Volume 10717
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 1605-7422
ISSN: 2410-9045 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/18/$18.00.

Printed in the United States of America by Cuman Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ix  Authors
xiii Conference Committee
xv Introduction
xx Organizers

**LASER SYSTEMS AND NOVEL APPLICATIONS**

| 10717 02 | The choice of the optimal approximation in the kinetic description of the vacuum creation of electron-positron plasma in strong laser fields [10717-13] |
| 10717 03 | Modification of the laser triangulation method for measuring the thickness of optical layers [10717-87] |
| 10717 04 | Optimization of silicon waveguides for gas detection application at mid-IR wavelengths [10717-44] |
| 10717 05 | O²(a1Δ) vibrational kinetics in oxygen-iodine laser [10717-201] |
| 10717 06 | O²(b¹Σg+) relaxation in active medium of oxygen-iodine laser [10717-182] |
| 10717 07 | Broadband tunable mid-IR Cr²⁺:CdSe lasers for medical applications [10717-99] |
| 10717 08 | Self-mixing laser diode included in scanning microwave microscope to the control of probe nanodisplacement [10717-163] |
| 10717 09 | Influence of temperature on the spectral characteristics of semiconductor lasers in the visible range [10717-92] |
| 10717 0A | Using phase locking for improving frequency stability and tunability of THz-band gyrotrons [10717-135] |
| 10717 0B | Synchronization and control of external-cavity laser diodes [10717-162] |

**LASER-ACTIVE AND NONLINEAR OPTICAL MEDIA AND INTERACTIONS**

| 10717 0C | Ramsey scheme for coherent population resonance detection in the optically dense medium [10717-3] |
| 10717 0D | Comparison of light harmonic generation in Al and Ge consisted silicate materials [10717-89] |
Multi-peaks scattering of light in glasses [10717-91]

Model of quantum kinetics of spin-orbit coupled two-dimensional electron gas in the presence of strong electromagnetic field [10717-175]

The improved z-scan technique: potentialities of the additional right-angle scattering channel and the input polarization control [10717-118]

Amplitude and phase measurements based on low-coherence interferometry with acousto-optic spectral image filtration [10717-172]

The measurement of argon metastable atoms in the barrier discharge plasma [10717-164]

BEAM AND PULSE PROPAGATION, IMAGE FORMATION

Electromagnetically induced transparency in the case of elliptic polarization of interacting fields [10717-27]

Modelling of the nonlinear soliton dynamics in the ring fibre cavity [10717-165]

Investigation of focusing features of a spiral binary axicon [10717-155]

Sharp focusing of laser light by multilayer cylinders with circular cross-section [10717-181]

Tight focusing of a nonhomogeneously polarized optical vortex [10717-174]

Stimulated fission of high-order optical breather via pairwise interaction of solitons in model of nonlinear Schrödinger equation with variable coefficients [10717-142]

Transformation of an optical pulse shape in a phototropic medium [10717-139]

Experimental investigation of complex circular Airy beam characteristics [10717-154]

QUANTUM OPTICS, CAVITY QED, AND NON-CLASSICAL LIGHT

Generalized Tavis-Cummings models and quantum networks [10717-186]

The description of two-photon Rabi oscillations in the path integral approach [10717-173]

Dynamics of atom-field entanglement for Tavis-Cummings models [10717-170]

Atom-atom entanglement in the double Jaynes-Cummings model [10717-171]

Light with orbital angular momentum and encryption algorithms [10717-166]

Near-field excitation exchange between motionless point atoms located near the conductive surface [10717-22]
Influence of dipole-dipole interaction and detuning on entanglement dynamics in two-atom Jaynes-Cummings model [10717-180]

**COMPUTATIONAL APPROACHES AND NUMERICAL SIMULATIONS IN PHOTONICS**

- **10717 0Y** Algorithm for lens calculations in the geometrized Maxwell theory [10717-100]
- **10717 0Z** Calculation of normal modes of the closed waveguides in general vector case [10717-136]
- **10717 10** One-dimensional "atom" with zero-range potential perturbed by finite sequence of zero-duration laser pulses [10717-183]
- **10717 11** Simulation of light propagation in the thin-film waveguide lens [10717-184]
- **10717 12** Finite element method for calculating spectral and optical characteristics of axially symmetric quantum dots [10717-177]
- **10717 13** The Riemannian geometry is not sufficient for the geometrization of the Maxwell’s equations [10717-156]

**ELECTRODYNAMICS OF PHOTONIC STRUCTURES AND METAMATERIALS**

- **10717 14** Backward and forward plasmons in symmetric structures [10717-11]
- **10717 15** Diffraction of a plane wave on two-dimensional conductive structures and a surface wave [10717-28]
- **10717 16** WKB solution 4×4 for electromagnetic waves in a planar magnetically anisotropic inhomogeneous layer [10717-49]
- **10717 17** Dependence of the ellipsometric parameters of reflected light on the orientation of the optical axis relative to the plane of incidence [10717-63]
- **10717 18** Wave propagation characteristics in the cavity with hyperbolic medium [10717-68]
- **10717 19** To the theory of hybrid modes of the discrete spectrum in finite structures with nanocrystalline films [10717-202]
- **10717 1A** Simulation and development of novel slow-wave structures for miniaturized THz-band vacuum-tube devices [10717-95]
- **10717 1B** Dynamics of the optical field in the ring cavity with nonlinear metamaterial and time-delayed feedback [10717-176]

**PHOTONICS OF RANDOMLY INHOMOGENEOUS MEDIA**

- **10717 1C** Bubble statistics in aged wet foams and the Fokker-Planck equation [10717-24]
- **10717 1D** Evolution of the scattering anisotropy of aged foams in the wet-to-dry transition [10717-32]
| 1071 1E | Parametric presentation of dielectric function of laser pumped wide-zone semiconductor material: does this function satisfy the Kramers-Kronig relations? [10717-33] |
| 1071 1F | Diffusing light probing of aged wet foams [10717-82] |
| 1071 1G | Peculiarities of the statistics of spectrally selected fluorescence radiation in laser-pumped dye-doped random media [10717-122] |
| 1071 1H | Spatially resolved speckle-correlometry of sol-gel transition [10717-130] |
| 1071 1I | Structure changes in metastable and unstable foams probed by multispeckle diffusing light spectroscopy [10717-185] |

**BRAIN DYNAMICS: ANALYSIS, MODELING, COMPUTATIONS**

| 1071 1J | Recognition of neural brain activity patterns correlated with complex motor activity [10717-138] |
| 1071 1K | Analysis of psycho-physiological features of a subject in simple tests with the registration of electroencephalograms [10717-137] |
| 1071 1L | Analysis of the features of untrained human movements based on the multichannel EEG for controlling anthropomorphic robotic arm [10717-71] |
| 1071 1M | Optimal spatiotemporal representation of multichannel EEG for recognition of brain states associated with distinct visual stimulus [10717-125] |
| 1071 1N | Detection of different states of sleep in the rodents by the means of artificial neural networks [10717-94] |
| 1071 1O | Brain states recognition during visual perception by means of artificial neural network in the different EEG frequency ranges [10717-88] |
| 1071 1P | Multifractal analysis of real and imaginary movements: EEG study [10717-35] |
| 1071 1Q | Reconstruction of dynamical systems from resampled point processes produced by neuron models [10717-25] |
| 1071 1R | Brain-computer interface on the basis of EEG system Encephalan [10717-70] |
| 1071 1S | Raindrops of synaptic noise on dual excitability landscape: an approach to astrocyte network modelling [10717-129] |
| 1071 1T | Proepileptic patterns in EEG of WAG/Rij rats [10717-121] |
| 1071 1U | Brain tissues volume measurements from 2D MRI using parametric approach [10717-113] |
| 1071 1V | The lymphatic mechanisms of brain cleaning: application of optical coherence tomography and fluorescence microscopy [10717-151] |
On trans-parenchymal transport after blood brain barrier opening: pump-diffuse-pump hypothesis [10717-148]

Wavelet-domain de-noising of OCT images of human brain malignant glioma [10717-83]

Optical coherent tomography and fluorescent microscopy for the study of meningeal lymphatic systems [10717-152]

HIGHLY LOCALIZED LASER-INDUCED VASCULAR RESPONSES

The estimation of hemodynamic signals measured by fNIRS response to cold pressor test [10717-80]

Dynamical mechanisms of conducted vasoreactivity: minimalistic modeling study [10717-147]

Towards optical control of single blood platelet activation [10717-8]

Low-frequency dynamics of autonomic regulation of circulatory system in healthy subjects [10717-146]

Non-contact method of search and analysis of pulsating vessels [10717-116]

Analysis of cerebral vessels dynamics using experimental data with missed segments [10717-26]

Numerical modeling of dynamics of heart rate and arterial pressure during passive orthostatic test [10717-141]

Automated analysis of plethysmograms for functional studies of hemodynamics [10717-192]

ADVANCED METHODS IN BIOCOMPUTING

MATLAB for laser speckle contrast analysis (LASCA): a practice-based approach [10717-144]

Nonlinear dynamics of the complex multi-scale network [10717-111]

Mechanisms for the target patterns formation in a stochastic bistable excitable medium [10717-127]

Self-organization in multilayer network with adaptation mechanisms based on competition [10717-117]

Creation of anatomical models from CT data [10717-18]
