2018 44th Euromicro Conference on Software Engineering and Advanced Applications (SEAA 2018)

Prague, Czech Republic
29-31 August 2018
Table of Contents

Message from the General Chair  xv.................................................................
Message from the Program Chairs  xvi.............................................................
SEAA 2018 Committees  xviii...........................................................................
SEAA 2018 Program Committee  xix.................................................................
Additional Reviewers  xxx................................................................................

SPPI: Software Process and Product Improvement

SPPI 1: Model-Driven and Agile Software Engineering

Exploiting ALM and MDE for Supporting Questionnaire-Based Gap Analysis Processes  1..................
  Vincenzo De Simone (University of Naples Federico II), Domenico Amalfitano (University of Naples Federico II), and Anna Rita Fasolino (University of Naples Federico II)

Ontology-Supported Design Parameter Management for Change Impact Analysis  9..................
  Jan Novacek (FZI Forschungszentrum Informatik), Ali Ahari (FZI Forschungszentrum Informatik), Alessandro Cornaglia (FZI Forschungszentrum Informatik), Frederik Haxel (FZI Forschungszentrum Informatik), Alexander Viehl (FZI Forschungszentrum Informatik), Oliver Bringmann (Universität Tübingen), and Wolfgang Rosenstiel (Universität Tübingen)

Singing the Praise of Empowerment: Or Paying the Cost of Chaos  17..........................
  Helena Holmström Olsson (Malmö University) and Jan Bosch (Chalmers University of Technology)

Sustaining Agile Beyond Adoption  22..................................................................
  Leonor Barroca (The Open University), Peggy Gregory (University of Central Lancashire), Kati Kuusinen (University of Southern Denmark), Helen Sharp (The Open University), and Raid AlQaisi (University of Central Lancashire)
SPPI 2: Quality Assurance

Influence of Structured Information in Bug Report Descriptions on IR-Based Bug Localization  26
Michael Rath (Technische Universität Ilmenau) and Patrick Müder (Technische Universität Ilmenau)

Challenges Concerning Test Case Specifications in Automotive Software Testing  33
Katharina Juhnke (Daimler AG), Matthias Tichy (Ulm University), and Frank Houdek (Daimler AG)

Re-visiting a Test Taxonomy with Refactoring and Defect-fix Data  41
Steve Counsell (Brunel University), Stephen Swift (Brunel University), Roberto Tonelli (University of Cagliari), Michele Marchesi (University of Cagliari), and Michael Felderer (University of Innsbruck)

Enabling Compliance Checking Against Safety Standards from SPEM 2.0 Process Models  45
Julieth Patricia Castellanos Ardila (Mälardalen University), Barbara Gallina (Mälardalen University), and Faiz Ul Muram (Mälardalen University)

SPPI 3: Case Studies and Experimentation

Software Engineering Challenges of Deep Learning  50
Anders Arpteg (Peltarion AB), Björn Brinne (Peltarion AB), Luka Crnkovic-Friis (Peltarion AB), and Jan Bosch (Chalmers University of Technology)

A Large Agile Organization on Its Journey Towards DevOps  60
Kati Kuusinen (University of Southern Denmark), Veena Balakumar (University of Southern Denmark), Simon Hjortshøj Larsen (University of Southern Denmark), Thomas August Lemqvist (University of Southern Denmark), Admir Muric (University of Southern Denmark), Anna Ølgaard Nielsen (University of Southern Denmark), and Oliver Vestergaard (University of Southern Denmark)

Effective Online Controlled Experiment Analysis at Large Scale  64
Aleksander Fabijan (Malmö University), Pavel Dmitriev (Microsoft), Helena Holmström Olsson (Malmö University), and Jan Bosch (Chalmers University of Technology)

Online Controlled Experimentation at Scale: An Empirical Survey on the Current State of A/B Testing  68
Aleksander Fabijan (Malmö University), Pavel Dmitriev (Microsoft), Helena Holmström Olsson (Malmö University), and Jan Bosch (Chalmers University of Technology)

CPS: Cyber – Physical Systems

Monitoring CPS at Runtime - A Case Study in the UAV Domain  73
Michael Vierhauser (University of Notre Dame), Jane Cleland-Huang (University of Notre Dame), Sean Bayley (University of Notre Dame), Thomas Krismayer (CDL MEVSS, Johannes Kepler University), Rick Rabiser (CDL MEVSS, Johannes Kepler University), and Pau Grünbacher (CDL MEVSS, Johannes Kepler University)
Evidence-Based Verification of Safety Properties Concerning the Cooperation of Autonomous Agents. (81)

Marc Spislaender (Software Engineering, University of Erlangen-Nuremberg) and Francesca Saglietti (Software Engineering, University of Erlangen-Nuremberg)

Be Prepared: Learning Environment Profiles for Proactive Rule-Based Production Planning. (89)

Verena Klös (TU Berlin), Thomas Göthel (TU Berlin), and Sabine Glesner (TU Berlin)

Towards Co-simulation of Embedded Platforms and Physics-Based Models. (97)

Yon Vanommeslaeghe (Universiteit Antwerpen), Paul De Meulenaere (Universiteit Antwerpen), Joachim Denil (Universiteit Antwerpen), Francesco Cosco (Katholieke Universiteit Leuven), Bart Forrier (Katholieke Universiteit Leuven), and Jan Croes (Katholieke Universiteit Leuven)

ES-IoT: Embedded Systems and the Internet of Things

Allocation Optimization for Component-Based Embedded Systems with GPUs. (101)

Gabriel Campeanu (Mälardalen University), Jan Carlson (Mälardalen University), and Séverine Sentilles (Mälardalen University)

A Smart City Application Modeling Framework: A Case Study on Re-engineering a Smart Retail Platform. (111)

Paraskevi Smiari (Department of Informatics and Telecommunications Engineering, University of Western Macedonia,) and Stamatia Bibi (Department of Informatics and Telecommunications Engineering University of Western Macedonia,)

NUMA Awareness: Improving Thread and Memory Management. (119)

Maria Patrou (University of New Brunswick), Kenneth B. Kent (University of New Brunswick), Gerhard W. Dueck (University of New Brunswick), Charlie Gracie (IBM Canada), and Aleksandar Micic (IBM Canada)

Security and Privacy Concerns in Connected Cars: A Systematic Mapping Study. (124)

Prabhat Ram (University of Oulu), Jouni Markkula (University of Oulu), Ville Friman (University of Oulu), and Arian Raz (University of Oulu)

Towards Modeling Patterns for Embedded Software Industry: Feedback from the Field. (132)

Deniz Akdur (Aselsan Inc.), Onur Demirörs (İzmir Institute of Technology), and Bilge Say (Atilim University)

DSLMBD: Domain Specific Languages and Model-Based Development

Best Practices for Domain-Specific Modeling, A Systematic Mapping Study. (137)

Gerald Czech (Software Competence Center Hagenberg), Michael Moser (Software Competence Center Hagenberg), and Josef Pichler (Software Competence Center Hagenberg)
SM: Software Management: Measurement, Peopleware and Innovation

SM1: Source Code Analysis

Fault-Prone Java Method Analysis Focusing on Pair of Local Variables with Confusing Names .154
Keiichiro Tashima (Ehime University, Japan), Hirohisa Aman (Ehime University, Japan), Sousuke Amasaki (Okayama Prefectural University, Japan), Tomoyuki Yokogawa (Okayama Prefectural University, Japan), and Minoru Kawahara (Ehime University, Japan)

Impact of Design Pattern Implementation Variants on the Retrieval Effectiveness of a Recovery Tool: An Exploratory Study .159
Andrea De Lucia (Università di Salerno, Italy), Vincenzo Deufemia (Università di Salerno, Italy), Carmine Gravino (Università di Salerno, Italy), and Michele Risi (Università di Salerno, Italy)

Exploring the Use of Rapid Type Analysis for Detecting the Dead Method Smell in Java Code .167
Simone Romano (University of Basilicata) and Giuseppe Scanniello (University of Basilicata)

SM2: Management and Design

The Effects of Vectorization Methods on Non-Functional Requirements Classification .175
Sousuke Amasaki (Okayama Prefectural University) and Pattara Leelaprute (Kasetsart University)

Realising Individual and Team Capability in Agile Software Development: A Qualitative Investigation .183
Emilia Mendes (BTH and University of Oulu), Davi Viana (Federal University of Maranhão), Sai Datta Vishnubhotla (BTH), and Lars Lundberg (BTH)

Exploring Reuse Levels in ERP Projects in Search of an Effort Estimation Approach .191
Onur Demirörs (Izmir Institute of Technology) and Neslihan Küçükate Ömürül (Middle East Technical University)

Component Selection in Software Engineering - Which Attributes are the Most Important in the Decision Process? .198
Panagiota Chatzipetrou (Blekinge Institute of Technology), Emil Alégroth (Blekinge Institute of Technology), Efş Papatheocharous (RISE SICS AB), Markus Borg (RISE SICS AB), Tony Gorschek (Blekinge Institute of Technology), and Krzysztof Wnuk (Blekinge Institute of Technology)
SM3: Software Teams and Innovation

Anchor videos as a Means to Engage with Software and Technology Innovations in Large Organizations 206
Verena Pohl (Fraunhofer Institute for Industrial Engineering IAO), Harriet Kasper (Fraunhofer Institute for Industrial Engineering IAO), Monika Kochanowski (Fraunhofer Institute for Industrial Engineering IAO), and Tobias Krause (Fraunhofer Institute for Industrial Engineering IAO)

Using Self-Healing to Increase Robustness of Handling In-Browser Third-Party Content 210
Sara Nadi (Chalmers University of Technology), Jimmy Hedström (Chalmers), and Miroslaw Staron (Chalmers | University of Gothenburg)

Linking Personality Traits and Interpersonal Skills to Gamification Awards 214
Maria Papoutoglou (Aristotle University of Thessaloniki), Georgia M. Kapitsaki (University of Cyprus), and Nikolaos Mittas (Eastern Macedonia & Thrace Institute of Technology)

DKD Onto: An Ontology to Support Software Development with Distributed Teams 222
Rodrigo G. C. Rocha (Federal Rural University of Pernambuco, Garanhuns, Brazil), Arthur Araujo (Federal Rural University of Pernambuco, Garanhuns, Brazil), Diogo Cordeiro (Federal Rural University of Pernambuco, Garanhuns, Brazil), Ryan R. Azevedo (Federal Rural University of Pernambuco, Garanhuns, Brazil), and Daliton da Silva (Federal Rural University of Pernambuco, Garanhuns, Brazil)

Are We Excellent Yet? Perceptions of Software 'Test Centre of Excellence' Within a Financial Institution 226
Michal Doležel (University of Economics, Prague) and Jana Kroppová (University of Economics, Prague)

EsPreSSE: Estimation and Prediction in Software and Systems Engineering

Jernej Flisar (University of Maribor, FERI) and Vili Podgorelec (University of Maribor, FERI)

Structural Quality Metrics as Indicators of the Long Method Bad Smell: An Empirical Study 234
Sofia Charalampidou (University of Groningen), Elvira-Maria Arvanitou (University of Macedonia), Apostolos Ampatzoglou (University of Macedonia), Paris Avgieriou (University of Groningen), Alexander Chatzigeorgiou (University of Macedonia), and Ioannis Stamelos (Aristotle University of Thessaloniki)

Code Cleaning for Software Defect Prediction: A Cautionary Tale 239
Thomas Shippey (University of Hertfordshire), David Bowes (University of Hertfordshire), Steve Counsell (Brunel University), and Tracy Hall (Brunel University)

An Exploratory Study of Search Based Training Data Selection for Cross Project Defect Prediction 244
Seyedrebvar Hosseini (University of Oulu) and Burak Turhan (Brunel University)
A-BPM: Advancing Business Process Management

Categories of Change Triggers in Business Processes 252
Angelika Kaplan (Karlsruhe Institute of Technology), Kiana Busch (Karlsruhe Institute of Technology), Anne Koziol (Karlsruhe Institute of Technology), and Robert Heinrich (Karlsruhe Institute of Technology)

Advanced Queueing Models for Quantitative Business Process Analysis 260
Remco Dijkman (Eindhoven University of Technology), Ivo Adan (Eindhoven University of Technology), and Sander Peters (Eindhoven University of Technology)

Considering Non-sequential Control Flows for Process Prediction with Recurrent Neural Networks 268
Andreas Metzger (paluno, University of Duisburg-Essen) and Adrian Neubauer (paluno, University of Duisburg-Essen)

Integrating Requirements and Business Process Models in BPM Projects 273
Carina Alves (Universidade Federal de Pernambuco), George Valença (Universidade Federal Rural de Pernambuco), and Gloria Fraga (Tribunal de Contas de Pernambuco)

A Toolbox for the Development and Implementation of Value Based Care Pathways 281
Irene Vanderfeesten (Eindhoven University of Technology), Debora Katerberg (Eindhoven University of Technology), Oktay Türetken (Eindhoven University of Technology), and Ramon van de Ven (St. Anna Hospital)

MoLS: Monitoring Large-Scale Software Systems

Flexible System-Level Monitoring of Heterogeneous Big Data Streaming Systems 289
Holger Eichelberger (University of Hildesheim)

Incremental Verification of Complex Event Processing Applications for System Monitoring 293
Andreas Metzger (paluno, Univ. Duisburg-Essen), Christian Reinautz (paluno, Univ. Duisburg-Essen), and Klaus Pohl (paluno, Univ. Duisburg-Essen)

CVDCPS: Consistency in the View-based Development of Cyber-Physical Systems

An Empirical Study on the Current and Future Challenges of Automotive Software Release and Configuration Management 298
Houssem Guissouma (Institute for Information Processing Technologies, Karlsruhe Institute of Technology, Germany), Heiko Klare (Institute for Program Structures and Data Organization, Karlsruhe Institute of Technology, Germany), Eric Sax (Institute for Information Processing Technologies, Karlsruhe Institute of Technology, Germany), and Erik Burger (Institute for Program Structures and Data Organization, Karlsruhe Institute of Technology, Germany)
Role-Based Runtime Model Synchronization 306
Christopher Werner (Technische Universität Dresden), Hendrik Schön (Technische Universität Dresden), Thomas Kühn (Technische Universität Dresden), Sebastian Götz (Technische Universität Dresden), and Uwe Aßmann (Technische Universität Dresden)

A Knowledge-Based Decision Support System for Micro and Nano Manufacturing Process Chains 314
Tobias Müller (Karlsruhe Institute of Technology), Veit Hagenmeyer (Karlsruhe Institute of Technology), Andreas Schmidt (Karlsruhe Institute of Technology), Steffen Scholz (Karlsruhe Institute of Technology), and Ahmed Elkaseer (Karlsruhe Institute of Technology)

A Consistent View of the Smart Grid: Bridging the Gap between IEC CIM and IEC 61850 321
Artem Schumilin (Karlsruhe Institute of Technology), Clemens Duepmeier (Karlsruhe Institute of Technology), Karl-Uwe Stucky (Karlsruhe Institute of Technology), and Veit Hagenmeyer (Karlsruhe Institute of Technology)

A Methodology for Domain-Spanning Change Impact Analysis 326
Robert Heinrich (Karlsruhe Institute of Technology), Kiana Busch (Karlsruhe Institute of Technology), and Sandro Koch (Karlsruhe Institute of Technology)

Multi-level, Viewpoint-Oriented Engineering of Cyber-Physical Production Systems: An Approach Based on Industry 4.0, System Architecture and Semantic Web Standards 331
Udo Kannengiesser (eneon IT-solutions GmbH) and Harald Müller (Institute for Business Informatics – Communications Engineering, Johannes Kepler University, Linz, Austria)

EBEDE: Evidence Based and Experiment Driven Engineering

Current State of Research on Continuous Experimentation: A Systematic Mapping Study 335
Florian Auer (University of Innsbruck) and Michael Felderer (University of Innsbruck)

Continuous Experimentation in Mobile Game Development 345
Sezin Yaman (University of Helsinki, Finland), Tommi Mikkonen (University of Helsinki, Finland), and Riku Suomela (Next Games Ltd., Finland)

Continuous Experimentation Scenarios: A Case Study in e-Commerce 353
Rasmus Ros (Lund University, Sweden) and Elizabeth Bjarnason (Lund University, Sweden)

Objectives and Challenges of the Utilization of User-Interaction Data in Software Development 357
Sampo Suonsyrjä (Tampere University of Technology), Outi Sievi-Korte (Tampere University of Technology), Kari Systä (Tampere University of Technology), Terhi Kilamo (Tampere University of Technology), and Tommi Mikkonen (University of Helsinki)
SA+BDA: Software and Big Data Analytics

A Collection of Software Engineering Challenges for Big Data System Development .362
Oliver Hummel (Mannheim University of Applied Sciences), Holger Eichelberger (University of Hildesheim), Andreas Giloj (Fraunhofer IESE), Dominik Werle (Karlsruhe Institute of Technology), and Klaus Schmid (University of Hildesheim)

A Quality Model for Actionable Analytics in Rapid Software Development .370
Silverio Martínez-Fernández (Fraunhofer IESE), Andreas Jedlitschka (Fraunhofer IESE), Liliana Guzmán (Fraunhofer IESE), and Anna Maria Vollmer (Fraunhofer IESE)

A Large-Scale Study on Source Code Reviewer Recommendation .378
Jakub Lipcak (Masaryk University) and Bruno Rossi (Masaryk University)

CrossSim: Exploiting Mutual Relationships to Detect Similar OSS Projects .388
Phuong T. Nguyen (University of L'Aquila, Italy), Juri Di Rocco (University of L'Aquila, Italy), Riccardo Rubei (University of L'Aquila, Italy), and Davide Di Ruscio (University of L'Aquila, Italy)

An Automated Approach for Classifying Reverse-Engineered and Forward-Engineered UML Class Diagrams .396
Mohd Hafeez Osman (Technical University of Munich, Germany; University Putra Malaysia, Malaysia), Truong Ho-Quang (Chalmers & Gothenburg University of Technology, Sweden), and Michel Chaudron (Chalmers & Gothenburg University of Technology)

SEaTeD: Software Engineering and Technical Debt

SEaTeD1: Technical Debt in Architecture and Documentation

A Case Study of the Effects of Architecture Debt on Software Evolution Effort .400
Will Snipes (ABB Corporate Research), Sunil Karlekar (ABB GISPL), and Ran Mo (ABB Corporate Research)

Exploring the Relationship between Software Modularity and Technical Debt .404
Peggy Skiada (Aristotle University of Thessaloniki), Apostolos Ampatzoglou (Aristotle University of Thessaloniki), Elvira-Maria Arvanitou (University of Macedonia), Alexander Chatzigeorgiou (University of Macedonia), and Ioannis Stamatos (Aristotle University of Thessaloniki)

Towards an Architectural Debt Index .408
Riccardo Roveda (Allen Italia, Milano, Italy), Francesca Arcelli Fontana (Università degli studi di Milano – Bicocca), Ilaria Pigazzini (Università degli studi di Milano – Bicocca), and Marco Zanoni (Università degli studi di Milano – Bicocca)

An Architectural Smells Detection Tool for C and C++ Projects .417
Andrea Biaggi (Università degli Studi di Milano - Bicocca), Francesca Arcelli Fontana (Università degli Studi di Milano - Bicocca), and Riccardo Roveda (Università degli Studi di Milano - Bicocca)
Integrating Traceability Within the IDE to Prevent Requirements Documentation Debt  
Sofia Charalampidou (University of Groningen), Apostolos Ampatzoglou (University of Groningen), Alexander Chatzigeorgiou (University of Macedonia), and Nikolaos Tsiridis (Open Technology Services)

SEaTeD2: New Perspectives on Technical Debt

A Study of Factors that Lead Development Teams to Incur Technical Debt in Software Projects  
Nicolli Rios (Federal University of Bahia), Rodrigo Oliveira Spinola (Salvador University), Manoel G. de Mendonça Neto (Federal University of Bahia), and Carolyn Seaman (University of Maryland Baltimore County)

Identifying Technical Debt in Database Normalization Using Association Rule Mining  
Mashel Albarak (University of Birmingham), Muna Alrazgan (King Saud University), and Rami Bahsoon (University of Birmingham)

Challenges in Assessing Technical Debt Based on Dynamic Runtime Data  
Marcus Ciolkowski (QAware GmbH), Liliana Guzmán (Fraunhofer ISESE), Adam Trendowicz (Fraunhofer ISESE), and Anna Maria Vollmer (Fraunhofer ISESE)

SMSE: Systematic Literature Reviews and Mapping Studies in Software Engineering

SMSE1: Systematic Mappings

A Systematic Mapping of Software Engineering Approaches to Develop Big Data Systems  
Rodrigo Laigner (Pontifical Catholic University of Rio de Janeiro), Marcus Kalinowski (Pontifical Catholic University of Rio de Janeiro), Sérgio Lifschitz (Pontifical Catholic University of Rio de Janeiro), Rodrigo Salvador Monteiro (Fluminense Federal University), and Daniel de Oliveira (Fluminense Federal University)

A Systematic Mapping Study on Security in Agile Requirements Engineering  
Hugo Villamizar (Pontifical Catholic University of Rio de Janeiro), Marcos Kalinowski (Pontifical Catholic University of Rio de Janeiro), Marx Viana (Pontifical Catholic University of Rio de Janeiro), and Daniel Méndez Fernández (Technical University of Munich)

A Systematic Mapping Study on API Documentation Generation Approaches  
Kristian Nybom (Åbo Akademi University), Adnan Ashraf (Åbo Akademi University), and Ivan Porres (Åbo Akademi University)

Safety-Critical Systems and Agile Development: A Mapping Study  
Rashidah Kasauli (Chalmers \ University of Gothenburg and Makerere University), Eric Knauss (Chalmers \ University of Gothenburg), Benjamin Kanagwa (Makerere University), Agneta Nilsson (Chalmers \ University of Gothenburg), and Gul Calikli (Chalmers \ University of Gothenburg)
SMSE2: Surveys and Studies

Towards a Terminology Unification in Software Interoperability 478
Diana Maria Torres Ricaurte (Universidad Nacional de Colombia), Mónica
K. Villavicencio Cabezas (Escuela Superior Politécnica del Litoral,
ESPOL), and Carlos Mario Zapata Jaramillo (Universidad Nacional de
Colombia)

Smart Cities Evaluation – A Survey of Performance and Sustainability Indicators 486
Dessislava Petrova-Antonova (Sofia University "St. Kl. Ohridski") and
Sylvia Ilieva (Sofia University)

CBSMS: Cloud-Based Systems and Microservices

Hierarchical Multi-tenancy in Business to Business Software Services 494
Adeniyi Abdul (University of Salford) and Julian M. Bass (University
of Salford)

Performance and Energy-Based Cost Prediction of Virtual Machines Auto-Scaling in Clouds 502
Moahammad Aldossary (Prince Sattam Bin Abdulaziz University, KSA and
University of Leeds, Leeds, U.K.) and Karim Djemame (University of
Leeds, Leeds, U.K.)

Towards Generating Elastic Microservices: A Declarative Specification for Consistent Elasticity
Configurations 510
Floriment Klinaku (University of Stuttgart) and Vincenzo Ferme
(University of Stuttgart)

Towards an End-to-End Architecture for Run-Time Data Protection in the Cloud 514
Nazila Gol Mohammadi (paluno – The Ruhr Institute for Software
Technology, University of Duisburg-Essen), Zoltán Adam Mann (paluno –
The Ruhr Institute for Software Technology, University of
Duisburg-Essen), Andreas Metzger (paluno – The Ruhr Institute for
Software Technology, University of Duisburg-Essen), Maritta Heisel
(paluno – The Ruhr Institute for Software Technology, University of
Duisburg-Essen), and James Greig (Oxford Computer Consultants)

Abstract Fog in the Bottle - Trends of Computing in History and Future 519
Marcus Hilbrich (Chemnitz University of Technology, Germany) and
Markus Frank (University of Stuttgart, Germany)

Author Index 523
