2018 14th European Dependable Computing Conference (EDCC 2018)

Iasi, Romania
10-14 September 2018
Table of Contents

Message from General Chairs ix
Message from Program Chair x
Conference Organization xi
Program Committee xii
Reviewers xiii
Steering Committee xiv
Message from SERENE 2018 Workshop Program Chairs xv
Message from WBD 2018 Workshop Organizers xvi

Distinguished Papers

Accurate Robustness Assessment of HDL Models Through Iterative Statistical Fault Injection 1
Ilya Tuzov (Universitat Politècnica de València), David de Andrés (Universitat Politècnica de València), and Juan-Carlos Ruiz (Universitat Politècnica de València)

Exploratory Study of Machine Learning Techniques for Supporting Failure Prediction 9
João R. Campos (DEI/CISUC, University of Coimbra, Portugal), Marco Vieira (DEI/CISUC, University of Coimbra, Portugal), and Ernesto Costa (DEI/CISUC, University of Coimbra, Portugal)

Exploiting New CPU Extensions for Secure Exchange of eHealth Data at the EU Level 17
Luigi Coppolino (University of Naples 'Parthenope' Naples), Salvatore D'Antonio (University of Naples 'Parthenope' Naples), Giovanni Mazzeo (University of Naples 'Parthenope' Naples), Luigi Romano (University of Naples 'Parthenope' Naples), and Luigi Sgaglione (University of Naples 'Parthenope' Naples)

Verification & Validation

Hardware Runtime Verification of a RTOS Kernel: Evaluation Using Fault Injection 25
Dimitry Solet (Université de Nantes, IETR, CNRS UMR 6164), Jean-Luc Béchennec (CNRS, LS2N, CNRS UMR 6004), Mikael Briday (Université de Nantes, LS2N, CNRS UMR 6004), Sébastien Faucon (Université de Nantes, LS2N, CNRS UMR 6004), and Sébastien Pillement (Université de Nantes, IETR, CNRS UMR 6164)
Validation of Safety Necessities for a Safety-Bag Component in Experimental Autonomous Vehicles 33
Crubille Paul (Sorbonne universités, Université de Technologie de Compiègne, CNRS, Heudiasyc UMR 7253), Lussier Benjamin (Sorbonne universités, Université de Technologie de Compiègne, CNRS, Heudiasyc UMR 7253), Schön Walter (Sorbonne universités, Université de Technologie de Compiègne, CNRS, Heudiasyc UMR 7253), and Manel Brini (Sorbonne universités, Université de Technologie de Compiègne, CNRS, Heudiasyc UMR 7253)

Model-based design

A Study of the Interplay Between Safety and Security Using Model-Implemented Fault Injection 41
Behrooz Sangchoolie (RISE Research Institutes of Sweden), Peter Folkesson (RISE Research Institutes of Sweden), and Jonny Vinter (RISE Research Institutes of Sweden)

A Systematic Process for Applying the CHESS Methodology in the Creation of Certifiable Evidence 49
André Luiz de Oliveira (Federal University of Juiz de Fora), Lucas Paiva Bressan (Federal University of Juiz de Fora), Leonardo Montecchi (University of Campinas), and Barbara Gallina (Malardalen University)

Security and Dependability Analysis

Finding SQL Injection and Cross Site Scripting Vulnerabilities with Diverse Static Analysis Tools 57
Areej Algaith (Centre for Software Reliability, City, University of London, UK), Paulo Nunes (CISUC, University of Coimbra, UDI, Polytechnic Institute of Guarda, Portugal), Fonseca Jose (CISUC, University of Coimbra, UDI, Polytechnic Institute of Guarda, Portugal), Ilir Gashi (Centre for Software Reliability, City, University of London, UK), and Marco Vieira (University of Coimbra, Portugal)

Evaluating the Inherent Sensitivity of Programming Languages to Soft Errors 65
Frederico Cerveira (CISUC, Department of Informatics Engineering, University of Coimbra), Alcides Fonseca (LASIGE, Faculdade de Ciências da Universidade de Lisboa), Raul Barbosa (CISUC, Department of Informatics Engineering, University of Coimbra), and Henrique Madeira (CISUC, Department of Informatics Engineering, University of Coimbra)

A Message-Passing Based Algorithm for k-Terminal Reliability 73
Minh Lê (Siemens AG) and Josef Weidendorfer (Leibniz Supercomputing Center)

Fault Tolerance and Performance Evaluation

Fault-Tolerance Evaluation of a New SQL Database 81
Ainhoa Azqueta-Azúñez (Universidad Politécnica de Madrid), Marta Páñino Martínez (Universidad Politécnica de Madrid), Valerio Vianello (Universidad Politécnica de Madrid), and Ricardo Jimenez Péris (LeanXcale)
Resource-Efficient State-Machine Replication with Multithreading and Vertical Scaling 87
Gerhard Habiger (Ulm University), Franz J. Hauck (Ulm University),
Johannes Köstler (Universitat Passau), and Hans P. Reiser (Universitat
Passau)

Assessing Containerized REST Services Performance in the Presence of Operator Faults 95
Mariana Cunha (CISUC, Departament of Informatics Engineering,
University of Coimbra, Portugal) and Nuno Laranjeiro (CISUC,
Departament of Informatics Engineering, University of Coimbra,
Portugal)

Frameworks, Architectures and Tools

A Re-Identification Risk-Based Anonymization Framework for Data Analytics Platforms 101
Hebert Silva (University of Campinas), Tania Basso (University of
Campinas), Regina Moraes (University of Campinas), Donatello Elia
(Euro-Mediterranean Center for Climate Change), and Sandro Fiore
(Euro-Mediterranean Center for Climate Change)

Towards Safety-Awareness and Dynamic Safety Management 107
Mario Trapp (Fraunhofer ESK), Daniel Schneider (Fraunhofer IESE), and
Gereon Weiss (Fraunhofer ESK)

An Exploratory Study on Zeroconf Monitoring of Microservices Systems 112
Marcello Cinque (Università degli Studi di Napoli Federico II),
Raffaele Della Corte (Critware S.r.l.), Raffaele Iorio (Università
degli Studi di Napoli Federico II), and Antonio Pecchia (Università
degli Studi di Napoli Federico II)

An Efficient Strategy for Model Composition in the Möbius Modeling Environment 116
Giulio Masetti (University of Pisa and ISTI-CNR Pisa), Silvano
Chiaradonna (ISTI-CNR Pisa), Felicita Di Giandomenico (ISTI-CNR Pisa),
Brett Feddersen (Information Trust Institute, University of Illinois),
and William H. Sanders (Information Trust Institute, University of
Illinois)

Threats and Anomaly Detection

Optimal Deployment of Security Policies: Application to Industrial Control Systems 120
Ziad Ismail (Télécom ParisTech), Jean Leneutre (Télécom ParisTech),
and Alia Fourati (EDF R&D)

Detecting Network Threats using OSINT Knowledge-Based IDS 128
Ivo Vacas (LASIGE, Faculdade de Ciências, Universidade de Lisboa,
Portugal & Centro Nacional de Cibesegurança, Portugal), Ibéria
Medeiros (LASIGE, Faculdade de Ciências, Universidade de Lisboa,
Portugal), and Nuno Neves (LASIGE, Faculdade de Ciências, Universidade
de Lisboa, Portugal)
Detection of Integrity Attacks to Smart Grids using Process Mining and Time-Evolving Graphs  136

Simona Bernardi (Department of Computer Science and System Engineering, University of Zaragoza, Spain), Raquel Trillo-Lado (Department of Computer Science and System Engineering, University of Zaragoza, Spain), and José Merseguer (Department of Computer Science and System Engineering, University of Zaragoza, Spain)

Contextual Anomaly Detection for a Critical Industrial System Based on Logs and Metrics  140

Mostafa Farshchi (Swinburne University, Data61-CSIRO), Ingo Weber (Data61, CSIRO), Raffaele Dellacorte (Federico II University of Naples), Antonio Pecchia (Federico II University of Naples, Italy), Marcello Cinque (Federico II University of Naples, Italy), Jean-Guy Schneider (Swinburne University of Technology), and John Grundy (Monash University)

WBD 2018: Workshop on Blockchain Dependability

Performance Benchmarking of Smart Contracts to Assess Miner Incentives in Ethereum  144

Amjad Aldweesh (Newcastle University), Maher Alharby (Newcastle University), Ellis Solaiman (Newcastle University), and Aad van Moorsel (Newcastle University)

Simulation of Stochastic Blockchain Models  150

Pierre-Yves Piriou (EDF R&D) and Jean-Francois Dumas (EDF R&D)

Runtime Verification of Ethereum Smart Contracts  158

Joshua Ellul (University of Malta) and Gordon J. Pace (University of Malta)

How to Assess the Dependability of Applications on Top of the Blockchain: Novel Research Challenges  164

Marcello Cinque (Federico II University of Naples, Italy) and Christian Esposito (Federico II University of Naples, Italy)

SERENE 2018: 10th International Workshop on Software Engineering for Resilient Systems

A Proactive Q-Learning Approach for Autoscaling Heterogeneous Cloud Servers  166

Federico Lombardi (University of Southampton)

Formal Verification for Feature-Based Composition of Workflows  173

Stephan Adelsberger (Dept. of Information Systems, Vienna University of Economics), Bashar Igried (Faculty of Information Technology, The Hashemite University, Jordan), Markus Moser (Dept. of Information Systems, Vienna University of Economics, Vienna, Austria), Vadim Savenkov (Dept. of Information Systems, Vienna University of Economics, Vienna, Austria), and Anton Setzer (Dept. of Computer Science, Swansea University, Swansea, UK)

Towards a Formal Approach to Analysing Security of Safety-Critical Systems  182

Inna Vistbakka (Åbo Akademi) and Elena Troubitsyna (KTH - Royal Institute of Technology)
A Context-Aware, Confidence-Disclosing and Fail-Operational Dynamic Risk Assessment Architecture
Patrik Feth (Fraunhofer IESE), Rasmus Adler (Fraunhofer IESE), and
Daniel Schneider (Fraunhofer IESE)

Analyzing the Shared Information in Social Networks
Bogdan Aman (A.I.Cuza” University, Faculty of Computer Science and
Romanian Academy, Institute of Computer Science, Iai, Romania) and
Gabriel Ciobanu (A.I.Cuza” University, Faculty of Computer Science and
Romanian Academy, Institute of Computer Science, Iai, Romania)
