Complex Adaptive Systems Conference (CAS 2018)

Cyber Physical Systems and Deep Learning

Procedia Computer Science Volume 140

Chicago, Illinois, USA
5 – 7 November 2018

Editor:

Cihan H. Dagli

# Table of Contents

Engineering Cyber Physical Systems Preface
  Cihan H. Dagli .......................................................... 1

Part I Cyber Physical Systems

Systems Engineering Design: Architecting Trustworthiness in Cyber Physical Systems Using an Extended Aggregated Modality
  Brian Connett, and Bryan O’Halloran ........................................... 4

Non-Commutativity, Incompatibility, Emergent Behavior and Decision Support Systems
  Mustafa Canan ........................................................................ 13

Conceptual Modeling of Cyber-Physical Gaps in Air Traffic Control
  Yaniv Mordecai ......................................................................... 21

System of Systems Architecting Problems: Definitions, Formulations, and Analysis
  Hadi Farhangi, and Dincer Konur ............................................. 29

Space-based Collision Avoidance Framework for Autonomous Vehicles
  Jinke Yu, and Leonard Petnga .................................................. 37

Ranking Critical Activities in Process Architectures
  Satish M Srinivasan, Nil Kilicay-Ergin, Raghvinder S. Sangwan, and Colin J. Neil ................. 46

A Three-Choice Minority Game Model with Homogeneous Agent Preferences for Resource Allocation
  Catalina A. Montes, and Adrian Roy L. Valdez ................................ 56

Anomaly Detection in Vehicle Traffic with Image Processing and Machine Learning
  Selim S. Sarikan, and A. Murat Ozbayoglu .................................. 64

DSRC Based Sensor-Pooling Protocol for Connected Vehicles in Future Smart Cities
  Mostafa El-Said, Samah Mansour, and Vijay Bhuse ........................ 70

Solving Stochastic Shortest Distance Path Problem by Using Genetic Algorithms
  Ehsan Ahmadi, Gürsel A. Süer, and Farah Al-Ogaili ............................. 79

Text Mining to Understand the Influence of Social Media Applications on Smartphone Supply Chain
  Aditya Akundi, Bill Tseng, Jiamin Wu, Eric Smith, M Subbalakshmi, and Francisco Aguirre .... 87

Social Media Analysis of User’s Responses to Terrorism Using Sentiment Analysis and Text Mining
  Samah Mansour ...................................................................... 95

Sensor Based Human Activity Recognition Using Adaboost Ensemble Classifier
  Abdulhaimit Subasi, Dalia H. Dammas, Rahaf D. Alghamdi, Raghad A. Makawi, Eman A. Albiet, Tayeb Brahimi, and Akila Sarirete ...................................................... 104

Visualizing High Dimensional and Big Data
  Amy Genender-Feltheimer ............................................................. 112

Adaptive Software Reliability Growth
  Chandru Mirchandani ................................................................. 122
### Part II Deep Learning and Data Analysis

</table>
Asymmetric MDS with Categorical External Information Based on Radius Model
Kensuke Tanioka, and Hiroshi Yadohisa ................................................................. 284

An Application Study of DNA Structural Properties for Promoter Prediction with Wavelet and Support Vector Machine
Makihiko Sato .......................................................................................................... 292

Real-Time Classification of Earthquake using Deep Learning
H. Serdar Kuyuk, and Ohno Susumu........................................................................... 298

Forecasting Mortality Risk for Patients Admitted to Intensive Care Units Using Machine Learning
Hamid R. Darabi, Daniel Tsinis, Kevin Zecchini, Winthrop F. Whitcomb, and Alexander Liss......... 306

Near Field Communication Detection System for Drug-Drug Interactions
Amjed B.H. Altaweel, Loay Abusalah, and Dima M. Qato ........................................... 314

Using Accuracy Measure for Improving the Training of LSTM with Metaheuristic Algorithms
Tarik A. Rashid, Polla Fattah, and Delan K. Awla ......................................................... 324

Analysis of Parkinson’s Disease Data
Ram Deepak Gottapu, and Cihan H Dagli .................................................................. 334

Robust Virtual Welding Process Optimization
Vijay K Yalamanchili, Diego A Galindo, and Justin C Mach ........................................... 342

Selection of Assembly Systems; Assembly Lines vs. Seru Systems
Aaya Aboelfotoh, and Gürsel A Süer Md Abdullah....................................................... 351

Multidimensional Kernel Principal Component Analysis of False Alarms of Rapidly Intensifying Atlantic Tropical Cyclones
Andrew Mercer, Alexandria Grimes, and Kimberly Wood ............................................ 359

Astronomical Knowledge Discovery of Very Faint Galaxies
María José Márquez, Tamás Budavari, and Luis Manuel Sarro ....................................... 367

Learning to Operate an Excavator via Policy Optimization
Benjamin J. Hodel .......................................................................................................... 376

Predicting the Future with Artificial Neural Network
Anifat Olawoyin, and Yangjuin Chen ............................................................................. 383

Early Detection of Disease Using Electronic Health Records and Fisher’s Wishart Discriminant Analysis
Sijia Yang, Jian Bian, Zeyi Sun, Licheng Wang, Haojin Zhu, Haoyi Xiong, and Yu Li ............ 393
