Holm Conference 2018 -- TABLE OF CONTENTS

Foreword

Conference Supporters and Committees

Morton Antler Lecture

Erle Shobert Prize Paper Award

Armington Recognition Award

Young Investigator Award

Author Index

SESSION 1: Young Investigator Presentations

1.1 Investigations on the Effects of Different Strand Surface Conditions on the Inter Strand and Strand/Connector Resistance ................................................................. 1
   Carsten Kuckuck1,2, Michael Blauth1, Jian Song2
   1Phoenix Contact GmbH & Co, 2Ostwestfalen-Lippe University of Applied Sciences

1.2 The Impact of Coating Materials in Coaxial Connectors on Passive Intermodulation ..... 9
   Jin Qiuyan1,2, Jinchun Gao1, George Flowers2, Gang Xie3, Xiangwen Wu3
   1Beijing University of Posts and Telecommunications, 2Auburn University, 3Forstar S&T Co., Ltd.

1.3 The Influence of Contaminated Copper Wires on the DC Joule Heating of Connectors ................................................................. 17
   Tobias Dyck1 and Andreas Bund2
   1WAGO Kontakttechnik GmbH & Co, 2Technische Universitat Ilmenau

1.4 Theoretical and Experimental Work on Optimal Contact Geometries for Fast Mechanical Disconnect Switches .................................................... 24
   Tushar Damle and Lukas Graber, Georgia Institute of Technology

1.5 Improved Microcontact Testing Fixture for Efficient Reliability and Performance Characterization ................................................................. 31
   Protap Mahanta and Ronald Coutu, Marquette University

SESSION 2: Fundamentals

2.1 The Model of Melting and Welding of Closed Electrical Contacts with Softening Contact Zone ................................................................. 38
   Stanislav Kharin1, Merey Sarsengeldin2, Samat Kassabek3, Targyn Nauryz1, 1Kazakh-British Technical University, 2Kazakh National Polytechnic University, 3Suleiman Demirel University

2.2 The Effects of Bridge Structures on Current Density and Temperature Distributions .... 43
   Robert Malucci, RD Malucci Consulting

2.3 A Multiphysics Coupled Electro-thermo-mechanical Model of Whisker Shorting ........ 48
   Robert Jackson1 and Erika R. Crandall2, 1Auburn University, 2TE Connectivity
SESSION 3: Modeling I

3.1 3-D Hydrodynamic Model of Metal Droplet Sputtering and Molten Pool Formation under Electric Arc ................................................................. 56
Xiaoyu Liao, Xue Zhou, Kai Bo, Guofu Zhai, Harbin Institute of Technology

3.2 Modeling of the Friction Force in Sliding Electrical Contact with Mining Rules .......... 61
Lichuan Hui1, Zhonghua Chen1, Fungyi Guo1, Guojun Sun2, 1Liaoning Technical University,
2Shouzhou Power Supply Company of the State Grid Corporation of China

3.3 Parameter Estimation of Black Box Arc Model based on Heuristic Optimization Algorithms ................................................................. 66
Guogang Zhang1, Yakui Liu1, Lu Qi1, Youdang Xu1, Michael Kurrat2
1Xi’an Jiaotong University, 2Technical University Braunschweig

SESSION 4: Arcing I

4.1 Weldings in Break and Make Operations for CuMo and CuW Contact Materials in DC200-500V and Different Surrounding Gases ................................................. 71
Yuan Liao1, Lige Zhang1, Zhenbiao Li1, Qingchong Zhu1, Makoto Hasegawa2
1Huazhong University of Science and Technology, 2Chitose Institute of Science and Technology

4.2 Effect of Contact Velocity on the Behavior of Decaying Arcs in Air ....................... 77
Mrunal Parekh1, Jesper Magnusson2, Marley Becerra1,2, Göran Engdahl1
1KTH Royal Institute Of Technology, 2ABB AB Corporate Research

4.3 Arc Behaviors of Three Kinds of Bridge-type Contacts when Opening a Resistive Load in Range of from 300VDC to 750VDC ......................................................... 81
Huimin Liang1, Delong Liu1, Xue Zhou1, Xiaoyu Liao1, Dan Chen2, Zhaowen Cai2, Shuqing Chen2
1Harbin Institute of Technology, 2G&A Technologies Co., Ltd.

4.4 Effective Shortening of Break Arc Durations of Ag and Several Ag-Based Contacts in DC Load Conditions with Increased Contact Opening Speeds and External Magnetic Field ......................................................................................... 87
Seika Tokumitsu and Makoto Hasegawa, Chitose Institute of Science and Technology

SESSION 5: Circuit Breakers

5.1 Study of DRM during Closing Period of High Voltage Circuit Breaker ..................... 95
Yakui Liu1, Guogang Zhang1, Hao Qin1, Zhengxiang Song1, Jianhua Wang1, Jinggang Yang2
1Xi’an Jiaotong University, 2Jiangsu Electric Power Company Research Institute

5.2 Impact of Surface Morphology on Arcing Induced Erosion of CuW Contacts in Gas Circuit Breakers ................................................................................. 99
Milad Mohammadhosein1, Kaveh Niayesh1, Amir Abbas Shayegani Akmal1, Hossein Mohseni2
1University of Tehran, 2Norwegian University of Science and Technology

5.3 Bi-directional DC Circuit Protection Technology for Photovoltaic Applications ........ 106
Xin Zhou, Eaton Corporation

5.4 Current Carrying Capacity of an Earthing Switch for a Generator Circuit Breaker .... 113
Alberto Zanetti and Jean-Claude Mauroux, ABB Schweiz AG
P1.1 Simulation and Experimental Research on Electrical Properties of AgSnO<sub>2</sub> Contact Materials Doped with Rare Earth Element Ce ................................................................. 119
Jinqin Wang<sup>1</sup>, Ying Zhang<sup>1</sup>, Huiling Kang<sup>1</sup>, Yanyan Luo<sup>1</sup>, Jiaomin Liu<sup>2</sup>
<sup>1</sup>Hebei University of Technology, <sup>2</sup>Tianjin Electronic Information Advanced Technical School

P1.2 Virtual prototype and Optimal Design of Short Circuit Current Capability of Magnetic Latching Relay .................................................................................................................. 124
Hao Yu, Huimin Liang, Kai Bo, Xuerong Ye, Guofu Zhai, Harbin Institute of Technology

P1.3 A XANES Study of Natural Oxide Films on Plated Tin ......................................................... 130
Keiji Mashimo, Yujin Hori, Satoshi Yamazaki, Furukawa Electric Co., Ltd.

P1.4 Experimental Study and Feature Improvement of DC Series Arc Faults with Switching Noise Interference ........................................................................................................... 135
Silei Chen, Xingwen Li, Xi'an Jiaotong University

P1.5 Application of the Preference Set-based Design Method to Cantilever for Electrical Contact ................................................................................................................................. 143
Yoshiki Kayano<sup>1</sup>, Kazuaki Miyanaga<sup>2</sup>, Hiroshi Inoue<sup>1</sup>, Yoshio Kami<sup>1</sup>
<sup>1</sup>The University of Electro-Communications, <sup>2</sup>Fujitsu Component Limited

P1.6 Relationship between Wear Profile of Pantograph Contact Strip and Arc Discharge Energy Distribution .......................................................................................................................... 150
Yoshitaka Kubota, Railway Technical Research Institute

P1.7 Development of 126kV Single-break Vacuum Circuit Breaker ............................................ 154
Haomin Li, Yingsan Geng, Zhiyuan Liu, Jianhua Wang, Xi'an Jiaotong University

P1.8 Investigations on the Effects of Different Strand Surface Conditions on the Inter Strand and Strand/Connector Resistance .......................................................................................... 1
Carsten Kuckuck<sup>1</sup>,<sup>2</sup>, Michael Blauth<sup>1</sup>, Jian Song<sup>2</sup>
<sup>1</sup>Phoenix Contact GmbH & Co, <sup>2</sup>Ostwestfalen-Lippe University of Applied Sciences

P1.9 The Impact of Coating Materials in Coaxial Connectors on Passive Intermodulation .... 9
Jin Qiuyan<sup>1</sup>,<sup>2</sup>, Jinchun Gao<sup>1</sup>, George Flowers<sup>2</sup>, Gang Xie<sup>1</sup>, Xiangwen Wu<sup>3</sup>
<sup>1</sup>Beijing University of Posts and Telecommunications, <sup>2</sup>Auburn University, <sup>3</sup>Forstar S&T Co., Ltd.

P1.10 The Influence of Contaminated Copper Wires on the DC Joule Heating of Connectors ................................................................. 172
Tobias Dyck<sup>1</sup> and Andreas Bund<sup>2</sup>
<sup>1</sup>WAGO Kontakttechnik GmbH & Co, <sup>2</sup>Technische Universitat Ilmenau

SESSION 6: Materials

6.1 Contact Material Solutions for LED Lamp Application ........................................................ 159
Timo Muetzel and Christian Hubrich, Saxonia Technical Materials GmbH

6.2 Study on Cu-W Clad Contact Materials with Arc-less Current Commutation in a Hybrid DC Switch ....................................................................................................................... 166
Mo Chen, Yuta Yamada, Shungo Zen, Nozomi Takeuchi, Koichi Yasuoka, Tokyo Institute of Technology

6.3 A Novel Method Based in Nanotechnology to Replace Traditional Brazing Methods Used to Weld Electrical Contacts .......................................................................................... 172
Perla Rodriguez<sup>1</sup>, Juan Jose Rodriguez<sup>1</sup>, Eduardo Cardenas<sup>2</sup>, 1Siemens SA, 2ITESM-Monterey

6.4 Switching Behavior of Ag/SnO<sub>2</sub> Contact Materials at High Operating Overload Currents ................................................................................................................................. 176
Havva Cinaroglu, Volker Behrens, Thomas Honig, DODUCO GmbH
SESSION 7: DC

7.1 Influence of Arc Discharge on Contact Erosion and Contact Resistance in a Hybrid DC Switch .............................................................. Chomrong Ou, Ryo Nakayama, Shungo Zen, Nozomi Takeuchi, Koichi Yasuoka
Tokyo Institute of Technology

7.2 Influence of Magnetic Flux Density on “Magnetic Blow-out” of Direct Current High Voltage Arc .......................................................... Kiyoshi Yoshida, Koichiro Sawa, Kenji Suzuki
1Nippon Institute of Technology, 2Keio University, 3Fuji Electric FA Components & Systems Co., Ltd.

7.3 DC Arc Properties in a DC Magnetic Field .............................................................. John Shea, Elissa Heckman, José C. Suárez Guevara, Schneider-Electric

7.4 Hybrid Circuit Breaker-based Fault Detection and Interruption in 380V DC Test-setup ................................................................. Christoph Klosinski, Dirk Bösche, Patrick Ross, Nasser G. A. Hemdan, Michael Kurrat, Johann Meisner, Stephan Passon, Alexander Heinrich, Frank Gerdinand
1Technische Universität Braunschweig, 2PTB Physikalisch-Technische Bundesanstalt, 3E-T-A Elektrotechnische Apparate GmbH

SESSION 8: Arcing II

8.1 Numerical Study of Arc Motion Process Considering Ferromagnetic Material in Multiple Parallel Contacts System ................................ Baoliang Zhang, Jianning Yin, Penghe Zhang, Xingwen Li, Qian Wang, Guobin Hou, Xiaofeng Deng
1China Electric Power Research Institute Co., Ltd., 2Xi'an Jiaotong University, 3Xi'an Univ of Technology

8.2 Investigation on Vacuum Arc Dynamics and Discharge Transition Modes under Different Conditions ...................................................... Diego Gonzalez, Sergey Gortschakow, Steffen Franke, Ralf Methling, D. Uhrlandt
Leibniz Institute for Plasma Science and Technology

8.3 Arc Modeling to Predict Arc Extinction in Low Voltage Switching Devices ........................................................... Dongkyu Shin, John W. McBride, IgorO. Golosnoy, University of Southampton

8.4 Emission Currents and Late Restrikes After Switching Capacitors using Vacuum Interrupters ......................................................... Paul G. Slade, Erik D. Taylor, 1Consultant, 2Siemens AG

SESSION 9: Modeling II

9.1 Parameter Study on the Electrical Contact Resistance of Axially Canted Coil Springs for High-current Systems ..................................... Thomas Schrieffer, Maximilian Hofmann, Hubert Rauh, Bernd Eckardt, Martin März
1University of Erlangen-Nuremberg, 2Fraunhofer Institute for Integrated Systems and Device Technology

9.2 Generation of Overvoltages by Chop Current on Ag-WC and Cu-W/WC Contacts in Vacuum .......................................................... Erik Taylor, Klaus Niemeyer, Christian Pietsch, Siemens AG

9.3 On Partial Discharge/Corona Considerations for Low Voltage Switchgear and Controlgear .......................................................... Hans Weichert, Pascal Benz, Nicholas Hill, Michael Hilbert, Michael Kurrat
1Rockwell Automation Switzerland GmbH, 2Technische Universität Braunschweig
SESSION 10: HP Connectors

10.1 The Influence of Peak Current and ECR on the Transmission Performance of High Power Connectors during Faults ................................................................. 254
Toni Israel¹, Stephan Schlegel¹, Steffen Großmann¹, Tom Kufner², George Freudiger²
¹Technische Universität Dresden, ²Stäubli Electrical Connectors AG

10.2 Influence of Oxygen on the Aging of Electrical Joints with One Bare and One Coated Aluminum Contact Member ................................................................. 262
Marcella Oberst, Stephan Schlegel, Steffen Großmann, Technische Universität Dresden

10.3 Recent Findings in the Long-Term and Short Circuit Behavior of Power Connections and their Relevance for Testing ................................................................. 270
Christian Hildmann, Toni Israel, Stephan Schlegel, Steffen Großmann, Technische Universität Dresden

10.4 Effects of High-Speed Signals on Power Integrity ............................................................. 278
Stephen Smith¹, Khushboo Patel¹, Joseph Cin¹, Sedig Agili², Jeffrey Walden³, ¹Amphenol Corporation, ²Pennsylvania State University, ³Walden and Associates EMC/SI RF Consulting

SESSION 11: Fretting

11.1 AC Signal Modulation on Electrical Contacts due to Vibration Induced Fretting Corrosion ........................................................................................................... 286
Sanqiang Ling¹, Haoyue Yang², Xue Zhou¹, Le Xu¹, Donghui Li¹, Sai Wu¹, George Flowers²
¹Harbin Inst of Technology, ²Auburn University, ³Hangzhou Aerospace Electronic Technology Co., Ltd.

11.2 Occurrence and Influence of Fretting Corrosion on Receptacle Contact Resistance ..... 295
Matthias Friedlein, Daniel Gräf, Fabian Raiser, Andreas Jaumann, Jörg Franke
Friedrich-Alexander-University

11.3 The Effects of Relative Humidity on the Fretting Wear Behavior of Silver-plated Electrical Contacts ............................................................................................ 302
Florent Pompanon¹, Siegfried Fouvry¹, Olivier Alquier², ¹Ecole Centrale de Lyon, ²PSA Groupe

11.4 A Modification of the Calculation Model for the Prediction of the Wear of Silver-Coated Electrical Contacts with Consideration of Third Bodies ............... 310
Haomiao Yuan, Jian Song, Vitali Schinow, Ostwestfalen-Lippe University of Applied Sciences

SESSION 12: Safety

12.1 Innovative Safety Concept to Shutdown Short Circuit Currents in Battery Systems Up to 1000V Based on Ultrafast Pyrofuse Technology .................................................. 317
Peter Lell¹ and Dieter Volm², ¹PyroGlobe GmbH, ²Panasonic Electric Works Europe AG

12.2 Influence of Perturbations Produced by Electromagnetic Interference (EMI) in Arc Fault Detection ............................................................................................... 323
Edwin Calderon, Patrick Schweitzer, Christophs Bonnet, Serge Weber, Lorraine University

12.3 Simulation of Arcing Fault in PV Panel Network .............................................................. 329
Jonathan Andre¹, D. Jung¹, Patrick Schweitzer², Benjamin Vidales², Edwin Calderon², Serge Weber²
¹Esterline Power Systems, ²Lorraine University

12.4 Series Arc Fault Detection using Novel Signal Processing Technique .......................... 335
Manaf Atharparvez and Kedar Purandare, Larsen and Toubro Limited
SESSION 13: HS Connectors - Passive Intermodulation

13.1 The Impact of Electrical Contact Degradation on Differential Signal Transmission of High Speed Channel ................................................................. 340
Ziren Wang¹, Jinchun Gao¹, George Flowers², Gang Xie³, Rui Ji¹
¹Beijing University of Posts and Telecommunications, ²Auburn University

13.2 Statistical Passive Intermodulation Behavior on Coaxial Connector .............................. 347
Xiong Chen¹, Keyue Zhang¹, Y onging He¹, Wanzhao Cui², Songchang Zhang¹, Y aojiang Zhang³
¹X i’an Jiaotong University, ²China Academy of Space Technology, ³Global Compliance & Testing Center

13.3 Study of Metal Contact Resistance and its Statistical Correlation with Passive Intermodulation .................................................................................................................... 353
Songchang Zhang, Xiaolong Zhao, Fan Gao, Y onging He, X i’an Jiaotong University

SESSION 14: MEMS

14.1 The Influence of Circuit Parameters on Molten Bridge Surface Degradation in a Au/MWCNT MEMS Switch Contact .................................................................................. 359
Thomas. G. Bull, John W. McBride, and Liudi Jiang, University of Southampton

14.2 Investigation of the Static Electrical Contact Behaviors of Rod and Spring for Micro-electromechanical-relay ............................................................................................ 366
Chao Zhang¹, Wenbo Fan², Wanbin Ren³, Fubiao Luo²
¹Harbin Institute of Technology, ²G&A Electronics Ltd. Co.

14.3 On the Melting of Ohmic-Heated Nanowires and Electrical Contacts ............................ 373
Roland S Timsit, Timron Scientific Consulting Inc.

POSTER SESSION 2

P2.1 A Phenomenological Model of Vibrations Transfer in Connectors for Fretting Corrosion Phenomena .......................................................................................................... 381
Erwann Carvou¹, J. Labbé¹, L. Le Marrec¹, C. Plouzeau², F. Le Strat²
¹Université de Rennes, ²Renault DEA-TCM

P2.2 Evaluation and Comparison of the Arc Erosion Characteristic of Ag/SnO₂/In₂O₃ Contact Materials Used for an Automotive Relay ............................................................. 387
Lei Yi¹, Ningyi Lu², ¹Xiamen Hongfa Electroacoustic Co., Ltd., ²Zhejiang University

P2.3 Study on V-I Characteristic in Natural Graphite Brush vs Steel Slip-Ring System ...... 393
Yuki Amada¹, Koichiro Sawa¹, Takahiro Ueno¹, Noboru Morita²
¹Nippon Institute of Technology, ²Motor & Carbon Brush Lab. Co. Ltd.

P2.4 Study on Friction and Wear of Sliding Electrical Contact of Pantograph-catenary System under Fluctuating Compressive Load ............................................................. 399
Zhonghua Chen, Guojun Sun, Guang Shi, Lichuan Hui, Liaoning Technical University

P2.5 Internal Arc Fault Simulation in Medium Voltage Panel for Thermal and Structural Withstand ........................................................................................................................... 405
Parkash Kumar, Amol Kale, Abhimanyu Kumar Singh, Mahesh Ranade, Larsen & Toubro Ltd.

P2.6 Mechanical Wear and Arc Erosion of Brush and Commutator in DC Motor for Automotive Fuel Pump ................................................................. 412
Koichiro Sawa, Y oshitada Watanabe, Takahiro Ueno, Nippon Institute of Technology
P2.7 Refined Fault Detection in LVDC-Grids with Signal Processing, System Identification and Machine Learning Methods ................................................................. 418
Christian Strobl1, Leopold Ott2, Julian Kaiser3, Kilian Gosses3, Maximilian Schäfer3, Rudolf Rabenstein3
1Elektrotechnische Apparate GmbH, 2Fraunhofer Institute for Integrated Systems and Device Technology, 3Friedrich-Alexander-Universität Erlangen

P2.8 Effect of Lubrication on DC and RF Electrical Endurance of Gold Plated Contacts Subjected to Fretting Wear .......................................................... 426
Olivier Gratton1, Siegfried Fouvry1, Richard Enquebecq2, Laurent Petit2
1École Centrale de Lyon, 2Radiall

P2.9 Theoretical and Experimental Work on Optimal Contact Geometries for Fast Mechanical Disconnect Switches ......................................................... 24
Tushar Damle and Lukas Graber, Georgia Institute of Technology

P2.10 Improved Microcontact Testing Fixture for Efficient Reliability and Performance Characterization .................................................................................. 31
Protap Mahanta and Ronald Coutu, Marquette University

SESSION 15: Sliding Contacts

15.1 The Effect of Running Speed of High Speed Trains on the Surface Erosion of Pantograph Strip under Pantograph Arc ............................................. 434
Guoqiang Gao, Pan Xu, Wenfu Wei, Zefeng Yang, Guangning Wu, Southwest Jiaotong University

15.2 Characteristics of Sliding Electric Contact between Couples of Carbon and Metal Materials .................................................................................. 439
Wenfu Wei, Zefeng Yang, Guangning Wu, Southwest Jiaotong University

Paper withdrawn ........................................................................................................................................................................... N/A

15.3 Characterization of Nanocomposite Graphene/Polymer Films for Electrical Contact Applications ........................................................................... 448
Yoan Bourlier1, Sophie Noel1, Pascal Vie1, Aurore Brérizard-Oudot1, Pascal Chrétien1, Anthony Franchini3, Antoine Faures Karam3, 1Université Paris-Sud, 2Centre d'Etudes de Saclay, 3Amphenol-ICC

SESSION 16: Testing

16.1 Evaluation of Degradation Degree of Plated Base Metal Contacts by Impedance Measurement .............................................................................. 456
Yasuhiro Fukuyama1, Jun Toyoizumi2, Yoshitaka Itou2, Takaya Kondo2, Nobu-Hisa Kaneko1
1National Institute of Advanced Industrial Science and Technology, 2Yazaki Parts Co., Ltd.

16.2 Investigation on the Thermal Failure Evaluation of Load-Sharing Connectors ............ 460
Ruoyu Wang, Liangjun Xu, Yilin Zhou, Beijing University of Posts and Telecommunications

16.3 Accelerated Testing of Electromechanical Connectors Considering Thermal and Mechanical Loads ................................................................. 467
Jian Song, Haomiao Yuan, Christian Koch, Ostwestfalen-Lippe University of Applied Sciences

16.4 Pitfalls in Environmental Endurance Testing of Electrical Connectors – Problem Overview and Discussion ......................................................... 475
Lena Sjögren1, Tag Hammam1, Åsa Kassman Rudolph2, 1Swerea KIMAB, 2Uppsala University
SESSION 17: Arcing III

17.1 Breaking Performance of a Novel DC Contactor Concept ....................................................... 483
   Erik Johansson, Anna Andersson, Gunnar Johansson, Mats Johansson, ABB AB

17.2 An Experimental Investigation of Dynamic Welding Mechanism of Contacts
   Used in Low Current Switching Devices .................................................................................. 488
   Xu Zhang¹, Zhe Zheng¹, Wanbin Ren¹, Zhefeng Zhou²
   ¹Harbin Institute of Technology, ²G&A Electronics Ltd. Co.

17.3 Simulation of Electrode Erosion under DC Air Arc ............................................................... 495
   Yunkun Deng¹, Yi Ma², Dada Wang², Yihong Wu³, Xiaofeng Deng¹, Guobin Hou³, Xingwen Li³
   ¹Yunnan Power Grid Corp, ²Yunnan Electric Power Grid Research Institute, ³Xi’an Jiaotong University

17.4 Partial Discharges in Low Voltage Switchgears at Elevated Temperatures ....................... 501
   Karsten Fuchs¹, Frank Berger¹, Heribert Schorn²
   ¹Technische Universität Ilmenau, ²Institute for International Product Safety GmbH

SESSION 18: Relays

18.1 Study on Conducted Electromagnetic Interference of DC SSR Based on
   Synthesizing Modeling Method .............................................................................................. 507
   Le Xu¹, Sanqiang Ling¹, Qiang Li², Xueyong Chen¹, ¹Harbin Institute of Technology, ²China Academy
   of Launch Vehicle Technology, ³Avic Jonhon Optron Technology Co., Ltd.

18.2 Overload Capacity Experimental Research and the Improved Design Method
   for the Contact System of an SSER ...................................................................................... 512
   Bo Li¹, Yang Wu², LingLing Pan³, Jiaxin You³, Xu Tan³, Huimin Liang²
   ¹China Telecom Co. Ltd, ²Harbin Institute of Technology, ³Nanjing University of Science and
   Technology, ⁴ShaanXi QunLi Electric Co. Ltd.

18.3 A Study on Growth of Dust of Needle-Like Crystal from a Flame Retarder of
   Electromagnetic Relay Housing ............................................................................................ 516
   Kazuaki Miyanaga, Satoshi Matsumoto, Katsuyuki Takahashi, Shailendra Kumar Shah, Fumio Takei,
   Akihiko Nakamura, Yoshinori Kurata, Fujitsu Component Limited

18.4 Contact Voltage Drop and Brush Wear Characteristics for Various Silver
   Content of the Silver Graphite Brush in Slip Ring System ................................................... 521
   Naoki Fukuda, Koichiro Sawa, Takahiro Ueno
