The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

  ISSN: 0277-786X

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

  • The first five digits correspond to the SPIE volume number.
  • The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.
Contents

vii  Authors  
xi  Conference Committee

ATMOSPHERE, WEATHER, AND CLIMATE

10769 03  A novel CubeSat payload for airglow measurements in the mesosphere and lower thermosphere [10769-2]
10769 04  Architectures for Earth-observing CubeSat scatterometers [10769-3]
10769 05  A GNSS receiver for small-sats enabling precision POD, radio occultations, and reflections [10769-4]
10769 06  Technology development in support of hyperspectral infrared atmospheric sounding in a CubeSat [10769-5]
10769 07  CubeSat active thermal management in support of cooled electro-optical instrumentation for advanced atmospheric observing missions [10769-6]
10769 08  Overview of the NASA TROPICS CubeSat constellation mission [10769-7]

LAND AND OCEAN I

10769 0B  Snow and Water Imaging Spectrometer (SWIS): CubeSat configuration and design [10769-9]
10769 0C  Hawkeye ocean color instrument: performance summary [10769-10]

LAND AND OCEAN II

10769 0D  Constellations of CubeSats to exploit signals-of-opportunity for Earth system science [10769-35]

PLANETARY AND HUMAN EXPLORATION

10769 0G  Nature of and lessons learned from Lunar Ice Cube and the first deep space Cubesat ‘cluster’ [10769-14]
10769 0H  The Lunar Flashlight CubeSat instrument: a compact SWIR laser reflectometer to quantify and map water ice on the surface of the moon [10769-15]
Overview of Phobos/Deimos Regolith Ion Sample Mission (PRISM) concept [10769-16]

Overview of Primitive Object Volatile Explorer (PrOVE) Cubesat or Smallsat concept [10769-17]

A constellation of MicroSats to search for NEOs [10769-20]

Inter-satellite omnidirectional optical communicator for remote sensing [10769-21]

HIGH-POWER LASERS AND FT-IR SPECTROMETERS FOR CUBESAT DEPLOYMENT I

A CubeSat mission for space-environment demonstration of Remote Laser-Evaporative Molecular Absorption (R-LEMA) spectroscopy sensor system concept (Invited Paper) [10769-22]

Remote Laser Evaporative Molecular Absorption (R-LEMA) spectroscopy laboratory experiments [10769-23]

Experimental design for remote laser evaporative molecular absorption spectroscopy sensor system concept [10769-24]

Control system development for an R-LEMA testing CubeSat experiment [10769-25]

High-power laser subsystem for a 6U CubeSat mission [10769-26]

Spectrometer subsystem for a CubeSat mission to test Remote Laser-Evaporative Molecular Absorption (R-LEMA) spectroscopy concept in the space environment [10769-27]

Energy subsystem analysis for a 6U CubeSat mission utilizing high-power laser and FT-IR spectrometer [10769-28]

HIGH-POWER LASERS AND FT-IR SPECTROMETERS FOR CUBESAT DEPLOYMENT II

Thermal control analysis on a 6U CubeSat equipped with a high-power laser [10769-29]

Preliminary studies of the impact on temperature of a high-power laser on-board a 6U CubeSat [10769-30]

Analysis of a dual CubeSat communication system for a formation-flying experiment [10769-31]

OTHER SENSORS

Evaluation of UV optics for triple tiny ionospheric photometers on CubeSat missions [10769-32]

A small satellite mission for solar coronagraphy [10769-33]
LetSat-1: a GPU technology demonstrator and AI navigation system [10769-34]

POSTER SESSION

10769 14  Advanced multi-mission operations system instrument toolkit: an open source instrument and small satellite operations toolkit [10769-41]

10769 15  Omnidirectional optical transceiver design techniques for multi-frequency full duplex CubeSat data communication [10769-42]
