO ROUNDNESS GENERATION ANALYSIS IN CENTERLESS THROUGH-FEED GRINDING IN CONSIDER OF DECISIVE PARAMETERS OF GRINDING GAP BY USE OF 3D KINEMATIC SIMULATION

Mehsen Hassanzadeh Otaghvar, Bernhard Hahn, Harald Werner, Hesam Omiditabrizi, Dirk Bährke

STUDY ON CUTTING MARKS BY TURN MILL PROCESS

Shunya Kaibu, Atsushi Ikeda, Yukitoshi Ihara

EFFECTS OF PROCESS PARAMETERS DURING TURN-MILLING OF MICROSTRUCTURED SURFACES ON THE COEFFICIENT OF STATIC FRICTION

R. Funke, A. Schubert

INVESTIGATING HIGH PRODUCTIVITY CONDITIONS FOR TURN-MILLING IN COMPARISON TO CONVENTIONAL TURNING

Kaveh Rahimzadeh Berenji, Mehmet Emre Kara, Erhan Budak

AUTOMATED MICROFLUIDIC BALANCING SYSTEM FOR HIGH SPEED AIR-BEARING SPINDLES

FEM-BASED OPTIMIZATION OF MACHINING OPERATIONS OF AEROSPACE PARTS MADE OF INCONEL 718 SUPERALLOY .......................................................... 570
Piotr Nieslony, Wit Grzesik, Krzysztof Jarosz, Piotr Laskowski

CUTTING FORCE AND FINISH SURFACE SIMULATION OF END MILLING OPERATION IN CONSIDERATION OF STATIC TOOL DEFLECTION BY USING VOXEL MODEL ......................................................................................................................... 574
Isamu Nishida, Ryuma Okumura, Ryuta Sato, Keiichi Shirase

REDUCING MACHINING TIME BY PRE-PROCESS CONTROL OF SPINDLE SPEED AND FEED-RATE IN MILLING STRATEGIES ........................................................................... 578
Petr Vavruska, Pavel Zeman, Michal Stejskal

SCULPTURED SURFACES SUBDIVISION FROM 3D CLOUD OF POINTS AND ASSOCIATION OF OPTIMUM BALL CUTTERS ......................................................................................................................... 582
Mohamed Bey, Krivo Azouaoui, Mohamed Boutassouma

TECHNOLOGICAL AND ECONOMICAL ASSESSMENT OF ALTERNATIVE PROCESS CHAINS FOR TURBOCHARGER IMPELLER MANUFACTURE .......................................................... 586
A. Klink, M. Hlavac, T. Herrig, M. Holsten

FLUSHING VELOCITY OBSERVATIONS AND ANALYSIS DURING EDM DRILLING ......................................................................................................................... 590
M. Klues, C. Baumgart, H. Bütter, K. Wegener

MODEL-BASED PRODUCTIVITY ANALYSIS OF WIRE EDM FOR THE MANUFACTURING OF TITANIUM ......................................................................................................................... 594
F. Klocke, L. Welschhof, T. Herrig, A. Klink

SPECIFIC CARBIDE SUBSTRATE DESIGN TO ENHANCE TOOL PERFORMANCE IN MACHINING OF Ti5553 ......................................................................................................................... 598
M. Ibrahim Sadik, Martina Lattmann, José Garcia

INCREASED PERFORMANCE IN HIGH SPEED TURNING OF INCONEL 718 BY LASER STRUCTURING OF PCBN TOOLS ......................................................................................................................... 602
Berend Denkena, Thilo Grove, Alexander Krüdel, Lars Ellersiek

TOOL WEAR MECHANISMS OF PCBN TOOLING DURING HIGH-SPEED MACHINING OF GRAY CAST IRON ......................................................................................................................... 606
Fredrik Schultheiss, Volodymyr Bushlya, Filip Lenrick, Daniel Johansson, S. Kristiansson, Jan-Eric Ståhl

OPTIMIZING CUTTING PARAMETERS FOR CUTTING POWER AND ROUGHNESS IN VAT 32* TURNING WITH AN EXPERIMENTAL Al2O3-MGO CERAMIC TOOL USING TAGUCHI’S METHOD ......................................................................................................................... 610
Marcel Y Kondo, Cleverson Pinheiro, José V C Souta, Marcos V Ribeiro, Manoel C S Alves

DYNAMIC MODELING OF MACHINE TOOL SPINDLE BEARING SYSTEM AND MODEL BASED DIAGNOSIS OF BEARING FAULT CAUSED BY COLLISION ......................................................................................................................... 614
Songtao Xi, Hongrui Cao, Xuefeng Chen, Linkai Niu
REAL TIME TEMPERATURE MEASUREMENT WITH EMBEDDED THIN-FILM THERMOCOUPLES IN MILLING ......................................................................................................................................................................................... 618

Sinan Kesriklioglu, Frank E. Pfefferkorn

INFLUENCE OF BEARING KINEMATICS HYPOTHESES ON BALL BEARING HEAT GENERATION ......................................................................................................................................................................................... 622

Clément Rabréau, Josef Kekula, Mathieu Ritou, Matej Sulitka, J. Shim, S. Loch, Benoit Furet

TOOL WEAR ANALYSIS OF MICRO END MILLS - UNCOATED AND PVD COATED TIALN & ALTIN IN HIGH SPEED MICRO MILLING OF TITANIUM ALLOY - TI-0.3MO-0.8NI ......................................................................................................................................................................................... 626

Chakradhar Bandapalli, Bharatkumar Mohanbhai Sutaria, Dhananjay Vishnu Prasad Bhatt, Kundan Kumar Singh

SUITABILITY OF THE FULL BODY CERAMIC END MILLING TOOLS FOR HIGH SPEED MACHINING OF NICKEL BASED ALLOY INCONEL 718 ......................................................................................................................................................................................... 630

Damir Grguraš, Matjaž Kern, Franci Pušavec

STUDY OF THE PERFORMANCE OF PCBN AND CARBIDE TOOLS IN FINISHING MACHINING OF INCONEL 718 WITH CUTTING FLUID AT CONVENTIONAL PRESSURES ......................................................................................................................................................................................... 634

Víctor Criado, José Díaz-alvarez, José Luis Cantero, María Henar Miguélez

TOOL PERFORMANCE ASSESSMENT BASED ON THREE-DIMENSIONAL TOOL WEAR RATE ......................................................................................................................................................................................... 638

Fernando Luiz Castro, Denis Boing, Rolf Bertrand Schroeter

THE APPLICATION OF WIRE ELECTRICAL DISCHARGE MACHINING (WEDM) IN THE PROTOTYPING OF MINIATURE BRASS GEARS ......................................................................................................................................................................................... 642

LIMITS OF DIE-SINKING EDM FOR MICRO STRUCTURING IN W300 STEEL WITH PURE COPPER ELECTRODES ......................................................................................................................................................................................... 646

H. Büttner, R. Roth, K. Wegener

INVESTIGATION ON WIRE-EDM FINISHING OF TITANIUM NITRIDE DOPED SILICON NITRIDE IN CH-BASED DIELECTRICS ......................................................................................................................................................................................... 650

FABRICATION OF A BALL END NOSE MICRO MILLING TOOL BY TANGENTIAL LASER ABLATION ......................................................................................................................................................................................... 654

M. Hajri, J. Pfaff, H. Büttner, M. Voegtlin, M. Kaufmann, K Wegener

INFLUENCE OF CUTTING EDGE RADIUS ON SMALL SCALE MATERIAL REMOVAL AT ULTRA-PRECISE LEVEL ......................................................................................................................................................................................... 658

M. Azizur Rahman, Mustafizur Rahman, A. Senthil Kumar

INFLUENCE OF CUTTING EDGE MICRO-GEOMETRY IN MICRO-MILLING OF COPPER ALLOYS WITH REDUCED LEAD CONTENT ......................................................................................................................................................................................... 662

E. Uhlmann, Y. Kuche, J. Polte, M. Polte

PRECISION TURNING WITH INSTRUMENTED VIBRATION-DAMPED BORING BARS ......................................................................................................................................................................................... 666

Knut Sørby, Dan Østling

DYNAMIC SUBSTRUCTURING OF MACHINE TOOLS CONSIDERING LOCAL DAMPING MODELS ......................................................................................................................................................................................... 670

Thomas Semm, Maximilian F. Spannagl, Michael F. Zaehe

HARDWARE-IN-THE-LOOP EXPERIMENT OF TURNING ......................................................................................................................................................................................... 675

Ákos Miklós, Dániel Bachrathy, Richard Wohlfart, Dénes Tukacs, G. Porempovics, A. Toth, Gábor Stépán
