Session 1: Performance Evaluation

Evaluating Rare Events in Mission Critical Dispatching Systems 1
Esa Hyytiä (University of Iceland) and Rhonda Righter (University of California Berkeley)

Statistical Delay Bounds for Automatic Repeat Request Protocols with Pipelining 10
Mark Akselrod (Leibniz Universität Hannover) and Markus Fidler
(Leibniz Universität Hannover)

Whittle Index Approach to Energy-Aware Dispatching 19
Samuli Aalto (Aalto University, Finland) and Pasi Lassila (Aalto University, Finland)

On Occupancy Based Randomized Routing Schemes in Large Systems of Shared Servers 28
Thirupathaiah Vasantam (University of Waterloo) and Ravi R. Mazumdar
(University of Waterloo)

Session 2: Mobile Edge Computing

Online Algorithms for Cost-Effective Cloud Selection with Multiple Demands 37
Youngmi Jin (KDDI Research, Inc.), Michiaki Hayashi (KDDI Research, Inc.), and Atsushi Tagami (KDDI Research, Inc.)

Application-Agnostic Offloading of Datagram Processing 46
Oliver Hohlfeld (RWTH Aachen University), Helge Reelfs (RWTH Aachen University), Jan Rüth (RWTH Aachen University), Florian Schmidt (NEC Laboratories Europe), Torsten Zimmermann (RWTH Aachen University), Jens Hiller (RWTH Aachen University), and Klaus Wehrle (RWTH Aachen University)

A Popularity-Based Approach for Effective Cloud Offload in Fog Deployments 55
Marcel Enguehard (Cisco Systems & Telecom ParisTech), Giovanna Carofiglio (Cisco Systems), and Dario Rossi (Telecom ParisTech)
Session 3.1: PhD Workshop

Optimal Fairness and Quality in Video Streaming with Multiple Users ................................................................. 73
Christian Moldovan (University Duisburg-Essen), Lea Skorin-Kapov (University of Zagreb), Poul E. Heegaard (Norwegian University of Science and Technology), and Tobias Hoßfeld (University of Würzburg)

Performance Evaluation of Container Based Virtualization on Embedded Microprocessors .......................... 79
Vivian Noronha (TU Chemnitz), Ekkehard Lang (Nokia Bell Labs), Maximilian Riegel (Nokia Bell Labs), and Thomas Bauschert (TU Chemnitz)

Session 3.2: Madness Session

WhatsAnalyzer: A Tool for Collecting and Analyzing WhatsApp Mobile Messaging Communication Data ........................................................................................................................................... 85
Anika Schwind (University of Würzburg) and Michael Seufert (AIT Austrian Institute of Technology)

Effects of Adaptive Streaming Optimizations on the Perception of 360° Virtual Reality Video ......................................................... 89
Joris Heyse (Ghent University), Maria Torres Vega (Ghent University), Tim Wauters (Ghent University), Femke De Backere (Ghent University), and Filip De Turck (Ghent University)

Exploring the Transmission Behaviour of Overwatch: The Source of Lag ...................................................... 93
Florian Metzger (University of Würzburg) and Roman Heger (University of Duisburg-Essen)

Deriving YouTube Playout Phases from Encrypted Packet Level Traffic ...................................................... 97
Stefan Geissler (University of Würzburg), Stanislav Lange (University of Würzburg), Florian Wamsler (University of Würzburg), and Tobias Hoßfeld (University of Würzburg)

Zhenmin Li (Hefei University of Technology), Renshi Fan (Hefei University of Technology), Gaoming Du (Hefei University of Technology), Yifan Cao (Hefei University of Technology), Zhonghai Lu (KTH Royal Institute of Technology), and Minglun Gao (Hefei University of Technology)
Session 4: Vision Day

Session 5: Young Researchers Session

Online Resource Allocation in Dynamic Optical Networks .................................................... Ronald Romero Reyes (Technische Universität Chemnitz) and Thomas Bauschert (Technische Universität Chemnitz)

Optimization of Controller Placement and Information Flow in Softwarized Networks ............. Stanislav Lange (University of Würzburg)

Synopsis of the PhD Thesis - Network Computations in Artificial Intelligence ....................... Decebal Constantin Mocanu (Eindhoven University of Technology)

Cognitive Real-Time QoE Management in Video Streaming Services ..................................... Maria Torres Vega (Ghent University) and Antonio Liotta (University of Derby)

From Self-Sustainable Green Mobile Networks to Enhanced Interaction with the Smart Grid ...... Daniela Renga (Politecnico di Torino, Italy) and Michela Meo (Politecnico di Torino, Italy)

Session 6: Wireless and Cellular Networks

Performance Evaluation of Scheduling Schemes for D2D Communications .......................... Antonia Maria Masucci (Orange Labs), Philippe Olivier (Orange Labs), and Alain Simonian (Orange Labs)

Can Decentralized Status Update Achieve Universally Near-Optimal Age-of-Information in Wireless Multiaccess Channels? .............................................................. Zhiyuan Jiang (Tsinghua University), Bhaskar Krishnamachari (University of Southern California), Sheng Zhou (Tsinghua University), and Zhisheng Niu (Tsinghua University)

Driven by Capacity or Blockage? A Millimeter Wave Blockage Analysis .............................. Ish Kumar Jain (New York University), Rajeev Kumar (New York University), and Shiendra Panwar (New York University)

Enabling a Win-Win Coexistence Mechanism for WiFi and LTE in Unlicensed Bands ........... Fabrizio Giuliano (Università di Palermo), Ilenia Tinnirello (Università di Palermo), and Domenico Garlisi (Università di Palermo)

Session 7: Network Measurements

Can WebRTC QoS Work? A DSCP Measurement Study ....................................................... Runa Barik (University of Oslo, Norway), Michael Welzl (University of Oslo, Norway), Ahmed Mustafa Elmokashfi (Simula Research Laboratory, Norway), Thomas Dreibholz (Simula Research Laboratory, Norway), and Stein Gjessing (University of Oslo, Norway)

LENTA: Longitudinal Exploration for Network Traffic Analysis .......................................... Andrea Morichetta (Politecnico di Torino) and Marco Mellia (Politecnico di Torino)
Session 8: Network Architectures and Paradigms

A Semi-Virtualized Testbed Cluster with a Centralized Server for Networking Education

Mark Schmidt (University of Tuebingen), Andreas Stovkmayer (University of Tuebingen), Florian Heimgaertner (University of Tuebingen), and Michael Menth (University of Tuebingen)

Performance Implications of Packet Filtering with Linux eBPF

Dominik Scholz (Technical University of Munich), Daniel Raumer (Technical University of Munich), Paul Emmerich (Technical University of Munich), Alexander Kurtz (Technical University of Munich), Krzysztof Lesiak (Technical University of Munich), and Georg Carle (Technical University of Munich)

Impact of TCP BBR on CUBIC Traffic: A Mixed Workload Evaluation

Per Hurtig (Karlstad University), Habtegebreil Haile (Karlstad University), Karl-Johan Grinnemo (Karlstad University), Anna Brunstrom (Karlstad University), Eneko Atxutegi (University of the Basque Country), Fidel Liberal (University of the Basque Country), and Åke Arvidsson (Kristianstad University)

Performance Evaluation of Service Functions Chain Placement Algorithms in Edge Cloud

Lam Dinh-Xuan (University of Wuerzburg, Germany), Michael Seufert (University of Wuerzburg, Germany), Florian Wamser (University of Wuerzburg, Germany), Phuoc Tran-Gia (University of Wuerzburg, Germany), Constantinos Vassilakis (Ubitech Ltd, Greece), and Anastasios Zafeiropoulos (Ubitech Ltd, Greece)

Session 9: Application Scenarios and Farewell Session

Improving Mobile Video Quality Through Predictive Channel Quality Based Buffering

Jan Willem Kleinrouweler (Centrum Wiskunde & Informatica), Britta Meixner (Centrum Wiskunde & Informatica, Tiledmedia), Joost Bosman (Centrum Wiskunde & Informatica), Hans van den Berg (TNO, University of Twente, Centrum Wiskunde & Informatica), Rob van der Mei (Centrum Wiskunde & Informatica, VU University Amsterdam), and Pablo Cesar (Centrum Wiskunde & Informatica, Delft University of Technology)

Network-Level Cooperation in Random Access IoT Networks with Aggregators

Nikolaos Pappas (Linköping University), Ioannis Dimitriou (University of Patras), and Zheng Chen (Linköping University)
Welcome Message from NetCal 2018 Co-Chairs v
NetCal 2018 Workshop Committee vi
NetCal 2018 Schedule vii
NetCal 2018 Sponsors viii

International Workshop on Network Calculus and Applications (NetCal 2018)

Session I: Applications

Latency and Backlog Bounds in Time-Sensitive Networking with Credit Based Shapers and Asynchronous Traffic Shaping 1
Ehsan Mohammadpour (École Polytechnique Fédérale de Lausanne, Switzerland), Eleni Stai (École Polytechnique Fédérale de Lausanne, Switzerland), Maaz Mohiuddin (École Polytechnique Fédérale de Lausanne, Switzerland), and Jean-Yves Le Boudec (École Polytechnique Fédérale de Lausanne, Switzerland)

Multi-interface Communication: Interface Selection Under Statistical Performance Constraints 7
Sounak Kar (Technische Universität Darmstadt), Amr Rizk (Technische Universität Darmstadt), and Markus Fidler (Leibniz Universität Hannover)

Energy Management in Wireless Communications with Energy Storage Imperfections 13
Sami Akin (Leibniz Universität Hannover)

Stochastic Guarantees for Rate-Adaptive Streaming 19
Mark Akselrod (Leibniz Universität Hannover, Institute of Communications Technology), Markus Fidler (Leibniz Universität Hannover, Institute of Communications Technology), and Ralf Lübben (Robert Bosch GmbH)

Session II: Service and Arrival Characterizations

A Fluid-Flow Interpretation of SCED Scheduling 25
Jörg Liebeherr (University of Toronto)
A General Per-Flow Service Curve for GPS .......................... Almut Burchard (University of Toronto) and Jörg Liebeherr (University of Toronto)

Integrating Fractional Brownian Motion Arrivals into the Statistical Network Calculus .................. Paul Nikolaus (TU Kaiserslautern, Germany), Sebastian Henningsen (Humboldt-Universität zu Berlin, Germany), Michael Beck (University of Manitoba, Canada), and Jens Schmitt (TU Kaiserslautern, Germany)

Session III: Analysis Techniques

The Case for a Network Calculus Heuristic: Using Insights from Data for Tighter Bounds .......................... Fabien Geyer (Technical University of Munich) and Georg Carle (Technical University of Munich)

Of Kernels and Queues: When Network Calculus Meets Analytic Combinatorics .................. Anne Bouillard (Nokia Bell Labs France), Céline Comte (Nokia Bell Labs France), Élie de Panafieu (Nokia Bell Labs France), and Fabien Mathieu (Nokia Bell Labs France)

Network Calculus for Mean Delay Analysis Through a Network .......................................................... Fabrice Guillemin (Orange Labs), Ravi Mazumdar (University of Waterloo), Catherine Rosenberg (University of Waterloo), and Yu Ying (VMware Inc.)

Author Index - Volume 2
