SPE Thermal Well Integrity and Design Symposium 2018

Banff, Canada
27 - 29 November 2018

ISBN: 978-1-5108-7748-1
TABLE OF CONTENTS

SESSION 2: CASING AND CONNECTIONING INTEGRITY AND DESIGN

Structural Reliability Study of OCTG Casing and Connections for Thermal Wells ................................................................. 1
   Khan, Mohammad Sayed; Hamilton, Andrew
Post Yield Strain Fatigue Experiments to Validate Low Cycle Methodology for Tubular and Connections ................................................................. 16
   Krishna, Shree; Milligan, Ryan; George, Ken; Krishnamurthy, Ravi M.; Powers, Jim; Kremer III, John
Unified Basis for Thermal Casing/Connection System Design ................................................................. 33
   Dall’Acqua, Daniel; Chartier, Mark; Nowinka, Jaroslaw; Meijer, Garret

SESSION 3: DIAGNOSTICS AND WELL INTEGRITY REMEDIATION AND REPAIRS

SAGD Production Casing Failure Diagnosis and Repair ................................................................................................................................. 63
   Plaxton, Bill; Pehlke, Trent; Baxter, Dennis; Crockett, Matt; Kaiser, Trent
Three-Stage SAGD Liner Intervention to Remediate a Liner System Using Concentric Coiled Tubing	Jet Pump Technology ................................................................................................................................. 78
   Winkler, Steven; Luebke, Garrett; Jensen, Camille; Cross, Ryan; Bradshaw, Torrie
Increase Exposed Bitumen Reserves by Optimizing Wellbore Placement in Oil Sands with Extra-Deep Azimuthal Resistivity LWD Service ................................................................................................................................. 92
   Vetsak, Aleksandr; Jablonski, Bryce
CT Diagnosis of Well Trajectory and Completion Decision Guidance for SAGD Paired Horizontal Wells ................................................................................................................................. 102
   Chen, Xun; Sun, Shouguo; Tong, Deshui

SESSION 4: CEMENT DESIGN

Design and Application of a New High Performance Lightweight Thermal Cement ................................................................................................................................. 107
   Taylor, Jared; Iremonger, Simon

SESSION 5: FLOW CONTROL DEVICES AND SAND CONTROL I

Flow Control Devices in SAGD - A System-Based Technology Solution ................................................................................................................................. 120
   Burke, Lyle; Ghazar, Claude
Material Selection for Thermal Inflow Control Device Manufacturing to Minimize the Silica and Calcium Carbonate Scaling Potential ................................................................................................................................. 132
   Qiu, Xiaoyong; Pan, Minfei; Gong, Lu; Huang, Jun; Mahmoudi, Mahdi; Sabbagh, Reza; Fattahpour, Vahidoddin; Sutton, Colby; Luo, Jing-Li; Zeng, Hongbo
Impact of Anisotropic Stresses on the Slotted Liners Performance in Steam Assisted Gravity Drainage Process ................................................................................................................................. 140
   Wang, Chenxi; Pang, Yu; Montero, Jesus; Haftani, Mohammad; Fattahpour, Vahidoddin; Mahmoudi, Mahdi; Nouri, Alireza
Experimental Assessment of Wire-Wrapped Screens Performance in SAGD Production Wells ................................................................................................................................. 151
   Montero Pallares, Jesus David; Wang, Chenxi; Haftani, Mohammad; Pang, Yu; Mahmoudi, Mahdi; Fattahpour, Vahidoddin; Nouri, Alireza

SESSION 6: COMPLETIONS – SAGD AND BEYOND

Experience with the Vacuum Insulated Tubing VIT Utilization at Gas Fields in the Northern Part of Western Siberia ................................................................................................................................. 164
   Belomestnov, Alexander; Marchenko, Kirill; Melnikov, Igor
Thermodynamic Analysis of a Modified Autonomous Flow Control Device for SAGD Sub-Cool Management ................................................................................................................................. 177
   Konopczynski, Michael
SAGD Circulation Phase: History-Match of Field Data in Lloydminster Reservoir using a Discretized Thermal Wellbore Modelling Simulator .......................................................... 193

Ayala, Daniel; Gates, Ian

SAGD Circulation Phase: Thermal Efficiency Evaluation of Five Wellbore Completion Designs in Lloydminster Reservoir ............................................................... 205

Ayala Rivas, Daniel; Gates, Ian

SESSION 7: FLOW CONTROL DEVICES AND SAND CONTROL II

Optimization of Placement of Flow Control Devices under Geological Uncertainty in Steam Assisted Gravity Drainage .......................................................... 222

Nejadi, Siavash; Hubbard, Stephen M.; Shor, Roman J.; Gates, Ian D.; Wang, Jingyi

Staged Risk-Based Approach for Assessing Erosion Resistance of SAGD Flow Control Devices ............................................................... 234

Prasad, Shawn; Zahacy, Todd

Visualization of Fines Migration in the Flow Entering Apertures through the Near-Wellbore Porous Media ............................................................... 261

Ansari, Shadi; Yusuf, Yishak; Kinsale, Lisa; Sabbagh, Reza; Nobes, David S.

SESSION 8: THERMAL LINER DESIGN AND INTEGRITY

On Subcool Control in the SAGD Producers. Part II: Localized Hot Spots Effects and Optimization of Flow-Control-Devices ............................................................... 271

Irani, Mazda

Standalone Sand Control Failure: The Role of Wellbore and Near Wellbore Hydro-Thermo-Chemical Phenomenon on the Plugging and the Flow Performance Impairments of the Standalone Sand Screen ............................................................... 299

Mahmoudi, Mahdi; Roostaei, Morteza; Fattahpour, Vahidoddin; Uzcatequi, Alberto; Cyre, Jeff; Sutton, Colby; Fermariuk, Brent

Addressing Thermal Loading Uncertainties for Liner Design ............................................................... 326

Chartier, Mark A.; Miller, Samantha M.; Kaiser, Trent M. V.

SESSION 9: WELL DESIGN FOR PRODUCTION OPTIMIZATION

Reducing Operational Cost and Accelerating Oil in a Thermal Field with Cyclic Steam Stimulation Operation in South Oman ............................................................... 344

Mahrazy, Khalfan; Alwazeer, Abdullah; Salhi, Khalid

An Experimental Investigation into the Sand Control and Flow Performance of the Remedial Tubing Deployed Scab Liners in Thermal Production ............................................................... 353

Fattahpour, Vahidoddin; Mahmoudi, Mahdi; Roostaei, Morteza; Nolan, Patrick; Sutton, Colby; Fermariuk, Brent
