The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii Symposium Committee

ix Conference Committee

xi Introduction

xiii Conference Organizers

SESSION 1  IRMMW-THz TECHNOLOGIES AND THEIR APPLICATIONS I

10623 02 Corrugated metal surface with pillars for terahertz surface plasmon polariton waveguide components [10623-36]

10623 03 THz computed tomography system with zero-order Bessel beam [10623-39]

10623 04 Manipulating the strength and broadband of the resonators in the terahertz metamaterials [10623-37]

10623 05 A debugging method of the Quadrotor UAV based on infrared thermal imaging [10623-44]

SESSION 2  IRMMW-THz TECHNOLOGIES AND THEIR APPLICATIONS II

10623 06 Terahertz carpet cloak based on ultrathin metasurface [10623-41]

10623 07 All-dielectric band stop filter at terahertz frequencies [10623-10]

10623 08 Compact terahertz spectrometer based on disordered rough surfaces [10623-13]

POSTER SESSION

10623 09 Stimulation research on the measurement of the IRW pneumatic thermal radiation [10623-3]

10623 0A Research on terahertz properties of rat brain tissue sections during dehydration [10623-8]

10623 0B Optical constant determination of cross-linked polystyrene in the infrared [10623-11]

10623 0C Nonlinear bias analysis and correction of microwave temperature sounder observations for FY-3C meteorological satellite [10623-14]
Switchable tri-band THz polarizing rotator based on chiral metamaterials [10623-16]

Scattering properties of electromagnetic waves from metal object in the lower terahertz region [10623-18]

A simple system for 160GHz optical terahertz wave generation and data modulation [10623-25]

The preparation method of terahertz monolithic integrated device [10623-27]

Hydrothermal preparation of vanadium dioxide thin films and research progress of terahertz modulation [10623-28]

Quantitative detection of melamine based on terahertz time-domain spectroscopy [10623-29]

Detection of ionic liquid using terahertz time-domain spectroscopy [10623-30]

Detailed real-time infrared radiation simulation applied to the sea surface [10623-33]

Removing the echoes from terahertz pulse reflection system and sample [10623-35]

Studies on electromagnetic response in arc-shaped structures in terahertz region [10623-38]

Characterizing the hydration state of L-threonine in solution using terahertz time-domain attenuated total reflection spectroscopy [10623-42]

Light field imaging and application analysis in THz [10623-43]

Studies on the resonant properties in the asymmetric dipole-array terahertz metamaterials [10623-46]

Fabrication and performance of a double layered Mn-Co-Ni-O/Mn-Co-Ni-Cu-O thin film detector [10623-48]

Study on THz wave generation from air plasma induced by quasi-square Airy beam [10623-50]

Characterization of the terahertz frequency optical constants of tourmaline [10623-51]

Integrated Mach-Zehnder interferometer on the end facet of multicore fiber for refractive index sensing application [10623-52]

The improvement of surface roughness for OAP aluminum mirrors: from terahertz to ultraviolet [10623-53]
