# TABLE OF CONTENTS

## VOLUME 1

### U401 – AEROSPACE DIVISION TECHNICAL SESSION

- Engaged Student Learning in Dynamics of Flight and Control Classes ................................................................. 1  
  - Shawn S. Keshmiri, Aaron Blevins, A Ram Kim
- Impact of an Authentic Environment on Learning of Math and Science ............................................................... 10  
  - Chadia A. Aji, M. Javed Khan
- Impact of Programming Robots and Drones on STEM Attitudes ........................................................................... 21  
  - M. Javed Khan, Chadia A. Aji
- Development of a Virtual Reality Flight Simulator to Assist in the Design of Original Aircraft ......................... 28  
  - Dominic M. Halmier, John A. Voth, Connor A. McCain, Jordan David Reutter, Nathaniel Shuy Fraley, Matthew Samuelson, David Ahrens

### U402 – ARCHITECTURAL DIVISION TECHNICAL SESSION

- Advancing Critical Building Code Education through Modularized Lectures ......................................................... 46  
  - Ryan L. Solomsky
- Current Trends in Architectural Engineering Education .......................................................................................... 57  
  - John J. Phillips
- Teaching a Methodology Towards a Sustainable, Affordable 3-D-printed House: Heat Transfer and Thermal-Stress Analysis .................................................................................................................. 69  
  - Ahmed Cherif Megri, Ismail Megri, Sameer Hamoush, Taher M. Abu-Lebdeh
- LEED® Lab™: Which Compliance Path is Best for Your University? ................................................................. 86  
  - Janet Fick, James W. Jones

### U4112B – PERSPECTIVES ON DIVERSITY, EQUITY, AND INCLUSION BEYOND THE UNDERGRADUATE YEARS

- Isolation, Microaggressions, and Racism: Black Engineers in Technology Companies ........................................... 92  
  - Francesca Dupuy, Elliot P. Douglas, Paul G. Richardson
- Native Hawaiians in Engineering: A Path to the Professoriate .............................................................................. 105  
  - Trang Thi Nguyen, Oceana Puananilei Francis, Scott F. Miller, Donna Kuehu, Kapena MeLean, Joshua Lelemia Irvine, Nicholas R. Iwau
- The Career Pathways of Non-tenure-track Full-time Engineering Faculty ..................................................... 121  
  - Cliff Fitzmorris, Deborah A. Trytten, Randa L. Shehab
- The American Society of Civil Engineers’ Canon 8: Codifying Diversity as Ethics ........................................... 137  
  - Canek Moises Luna Phillips, Yvette E. Pearson, Lisa M. Black, Quincy G. Alexander

### U413A – STUDIES IN ENGINEERING DESIGN

- An Experiential Learning Framework for Improving Engineering Design, Build, and Test Courses .................. 149  
  - May-Ling Tan, Jamalladin Haran
- Methods to Study Elements of the Instructional Scaffolding Strategy Model for Enhancing Engineering Students’ Knowledge Construction in an Online Social Collaborative Learning Environment .................................................. 174  
  - Nicky Wolmarans, Jennifer M. Case
- Understanding Complexity: A Model for Characterizing a Sequence of Design Projects ................................... 209  
  - Mark W. Blanchard, Jennifer M. Case
- Quantifying Differences Between Professional Expert Engineers and Engineering Students Designing: Empirical Foundations for Improved Engineering Education ....................................................... 225  
  - Mo Ha, Tripp Shealy, John S. Gero
- Neuro-cognitive Differences Among Engineering Students when Using Unstructured, Partially Structured, and Structured Design Concept Generation Techniques .................................................. 240  
  - Mo Ha, Tripp Shealy, John S. Gero
- Mapping as Design Thinking: Can GIS Help Engineering Students Approach Design? ................................... 255  
  - Jessie Marshall Zarazaga

### U413B – UNDERSTANDING STUDENT DEVELOPMENT IN DESIGN

- Improving an Online STEM Course through Quality Matters Certification - A Case Study ................................... 279  
  - Hong Wang
- Integration of a Highway Fill Embankment Case Study in Engineering Design Courses for Instructional Improvement ................................................................. 289  
  - Jiliang Li, Nuri Zeytingolgu, Massoud Mojtahed, Matthew William Wood, Ikechukwu I Nnachi
Entrepreneurship Course Sequence and non-CS Undergraduates

Detecting Current Job Market Skills and Requirements Through Text Mining

..........................................607

Industrial Engineering Outreach to K-12 Community

..............................................................................................................................595

A New Industrial and Systems Engineering Program: Benchmarking Results to Determine What and Why

U429 – IED TECHNICAL SESSION: PREPARING PROGRAMS FOR THE FUTURE

A New Industrial and Systems Engineering Program: Benchmarking Results to Determine What and Why ..........................................................570

Kate D. Abel

A Systems Approach to Accredited Program Accountability in Regional Universities ...........................................................................................................579

David Elizandro, David H. Huddleston

Industrial Engineering Outreach to K-12 Community ........................................595

A Systems Approach to Accredited Program Accountability in Regional Universities

..............................................579

David Elizandro, David H. Huddleston

Industrial Engineering Outreach to K-12 Community ........................................595

Anuj Mittal, Sriram Sundararajan, D. Raj Raman, Caroline C. Krejci

Curriculum and Specializations Framework to Address Skills Required by Manufacturing Companies ..............................................................607

Nabeel Yousef, Ron Eaglin

Detecting Current Job Market Skills and Requirements Through Text Mining ........................................................................................................616

Houshang Darabi, Fazle Shahnawaz Muhibul Karim, Samuel Thomas Harford, Elnaz Douzali, Peter C. Nelson
U433A – PCEE EVALUATION STUDIES

A Successful Pre-college Nanotechnology Experience for Low-income Students (Evaluation) ................................................................. 632
Cristina D. Pomales-Garcia, Oscar Marcelo Suarez, Agnes M. Padovani, Jaqueline Estor Aviles

Improving Spatial Visualization Abilities Using 3D Printed Blocks ........................................................................................................... 646
Vanessa Lebow, Michelle L. Bernhardt-Burry, Jyotishka Dutta

The Effect of the Project Lead the Way Program on Students’ Spatial Visualization Skills (Evaluation) ..................................................... 661
Jamie R. Gurganus, Elise Hilt, Anne Marie Spence

U433B – PROFESSIONAL DEVELOPMENT FOR TEACHERS AND COUNSELORS

’Helped Me Feel Relevant Again in the Classroom’: Longitudinal Evaluation of a Research Experience for a Teachers’ Program in Neural Engineering (Evaluation) ................................................................................................. 674
Kristen Clapper Bergsman, Jill Lynn Weber, Eric H. Chudler

VOLUME 2

A Study of the Attitudes and Practices of K-12 Classroom Teachers who Participated in Engineering Summer Camps (Evaluation) ........................................................................................................................ 709
Amber L. M. Kendall, Laura Bottomley, Susan Beth D’Amico

Professional Development for High School Guidance Counselors to Facilitate Pre-college STEM Preparation (RTP) .................................................. 725
Richard A. Gearn, Angela M. Kelly, Monica Bugallo

U434B – DIVERSITY AND INCLUSION: CONCEPTS, MENTAL MODELS, AND INTERVENTIONS

Dimensions of Diversity in Engineering: What We Can Learn from STS ........................................................................................................ 738
Toluwalogo Ohimose, Sean Ferguson, Rider W. Foley, Kathryn A. Neeley, Caitlin Donahue Wylie, Sharon Tsai-Hsuan Ku, Rosalyn W. Bumey

Diversity and Inclusion in Engineering: Students’ Perceptions of Learning and Engagement with Difference ............................................. 754
Sean M. Eddington, Carla B. Zolotowski, Andrew O. Brightman, Ruchu Joshi, Patrice Marie Bazzanelli, David Torres

How Theater Can Promote Inclusive Engineering Campuses ...................................................................................................................... 767
David Dibiasio, Kristin Boudreaux, Paula Quinn

Active Learning Group Work: Helpful or Harmful for Women in Engineering? ..................................................................................... 791
Megan Keogh, Malinda S. Zarske, Janet Y. Tsai

U434C – LEARNING OUTCOMES AND PEDAGOGICAL STRATEGIES: PROBLEMS OF ALIGNMENT

Preparing Today’s Engineering Graduate: An Empirical Study of Professional Skills Required by Employers ........................................... 807
Robert Graham, Tobin Porterfield

Faculty Perceptions of the Most Effective Settings and Approaches for Educating Engineering and Computing Students About Ethics and Societal Impacts ......................................................................................... 825
Madeline Polmear, Angela B. Bielefeldt, Daniel Knight, Nathan E. Cunney, Chris Swan

A Broader Look at The Role of Andragogy in Engineering Education ........................................................................................................ 846
Richard Melnych, Brian J. Novoselich, Gregory Martin Freisinger

U445B – ENGINEERING PHYSICS AND PHYSICS DIVISION TECHNICAL SESSION 3

A Size and Scale Laboratory Experiment for Introductory Nanotechnology ............................................................................................... 864
Scott Alexander Kaiser, Reza Kamali, Paul Weber, Afsaneh Minaie

Towards a Full Integration of Physics and Math Concepts: The Path Full of Traps ..................................................................................... 891
Angeles Dominguez, Iztel Hernandez-Armenta, Jorge Eugenio De La Garza Becerra

Voices of the Millennial Generation: Connections Between Physics, Scientific Literacy and Attitudes towards Future Space Exploration ........................................................................................................... 901
Danielle Roslyn Montecalvo, Teresa L. Larkin

U448 – SYSTEMS ENGINEERING TECHNICAL SESSION 1: COURSE DESIGN & SE COMPETENCIES

Design and Development of an Auto-fetch Dog System Using a System Engineering Approach in an Electrical Engineering Master’s Capstone Course........................................................................................................ 926
John M. Santiago Jr., Jing Guo

From Technology Elaboration Toward Application Innovation: An Instructional Transformation in a Project-oriented Capstone Course of Dynamic Control Systems ........................................................................................................ 942
Kuan-Yu Chou, Yon-Ping Chen, Sunny S. J. Lin, Chao-Yang Cheng

</table>
U521 – ENGINEERING LIBRARIES DIVISION TECHNICAL SESSION 2

Reinforcing Information Fluency: Instruction Collaboration in Senior Capstone Laboratory Course ................................................................. 1234
William W. Tsai, Amber Janssen Mit

Innovative Uses of Social Media in Information Literacy Education, Library Outreach, and User Engagement: An International Perspective ................................................................. 1265
Qing Li

Using a Flipped Lesson to Improve Information Literacy Outcomes in a First-year Design Class ................................................................. 1278
Brianna B. Buljung, Leslie Light

Understanding the Significance of Integrating Codes and Standards into the Learning Environment ................................................................. 1291
Virginia Charter, Bryan Lawrence Hostine, Samuel B. Montgomery

U523 – ET PEDAGOGY I

A Learning-centered Educational Paradigm: Case Study on Engineering Technology Students’ Design, Problem-solving, Communication, and Group Skills ................................................................. 1307
Rustin Webster

Integrating Statistical Methods in Engineering Technology Courses ......................................................................................................................... 1326
Sanjeevi Chitikeshi, Jake Hildebrant, Otilia Popescu, Orlando M. Ayala, Vukica M. Jovanovic

An Engineering Technology Course in Additive Manufacturing ......................................................................................................................... 1340
Christopher David Lablanc, Donald J. Plante

Identifying Classroom Management Strategies by Focusing on Diversity and Inclusion ................................................................. 1351
Mohammad Moin Uddin, Keith V. Johnson

U524 – ENTREPRENEURSHIP & ENGINEERING DIVISION TECHNICAL SESSION 2

The Entrepreneurial Engineer: A Quantitative Analysis of Personality Factors in the Social Cognitive Career Theory ................................................................. 1359
Leon Sceli, Shannon Katherine Gilmartin, Helen L. Chen, Sheri Sheppard

Kathryn A. Neeley, Bernd Steffensen

VOLUME 3

Is Someone in Your Family an Entrepreneur?: Examining the Influence of Family Role Models on Students’ Entrepreneurial Self-efficacy and its Variation Across Gender ................................................................................................. 1423
Prateek Shekhar, Aileen Huang-Saad, Julie Libarkin, Anastasia Katharine Ostrowski

Curious About Student Curiosity: Implications of Pedagogical Approach for Students’ Mindset ......................................................................................................................... 1437
Margot A. Vigeant, Michael J. Prince, Katharyn E. K. Notis, Amy Frances Golightly

Entrepreneurial Mindset (EML) Modules for Chemical Engineering Courses ......................................................................................................................... 1447
Noelle K. Comolli, Jacob James Elmer

U530 – COMPUTING RESEARCH

The Research Experience for Undergraduates (REU) Principal Investigators (PI) Guide: Development of a Best Practices Website ......................................................................................................................... 1458

Undergraduate Research: Introducing Deep Learning-based Image Classification to Undergraduate Students ......................................................................................................................... 1466
Deng Cao, Cadance Lowell, Augustus Morris

U533A – PCEE BIOMEDICAL ENGINEERING

IBBME Discovery: Biomedical Engineering-based Iterative Learning in a High School STEM Curriculum (Evaluation) ......................................................................................................................... 1475
Locke Davenport Huyer, Neal I. Callaghan, Rami Saab, Daniel Smieja, Andrew Elfat, Dawn M. Kilkenny

Individual- and Group-level Effects on Learning During Engineering Design Tasks in High School Biology (Fundamental) ......................................................................................................................... 1492
Martina Nieswandt, Elizabeth McEneaney

NeuroBytes: Development of an Integrative Educational Module Across Neurophysiology and Engineering (Evaluation) ......................................................................................................................... 1508
Isabel Maria Gossler, Vignesh Sabhian, J. Jill Rogers

Teaching Fundamentals in Lasers and Light Technology to Advanced Applied Optics in Biology and Biomedical Research: Analyzing the Team-teaching Influence on High School Students’ Perception of and Confidence in STEM ......................................................................................................................... 1525
Vahideh Abdolazimi, Jared Andrew Ruddick, Jessica S. Ward, Adam K. Fontecchio, Richard Edward Giduck
U533B – TEACHER ATTITUDES, BELIEFS, & SELF EFFICACY

Assessing High School Science Teachers’ Nature of Engineering (NOE) Perceptions with an Open-ended NOE Instrument (Fundamental) .................................................................1535
Erin Berbergs, Erica J. Marti, Erdogun Kayta, Hazan Deniz, Ezgi Yesilyurt, Johanna Rgyestar

Engineering Design Professional Development as a Mechanism for Changing Science Teachers’ Beliefs (Fundamental) ..................................................................................................................1570
Tamara J. Moore, Siddika Selcen Gaczy, Amanda C. Johnston, Murat Akarsu, Peter Wesley Odom, Maurina Loren Aranda, Richard Lie

Investigation of Pre-Service Teacher Self-Efficacy for Teaching Engineering .................................................................................................................................1585
Jessica Lauren Sergent, Beth M. Holloway, Susan R. Bayley, Anna Verónica Walter

K-5 Teachers’ Perceptions of Engineering Education and Perceived Barriers to Teaching Engineering ........................................................................................................................1602
Rebekah J. Hammack

U534A – COMMUNICATING ACROSS CULTURAL AND EPISTEMOLOGICAL BOUNDARIES

Engineering/Design Frictions: Exploring Competing Knowledge Systems via Efforts to Integrate Design Principles into Engineering Education ..................................................................................................................1619
Dean Niesmza

From 'Empathic Design' to 'Empathic Engineering': Toward a Genealogy of Empathy in Engineering Education ..............................................................................................................................1635
Xiaofong Tang

Where’s My Code? Engineers Navigating Ethical Issues on an Uneven Terrain .................................................................................................................................1648
Cindy Rottmann, Doug Reeve, Robin Sacks, Mike Klassen

Reimagining Energy: Deconstructing Traditional Engineering Silos Using Culturally Sustaining Pedagogies ..............................................................................................................................1665
Gordon D. Hoople, Joel Alejandro Mejia, Diana A. Chen, Susan M. Lord

U534B – DESIGN, ASSESSMENT, AND REDISING OF WRITING INSTRUCTION FOR ENGINEERS

Examining Engineering Writing Instruction at a Large Research University Through the Lens of Writing Studies ...............................................................................................................................1679
John T. Yoritomo, Nicole Turnipseed, S. Lance Cooper, Celia Mathews Elliott, John R. Gallagher, John S. Popovics, Paul Prior, Julie L. Zilles

Satisfaction: Intrinsic and Extrinsic Motivation in Engineering Writing Coursework .................................................................................................................................1701
Stephanie Pulford, Jiahui Tan, Michael Raymond Gonzalez, Amanda Model

Beyond Drag and Drop: Balancing Experience and Innovation in Online Technical Communication Course Development ..............................................................................................................................1721
Jessica Livingston, Sarah Summers, Mary Jane Szabo

Technical Communication Across the ME Curriculum at Rose-Hulman .................................................................................................................................1734
Rebecca Bercich, Sarah Summers, Philip Cornwall, James Mayhew

U548 – SYSTEMS ENGINEERING DIVISION TECHNICAL SESSION 2: SE APPLICATIONS

Application of DEJI® Systems Engineering Model in the Development of a New Faculty Mentoring Program in Higher Education ..............................................................................................................................1744
Sharon Claxton Bommer, Alice E. Grimes, Adefeji B. Badiri

Mission Engineering Competencies .................................................................................................................................1755
Nicole A. C. Hutchison, Sergio Luna, William D. Miller, Hoong Yan See Tao, Dinesh Verma, Gregg T. Yesonnder, Jon Patrick Wade

M2105 – NSF GRANTEES POSTER SESSION

Towards a National Agenda for Broadening the Participation of African Americans in Engineering and Computer Science: Insights from Year 1 ..............................................................................................................................1771

A Case Study of Community College Transfer and Success in a 2+2 Program .................................................................................................................................1776
Kathleen Affano

A Conceptual Model for Engineering Major Choice .................................................................................................................................1792
Joyce B. Main, Xinrui Xu, Alexandra Marie Dukes

Jill Davishahl, Xichen Jiang, Sean P. Dever, Lindsey Bear, Tim Mark Christman, Dana Hickenbottom, Sam Winters

A Multidisciplinary Approach to Support Undergraduate Students and Improve Retention and Success .................................................................................................................................1816
Heather Shipley, Rena Bizios, Krystal Castillo

A Multidisciplinary Professional Development Program that Shifts Faculty Attitudes and Practice Toward Evidence-Based Instructional Strategies (EBIS) for Teaching and Learning .............................................................................................................................1822
Stephen J. Krause, Eugene Judson, Keith D. Hjelmstad, James A. Middleton, Robert J. Culbertson, Casey Jane Ankeny, Ying-Chih Chen, Lydia Ross, Lindy Hamilton Mayled, Kara L. Hjelmstad

A New Approach to Collaboration: A Partnership between an NSF-funded Engineering Research Center and a Liberal Arts College ...............................................................................................................................1837
Mary Roth, Laurie F. Castlake
A Rolling Stone: Evaluation of one NSF S-STEM Program through Successive Grant Periods ........................................ 1844

Scott Steinbriink, Karinna M. Vernaza, Barry J. Brinkman, Lin Zhao

A Simple Soc Platform for the Integrated Computer Engineering Lab Framework ...................................................... 1858

Pong P. Chu, Chunsu Yu, Karla R. Hamlen

A Virtual Community of Practice to Promote LGBTQ Inclusion in STEM: Member Perceptions and Community Outcomes ...................................................... 1868

Stephanie Farrell, Rocio C. Chavela Guerra, Alexandra Longo, Rossen Tsanov

A Research Experience for Undergraduates (REU) Program Coupling Energy-related Research with Training in Entrepreneurship ...................................................... 1884

Adam T. Melvin, Mike Benton

Advanced Manufacturing Research Experiences for High School Teachers: Effects on Perception and Understanding of Manufacturing ...................................................... 1893

Debapriyo Paul, Bimal P. Nepal, Michael Johnson

Algæ City - An Interactive Serious Game ...................................................... 1904

Ying Tang, Kauser Jahan, Kevin B. Trinh, Gena Gizi, Nathan Lamb

Algebra-Related Misconceptions Identified in a First-Year Engineering Reasoning Course ...................................................... 1916

An Ecosystem for Success in Engineering and Computer Science ...................................................... 1921

Horacio Vasquez, Virgil U. Pierce, Stephen W. Crown, Arutuo A. Fuentes

An Instructional Framework for the Integration of Engineering into Middle School Science Classrooms ................. 1931

Christina L. Baize, Todd L. Hutner, Richard H. Crawford, Victor Sampson, Lawrence Chu, Stephanie Rivalle, Hannah Smith Brooks

An S-STEM Project for Improving Undergraduate Engineering Education ...................................................... 1950

Yong Fang, Siqi McNeill, Robert Spall, Paul Barr

An Exploration of the Diverse Stories of Engineering Students at Community Colleges: Findings from Year One .............. 1957

Audrey Boklage, Nadia N. Kellam, Anna Montiana Cirell, Brooke Charae Coley

Assessing the Modular-based Digital Forensics Game for Entry Level Students ...................................................... 1968

Yin Pan, Michael Yucci, Sumita Mishra

Building a Networked Improvement Community (NIC) around Engaging Minority Males in STEM ......................... 1980

Building an Infrastructure to Enhance and Sustain the Success of STEM Majors Who are Commuting Students ........... 1991

Jesús Sánchez Libí

Allison Godvin, Dina Verdin, Brianna Shani Benedict, Rachel Ann Baker, Thaddeus J. Milton, Joshua T. Yeggy

Karen D. Alfrey

Collaborative Research: Supporting Agency among Early Career Engineering Education Faculty in Diverse Institutional Contexts ...................................................... 2011

Erin J. McCave, Courtney June Furber, Cheryl A. Bodnar, Alexandra Coto Strong, Walter C. Lee, Courtney S. Smith-Orr

Collaborative Research: vObjects - Understanding their Utility to Enhance Learning of Abstract and Complex Engineering Concepts ...................................................... 2017

Diana Barraktaurova, Scott T. Huxtable, Sathyanarayanan Subramanian, Zahed Siddique

Collaborative: IUSE: Cultivating Inclusive Identities of Engineers and Computer Scientists: Expanding Efforts to Infuse Inclusive Excellence in Undergraduate Curricula ...................................................... 2023

Communicating Findings about Online Forum Use among Undergraduates in Distance-delivered Calculus: Developing a Help Seeking Usage Model ...................................................... 2028

Angela Minichiello, Matthew Paul Joffrey

Community Cultures: Broadening Participation By Understanding How Rural Communities Support Engineering as a College Major Choice ...................................................... 2053

Marie C. Purcell, Jacob R. Grohs, William Michael Anderson, Marlena McGlothlin Lester, Liesl M. Baum, Phyllis Leary Newbill, Stacye Leigh Kelly

Comparative Study of the Intersection of NSF S-STEM Program through Successive Grant Periods and Black Identity of African-American Engineering Students at a PWI and an HBCU ...................................................... 2059

Lesley M. Berhan, Revaithy Kumar, Marjory A. Goodloe, Jimmie Jones, Aaron Lee Adams

Computing and Engineering Scholarship Program at CSU  .......................................................................................... 2067

Sathyanarayanan Herath, Rohitha Geonattalage, Sureewathi Herath

Connecting STEM Scholars with Employers Worldwide ...................................................... 2083

Melissa Gavin, Lisa Naderman

Creating and Assessing an Upper Division Additive Manufacturing Course and Laboratory to Enhance Undergraduate Research and Innovation ...................................................... 2090

Patricia Ann Maloney, Bingbing Li, Meng Zhang, Weilong Cong

Designing Engineers Student Survey: Instrument Development and Preliminary Psychometric Data ...................................................... 2106

Tabin N. Walton, Robin Guilt Liles
Developing Changemaking Engineers – Year Three.................................................................................2133
Cheri A. Roberts, Susan M. Lord, Michelle M. Camacho, Rick Olson, Leonard A. Perry

Developing Metacognitive Skills in PBL Undergraduate Engineering.................................................2141
Rose M. Marra, Carolyn Plumb, Douglas J. Hacker

Developing a Summer Engineering Teaching Institute for Community College Engineering Faculty.........................................................................................................................2152
Amelito G. Enriquez, Nicholas Langhoff, Erik N. Dumire, Thomas Rehbold

Do Adaptive Lessons for Pre-class Experience Improve Flipped Learning? ....................................2168
Renee M. Clark, Aastar Kow, Elena Delgado

EAGER: Student Support in STEM: Developing and Validating a Survey Instrument for Assessing the Magnitude of Institutional Support Provided to Undergraduate Students at a College Level.............................................2181
Walter C. Lee, David B. Knight, Allison Godwin, Lisa Ann Moyer, Indhira Maria Hasbun

ECE Scholars: NSF S-STEM Grant........................................................................................................2186
Agnieszka Miguel

Effectiveness of A Scholarship Program to Increase Retention in Engineering........................................2196
Jean Nocito-Gobel, Maria-Isabel Carnasciali, Christopher Martinez

Effects of Online Collaborative Learning with Scaffolding in Multiple STEM Courses Based on Results from Three Consecutive-Year Implementation..................................................2211
Wei Zheng, Jing Yan, Justin R. Allison, Zhenyu Zhang, Haifu Shih

Elites: A STEM Leadership Program......................................................................................................2224
Jean Mistele, Sandra Nicks Baker, Sarah L. Strout, Prem Uppuluri

Engineering Doctoral Students’ Motivations and Identities: Understandings and Implications.............2239
Cheryl Coss, Adam Korn, Marissa A. Toagawa-Nieves, Heather Lee Perkins, Matthew Bahnhosn, Rebecca Mills, Amber B. Parker

Engineering Pathways for P-12 Teacher Preparation..........................................................................2245
Leon M. Miranda, Elizabeth Densmore

Engineering Student Perspectives on Research and What It Means to Be a Researcher.......................2249
Lisa Benson, Courtney June Faber, Rachel Louis Kajfez, Marian S. Kennedy, Katherine M. Ehlerdt, Dennis M. Lee, Anne Marguerite McAlister, Teresa Porter

Engineering with Engineers: Revolutionizing Engineering Education through Industry Immersion and a Focus on Identity..........................................................................................................................2256

Enhancing Core Chemical Engineering Courses with Computationally-Intense Course Modules...........2266
Kevin D. Dahm, Ravi P. Ramachandran, Nidhal Carla Bouaynaya

Enhancing Critical Life-Cycle Decision Making in Complex Engineering Projects in the Context of Engineering Economy Courses.................................................................2273
K. Jo Min, John Jackman, Farshad Niaiehpour

Enhancing Engineering Talent in Tennessee.........................................................................................2280
Allen Fort Gwinn Jr., Justin A. Myrick, Sr.

Enhancing Learning by Assessing More than Content Knowledge.......................................................2285
Renee Cole, Juliette M. Lantz, Suzanne Ruder, Gilbert J. Reynolds III, Courtney Stanford

Enhancing Minority Middle School Student Knowledge, Literacy, and Motivation in STEM Using Culturally Relevant Contexts........................................................................................................2296
Neil A. Knobloch, Levon T. Estere, Heidi A. Diefes-Dux, Abeer A. Rehomt, Quintana M. Clark, Ulyssia Hester, Trinity A. Johnson, Dottie Vollmer, Elizabeth Morgan Alexander

Enriching Communication in Introductory Computer Science Courses: A Retrospective of the Agile
Communicators Project.........................................................................................................................2301
Leo C. Ureel, II, Charles Wallace

Establishing a Baseline and Future Plans for Exploring Engineering Community and Identity.............2307
Mahnas Jean Mohammadi-Aragh, Rachel Louis Kajfez, Abigail M. Clark

Evaluation of Suffolk University’s Electrical Engineering S-STEM Program at Year 4..........................2312
Lisa Shatt, Kerrie Pielloch

Examining First-Year Chemistry Outcomes of Underprepared STEM Students Who Completed a STEM Summer Academic Bridge Program.................................................................2330
Brittany Bradford, Margaret E. Seier, Ann Saterbak, Megan McSpendon, Michael Wolf, Kristi Kincaid

Examining Interventions to Increase Classroom Community and Relevancy in an Early Career Engineering Course ......................................................................................................................2343

**M330 – COMPUTING & INFORMATION TECHNOLOGY: CURRICULUM AND ASSESSMENT**

Enhancing Computer Science Program Through Revising Curriculum, Peer Mentoring/Tutoring, and Engaging Students in Undergraduate Research ........................................4826
Masoud Naghedoolfeizi, Xiangyan Zeng, Chunhua Dong

The Value of ABET Accreditation to Computing Programs ........................................................................................................4836
Michael Ouadthoorn, Rajendra K. Ray, Stan Thomas, Allen Parrish

Partnering Strategies for Paired Formative Assessment in Programming .........................................................................................4854
Shannon Marie Beckinger, Bryce E. Hughes

Designing Undergraduate Data Science Curricula: A Computer Science Perspective ........................................................................4865
Predrag T. Tosic, Julie Beeston

**M330B – TOOLS AND TECHNIQUES**

Leveraging the Power of Matlab, SPSS, EXCEL, and Minitab for Statistical Analysis and Inference .............................................4876
Mohammad Rafaj Muqri, Nikole Harper, Hasan Muqri, Brian Keith Weer Sr.

Modernizing Capstone Project: External and Internal Approaches ..................................................................................................4895
Karen H. Jin, Michael Jonas, Christopher David Leblanc, Theodore-Sean Tavares

Hands-on Labs and Tools for Teaching Software Defined Network (SDN) to Undergraduates ..................................................4916
Emil H. Salib, John David Lester

Implementation of Big Data Lab for Broadband Wireless Networks Intelligent Traffic Management System: Evaluation and Challenges ..................................................................................4932
Tamer Omar

**M334 – ETHICAL AWARENESS AND SOCIAL RESPONSIBILITY IN A CORPORATE/TEAM CONTEXT**

Social Responsibility in Engineering Education and Practice: Alignments, Mismatches, and Future Directions .............................4946
Jessica Mary Smith, Juan C. Lucena

Exploring Team Social Responsibility in Multidisciplinary Design Teams .........................................................................................4975
Katharine E. Miller, Carla B. Zolotwski, Patrice Marie Buzzanelli, David Torres, Danielle Corplle, Megan Kenny Feister

Project-based Learning as a Vehicle for Social Responsibility and Social Justice in Engineering Education .....................................4992
Greg Rudlison, Carrie J. McClelland, Linda A. Battalora

Developing an Integrated Curriculum-wide Teamwork Instructional Strategy ..................................................................................5000
Natasha D. Mallette, Michelle Kay Bothwell, Christine Kelly

**M335 – DESIGN & DEVELOPMENT PROJECTS AND PRACTICES**

An Engineering Education Project: Using a Robot and Thermal Imaging to Automate and Analyze Ultrasonic Welding of Plastics .............................................................................5020
Michael G Mauk, Richard Chiu, Prashanth Yadav

Enhanced 3-D Printing for Energy Harvesting Project Implementation into Green Energy Manufacturing Laboratory ..................................................................................................................5032
Richard Chiu, Michael G Mauk, Tsu-Liang Bill Tseng, Sanjay Jayadev, Carlos Michael Ruiz

Engineering Manufacturing Education: Solar Cell Analysis and Diagnostics Using Scanning and Imaging Techniques ..................5047
Michael G Mauk, Richard Chiu, Carlos Michael Ruiz, Carol Jeanice Martin, Smarth H Chadha

Integration of Agriculture Research into Manufacturing Design and Implementation Projects ..........................................................5061
Zhenhua Wu, Laban K. Raitto, Shafiqzad Akbar

Manufacturing Applications of the One-dimensional Cutting Stock Problem as a Team Project ......................................................5076
Huseyin Surper, Nebajha I Jukic

**M336 – MATERIALS DIVISION TECHNICAL SESSION 3**

Measuring Student Learning of Crystal Structures Using Computer-based Visualizations .............................................................5094
Susan P. Gentry, Tanya Faltens, William Ashwin Wheeler, Andre Schliefe

New Resources for Introduction to Materials Class ..........................................................................................................................5121
Hannah Melia
Comparing Muddiest Points and Learning Outcomes for Campus and Distance Students in a Composite Materials Course .......................................................... 5137

Use of Mixed Reality Tools in Introductory Materials Science Courses ............................................................................................................................. 5149

Matthew Cavalli
Bilal Mansoor, Mustapha Jamal Makki, Dena Al-Thani

M337 – MATHEMATICS DIVISION TECHNICAL SESSION 1

Classifying the Engineering Mathematics Student: An Investigation of Trends in Learning ................................................................. 5162
Paul L. Goethals, Karoline Hood

Engineering Majors’ Cognitive Function Differentiation Ability .............................................................................................................................. 5177
Emre Tokgöz

From Gateway to ‘Pathway’: Mentoring-the-Mentors to Provide Academic and Motivational Support for Struggling STEM Majors ........................................... 5193
Nancy Romance, Ali Zilouchian, Michael Vitale, Lisa Greenberg

Implementing the Wright State Model First-Year Engineering Mathematics Course in a Startup School of Engineering .................................................................................. 5210
Lynn A Albers

Motivation Building Strategies of Mathematics Instruction for Undergraduate Students in Mechanical Engineering ......................................................... 5220
Amitabha Ghosh

Video Tutorials in Mathematics Education for Engineering Students ................................................................................................................. 5236
Franziska Dorothea Wehner

M338 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 11

The Impact of the Physics, Statics, and Mechanics Sequence on Student Retention and Performance in Mechanical Engineering ............................................................................... 5248
Kathryn Anne Wingate, Aldo A. Ferris, Karen M. Feigh

Competency Based Assessment in Dynamics ................................................................................................................................. 5263
Kurt M Degroote

Using Cartoons to Enhance Engineering Course Concepts .......................................................................................................................... 5274
Edward James Diehl

Assessment of Fluid Power Modules Embedded in Junior Level Thermodynamics and Fluid Mechanics Courses ...................................................... 5293
Liping Liu, James A. Mynderse, Robert W Fletcher, Andrew L Gerhart

Teaching Experimental Design in a Fluid Mechanics Course .......................................................................................................................... 5322
Seth Norberg, Tim Ashcraft, Matthew Miller, Michael J Benson

M339 – DYNAMIC PEDAGOgies FOR ENGINEERING DYNAMICS

Evaluating the Usage and Value of Supplemental Materials in a Dynamics Class .......................................................................................... 5336

Incorporating IMU Technology to Demonstrate Concepts in Undergraduate Dynamics Courses .................................................................................. 5356
Racheel Vitali, Noel C. Perkins, Cynthia J. Finelli

Learning to Read and Take Notes in Dynamics .................................................................................................................................................. 5364
Steven C. Zemke, Diane L. Zemke

Should Kinetics Follow Kinematics? Investigating Course Design in Dynamics ............................................................................................................. 5384
Philip Cornwell, Kent Ralph-Jensen, Kwangjin Yang

Work in Progress: Connections Between First-Order and Second-Order Dynamic Systems – Lessons in Limit Behavior .............................................................................. 5395
Vincent C. Pruintil, Mark L. Nagurka

M340 – MINORITIES IN ENGINEERING DIVISION TECHNICAL SESSION 1

Tenure as a Closed System: Subconscious Behavioral Characteristics of Coercion, Groupthink, Bias and Inherent Discrimination ................................................................................. 5411
Mitchell L. Springer

What Does Hidden Curriculum in Engineering Look Like and How Can It Be Explored? .......................................................................................................................... 5428
Idalis Villanueva, Laura Ann Gelles, Mariahkita Di Stefano, Buffy Smith, Renetta G. Tull, Susan M Lord, Lisa Benson, Anne

Work in Progress: An Investigation of a College of Engineering Underrepresented Minority Students’ Perceptions of Inclusive Co-curricular Spaces and Student Support Programs Beyond the First Year .................................................................................................................. 5444
Cherish C. Vance, Bria Perkins, Ajaia Bannister, Jamie M. Moore

Exploring the Interplay of Diversity and Ethics in an Introductory Bioengineering Course (Work In Progress) ................................................................. 5451
Dianne Grayce Hendricks, Camille Birch, Celina Gunnarsson
KickStarter: Providing Hispanic Serving Community Colleges with Technical Assistance to Improve their Federal Funding Competitiveness (Experience)..........................................................................................................................5458
Cynthia Kay Pickering, Caroline Vaningen-Dunn, Anita Grierson, Anna Tanguma

M341 – ENGAGING FACULTY ACROSS DISCIPLINES, COLLEGES AND INSTITUTIONS

Mechanical Engineering Design for Complex Environments: Incorporating Industrial Design Perspectives into a Multidisciplinary Capstone Design Project ........................................................................................................5477
Brian J Novoselich, Tom Weis, Harry Howard Jones IV

Drones and Satellites: Identifying Interdisciplinary Capstone Projects with Other Departments at Your Own University ..................................................................................................................................................5490
Bruce E Dume, Paul Keenlance

Architecture, Engineering, and Construction Interdisciplinary Senior Interdisciplinary Project Educational Model .................................................................................................................................5505
Jinsung Cho, Giuseppe Lomiento, Gad M. Ghada, Karin Tostigen

Innovation in the Course Disaster Risk Management to Improve the University Student’s Competence for Multidisciplinary and Participatory Work ......................................................................................5522
Sandra Cecilia Santa Cruz, Graciela Del Carmen Fernández De Córdova, Marta Vilela Vilela

Multidisciplinary Research Efforts in Post-Earthquake Civil Infrastructure Reconnaissance .................................................................................................................................5539
Jack Bergquist, Anahid Behrouzi

M344 – OCEAN AND MARINE DIVISION TECHNICAL SESSION 2

A Naval Hydrodynamics Undergraduate Curriculum for the Midwestern United States .................................................................................................................................5556
James Buchholz, Pablo M. Carrica, Jae-Eun Russell

Beyond the Sea Perch ..................................................................................................................................................5569
Thomas B. Consi, Jocelyn Frances Lorrey, Michelle Kornberg

Design a Micro-wind and Solar Energy Harvesting System for a Wireless Sensor Node to Operate in Coastal and Marine Area as a Senior Design Project ........................................................................5577
Radian G. Belu, Richard Chiou, Lucian Ionel Cioica

M356 – SOFTWARE ENGINEERING DIVISION TECHNICAL SESSION 1

Analyzing Popularity of Software Testing Careers in Canada .................................................................................................................................5591
Pradeep Kashinath Waychal, Luiz Fernando Capretz, Sachin Narendra Pardeshi

The Use of HFOSS Projects in the Grace Hopper Celebration of Women in Computing Open Source Day .................................................................................................................................5604
Cam Macdonell, Heidi J. C. Ellis, Darci Burdge, Lori Postner, Gregory W Hislap

A Re-look at the Introduction to Software Engineering Course .................................................................................................................................5616
James R Vallino, Bryan Basham

Why Educators Need to Team with Industry Professionals in Software Development Education .................................................................................................................................5636
Gregory Kulczycki, Steven Atkinson

M348 – SYSTEMS ENGINEERING DIVISION TECHNICAL SESSION 3 – COURSE AND PROGRAM OUTCOMES

Transitioning to the New ABET Student Outcomes: Architecture Development for a Systems Engineering Degree Program ..................................................................................................................................................5659
Stu Turner, Kalyn Tung, Cory Cooper

The Use of Systems Engineering Principles to Improve Learning Outcomes in a Multidisciplinary Course .................................................................................................................................5679
Zachary David Asher, Nicole L. Rama, Thomas H. Bradley

Establishing an Engineering Core – What Does Every Engineer Need to Know, Particularly About Systems Engineering? ..................................................................................................................................................5693
Devanandham Henry, Charles Daniel Turnisa, Cheryl Beuchamp

M351 – WOMEN IN ENGINEERING DIVISION TECHNICAL SESSION 7

A Systematic Literature Review on Improving Success of Women Engineering Students in the U.S. ..................................................................................................................................................5705
Pradeep Kashinath Waychal, Charles Henderson, Daniel Collier

Assessing Engineering Disciplines with Expected Success for Females in Saudi Arabia .................................................................................................................................5742
Ahmed M. El-Sherbeeny, Hamed Dhaif Alshurairi

Building Skills in Engineering: Hand and Power Tool Workshops for Confidence and Retention .................................................................................................................................5753
Pamela L Dickrell
Valuing Women's Contributions: Team Projects and Collaborative Writing
Jennifer C Mallette, Harold Ackler

M402 – ARCHITECTURAL DIVISION TECHNICAL SESSION 1

How Structures Move: Three Projects in Deployable Structures
Sudarshan Krishnan, Yaxin Li

Stellar’s Journey: From Conception to Prototyping of the Finalist of an International Design Competition
Bekir Kelceoglu

A Comparative Study of an Architectural Design Course of Two Sections: The Course Impact on the Performance and Continuation of a Major-Assessment Based on Two Design Projects
Nibert Saltibus

M403 – BIOLOGICAL & AGRICULTURAL DIVISION TECHNICAL SESSION 1

A Comparison of Learning Outcomes and Learner Satisfaction in a CADD Course with Flexible and Rigid Deadlines
Joel Peterson, Matthew Francis Digman

Work in Progress: Hybrid-flipped Classrooms: Challenges and Opportunities
D. Raj Raman, Amy L. Kaleita

Mapping Learning Outcomes Across Biological and Agricultural Engineering Concentrations Within the Curriculum
Janie M. Moore

M404 – CLINICAL LEARNING EXPERIENCES IN BME

Impact of Classroom Surgical Procedure Demonstration Using Artificial Bone in Orthopedic Implant Design
Won Joo

Designing an Interprofessional Educational Undergraduate Clinical Experience
Barbara Jean Muller-Borer, Stephanie M. George

Interdisciplinary Clinical Immersion: from Needs Identification to Concept Generation
Anthony E. Felder, Miri Kotche, Susan Stirling, Kimberlee M Wilkens

The DMVP (Detect, Measure, Valuate, Propose) Method for Evaluating Identified Needs During a Clinical and Technology Transfer Immersion Program
Hannah Lynn Cash, John D. Desjardins, Breanne Przestrzelski

M406 – THE EVOLVING CLASSROOM

An Institutional Excellence in Teaching Workshop Adapted from the ExCEEd Model
Charles Riley, Sharon L. Beaudry, Aja Bettencourt-McCarky

Civil Engineering Students’ Views on Infrastructure in the U.S
Carol Haden, Matthew W. Roberts

Developing an Effective and Engaging Concept-driven Approach to Teaching Structural Design
Joel Lanning

Assessing the Influence of Lecture/Laboratory Instructor Pairings on Student Perception and Learning Outcomes
Simon Thomas Ghanat, J. Michael Grayson, Motisha Babac, Kevin Skenes

Assessing the Impact of Educational Factors on Conceptual Understanding of Geotechnical Engineering Topics
Simon Thomas Ghanat, James Kaklamanos, Corrie Walton-Macaulay, Suresh Immanuel Selvaraj, David A. Saftner, Chris Swan, Tanya Kunberger

M407 – COLLEGE INDUSTRY PARTNERSHIPS DIVISION TECHNICAL SESSION 3

Assembling a Successful Industry-sponsored Senior Capstone Program: Lessons Learned from a Startup Effort at a Liberal Arts University
Lori Houghtalen, Timothy Kennedy, Raymond Earl Smith

Case Study: Industry-sponsored Mechanical Engineering Capstone Senior Design Projects
Honni I. Abu-Mulaweh, Naseryah Abu-Mulaweh

Statistical Methods Can Confirm Industry-sponsored University Design Project Results
Robert J. Durkin, Paul Yearling

M408 – COED: GAMIFICATION AND INTRODUCING STUDENTS TO PROGRAMMING

Using Gamification and Cyber Learning Environment to Improve Students’ Learning in an Introductory Computer Programming Course: An Empirical Case Study
Mourya Reddy Narasareddy Gari, Gursimran Singh Walia, Alex Radermacher
From App Inventor to Java: Introducing Object-oriented Programming to Middle School Students Through Experiential Learning ................................................................. 6043
Kimberly B. Demoret, Kyi Phyu Nyein, Jessica L. Wildman

Second Year of Using the Sidekick Basic Kit for TI Launchpad with Elementary School Students ................................................................. 6056
Tara N. Kinney, Cameron H. G. Wright, Thad R. Welch

Incorporating Diegetic Elements to Increase Engagement in Games for Engineering Education ........................................................................... 6066
Katherine Smith, Yachong Shen, Anthony W. Dean

M408B – COED MODULUS TOPICS

Developing Reviewer Profiles Using Analysis of Prior Authorship .......................................................................................................................... 6078
Matthew A. Verleger

Enabling Advanced Topics in Computing and Engineering Through Authentic Inquiry: A Cybersecurity Case Study .................................................. 6088
Mike Borowczak, Andrea Carneal Burrows

Undergraduate Research: Adaption and Evaluation of Software-defined Radio-based Laboratories ................................................................. 6098
Deng Cao, Zhiqiang Wu, Bin Wang, Chi-Hao Cheng

A Hybrid Google Computer Science for High School Workshops ......................................................................................................................... 6109
Afrin Naz, Mingyu Lu, Jordan Bowen, Cody Ryan Zackosisi

M409 – CONSTRUCTION DIVISION TECHNICAL SESSION 2: K 12 THROUGH ADULT LEARNING

Increasing Student Construction Interest by Engaging Elementary Students in an Inquiry-Based 3D Modelling After School Program ................................................................. 6118
Geoff Wright, Justin Earl Weidman

Student Perception as a Planning Input in a Project-Based Construction Program .................................................................................................. 6130
Saeed Rokooeei

The Use of Peer Teaching Quality Managers to Improve Student Learning in a Construction Project Management Course .................................................. 6146
Anthony Torres, Vedaraman Sirimane, Arceline Martinez Ortiz, Kristin Marie Kibling

Tailoring Construction Management Instruction to the Emerging Adult Learner ................................................................................................. 6160
Robert B. Austin

M411 – POSTCARD SESSION: EXPERIENTIAL LEARNING AS A HIGH IMPACT STUDENT EXPERIENCE

Increasing Student Self-Efficacy through Undergraduate Research Experiences: A Qualitative Study ................................................................. 6178
Addison J. Litton, Wade H. Goodridge, Benjamin James Call, Sarah E. Lopez

Summer Exchange Program: A Unique Platform to Broaden Exposure and Address Several Dimensions of Learning .................................................. 6192
Abhijit Nagchauhdhury, Lei Zhang, Madhumi Mitra, Blake Prout, Motsin Mehmoed, Kaliah A. Cross, Matt Collinge, Hafeez Teminepe Shittu, Habilou Ouro-Koura

Intensive Mentoring and Micro-Electronics Research for Students in Engineering (IMMERSE) ........................................................................... 6209
Stephen Schultz, Aaron R. Hasleys

Establishing an Industrial Engineering Internship Pipeline for Data Analysis Careers in Collegiate and Professional Athletics ............................................................... 6226
Glenda D. Young, Reuben F. Burch

M413 – TEAMWORK AND STUDENT LEARNING IN DESIGN

Capstone Design and Psychology: Teams, Traits, and Competencies Measured in Student Surveys ................................................................. 6233
Kimberly B. Demoret, Kyi Phyu Nyein, Jessica L. Wildman

A Longitudinal Study Exploring Motivation Factors in Cornerstone and Capstone Design Courses ................................................................. 6257
Elisabeth Kamens, Devanshi Dhrenkumar Shah, Beshoy Morkos

CATME or ITP Metrics? Which One Should I Use for Design Team Development and Assessment? ................................................................. 6279
Marnie V. Jamieson, John M. Shaw

Building Engineering Professional and Teamwork Skills: A Workshop on Giving and Receiving Feedback ................................................................. 6296
Erin Jobidon, Maria Barschello, Rama Al-Hammoud, Mehrnaz Mostafapour, Christopher Rennick, Ada Hurst, Jason Grove

Academic Practice/Design Interventions: An Activity-Based Design Course for Conceptualizing Failure and Factor of Safety ........................................................................... 6311
Farzana Rahman

Exploration of Multi-layered Mentorship Approaches in Summer Engineering Programs ......................................................................................... 6324
Kimberly Cook-Chennault
M414A – WORKS IN PROGRESS I

WIP: A Case for Disaggregating Demographic Data.................................................................6343
  Matthew Bahnsen, Heather Lee Perkins, Martissa A. Taugawa-Nieves, Adam Kern, Cheryl Cuss
WIP: Teaching Engineering Students How the Brain Works to Encourage Positive Learning Dispositions and Behaviors .................................................................6350
  Dong San Choi, Michael C. Loui
WIP: Characterizing Conceptual Change about Moments in a Statics Course.......................6355
  Chris Veniers, Katie Brown
WIP: How Do Visual Representations Affect How Engineering Students Learn and Solve Problems Within and Across Disciplines? .................................................................6360
  Nicole Johnson-Glausch, Dong San Choi, Geoffrey L. Herman
WIP: Emergence of Shared Leadership Dynamics during Engineering Student Design Projects .................................................................6368
  Malini Natarajanutham, Lei Xie, Michael Beyerlein, Rodney Boehm, Jill Zarestsky
WIP: Decoding a Discipline – Toward Identifying Threshold Concepts in Geomatics Engineering .................................................................................................................................6379
  Ivan Detcheverry, Elena F. Rangelova, Scott C. Packer, Quazi K. Hassan, Kyle O’Keefe

M414B – DESIGN THINKING AND CREATIVITY

Design Thinking in Engineering Course Design .......................................................................6388
  Nicholas D. Fila, Seda McKillop, Kelly Guerin
Development of Creativity of Engineering Students: A Cause for Concern? ..........................6414
  Andrew Valentine, Iouri Belski, Margaret Hamilton
User Stories and Algorithms as Programming and Design Tools ............................................6427
  Tom Elliot Spector, Stan Carroll, John J. Phillips
Uncovering K-12 Youth Engineering Design Thinking through Artifact Elicitation Interviews.................................................................6438
  Suzanne Eyerman, Sarah Hug, Emily McLeod, Tania Tauer
Work in Progress: A Case Study Exploring Teaching Strategies Employed in a Cornerstone Engineering Design Course .................................................................6449
  Kevin Calabro
Overriding Tradition? An Initial Exploration of the Intersection of Institutional and Disciplinary Cultures from the Student Perspective .................................................................6460
  Ashish Agrawal, Cassandra J. Groen, Amy L. Hermundstad Nave, Lisa D. McNair, Thomas Martin, Marie C. Paretti

M415B – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 2

Student-centered and Teacher-friendly Formative Assessment in Engineering ....................6479
  Cynthia Furse, Donna Harp Ziegenfuss
Using Guidelines from Cognitive Load Theory for the Traditional/Online Flipped Classroom Approach .................................................................................................................................6498
  John M. Santogni, Jing Guo
The Use of SPICE Simulation to Promote Reflection and Metacognition in a Microelectronics Course .................................................................................................................................6526
  Renee M. Clark, Samuel J. Dickerson
Student Engagement Profiles in Discrete-time Signals and Systems Courses .......................6540
  Daria Gerasimova, Jill K. Nelson, Margaret Hjalmarson
Student Engagement and Industry Readiness in a Systems Exploration, Engineering, and Design Laboratory (SEED Lab) .................................................................6554
  Tibhui Dave, Tyrone L. Vincent, Megan Sanders, Stephanie Claussen

M416 – ENERGY CONVERSION AND CONSERVATION DIVISION BEST PAPERS

Integrated Learning In Context for Heat Exchanger Analysis ..................................................6573
  Jan T. Lugowski, William Hutzel
Design and Implementation of MATLAB-Simulink Based Solar Cell Modeling and PV System Design Exercises for Advanced Student Learning .................................................................6585
  Sandip Das
Teaching Power Circuit Breaker Testing to Undergraduates ..................................................6596
  Glenn T. Wrate
Improving Vertical Axis Wind Turbine (VAWT) Performance .................................................6612
  Patrick A. Tebbe, Nazli Aslican Yilmaz Wodzinski, Namyong Lee

M417 – ENGINEERING AND PUBLIC POLICY DIVISION TECHNICAL SESSION 1

Assessing and Enhancing Standards Education for Environmental Management and Sustainability .................................................................................................................................6624
  Deanna H. Matthews, H. Scott Matthews
Attacks on Tenure: An Engineering Professor’s Experiences with Public Policy Actions Impacting Higher Education .......................................................................................................................................................................................... 6640

John B. Reisel

Learning from Failures: Engineering Education in an Age of Academic Capitalism .......................................................................................................................................................................................... 6655

Andrew Katz, Donna M. Riley

Using a Grounded Theory to Determine the Motivational Factors of Engineers’ Participation in Public Policy .................................................................................................................................................................. 6671

Sarah Bouazzaoui

M420 – ENGINEERING ETHICS DIVISION TECHNICAL SESSION 5

An Introduction to the Integrated Community-Engaged Learning and Ethical Reflection Framework (I-CELER) .................................................................................................................................................................. 6680

Grant A. Fore, Justin L. Hexit, Brandon Sorge, Mary F. Price, Martin A. Coleman, Thomas William Hahn, Julie Adele Hatcher

Incorporating Ethics Education into an Electrical and Computer Engineering Undergraduate Program .................................................................................................................................................................. 6699

Mahsa Ghorbani, Anthony A. Maciejewski, Thomas J. Siller, Edwin K. P. Chong, Pinar Omur-Oztek, Rebecca A. Astadero

Undergraduate STEM Students and Community Engagement Activities: Initial Findings from an Assessment of Their Concern for Public Well-being .................................................................................................................................................................. 6708

Alexandra Erwin, Jason Borenstein, Wendy C. Newsome, Colin Potts, Ellen Zegura

IT Ethics and the Role of Perceived Possibility of Disclosure: An Interventional Research .................................................................................................................................................................. 6716

Ali Reza Bohtari, Azadeh Bohtari

The Ethical Judgement Processes of Students in Computing: Implications for Professional Development .................................................................................................................................................................. 6723

Amir Hedayati Mehdiabadi

M425 – ENVIRONMENTAL ENGINEERING DIVISION TECHNICAL SESSION 3

International Scientific Research Experiences: Developing Global Citizens and Nurturing Engineers and Scientists of the Future .................................................................................................................................................................. 6742

Bettina Jeanine Casal, Monica Palomo, Natalie Mladenov

Introduction to Public Health for Environmental Engineers: Results from a Three-year Pilot .................................................................................................................................................................. 6760

Daniel B. Oerther

Learning Benefits of Integrating Socioeconomic and Cultural Considerations into an Onsite Water Reclamation Course Project .................................................................................................................................................................. 6778

Andrew Ross Pfluger, Junko Munakata Marr, Gary Vanzin, Robert L. Siegrist

M426 – DIVISION FOR EXPERIMENTAL & LAB ORIENTED STUDIES TECHNICAL SESSION 1

A Portable Engine Dynamometer Test Cell for Studying Spark-ignition Engine Performance and Mechanical-Electrical-Thermodynamic Energy Conversion .................................................................................................................................................................. 6794

Pavan K. Karru

A Cost-effective Laboratory Setup for Teaching System Dynamics and Controls .................................................................................................................................................................. 6813

Gene L. Harding, Megan Prygowski, James Burns, Brian Jeffrey Carmichael, Matthew S. Engstrom

A Hands-on Project for Avionics Systems Course in Aviation Engineering Technology Program .................................................................................................................................................................. 6824

Chensya Huang, Mary E. Johnson, Thomas Elmin

Enhancing a Real-time Audio Laboratory Using the MATLAB Audio System Toolbox .................................................................................................................................................................. 6841

Kip D. Coonley, Gautam Sai Chebrolu

Estimation of Experimental Errors Using Monte Carlo Analysis in the Introductory Electrical Circuits Laboratory .................................................................................................................................................................. 6860

Shaghayegh Abbasi, Ernest M. Kim, Thomas F. Schubert Jr.

Optimizing Students’ Learning Experiences in Instrumentation and Measurement Laboratory .................................................................................................................................................................. 6869

Emine Celik Foust

M427A – FIRST YEAR PROGRAMS DIVISION: STUDENT SUCCESS

Summer Engineering Academy for First-year Students in STEM: Making the Transition to College Through Coding and Robotics .................................................................................................................................................................. 6888

Okan Caglayan, Sreedevi Ande, Erik Coronado, Max Joseph Martinez, Samuel Jacob Handowski

Engineering Boot Camp: An Intense, Transformative Program for Incoming Freshmen .................................................................................................................................................................. 6902

Ann-Marie Vollstedt

Enhancing Students’ Learning Outcomes Through Freshman Summer Engineering Experience (SEE) Programs .................................................................................................................................................................. 6916

Hossein Rahemi, Amir Elzawawy, Margaret Ducharme

Supporting Student Learning Through Peer-led Course Support Initiatives .................................................................................................................................................................. 6928

Jenai Kelley Brown, Natalie Stringer, Rachel K. Anderson, Laurel Whisler

Examining the Effectiveness of Scholars Assisting Scholars Program Among Undergraduate Engineering Students .................................................................................................................................................................. 6945

Lydia Yang Yang, Bette Grauer
M427B – FIRST YEAR PROGRAMS DIVISION: ONLINE LEARNING

Motivating Students to Learn a Programming Language: Applying a Second Language Acquisition Approach in a Blended Learning Environment ................................................................. 6955
Lulu Sun, Christina Frederick, Caroline Liron, Li Ding, Lei Gu, Andrew Calvin Griggs Jr, Paula Sanjuan Espeso, Paula Sanjuan Espeso

Evidence-based Best Practices for First-year Blended Learning Implementation ......................................................... 6965
Emily Ann Marasco, Mohammad Moshirpour, Mahmoud Moussavi, Laleh Behjat, Yasaman Amannejad

A Comparison of Students Learning Programming with Online Modules, Instruction, and Team Activities ..................... 6975
Sarah Jane Grigg, Elizabeth Anne Stephan

Development and Implementation of a MOOC Introduction to Engineering Course .................................................. 6990
Benjamin Emery Mertz, Haolin Zhu, Amy Trowbridge, Alicia Baumann

M428 – PROFESSIONAL SKILLS FOR GRADUATE STUDENTS

'I Came in Thinking There Was One Right Practice': Exploring How to Help Graduate Students Learn to Read Academic Research ........................................................................................................... 7017
Wendy Rolldan, Jennifer A. Turnes

VOLUME 11

An Approach to Teaching Academic Writing to International Graduate Students in Colleges of Engineering.................. 7058
Kate Caroline Batson

Promoting an Inclusive Culture: Outcomes from Active Bystander Training................................................................. 7066
LaTonia Stiner-Jones

Providing Sustainable Scientific Writing Support for Graduate Engineering Students by Creating a Local Scientific Learning Community .................................................................................................. 7077
Prasun Lala, Felix Lungayin Harnois, Ghizlane El Boussaidi, Christian Descroix, Catherine Laporte

Review of Global Trends in Knowledge, Skills, and Abilities (KSA) Frameworks Applicable to Ph.D. Programs in Engineering ............................................................................................................. 7096
Eric Holloway, David F. Radcliffe

M430 – TOPICS IN COMPUTING AND INFORMATION TECHNOLOGY I

A Methodology for Automated Facial Expression Recognition Using Facial Landmarks .................................................. 7113
Justin Daniel Josey, Sushil Acharya

Forensic Analysis of SCADA/ICS System with Security and Vulnerability Assessment ............................................. 7124
Umit Karabiyik, Naciye Celebi, Faruk Yildiz, James Holekamp, Khaled Rabieh

Capability Analysis of Internet of Things (IoT) Devices in Botnets and Implications for Cyber Security Risk Assessment Processes .................................................................................................. 7140
Kari L. Jordan, Marianne Corvellec, Elizabeth D. Wickes, Naupaka B. Zimmerman, Jonah M. Duckles, Tracy K. Teal

Short-format Workshops Build Skills and Confidence for Researchers to Work with Data ........................................ 7159

M430B – COMPUTING TECHNOLOGY APPLICATIONS I

Teaching Directory Services: Topics, Challenges, and Experiences ............................................................................. 7179
Yu Cai

Expanding the Pool of Undergraduate Computing Students: Increasing Enrollments by Strategically Recruiting Women ......................................................................................................................... 7186
Zhen Wu, Christopher Lyndy Hovey, Leisa Thompson

RTTD-ID: Tracked Captions with Multiple Speakers for Deaf Students ........................................................................ 7200
Raju S. Kaushalnagar, Gary W. Bohn, Kevin T. Wolfe, Peter Yeung, Becca Dongman, Shareef Sayel Ali, Abraham Glasser, Claire Elizabeth Ryan

Teaching Theoretical Computer Science and Mathematical Techniques to Diverse Undergraduate Student Populations ..................................................................................................................... 7209
Predrag T. Totic, Julie Beeston

M431 – INSTRUMENTATION DIVISION TECHNICAL SESSION I

Virtual Software and Hardware Environment Provides Enhanced Learning for Mechatronics Engineering Technology Majors ............................................................................................................. 7226
Abram Hussain, Mohammad A. Zahraee

Students’ Participation to Improve Formula SAE Car ........................................................................................................ 7242
Masoud Fathizadeh, Anan Ismail Ayyad
M432 – HUMANITARIAN AND SUSTAINABILITY IN A GLOBAL ENGINEERING CONTEXT

Global Humanitarian Engineering Solutions: A Partnership Between Mercer University and the United Nations
Humanitarian Response Depot ................................................................. 7303
   Michael F. Maccarthy, Holly F. Burns, Ryan Monty, Matti Erin Brett, Zachary Lewis Martin, Katelyn C. N. Dimopoulos, Ing,
   Pietro Sannipoli, Nicolas Jerome Mesmer, Walid Ibrahim, Scott Schultz
Impact of Sustainable Study Abroad Course on Students ................................................................. 7317
   Patricia Fox, Charles McIntyre, Brandon Sorge
Cross-cultural Collaboration Inspired by a Sustainable Building Course in Costa Rica ......................... 7345
   Rodolfo Valdes-Vasquez, Caroline Murrie Clevenger, Laura Thornes, Svetlana Obhina
Developing Humanitarian Engineering Perspectives Among Underrepresented Scholars Through Engagement 7355
   with the Sustainable Development Goals in Global Contexts
   Renetta G. Tall, Shamwisha Hester, Farazeth Medina, Denise Nicole Williams, Hector Medina, Erika T. Aparaka
Engineering Education for Sustainable Development and Global Citizenship: A Course-level Implementation Case in Hong Kong ................................................................. 7373
   Rosanna Yuen-Yan Chan, Cecilia Ky Chan, Mehrdad Tahaninia, Jixian Liang, Qi Cao

M434 – PANEL: EMBEDDING WRITING IN EXPERIENTIAL LEARNING

Panel: Embedding Technical Writing with Experiential Learning Components into Engineering Curricula ...................................... 7389
   Lindsay Corneal, Debbie Morrow, Tracy Vole, Ann Saterbak, Susan Conrad, Timothy James Peiffer, Kenneth Lamb, William A.
   Kitch

M435 – MANUFACTURING CURRICULUM AND COURSE INNOVATIONS

A Curriculum Innovation Framework to Integrate Manufacturing-related Materials and Quality Control Standards into Different Level Engineering Education .................................................. 7402
   Hua Li, Kai Jin, Yue Zhang
A Deep Learning Graphical User Interface Application on MATLAB ........................................................................ 7409
   Aditya Akundi, Tsu-Liang Bill Tseng, Zejing Cao, Hoojin Kim
Implementing Entrepreneurial-minded Learning (EML) in a Manufacturing Processes Course ...................... 7417
   Vishal R Mehta, David R Mikesele
Integrating Soft Skill Development into a Manufacturing Systems Course ......................................................... 7429
   Faisal Afaqan, Qi Dunsworth, Mary L Kahl
Teaching Manufacturing Technology through ‘Learning by Doing’ Approach ................................................. 7439
   Zareena Gani, Sangareppillai Sivagogenathan, Saijero Karai, Hused Bohari Bohari
Non-Destructive Testing (NDT) and Evaluation Using Ultrasonic Testing Equipment to Enhance Workforce Skillset for Modern Manufacturing ................................................................. 7452
   Aditya Akundi, Tsu-Liang Bill Tseng, Md Fashiar Rahman, Eric D Smith

M435B – CAPSTONE PROJECTS IN MANUFACTURING

A Senior Design Project in Fabrication of Microfluidic HIV/Zika Viral Load and Monitoring Test Chips through Manufacturing Processes ................................................................. 7462
   Richard Chion, Michael G Mauk, Carlos Michael Ruiz
Student Project: Instrumentation and Control of Solar-Powered Algae Bioreactor ............................................ 7475
   Richard Chion, Michael G Mauk, Tsu-Liang Bill Tseng, Carlos Michael Ruiz, Jean Carlo Espallat, Senyu Wang
Interdisciplinary Senior Design Project to Develop a Teaching Tool: Filament Extruder ..................................... 7487
   Yalcin Ertekin, Richard Chion, Irina Nicoleta Ciobanescu Husanu, Joshua Seymour Leibowitz, Jon Armstrong, Nathan Lough
From Capstone Student-led Project to Experiential Learning Module: Design and Manufacturing of an Integrated System of Pico-Hydroelectric Generator and Water Filtration ................................................. 7497
   Irina Nicoleta Ciobanescu Husanu, Michael G Mauk, Perry B. Gold, Nando Tyler Orfanelli
Team Cleaning Robots ............................................................................................................................... 7510
   Daniel R Khodos, David J Adegbesan, Oliver Khairullah, Shouling He
M437 – MATHEMATICS DIVISION TECHNICAL SESSION 2

The Crux: Promoting Success in Calculus II ................................................................. 7529
Dubinsky, J., Stinson, D. & Pilgrim, D.

Redesigned Application-oriented Integral Calculus Curriculum .................................... 7545
Leszek Gawarczki, Yoamin Dong, Gina Rabilau

Creating Laboratories to Aid Student Modeling Ability in Calculus I ............................ 7564
Ashley Bernal, Jeffery J. Leader, Jesst B. Ward

Redesigning the Calculus Curriculum for Engineering Students ..................................... 7575
Stacie Pisano, Hui Ma, Bernard Fulgham, Gualtiero Guadagni, Diana D. Morris, Monika Abramenko

Guided-Lecture Team Based Learning at Work: Teaching Differential Calculus to Part-time Engineering Students in Latin America .................................................. 7585
Jose Roberto Portillo, Alberth E. Alvarado, Jorge Samayo Banero

Have You Seen an Integral? Visual, Intuitive and Relevant Explanations of Basic Engineering-related Mathematical Concepts ................................................................. 7595
Daniel Raviv

M438 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 2

An Arduino-Based Hardware Platform for a Mechanical Engineering Sophomore Design Course .......................................................... 7627
Mark David Bedillion, Karim Heinz MacKachler, Walter Ming Meselle Nikola

Teaching Geometric Dimensioning and Tolerancing Concepts Using 3-D Computer Models and 3-D Printed Parts ........................................ 7645
Oziel Rios

A Bio-Inspired Mind Map to Assist in Concept Generation for Wall Climbing Systems: Development, Assessment, and Resulting Prototypes ......................................................... 7657

Two Approaches to Optimize Formula SAE Chassis Design Using Finite Element Analysis ................................................................. 7685
Tanveer Singh Chawla, Eric Leonhardt

New Course Development and Assessment Tools in Automotive Lightweighting Technologies ................................................................. 7710
Raghav Echampati

M439A – STUDENT ADVANCEMENT IN MECHANICS OF MATERIALS

A Practical Graphical Approach for Drawing Shear Force and Bending Moment Diagrams ................................................................. 7724
Xiaohin Le, Masoud Ola, Ali Mouzai

Exploration of Expert and Novice Reasoning in Mechanics of Solids ................................................................. 7739
Johanna Paulette Doukakis

Work in Progress: Active Learning Activities to Improve Conceptual Understanding in an Undergraduate Mechanics of Materials Course ................................................................. 7753
Nick A. Stites, Charles Morton Krousegrill, Jeffrey F. Rhoads, Edward J. Berger, Jennifer Debuer, Angela Goldenstein

VOLUME 12

M440 – MINORITIES IN ENGINEERING DIVISION TECHNICAL SESSION 2

Mending the Gap: An Intentional Focus on Integrating Underrepresented Minority and Deaf/Hard-of-Hearing Students into the Research Culture (Experience) ................................................................. 7768
Reginald E. Rogers Jr., Todd Pagano

A Mixed-methods Study of Non-text Social Media Content as a Window into African-American Youth STEM Identities ................................................................. 7775
Donna Augustine, Tanya D. Annix, Shelly Lynn Miller, Joseph L. Polman

Literature Review on Disability Participation in the Engineering Field ................................................................. 7792
Elizabeth Marie Spingola

Intersecting Identities of Women in Engineering ................................................................. 7801

Talking Engineering: Students’ Translanguaging in Education ................................................................. 7816
Greses Perez

M441 – MULTIDISCIPLINARY DESIGN 1

Designing a Comprehensive Project for a Junior-level Multidisciplinary Engineering Design Course ................................................................. 7825
Amanda C. Ruthford, Brad Thomas Stanton, Staci Turuks, Elizabeth B. Varnes

Promoting Innovation in a Junior-level, Multidisciplinary, Electro-Mechanical Design Course ................................................................. 7843
Wesley L. Stone, Robert Scott Pierce, Sudhir Kaul

Teaching Mechanical Design for Mechatronics Engineering Students Using a Project-based Sequential Learning Approach ................................................................. 7850
Bahaa Kazem Ansaaf, Nebojsa I Jaksic
Designing for Children with Sensory Processing Disorders .................................................................................................................... 7860
Louise R. Manfredi, Bekir Kelceoglu

M444 – OCEAN AND MARINE DIVISION TECHNICAL SESSION 3

Industrial Expectations for Marine Engineering Major Students .................................................................................................................. 7871
Wei Yu, Gail M. Stephens, William Haynes
Water Tunnel Design: A Senior Capstone Project to Promote Hands-on Learning in Fluids .................................................................................. 7880
Nathan John Washuta, Jason Howison, Billy L. Clark, Robert Hudson Imhoff IV, Luiz Dos Reis

M446 – SOFTWARE ENGINEERING DIVISION TECHNICAL SESSION 2

Teaching Software Testing with Automated Feedback ................................................................................................................................. 7897
James Perretta, Andrew Deorio
Work in Progress: One Approach to Software Engineering Project Selection for Small Student Populations ........................................... 7911
Paul A. Benders
Measuring Broader Impact of NSF-funded Project on Software Engineering Education .......................................................................................... 7919
Sushil Acharya, Priya Manohar, Peter Y Wu
Gamification in Computer Science Education: A Systematic Literature Review ............................................................................................. 7936
Mourya Reddy Narasareddy Gari, Gursimran Singh Walia, Alex David Radermacher

M449 – TECHNOLOGICAL AND ENGINEERING LITERACY / PHILOSOPHY OF ENGINEERING DIVISION
TECHNICAL SESSION 1

What's in a Name? Technology and the Image of Engineering .......................................................................................................................... 7949
John Heywood
On Epistemic Diversity of Engineering and Engineering Education .............................................................................................................. 7969
Soheil Fatehiboroujeni
Developing Self-awareness in Learning Practices: Designing and Implementing a Survival Tool for Freshmen in Engineering ........................................................................ 7978
Neelam Prabhu Gaunkar, Mani Mina
Improvements in Undergraduate Electromagnetism Courses by Designing Experiences of Inquiry and Reflection ................................. 7992
Neelam Prabhu Gaunkar Prabhu Gaunkar, Mani Mina
Evaluation of Research Experience or Teachers (RET) Program Effectiveness as STEM Professional Development ............................ 8008
Katie Estridge Schneider, Amy Charlotte Martin, Terri S. Hogue

M450 – ENGINEERING/ENGINEERING TECHNOLOGY TRANSFER ISSUES: TWO YEAR COLLEGE TO FOUR YEAR COLLEGE

Avenue-E: An Innovative Student Transfer Pathway Program .......................................................................................................................... 8019
Jennifer Sinclair Curtis, Beth Frances Brome Brome, Cynthia Murphy-Ortega
Insights on Retention of Underrepresented Minority Electrical and Computer Engineering Transfer Students (Experience) ........................................................................ 8027
Samuel Paul Merriweather, Karen L. Butler-Purzy, Shannon Walton, Judy Kelley
Scholarship Programs for Vertical Transfers in Engineering and Engineering Technology .................................................................................. 8039
Surendra K. Gupta, James E. Moon, Roy W. Melton, Michael E. Kuhl, Daniel P. Johnson, Todd Dunn, James H. Lee, Franz Allen
Successes and Difficulties Experienced by Engineering Transfer Students at a Large Public University .......................................................... 8049
Susan P. Gentry, Colleen Elizabeth Bronner, Jennifer H Choi, Jason White
Strategies for Developing, Expanding, and Strengthening Community College Engineering Transfer Programs ............................................. 8066
Amelito G. Enriquez, Nicholas Langhoff, Erik N Dunmire, Thomas Rebold, Wenshen Pong

M451B – WOMEN IN ENGINEERING DIVISION TECHNICAL SESSION 1

An Investigation into How One Engineering School is Approaching Gender Diversity .......................................................................................... 8082
Vicki F. May, Joseph J. Hellble
Disagreement in Engineering Student Teams: Analyzing the Impact of Gender and Conversational Medium ...................................................................... 8098
James A. Callor, Magul Su, Robin Fosler
Do Students Believe Girls Belong in Engineering? So What? ................................................................................................................................. 8108
Henriette D. Burns, Colin Elizabeth Bronner
Succeeding but Doubting: Effects of Gender on Performance and Self-perception in Early Engineering Courses .................................... 8126
Jennifer Blue, Amy Sammerville, Brian P. Kirkmeyer, Brielle Nikole Johnson
STEM: Customized for Them .................................................................................................................................................................................. 8135
Laine Schrewe
M452 – TRANSDISCIPLINARY PERSPECTIVES ON ENGINEERING ENGAGEMENT WITH COMMUNITY

Transdisciplinarity for Sustainability: A Unifying Framework for Navigating Transformational Learning Systems ................................................................. 8142
Pradeep Kashinath Waychal, Pawan Ramchandra Galande

#EngineersWeek: Broadening our Understanding of Community Engagement Through Analysis of Twitter Use ................................................................. 8160
Marybeth Lima, Nicholas Patrick Totaro

Exploring Whitewater Rafting Guides’ Values of Learning and Teaching .................................................................................................................. 8176
Beth Huffman, Kathryn Elizabeth Roche

Representations of 'The Public' in Learning Through Service (LTS) Versus 'Mainstream' Engineering .................................................................................. 8182
Nathan E. Conney, Yanna Lambrinidou

M455 – LITERATURE AND RESEARCH PERSPECTIVES ON ENGINEERING LEADERSHIP DEVELOPMENT

Examining the Engineering Leadership Literature: Community of Practice Style ..................................................................................................... 8211
Cindy Bottmann, Doug Reeve, Mike Klassen, Serhiy Kovalchuk, Qin Liu, Alison Olechowski, Madeleine Samia

Understanding the Perceived Impact of Engineers’ Leadership Experiences in College ........................................................................................... 8234
William J. Schell IV, Bryce E. Hughes, Brett Tallman

Engineering Students and Group Membership: Patterns of Variation in Leadership Confidence and Risk Orientation .............................................................................. 8253
James N Magarian, Alison Olechowski

The Engineering Leader of the Future: Research and Perspectives ....................................................................................................................... 8277
Meg Handley, Jeffery M. Plumlee II, Andrew Michael Erdman

Faculty, Student, and Practitioner Initial Conceptions of Leadership ....................................................................................................................... 8291
Kenneth Lamb, Werner Zorman, Alicia M. Kinoshita, Natalie Mladenov

M456 – MILITARY AND VETERANS DIVISION TECHNICAL SESSION 1: ACADEMIC TRANSITION

Supporting Service Member Transition into Academia: MOOCs on Engineering Fundamentals .................................................................................... 8308
Aldo A. Ferri, Wayne E. Whiteman

Supporting Veteran Students Transitioning to Engineering ............................................................................................................................. 8319
Colleen Janeiro, Teresa Ryan, Jeff Foeller, Melissa Ann Hall

The Evolution of College Credit Recommendations for the United States Army by the American Council on Education ........................................................................... 8331
Janet C. Ford, George D. Ford

M502 – ARCHITECTURAL DIVISION TECHNICAL SESSION 2

Developing and Testing an Inter-disciplinary Course of Sustainable Technology Innovation for Urban Design ......................................................... 8341
Xiaojing Yuan, Bruce Alan Race

Learning Building Sciences in Virtual Environments ................................................................................................................................. 8357
Debra Lee Davis, Shahin Vassigh, Hadi Alhaffar, Albert John Elias IV, Giovanna Gallardo

Evaluating Visual Comfort Metrics of Responsive Facade Systems as Educational Activities ...................................................................................... 8369
Negar Heidari Matin, Ali Eydgahi, Shinning Shyu, Payam Matin

Fostering Civic Identity in Architectural Technology Students through the Evaluation of Critical Reflection in Service Learning Coursework ........................................................................ 8404
Beth Huffman, Kathryn Elizabeth Roche

M503 – BIOLOGICAL & AGRICULTURAL DIVISION TECHNICAL SESSION 2

Comparison of Game-based Learning and Traditional Lecture Approaches to Improve Student Engagement and Knowledge Transfer in STEM Education ...................................................................................... 8423
Nathan C. Rice, Asha Guru, Caprianna N. Keeler, Deepak R. Keshwani, Jennifer Keshwani

Integrating Novel Methods and Existing Tools to Enrich Nontraditional Learning Experiences ...................................................................................... 8437
Shannon Banner, John J. Classen

The First-year Experience in Biological Engineering at LSU ................................................................................................................................. 8458
Marybeth Lima, Nicholas Patrick Totaro

Improving Performance of an Agricultural Diploma Student ....................................................................................................................... 8465
Pradeep Kashinath Waychal, Pawan Ramchandra Galande
M504 – DESIGN IN THE BME CURRICULUM

An Engineering Design-Oriented First Year Biomedical Engineering Curriculum ......................................................................................................................... 8471
Kay C. Doe, Patricia Bruckin, Amelie Hewlett, Alan Chin, Glen A. Livesey, Jay Patrick McCormack, Renee D. Rogge, Richard A. House

Modeling and Design: A Hands-on Introduction to Biomedical Engineering ......................................................................................................................... 8481
Eileen Haase

An In-depth Analysis of Open-ended Biomedical Engineering Design Problems and the Role of Metacognition in Their Solutions ......................................................................................................................... 8515
Hannah YoWu, Michael Crowder, Ozcan Gulacar, Jennifer H. Choi

Patient Centered Design in Undergraduate Biomedical Engineering ......................................................................................................................... 8527
Timothy E. Allen, David Chen

M505 – HANDS ON PROJECTS AND DEMOS

3-D Printing and Arduino in the Chemical Engineering Classroom: Protein Structures, Heat Exchangers, and Flow Cells ................................................................. 8539
Jacob James Elmer, Daniel Adam Kraut

Citizen Scientists Engagement in Air Quality Measurements ......................................................................................................................... 8560
Anthony Butterfield, Katrina My Queen Le

Transference of Hands-on Desktop Learning Pedagogy Across Institution and Program Types .............................................................................................................. 8574
Negar Beheshti Pour, Kitana Manivone Kaiphanlum, Arsham Nazempour, David B. Thiessen, Robert F. Richards, Fanhe Shamus Meng, Oh sola Adeospe, Sarah A. Wilson, Derek L. Englert, Bernard J. Van Wie

The River Project: an Open-Ended Engineering Design Challenge from Bench-Scale to Pilot-Scale .............................................................................................................. 8582
Lucas James Landherr, Courtney Pfluger, Ryan A Kappes

M506 – SUSTAINABILITY IN CIVIL ENGINEERING

Development and Assessment of Three Envision Case Study Modules Connecting Behavioral Decision Science to Sustainable Infrastructure ......................................................................................................................... 8606
Reg Recayi Pecen, Faruk Yildiz, Iltekar Ihne Bastik, Matt Albrecht

Exploring Gender Differences in Students’ Sustainability Beliefs in Upper-level Engineering Courses .............................................................................................................. 8622
Marisa Swift, Allison Godwin, Tripp Shealy

Measuring Misconceptions About Climate Change Between Freshmen and Senior Civil Engineering Students .............................................................................................................. 8634
Tripp Shealy

Senior Civil Engineering Students’ Views on Sustainability and Resiliency ................................................................................................................................. 8649
Noah Salzman, Bhaskar C. S. Chittoori, Sondra M. Miller, Thomas A. Robbins

Methods for Measuring Systems Thinking: Differences Between Student Self-assessment, Concept Map Scores, and Cortical Activation During Tasks About Sustainability ......................................................................................................................................................................................... 8659
Mo Ha, Tripp Shealy

M507 – COLLEGE INDUSTRY PARTNERSHIPS DIVISION TECHNICAL SESSION 1

An Effective Industry-University Partnership to Develop Tomorrow’s Workforce ................................................................................................................................. 8671
Reg Recayi Pecen, Faruk Yildiz, Iltekar Ihne Bastik, Matt Albrecht

AAS Controls Technology Stackable Degree Education Requirements for Employees by Highly Automated Manufacturing Companies Drives a Collaborative Pathway at Weber State University ......................................................................................................................................................................................... 8683
Johanne K. McCutley

Alumni Grassroots Leadership Enables Sponsored Course Development ................................................................................................................................. 8693
Vladimir I. Produnov, John Greene

The Industry Scholars Program: An Immersive Professional Experience for Undergraduates .............................................................................................................. 8700
Breanne Przestrzelski, Chell A. Roberts, Leonard A. Perry

“Lean and Green” Assistance for Businesses in the U.S.-Mexico Border Region: A Retrospective .............................................................................................................. 8718
Paul K. Anderson, Patricia A. Sullivan, Jalal Rastegary, Christopher Campbell

M508 – COED: AUTOGRADING AND AUTOADVISING

Meet AD-VISOR: An Adaptive Advising System for a 21st Century Student Demographic ................................................................................................................................. 8728
Mike Thomas Pitcher, Peter Golding, Pedro-Arturo Espinoza, Crystal Fernandez-Pena, Celena Arreola, Hugo Gomez, Hector Erick Lagu Nevarez, Randy Hazel Anaya, Diane Elisa Golding, Kehui Marie Oyler, Americia Fernandez, Helen Elizabeth Geller, Luis Carlos Jimenez, Jennifer Arreola, Andrea Annette Duevez, Karla Alejandro Ayala

Developing and Testing an Electronic Homework System to Improve Student Engagement and Learning in Engineering Thermodynamics ......................................................................................................................................................................................... 8740
Stephen W. Crown, Constantin Tarawneh, Jazmin Ley
Detecting Plagiarism in SolidWorks CAD Courses..........................................................................................................................8751
Webster R. Johnson

M508B – COED: ONLINE AND BLENDED LEARNING PART 1

Carole E. Goodson, Susan L. Mierischin, Barbara Louise Stewart
Design of a Virtual Laboratory for Automation Control ........................................................................................................................8770
Zelin Zhu, Yuzhong Shen, Cheng Y. Lin, Shuo Ren, Katherine Smith, Anthony W. Dean
Innovative Approach to Online Argumentation in Computing and Engineering Courses ........................................................................8784
Swaroop-Joshi, Neelam Soundaranjan, Jeremy Morris
Characterizing MOOC Learners from Survey Data Using Modeling and n-TARP Clustering ...................................................................8798
Taylor V. Williams, Kerrie A. Douglas, Tanun Yellamraju, Mireille Boutin

M509 – CONSTRUCTION DIVISION TECHNICAL SESSION 3: CASE STUDIES

Integrating Micro-House Design and Construction into the Construction Management and Engineering Curriculum ..................................................8811
Edwin R. Schmeckpeper, John Edward Patterson, Nadia Al-Aubaidy
A Multimeda User-experience System with 3-D Simulation for the Construction Process of Nanwang Water Center with Potential to Inform Local Policy ..........................................................8872
Huiming Fan
Diversion Pivotal Project on China's Grand Canal .................................................................................................................................8819
Jing Wen, Jin Rong Yang, Michael Parke, Adrian Hadipriono Tan, Fabian Hadipriono Tan
Serving through Building: Sustainable Houses for the Gnobe People in Cieneguita, Panama .................................................................8845
Lauren W. Redden, April E. Simons, Scott William Kramer, Trenton Huffman
Exploratory Study of Facility Management Education Opportunities at the University of Oklahoma ..........................................................8859
Anthony Ferrenoud, Javenal Huizar

M515A – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 3

Professional Development Program for Improving the Diversity of Faculty in Electrical and Computer Engineering (iREDEFINE ECE) ..........................................................................................................................8872
Susan M. Lord, Athina Petropoul
Experiment-centric Pedagogy in Circuits and Electronics Courses ...........................................................................................................8887
Kenneth A. Connor, Paul M. Schoch, Kathy Ann Galtie, Dannah Newman, Shayla Sawyer Armand, Jeffrey Braunstein
Throwing Away the Course-centric Teaching Model to Enable Change .......................................................................................................8902
Anthony A. Maciejewski, Tom Chen, Zinta S. Byrne, Melissa D. Reese, Brunasen M. Notaros, Ali Pezeshki, Soroush Roy, Andrea M. Leland, Laura B. Sample McMeeking, Thomas J. Siller
Flipping a Hardware Design Class: An Encouragement of Active Learning. Should it Continue? ...............................................................8916
Nader Rafia, H. Shelton Jacinto
Collaborative Interdisciplinary Research Through Projects From Concept To Completion ........................................................................8925
Shahnam Mirzaei, Ana Cristina Cadavid, Vichi A Pedone, Werner Horn, Harvey Rich

M517 – ENGINEERING AND PUBLIC DIVISION TECHNICAL SESSION 2

Leveraging the NAM's 'Getting Nurses on Boards Coalition' to Promote NAE's 'Changing the Conversation' Campaign ..........................................................................................................................8945
Daniel B. Oerther
MERECat: A Case Study of How Faculty-led Research Initiatives Gave Rise to a Cross-departmental Research Center with Potential to Inform Local Policy .........................................................................................8956
Rohit Kandakatla, Angela Goldenstein, David Allen Evenhouse, Edward J. Berger, Jeffrey F. Rhoads, Jennifer Deboer
Economic and Pedagogical Analysis of an Alternative Model of Engineering Education ..............................................................................8966
R. Alan Cheville, John Heywood, Charles James Larkin, Shaen Corbet
An Exploration on the Reform of China’s Engineering Education under the Background of 'Made in China 2025' .........................................................8988
Huiming Fan

M520 – ENGINEERING ETHICS DIVISION TECHNICAL SESSION 2

Interim Results of a Longitudinal, Multi-site Survey of Perceptions of Academic Integrity ........................................................................8999
Samson Pepe Goodrich, Teresa Ryan, Colleen Janeiro, Patrick F. O'Malley
Where Should We Begin? Establishing a Baseline for First-year Student Awareness of Engineering Ethics .................................................................9025
Natalie C. T. Fan Tynie, Ingrid St. Omer
The Effectiveness of Webinars in Professional Skills and Engineering Ethics Education in Large Online Classes .............................................9038
Brendon Lumgair
A Midwestern Ghost Town: Times Beach, Missouri .................................................................................................................................9063
Marilyn A. Dyrud

Design of a Virtual Laboratory for Automation Control
Zelin Zhu, Yuzhong Shen, Cheng Y. Lin, Shuo Ren, Katherine Smith, Anthony W. Dean
Innovative Approach to Online Argumentation in Computing and Engineering Courses
Swaroop-Joshi, Neelam Soundaranjan, Jeremy Morris
Characterizing MOOC Learners from Survey Data Using Modeling and n-TARP Clustering
Taylor V. Williams, Kerrie A. Douglas, Tanun Yellamraju, Mireille Boutin

M509 – CONSTRUCTION DIVISION TECHNICAL SESSION 3: CASE STUDIES

Integrating Micro-House Design and Construction into the Construction Management and Engineering Curriculum
Edwin R. Schmeckpeper, John Edward Patterson, Nadia Al-Aubaidy
A Multimeda User-experience System with 3-D Simulation for the Construction Process of Nanwang Water Center with Potential to Inform Local Policy
Huiming Fan
Diversion Pivotal Project on China's Grand Canal
Jing Wen, Jin Rong Yang, Michael Parke, Adrian Hadipriono Tan, Fabian Hadipriono Tan
Serving through Building: Sustainable Houses for the Gnobe People in Cieneguita, Panama
Lauren W. Redden, April E. Simons, Scott William Kramer, Trenton Huffman
Exploratory Study of Facility Management Education Opportunities at the University of Oklahoma
Anthony Ferrenoud, Javenal Huizar

M515A – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 3

Professional Development Program for Improving the Diversity of Faculty in Electrical and Computer Engineering (iREDEFINE ECE)
Susan M. Lord, Athina Petropoul
Experiment-centric Pedagogy in Circuits and Electronics Courses
Kenneth A. Connor, Paul M. Schoch, Kathy Ann Galtie, Dannah Newman, Shayla Sawyer Armand, Jeffrey Braunstein
Throwing Away the Course-centric Teaching Model to Enable Change
Anthony A. Maciejewski, Tom Chen, Zinta S. Byrne, Melissa D. Reese, Brunasen M. Notaros, Ali Pezeshki, Soroush Roy, Andrea M. Leland, Laura B. Sample McMeeking, Thomas J. Siller
Flipping a Hardware Design Class: An Encouragement of Active Learning. Should it Continue?
Nader Rafia, H. Shelton Jacinto
Collaborative Interdisciplinary Research Through Projects From Concept To Completion
Shahnam Mirzaei, Ana Cristina Cadavid, Vichi A Pedone, Werner Horn, Harvey Rich

M517 – ENGINEERING AND PUBLIC DIVISION TECHNICAL SESSION 2

Leveraging the NAM’s 'Getting Nurses on Boards Coalition' to Promote NAE’s 'Changing the Conversation' Campaign
Daniel B. Oerther
MERECat: A Case Study of How Faculty-led Research Initiatives Gave Rise to a Cross-departmental Research Center with Potential to Inform Local Policy
Rohit Kandakatla, Angela Goldenstein, David Allen Evenhouse, Edward J. Berger, Jeffrey F. Rhoads, Jennifer Deboer
Economic and Pedagogical Analysis of an Alternative Model of Engineering Education
R. Alan Cheville, John Heywood, Charles James Larkin, Shaen Corbet
An Exploration on the Reform of China’s Engineering Education under the Background of 'Made in China 2025'
Huiqing Fan

M520 – ENGINEERING ETHICS DIVISION TECHNICAL SESSION 2

Interim Results of a Longitudinal, Multi-site Survey of Perceptions of Academic Integrity
Samson Pepe Goodrich, Teresa Ryan, Colleen Janeiro, Patrick F. O'Malley
Where Should We Begin? Establishing a Baseline for First-year Student Awareness of Engineering Ethics
Natalie C. T. Fan Tynie, Ingrid St. Omer
The Effectiveness of Webinars in Professional Skills and Engineering Ethics Education in Large Online Classes
Brendon Lumgair
A Midwestern Ghost Town: Times Beach, Missouri
Marilyn A. Dyrud
In-vitro Fertilization (IVF) as a Sociotechnical System: Using Actor-Network Theory (ANT) for Teaching Undergraduate Engineers About the Ethics of Assisted Reproductive Technology (ART) .......................................................... 9079
Rosalyn W. Berne

M523B – TECHNOLOGY POTPOURRI I

Implementing Graphene and Graphene Oxide in a Proton Exchange Membrane Fuel Cell .............................................................. 9092
Hamef Tsauji, Yeong Ryu, Srinivasa Govindarajan
Performance of a Linux-based Network Router .................................................................................................................................. 9104
David Border
Structured Programing Methodology and Its Role in Cognitive Development in Problem Solving Skills ........................................... 9118
Omer Farook, Jai P. Agrawal, Ashfaq Ahmed, Wangle Yu, Hassan Abdullah Alibrahim, Ahmed S. Khan, Qudsia Tahmina
Mining Robot Control Using Wireless Communication and Embedded Systems ................................................................................. 9144
Teshad Chambers, Jimmyon Jo, Christopher Washington, Wei-Bang Chen
Introduction of Mechatronics Specialization through Concentration Areas in the Mechanical and Electrical Engineering Technology Programs .................................................................................................. 9154
Otilia Popescu, Yukica M. Jovanovic, Sanjeevi Chitikeshi, Isaac L. Flory IV

VOLUME 14

M524 – ENTREPRENEURSHIP & ENGINEERING INNOVATION DIVISION TECHNICAL SESSION 3

Student-created Canvases as a Way to Inform Decision-making in a Capstone Design Sequence .......................................................... 9167
Joe Tranquillo, William A. Kline, Cory Hixson
Evaluating Innovations from a Critical Thinking Approach ............................................................................................................. 9182
Sarah Jane Grigg
Assessment and Evaluation of Villanova University’s Engineering Entrepreneurship Minor Program ..................................................... 9195
Pratipal Singh, Teresa Genevieve Woci{c}
A Way to Win: Incentivizing Engineering Faculty to Incorporate Entrepreneurship in Their Courses ................................................ 9207
Adam R. Carberry, Samantha Ruth Brunhaver, Jeremy S. London
Beyond Problem Solving to Creating Value: A Priority for Engineering Educators ................................................................................ 9216
William A. Kline, Dong E. Melton

M525 – ENVIRONMENTAL ENGINEERING DIVISION TECHNICAL SESSION 2

Collaboration in Assessment and Individual Validation for the ‘Digital Native’ ..................................................................................... 9229
Nathanial P. Nochom, Jeffrey A. Starke, David C. Zgonc
Environmental Considerations in Engineering: Students’ Goals and Journeys ................................................................. 9248
Angela B. Biefield, Greg Radifson
Informing an Environmental Ethic in Future Leaders Through an Environmental Engineering Sequence ........................................ 9263
Charles M. Ouellette, Luke Thomas Plante, Erick Martinez, Benjamin Michael Wallen, Jeffrey A. Starke
Environmental Energy Course Adopted into a University’s Core Curriculum ................................................................................... 9284
Alexa N. Rihamah Abdullah, Mark Schumack

M526 – DIVISION FOR EXPERIMENTATION & LAB ORIENTED STUDIES TECHNICAL SESSION 2

Designing a Sustainable Large-scale Project-based Learning (PBL) Experience for Juniors in Electrical and Computer Engineering ........................................................................................................... 9315
Stephen Schultz, Brad L. Hutchings
Developing a Low-voltage Microgrid for Experiments in Renewable Energy Distribution ............................................................... 9329
Harry Courteney Powell, Brian Hayt
Inexpensive Digital Light Processing 3D Printers in Undergraduate Engineering Labs .............................................................. 9341
Nebosja I. Jaksic, Baha I. Kazem Assaf
Work in Progress: Applications of Internet of Things (IoT) in Distance Lab Checkoff ......................................................................... 9352
Mohammed Rabhi, Emily Teresa Carbaugh
Using Arduino in Engineering Education: Motivating Students to Grow from a Hobbyist to a Professional ........................................ 9362
Brian M. Wood, Alexander O. Ganago

M528 – DEVELOPING TEACHING AND MENTORING SKILLS

A Doctoral Teaching Program in Engineering ........................................................................................................................... 9389
Donald P. Visco Jr., Nidha Makki, Esther R. Wain-Weiss
Graduate Student Self and Adviser Ratings on Professional Competencies ......................................................................................... 9408
Bret Austin Arnold, Alison J. Kerr, Bradley J. Brunner, Michael W. Keller
Integrative Engineering Leadership Initiative for Teaching Excellence (iELITE) ................................................................................... 9421
Hyun Hannah Choi, Yating W. Chen, A. Mattux Beckman Jr., Lucas Andeson, Blake Everett Johnson, Matthew D. Goodman, Chris Migotsky, Nicole Johnson-Grayson
Lessons Learned from a Chemical Engineering REU: The Importance of Training Graduate Students Who are Supervising REU Students ................................................................. 9437

When the Master Becomes the Student: Adviser Development through Graduate Advising ........................................... 9459

Alison J. Kerr, Bradley J. Brummel, Bret Austin Arnold, Michael W. Keller

M528B – GRADUATE RECRUITMENT AND RETENTION

Identifying the Best Admission Criteria for Data Science Using Machine Learning ................................................................. 9476

Anahita Zarei, Richard Hutley

Effectiveness of GRE Workshops to Increase Awareness .............................................................................. 9486

Colby Wetshaar, Manuel D. Rossetti, Kim Lascola Needy, Eric Specking, Trevor Joe Dodson

International Student Recruiting and Retention in Post-graduate STEM Education ........................................... 9499

Andres Alejandro Herrera, Eric Specking, Richard Ham

The Effectiveness of an On-campus Open House Targeting Underrepresented Students ........................................ 9511

La’Tonia Stiner-Jones

Supportive Interventions for the Success of URM Students in STEM Graduate Programs ........................................ 9520

Shabnam Etemadi Brady, Germysha Emily Little, Lesia L. Crumpton-Young

M530 – TOPICS IN COMPUTING AND INFORMATION TECHNOLOGY II

Applied Computing for Behavioral and Social Sciences (ACBSS) Minor ................................................................. 9530

Farshid Marbouti, Valerie A. Carr, Belle Wei, Morris E. Jones Jr., Amy Struge

Does Everyone Use Computational Thinking?: A Case Study of Art and Computer Science Majors ........................................... 9541

Andreat Pebrian, Oemardi Lawanto, Kamyn Peterson-Becker, Alia Melvin, Shane E. Gunmen

Cloud Application Monitoring for Efficient Network Management in Public Schools ........................................ 9557

John Pickard, Dale Drummond, Philip J. Lunsford II, Ciprian Popoviciu

Encouraging Women in CS 1: Intervential Inclusive Pedagogy in Computer Science ........................................... 9567

Arshia Khan

M530B – COMPUTING TECHNOLOGY APPLICATIONS II

P2P Platform for Peer Instruction in Flipped Classroom .................................................................................. 9574

Yun Dai, Tammeng Li, Ang Liu, Stephen Lu

Development of Undergraduate Interdisciplinary Cybersecurity Program: A Literature Survey ......................................... 9591

Tamer Omar, Srikanth Venkatesan, Abduljaffar Amanrus

A Practical Approach to Cellular Communications Standards Education .......................................................... 9606

Vuk Marovic, Antoni Geliocz-Bosch, Jeffrey Reed

A Flipped Active-learning Class to Support Diverse Students in a Large Introduction to Programming Class ......................................... 9624

Laura Kay Dillon, Michelle Slattery

M531 – INSTRUMENTATION DIVISION TECHNICAL SESSION 2

Developing PLC-based Pneumatic Lab Activities for an Undergraduate Course on Fluid Power ......................................... 9646

Ali Alavizadeh, Maged Mikhail

Developing a Radio Frequency Identification (RFID) as a Decision Support System in Horticulture Industry ......................................... 9655

Lash B. Mapa, Feruza Geji, Sadia Alam, Gobarna Aryan

Framework to Develop the Customized Tool for RFID Experiment .................................................................. 9673

Tae-Hoon Kim, Lash B. Mapa, Min Hye Jun

Design and Development of a Supervisory Control and Data Acquisition (SCADA) Laboratory ......................................... 9684

Faruk Yildiz, James Holekamp, Reg Recayi Pecen, Umit Karabiyik, Keith L. Coogler, Jeremy Ryan England

Design, Development, and Testing of Load Cell Accelerometers ............................................................................ 9700

Dale H. Linnthaler

STEM Education Internship Program .............................................................................................................. 9713

Asad Yousaf, Mohamad A. Mustafa, Mir M. Hayder, Alberto G. De La Cruz, Kisha Renee Cunningham

M532 – WHY CAN'T WE GET FACULTY AND STUDENTS TO GO ABROAD?

Sustaining a Study Abroad Program at Scale: What Motivates Faculty Members to Engage in Such Programs? ......................................... 9727

David B. Knight, Holly M. Matosovich, Mayra S. Artilles, Kirsten Davis, Timothy Kinoshita, Diana Bairakkarova, Kacie Hodges, Tamara Knott, Walter C. Lee, Marlena McGlothlin Lester, Lisa D. McNair, Kenneth Reid, Denise Rutledge Simmons

Understanding Engineering and Technology Student Perceptions: Barriers to Study Abroad Participation ......................................... 9743

Gregg Morris Warnick, Marie S. Cali, Randall Davies

Internationalization Tool for the U.S. Universities ................................................................................................. 9761

José Carlos Quadrado
M533A – ELEMENTARY ENGINEERING

Examining and Characterizing Elementary School Teachers’ Engineering Design-based Instructional Practices and Their Impact on Students’ Science Achievement ................................................................. 9763
Brenda M. Capobianco, James Lehman

Exploring the Use of Approximations of Practice in the Context of Elementary Teachers’ Attempts at Implementing Engineering Design-based Science Teaching ............................................................................. 9780
Brenda M. Capobianco, Jeffrey D. Radloff

Pre-Teachers Learn to Teach the Engineering Design Process (Research-to-Practice) ......................................................................................................................... 9807
Nicole J. Glen

The Effect of Teachers’ Professional Development on Implementing Engineering in Elementary Schools (RTP) .................................................................................. 9825
Teresa Porter, Meg E. West, Rachel Louis Kafiez, Kathy Lea Malone, Karen E. Irving

M533B – PROGRAM EVALUATION STUDIES

Bowman Creek Academy: An Immersive STEM Experience (Work in Progress) ................................................................................................................................. 9838
Sara Boudaud, Amy Blue Cuebas, Marty Kennedy

Elements that Support and Hinder the Development and Implementation of a School-wide/District-wide STEM Integration Program (Evaluation) ......................................................... 9850
Mia Dubosarsky, Jeannine H. Hubelbank

VOLUME 15

Evaluation of the 2017 National Summer Transportation Institute Hosted at Rowan University ............................................................................................................. 9874
Ayman Ali, Yuqaf A. Melhu, Shivani Dharmavir Patel

Impact of an Engineering Service Learning Program on Dual Credit High School Student Interests in Engineering (Evaluation) ................................................................................ 9888
J. Jill Rogers, Amy Annette Rogers, James C. Baygents

M533C – MODELING, INQUIRY, ENGINEERING LITERACY & ARGUMENTATION

Argumentation in K-12 Engineering Education: A Review of the Literature (Fundamental) ................................................................. 9900
Amy Wilson-Lopez, Christina Marie Sias, Ashley R. Strong, Jared W. Garlick, Angela Minichiello, Jorge Americo Acosta Feliz, Sandra Weingart

Determining the Engineering Knowledge Dimension: What all High School Students Should Know to be Engineering Literate (Fundamental) ................................................. 9912
Tanner J. Huffman, Greg J. Strimel, Michael Grubbs

Effective Design-based Implementation Research Using Complex Systems Modeling (Fundamental) ................................................................. 9924
Roxanne A. Moore, Michael Helms, Marion Usselman

From Physics to Where? Diagnosing the Effect of a Discovery-based Teaching Paradigm on Continued Barriers to Women’s Entry to the Physical Engineering Science Professions (RTP, Diversity) ............................................. 9941
Katherina V. Tarnai-Lokhorst

M535 – VIRTUAL REALITY, SIMULATION, AND OPTIMIZATION OF MANUFACTURING

A Comparative Study on Affordable Photogrammetry Tools ................................................................................................................................. 9950
John Fraley, Akruti Inam, Ismail Fidan, Magesh Chandramouli

Preparing Tomorrow’s Workforce in Lightweight Materials: Properties, Optimization and Manufacturing Processes ................................................................................................. 9958
Jimmy Ching-Ming Chen, Y. Gene Liao, Brandon Roderick Tucker, Alan R. Lecz

Virtual Reality Education Modules for Digital Manufacturing Instruction ......................................................................................... 9972
Magesh Chandramouli, Ge Jin, Justin David Heffron, Ismail Fidan, Mel Cossette, Cheryl A. Welsch, Wayne Merrell

M537 – MATHEMATICS DIVISION TECHNICAL SESSION 3

Flipping the Differential Equations Classroom: Changes Over Time ................................................................................................................................. 9986
Campbell B Begu, Patricia A. Rainstone, Angela Thompson, Adrienne Parsons, Gale J. Crush

Demystifying Tensors: A Friendly Approach for Students of All Disciplines ................................................................................................................................. 9997
Brenda M. Capobianco, James Lehman

How to Make Engineering Statistics More Appealing to Millennial Students ................................................................................................................................. 10019
Robert G. Batson

Infusion of Big Data Concepts Across the Undergraduate Computer Science Mathematics and Statistics Curriculum ................................................................................................................................. 10031
Carl Petit, Rajendran Swamidurai, Ash Abebe, David Shannon

Conceptual Power Series Knowledge of STEM Majors ................................................................................................................................. 10041
Emre Tokgoz
M538 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 3

Improving Instruction and Assessment via Bloom’s Taxonomy and Descriptive Rubrics ................................................................. 10072
Kathryn R. Gasselin, Nicole Okamoto
High-Enrollment Mechanical Engineering Programs Meeting the Challenge of Career Advising Through a Seminar Course .................................................. 10090
Rachel E. Thomassie, Kathryn Kirsch, Eric R. Marsh, Timothy J. Jacobs
On the Restructuring of the Undergraduate Mechanical Engineering Curriculum for Quarter to Semester Conversion .......................... 10118
Pattabhi Sitaran, Anca L. Sala
Critical Analysis of the Validity of the Fundamentals of Engineering Mechanical Exam ............................................................... 10382
Alex C. Scantam
Course and Standardized Exam Statistics in Mechanical Engineering .......................................................... 10126
Jessica Lofon, Jared T. Fulcher, Dick Blandford

M540 – MINORITIES IN ENGINEERING DIVISION TECHNICAL SESSION 3

Investment in Informal Outreach Programs: A Systematized Literature Review of Informal Pre-College STEM Programs in African-American Communities .................................................. 10136
Jessica Rush Leeker, Mary K. Pilote
Investigating the Effects of Mechanical Vibrations on Oryza Sativa: An Interdisciplinary Summer Undergraduate Research Experience ........................................ 10175
Dennis O’Connor
Experiencing the Engineering Attitudes and Experiences of URM Summer Camp Participants .......................................................... 10187
Jessica Symone Whipple, Sheilie P. Prater, Jni-Lynn Mondisa
Filling the Pipeline by Exciting Middle School Girls with Creative Projects .......................................................... 10196
Megan Charlotte Karbowski, Mackenzie Tjogas, Carleen Petrossian, Barbara E. Marino

M541 – MULTIDISCIPLINARY DESIGN II

Mixed Reality and Automated Machinery .......................................................... 10214
Ralf Oliver Schneider
Effects of Service-Learning Projects on Capstone Student Motivation .......................................................... 10223
Jason Forsyth, Mark M. Budnik, Randi Shledosky-Shoemaker, Jeffrey Will
Observed Best Practices Within a Student Driven Multidisciplinary Team-based Architectural Engineering Capstone .......................................................... 10236
Ryan L. Solonsky, M K Purfit
Preparation of the Professional Engineer: Outcomes from 20 Years of a Multidisciplinary and Cross-sectoral Capstone Course .......................................................... 10251
Tela Favaloro, Patrick E. Manney, Stephen C. Petersen, John F Vesecky

M542A – SCALING CLASS SIZE AND TECHNOLOGY – NEW ENGINEERING EDUCATORS DIVISION

A Review of Electronic Engineering Logbooks Throughout the Electrical Engineering Curriculum .......................................................... 10284
Steven S. Holland, Jennifer L. Bonnwell, Joshua David Carl
Curriculum and Instruction Basics for the New Engineering Educator .......................................................... 10296
Michael Allen Hayden, Randell W. Peters
A Corporate Organizational Model for Scaling Class Size .......................................................... 10309
Geoffrey Recktenwald, Allison Godwin, Anant Sahai, Matthew West
Failure Rates in Engineering: Does It Have to Do with Class Size? .......................................................... 10324
Peggy C. Boylan-Ashraf, John R. Haughery

M550 – TWO YEAR COLLEGE STEM PROGRAMS MEETING THE NEEDS OF INDUSTRY

Evaluating the Quality of Project Summaries for S-STEM Proposals .......................................................... 10348
A Model for Aligning Engineering Technology Curriculum with Industry Needs .......................................................... 10357
David I. Spang, Eric Constans, Edem G. Tetteh
Addressing Rural Industry and Student Needs through the Manufacturing of a Community College and University Partnership in Mechatronics and Robotics Systems .......................................................... 10371
Mark Bradley Kinney, Mark Higum, Aleksandr Sergeyev, Scott A Kuhl
Meeting STEM Workforce Demand in a Statewide Rural Community College Collaborative .......................................................... 10382
Caroline Vaningen-Dunn, Phil Blake McBride, Cynthia Kay Pickering, Verlyn Fick, Judith M. Slisz, John Morgan
From Entry to Employment: Interlocking Keys to Building a Successful Technician Program

Randy Libros, Tammy Wooten, Mozhgan Bahadory

M551B – WOMEN IN ENGINEERING DIVISION TECHNICAL SESSION 2

A Systematic Literature Review of the Impact of Undergraduate Work Experiences on Women in Engineering

Madison E. Andrews

Impact of Non-technical Conferences in Female Engineering Students’ Self-esteem and Engineering Self-efficacy

Suzanne Zurn-Birkhimer, Mayari Illarij Serrano Anazco, Rachel Ann Baker

Women on the Community College Pathway toward a Baccalaureate Degree in Engineering or Computer Science in Texas

Roberta Rincon

The STEM Gender Gap: An Evaluation of the Efficacy of Women in Engineering Camps

Malle Schilling, Margaret Pinnell

M556 – MILITARY AND VETERANS DIVISION TECHNICAL SESSION 2: VETERAN IDENTITY & INCLUSION

Factors Influencing Student Veteran Participation in Online Engineering Education

Douglas Moore Schutz, Yong-Young Kim, Dante Dionne

Integrating Veteran Experiences into Engineering Design: Veteran-led Student Development of High-power Rocket Competition Team

Thomas L. Davis, D. Blake Stringer, Maureen Regan McFarland

Reaching and Including Veteran Students in the Technical Communication Classroom

Alyson Grace Eggleston, Robert J. Rubb

I Never Played the ‘Girl Card’: Experiences and Identity Intersections of Women Student Veterans in Engineering

Rebecca C. Atkinson, Catherine Mobley, Catherine E. Brawner, Susan M. Lord, Michelle M. Camacho, Joyce B. Main

T104 – HANDS ON SKILLS IN BME

Guided Modules Emphasizing Process-Based Troubleshooting Techniques Help Below-Average Performing Students Improve Instrumentation Skills

Renata Fortuna Ramos

Connecting Theoretical Concepts to Physical Phenomena Using 3-D-printed Microfluidic Devices

Sarah Ikhanipour Rooney, Peter A. Sariano, Zachary Aaron Sexton, Wade Gerald Stewart, Kevin R. Guidry, Jason Gleghorn

Teaching Genomics and Genomic Technologies to Biomedical Engineers: Building Skills for the Genomics World

Karen R. Thickman

Creating New Labs for an Existing Required Biomedical Engineering Imaging Course

Elizabeth Kathleen Bucholz, Matthew Brown

T105 – CHEM E CURRICULUM: FRESHMAN AND SOPHMORE

A Framework to Guide Design of Interactive and Constructive Learning Opportunities

Tracy Q. Gardner

Chemical Engineering Major Selection Throughout the First Year: A Mixed-Methods Approach

Katherine Rae Tanner, Rachel Louis Kajfez, Krista M Kecskemety

VOLUME 16

Quantifying Self-guided Repetition Within an Interactive Textbook for a Material and Energy Balances Course

Matthew W. Liberatore, Katherine Roach

Modeling Student Performance in an Introductory Chemical Engineering Course

Kyle Joe Branch, Anthony Butterfield

T106B – EDUCATIONAL & PROFESSIONAL ISSUES OF STRATEGIC IMPORTANCE TO THE CIVIL ENGINEERING PROFESSION AND ASCE

Celebrating 20 Years of the ExCEEd Teaching Workshop

Implementing Civil Engineering-specific Requirements for Professional Licensure

Matthew Swenty, Craig N. Musselman, Monte L. Phillips, L. Robert Smith

Specialization Within the Civil Engineering Profession: Issues, Analysis, and Recommendations

Stephen J. Ressler, Thomas A. Lenox
Adjusting to the New ABET Criteria 3 and 5: It’s Really Not Very Hard ................................................................. 10668

The Third Edition of the Civil Engineering Body of Knowledge: An Update and Overview .................................................. 10687

Kenneth J. Fridley, Decker B. Hains, Brock E. Barry, Kristen L. Sanford Bernhardt, Leslie Nolen Cae

T108 – THE BEST OF COMPUTERS IN EDUCATION

Design of a Modular Educational Robotics Platform for Multidisciplinary Education .......................................................... 10714
Zhen Wei, Carlotta A. Berry

Weekly Programs in a CSI Class: Experiences with Auto-graded Many-small Programs (MSP) .................................................. 10734
Joe Michael Allen, Frank Yahid, Kelly Downey, Alex Daniel Edgcomb

Partnering to Develop Educational Software Applications: A Four-year Retrospective Study .................................................. 10747
David Resping, John K. Estell

Student Usage of Small Auto-graded MATLAB Coding Exercises ................................................................................... 10762
Alex Daniel Edgecomb, Nikitha Sambamarthy, Dasharath Gulbady, Santosh Kasula

T108B – COED: EE TOPICS

Use of FPGAs in a Digital System Design Course with Computer Gaming Applications .................................................... 10775
Cheng Chih Liu

Translating the Instructional Processor from VHDL to Verilog .......................................................................................... 10786
Ronald J. Hayne

Modeling a Perceptron Neuron Using Verilog Developed Floating-Point Numbering System and Modules for Hardware Synthesis ........................................................................................................ 10796
Afsaneh Moinie, Uphraim Nielsen

T109 – CONSTRUCTION DIVISION TECHNICAL SESSION 4: CAPSTONE, SAFETY AND BEYOND

Utilizing Capstone Courses in Separate Fields to Create Real-World Multidisciplinary Team Simulations .................................. 10810
Bradley Louis Benthart, Clark A. Cory, Rabina Rajkarnikar, Cirilo I. Rangel, Mark Shaurette

Interactive Safety Training: A Technological Tool for Fall Protection on Construction Sites .............................................. 10824
Melissa Lynn Hrvnak, Sheena Nastasia Marston, Lisa E. Burris, Fabian Hadipriomo Tan

Safety Training for Students Engaged in Service Learning Projects .................................................................................. 10854
Robert Alan Bugg, Wesley Collins

Examination of Future Construction Career Role Preferences and Identities of Construction Students ..................................... 10864
Dorail F. Porter, Andrea Nana Ofori-Boadu

T113A – STUDENT EMPATHY AND HUMAN CENTERED DESIGN

The Impact of Functional Modeling on Engineering Students’ Mental Models ...................................................................... 10879
Jacob Thomas Nelson, Julie S. Linsey, Robert L. Nagel, Matt Robert Bohm

Characterizations and Portrayals of Intuition in Decision-Making: A Systematic Review of Management Literature to Inform Engineering Education ................................................................. 10902
Emily Dringenberg, Annie Abell

Increasing Student Empathy Through Immersive User Empathy Experiences in First-Year Design Education ................................. 10927
Leslie Mitchell, Leslie Light

Implications of Contextual Empathic Design for Engineering Education ............................................................................. 10943
Benedikt Von Unold, Annette Isabel Böhmer, Tua A. Björklund, Nicolas Ledi, Udo Lindemann, George Toye, Sheri Sheppard

Human-Centered Design Incorporated in the Freshman Year through an Active Learning Engineering Center Lab: Best Practices, Lessons Learned, and Proposed Improvements .......................................................... 10961
Kirsten Heikkinen Dodson, Joseph B. Tipton Jr., Mark Philip McDonald, Greg Nordstrom, A. Fort Gwinn

Quantifying Changes in Creativity: Findings from an Engineering Course on the Design of Complex and Origami Structures .................................................................................................................. 10973
Justin L Hess, Anantha Sathyarayanan Rao, Grant Fore, Jiangmei Wu, Andres Tenvar, Sobel Anwar

T114A – COGNITIVE ENGAGEMENT

Measuring Engineering Students’ In-class Cognitive Engagement: Survey Development informed by Contemporary Educational Theories ........................................................................................................ 10994
Benjamin David Lutz, Allyson Jo Ironside, Nathaniel Hunsu, Cassandra J. Groen, Shane A. Brown, Olusola Adesope, Denise Rutledge Simmons

Fostering an Enriching Learning Experience: A Multisite Investigation of the Effects of Desktop Learning Modules on Students’ Learning Experiences in Engineering Classrooms ..................................................................... 11009
Nathaniel Hunsu, Olusola Adesope, Bernard J. Van Wie, Negar Beheshti Pour

Personal Epistemology: The Impact of Project-based Learning .............................................................................................. 11021
Rongrong Liu, Jiubin Zhu
A Multi-Epistemological Mapping of Knowing, Learning, and Analytics in Materials Science and Engineering ................................................. 11036
Petar Johanes

Application of Brain-based Learning Principles to Engineering Mechanics Education: Implementation and Preliminary Analysis of Connections Between Employed Strategies and Improved Student Engagement ................................................................. 11048
Firas Akasheh, John T. Solomon, Eric Hamilton, Chitra R. Nayak, Vimal Kumar Viswanathan

Student Perspectives on Cognitive Engagement: Preliminary Analysis from the Course Social and Cognitive Engagement Surveys .................................................................................................................. 11059
Allyson Jo Ironside, Shane A. Brown, Benjamin David Lutz

T114B – MOTIVATION, IDENTITY, AND BELONGINGNESS

Gender, Motivation, and Pedagogy in the STEM Classroom: A Quantitative Characterization ......................................................................... 11071
Jonathan D. Sostek, Yevgeniya V. Zastavker, Michael D. Gross

The Challenges and Affordances of Engineering Identity as an Analytic Lens ................................................................................................. 11090
Christine Allison Gray, Robin Tuchscherer, Ron Gray

Development and Testing of an Instrument to Understand Engineering Doctoral Students' Identities and Motivations ................................................................................................................................. 11108
Heather Lee Perkins, Matthew Bahnsen, Maritissa A. Tsagawa-Nieves, Adam Kirn, Cheryl Cass

A Combined Model for Predicting Engineering Identity in Undergraduate Students ................................................................................................. 11132
James Dylan Kollmer, Saroj K. Biswas, Li Bai, Arif I. Sarwat, Walid Saad

You Either Have It or You Don't: First Year Engineering Students’ Experiences of Belongingness .................................................................................. 11146
Jacqueline Ann Rohde, Lisa Benson, Geoff Potvin, Adam Kirn, Allison Godwin

Engineering Identity Development of Hispanic Students ................................................................................................................................. 11160
Meagan R. Kendall, Nathan Hyungsook Choe, Maya Denton, Maura Borrego

T115B – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 4

Zahraasadat Alavi, Arash Kiashashabi

A Study on Measuring Self-efficacy in Engineering Modeling and Design Courses ................................................................................................. 11196
Anita D. Pan Kolar, Sario K. Biswas, Li Bai, Arif I. Sarwat, Walid Saad

Designing a Curriculum that Helps Students Create Connected Narratives in Electrical Engineering .................................................................................. 11209
Sara Kaye Jones, Mani Mina

Documenting Engineering Identity: Electrical and Computer Engineering Departmental Documents and Student Identity ................................................................................................................................. 11217
Rachel E. Friedensen, Erin E. Doran, Sarah Rodriguez

How Free Choice Affects Student Interest in a Junior-level Embedded Systems Lab Course ................................................................................................. 11234
Michael Trent Bolt, Andrew Cookston, John Y. Hung, Victor P. Nelson

T116 – ENERGY CONVERSION AND CONSERVATION DIVISION TECHNICAL SESSION ON ENERGY EFFICIENCY AND POWER GRID SECURITY

Study of Energy Efficiency Characteristics of a Hydraulic System Component ................................................................................................................................. 11249
Alamgir A. Choudhury, Prajna Paramita, Jorge Rodriguez

Air Entrapment Issues in Piping for a Small Hydroelectric Station in Western North Carolina ................................................................................................. 11259
George D. Ford, Hayrettin B. Karayaka, Sung-Joon Suk

VOLUME 17

Testbed for Transactive Energy and its Effects on the Distribution System and Protective Devices Settings ................................................................................................................................. 11268
Ilya Y. Grinberg

A Hardware-in-the-loop Experimental Platform for Power Grid Security ................................................................................................................................. 11280
Anita Dyson, Li Bai, Arif I. Sarwat, Walid Saad

Enhanced Workforce Development via the 2017 FEEDER Student Summer Program ................................................................................................. 11297
Robert J. Kerestes, Zhihua Qu, Damla Turgut

T118 – EDGD: POTPOURRI

Detection and Incidence of Plagiarism in a Solid Modeling Course ................................................................................................................................. 11316
Steven Joseph Kiristukas

Using Online Tutorials in an Introductory Engineering Graphics Course to Improve Outcomes ................................................................................................. 11326
Nancy E. Study, Michael Lobaugh

The Engineering Design Graphics Journal and Its Selected Metrics of Effect ................................................................................................................................. 11338
Robert A. Chin
T120 – ENGINEERING ETHICS DIVISION TECHNICAL SESSION 3

A Longitudinal Study of Social and Ethical Responsibility Among Undergraduate Engineering Students: Comparing Baseline and Midpoint Survey Results

Student Learning About Engineering and Corporate Social Responsibility: A Comparison Across Engineering and Liberal Arts Courses

Goals and Research Takes an Unexpected Turn?

Institution

First-year Engineering Student Expectations and Experiences: Community, College, and Curriculum

First Generation Engineering Student Mentoring Program: A Case Study of a Large Engineering School in the T127A – FIRST YEAR PROGRAMS DIVISION: COLLECTION

Project-based Learning: Engaging Biomedical Engineering Sophomores Through a Collaborative Vein-finder Office Temperature Monitoring System: A Capstone Project

Laboratory Design to Enhance Understanding of Statics for Aeronautical Engineering Technology Students

Field Investigations: An Overlooked Form of Laboratory Experience

Is a Virtual Reality-based Laboratory Experience a Viable Alternative to the Real Thing?

Laboratory Design to Enhance Understanding of Statics for Aeronautical Engineering Technology Students

Office Temperature Monitoring System: A Capstone Project

Project-based Learning: Engaging Biomedical Engineering Sophomores Through a Collaborative Vein-finder Device Project with Nursing

T124 – ENTREPRENEURSHIP & ENGINEERING INNOVATION DIVISION TECHNICAL SESSION 4

Exploring the Dynamic Interactions and Cognitive Characteristics of NSF Innovation Corps (I-Corps) Teams

Engineering Deans’ Perspectives on the Value of Entrepreneurial Thinking in Engineering Education

It was a Failure, But a Good Failure’: A Qualitative Study Exploring Engineering Students’ Critical Entrepreneurship Experiences and Their Impacts

Food for Thought: Predicting Entrepreneurial Behavior

T126 – DIVISION FOR EXPERIMENTAL & LAB ORIENTED STUDIES TECHNICAL SESSION 3

Field Investigations: An Overlooked Form of Laboratory Experience

Is a Virtual Reality-based Laboratory Experience a Viable Alternative to the Real Thing?

Laboratory Design to Enhance Understanding of Statics for Aeronautical Engineering Technology Students

Office Temperature Monitoring System: A Capstone Project

Project-based Learning: Engaging Biomedical Engineering Sophomores Through a Collaborative Vein-finder Device Project with Nursing

T127A – FIRST YEAR PROGRAMS DIVISION: COLLECTION

First Generation Engineering Student Mentoring Program: A Case Study of a Large Engineering School in the U.S.

First-year Engineering Student Expectations and Experiences: Community, College, and Curriculum

Entrepreneurship Experiences and Their Impacts

Goals and Research Takes an Unexpected Turn?

Institution

First-year Engineering Student Expectations and Experiences: Community, College, and Curriculum

T127A – FIRST YEAR PROGRAMS DIVISION: COLLECTION

First Generation Engineering Student Mentoring Program: A Case Study of a Large Engineering School in the U.S.

First-year Engineering Student Expectations and Experiences: Community, College, and Curriculum
Social Network Analysis of Faculty Connections in a Multi-year Professional Development Program ................................................. 11723
James A. Middleton, Eugene Judson, Stephen J. Krause, Robert J. Culbertson, Keith D. Hjelmstad, Lindy Hamilton Mayled, Lydia Ross, Kara L. Hjelmstad, Ying-Chih Chen

How Competent are Freshman Engineering Students in Constructively Rating Their Peers in a Team Context? ........................................ 11738
Benjamin Emery Mertz, Daniel M. Ferguson, Mohd Iramul Hoque

A Second Year Review of a New FYE Program ........................................................................................................................................ 11751
George D. Ricco, Janet K. Lamp, Joshua Parsons, Shannon Lee Sampson, Brad A. Hubbard

T127B – FIRST YEAR PROGRAMS DIVISION: SELF EFFICACY

Exploring Engineering Major Choice and Self-concept Through First-year Surveys ............................................................................ 11758
Stacey Leigh Kelly, Darren K. Mazcka, Jacob R. Grohs

Confidently Uncomfortable: First-year Student Ambiguity Tolerance and Self-efficacy on Open-ended Design Problems ....................................................... 11769
Joshua L. Hertz

Sketching with Students: An Arts-informed Qualitative Analysis of First-year Engineering Students ........................................... 11785
Desen Sevi Ozkan, Cherrie D. Edwards, Sreyoshi Bhaduri, Diana Biatraktarova

Gallup StrengthsFinder in Engineering .................................................................................................................................................. 11799
Brenda Read-Daily, Kurt M. Degohde, Stacey L. Zimmerman

Reported Changes in Students' Perceptions of Their Abilities to Succeed on the ABET Student Outcomes During the First-year Engineering Program .............................................................................................................. 11815
Tanya Dugat Wickliff, So Yoon Yoon, Jacques C. Richard, Noemi V. Mendoza Diaz

T128 – GRADUATE STUDIES POTPOURRI

Capstone Internships for Engineering Management Professional Science Master's Degrees Benefit Students and Employers ........................................................................................................................................ 11832
Saeed D. Foroudastan, Carey Michael Snowdon

Comparing U.S. and International Students’ Motivations for Selecting a Master's in Engineering (MEM) Program ........................................... 11839
Robert Graham, Pamela H. Sheff, Evelyn Carolina Torres-Alfaro

Engineering Industry Perspectives and Policies Related to Employees’ Pursuit of Engineering Doctoral Training .................................................. 11852
Erika Mosjyowski, Shannon R. Daly, Diane L. Peters

The Impact of a Creativity-focused REU on Students' Conceptions of Research and Creativity ......................................................................... 11871
Sarah E. Zappe, Joseph C. Tise, Megan Huffstickler, Keefe B. Manning, Margaret June Slattery

T129 – IED TECHNICAL SESSION: PREPARING STUDENTS FOR THE FUTURE

A Framework for Collaborative Peer Review for Group-written Documents .................................................................................................. 11885
Lisa Miller, Daniel Emery

Diverse Teams Build Better Forecasts ......................................................................................................................................................... 11901
Joseph Wilck, Paul C. Lynch

Introducing Changemaking Engineering into an Operations Research Course: Some Unexpected Results ..................................................... 11910
Rick Olson, Andrés Esteban Acero

Writing as a Method to Build Better Engineers: Examining Faculty Perceptions of Writing’s Importance ......................................................... 11923
Elizabeth Kovalchuk, William J. Schell IV

T132 – STUDY AND RESEARCH ABROAD

A Study Abroad Course Leads to Service Learning Project .............................................................................................................................. 11941
Charles McIntyre, Ryan A. Camp, Patricia Fox, Shawn Patrick

Short-term, Full-semester, Study-abroad Engineering Programming and Signals & Systems Courses ........................................................................ 11953
Ernest M. Kim, Thomas F. Schubert Jr., Shahebbehgh Abbas

Student Learning in International Research Programs: A Comparison Across Cultural Contexts ........................................................................ 11963
Kirsten Davis, Yousef Jalali, David R. Knight, Vinod K. Lohani, Bolf Müller

VOLUME 18

Icarus: The Development of a Voluntary Research Program to Increase Engineering Students' Engagement .................................................. 11982
Homero Gregorio Murzi

T133A – ELEMENTARY STUDENTS: COMPUTATIONAL THINKING, REASONING, AND TROUBLESHOOTING

Examining Children’s Engineering Practices During an Engineering Activity in a Designed Learning Setting: A Focus on Troubleshooting (Fundamental) ......................................................................................................................... 11998
Hoda Ehsan, Jessica Rush Leeker, Monica E. Cardella, Gina Navou Svarovsky
Initial Problem Scoping in K-2 Classrooms (Fundamental) ................................................................. 12021
Emily M. Halaschak, Michelle L. Stevens, Tamara J. Moore, Kristina Maruyama Tank, Monica E. Carlotta, Morgan M. Hynes, Elizabeth Gadziklz, Ruben D. Lopez-Parrage Lopez

STEM Content in Elementary School Students’ Evidence-based Reasoning Discussions (Fundamental) .................................................. 12044
Emile A. Siverling, Elizabeth Saaza-Flores, Tamara J. Moore

T133B – PROGRAM EVALUATION STUDIES

An Investigation of Students’ Experiences in a K-12 Invention Program (Evaluation) ................................................................. 12058
Suni Haug Newton, Meltem Alemdar, Roxanne A. Moore, Christopher J. Cappelli

An Evaluation on Engineering Identity of K-12 Youth Using the Engineering Ambassador Network (Evaluation) ................................. 12079
Sally T. Wei, Trash Wench Hill

Basic Electrical Parameters Measurement Laboratory: A K-12 Outreach Project ................................................................. 12097
Rohit Dua

Pre-college Electrical Engineering Outreach: The Design of a Home Security System (Evaluation) .................................................. 12110
Zahraa Nayed Krayem, Angela M. Kelly, Monica Bugallo, David Westerfeld, Richard Gearns, Kathleen Westervelt

T133C – MIDDLE SCHOOL ENGINEERING EDUCATION

A Teacher’s Use of Engineering Language in an Engineering Design-based STEM Integration Unit (Fundamental) ................. 12119
Emile Siverling, Tamara J. Moore, Siddika Selcet Guzey

Effect of Scaffolding in the Assessment of Engineering Practices for Middle School Students (Fundamental) ........................................ 12129
Debra Brockway, Koji James

Teacher Engineering Talk About Problem Scoping in a Middle School Engineering Design-based STEM Integration Unit (Fundamental) ........................................................................................................ 12245
Amanda C. Johnston, Murat Akyous, Tamara J. Moore, Siddika Selcet Guzey

Argument-driven Engineering in Middle School Science Classrooms: The Study of Engineering Attitudes and Efforts to Broaden Engineering Participation by Exposing All Students to Multiple Engineering Design Tasks (RTP, Diversity) ......................................................................................................................... 12231
Lawrence Chu, Victor Sampson, Todd L. Hummer, Stephanie Bilite, Richard H. Crawford, Christina L. Baze Baze, Hannah Smith Brooks

T135 – EXPERIENCES IN MANUFACTURING ENGINEERING EDUCATION

A P-20 Learning Assessment for Manufacturing Organizations ........................................................................................................ 12184
Sidney E Martin III, Randell Wilson

Advanced Manufacturing Engineering Technology Program: a Program that Prepares Graduates for Today’s Manufacturing Industry ................................................................................................................................................ 12191
Hossein Rahemi, Amir Elzewar, Youngashwall Budhoo

Engaging Undergraduate Students Using Real-life Ergonomic Problems in the Introductory Ergonomics Course ........................................ 12203
Muhammad Peerajh Jhan

Teaching Undergraduate Manufacturing in a Flipped Classroom ...................................................................................................... 12218
Dawn Wendell

Work In Progress: A PLC Trainer With Hands-on Wiring .............................................................................................................. 12228
Hugh Jack, Paul M Yanik, Jerry N. Denton Denton

Transitioning a Manufacturing Systems Engineering Course to Student-Centered Learning .......................................................... 12236
Jason M. Weaver

T136 – MATERIALS DIVISION TECHNICAL SESSION 1

Encouraging a Growth Mindset in Engineering Students .......................................................... 12253
Megan Fruy

Exploration and Innovation in Creative Material Education ........................................................................................................ 12268
Robert A Heard, Christiana Job Niesman

Computational Curriculum for MatSE Undergraduates and the Influence on Senior Classes ......................................................... 12279
Xiao Zhang, Andre Schleif, Andrew Ferguson, Pascal Bellon, Timothy Bext, Geoffrey J. Herman, Jessica A. Krooogd, Robert Maas, Cecilia Leal, Dallas R Trinkle, Matthew West

Integrating Experiential with Technical: How Materials Science Modules Can Help Redefine the Traditional Engineering Canon ...................................................................................................................... 12295
Bre Przestrzelski, Elizabeth A. Reddy, Susan M Lord

T138 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 4

Revising the Flipped Classroom ................................................................................................................................. 12316
Anahita Ayasoufi, Rick Williams
Development of an Introduction to Circuits Course and Lab for Mechanical Engineering Students via Systematic Design of Instruction .............................................................................................................................. 12340

Grant Crawford, Junee Antonio Birsan, Richard Melnyk

Introducing Metacognition to Sophomores and Juniors and Its Effect on Academic Performance .......................................................... 12366

Brett Batson

Andragogical Learning Characteristics in Second-year and Fourth-year Mechanical Engineering Students .................................................. 12380

Gregory Martin Freisenger, Richard Melnyk, Brian J. Novoselich

Applications Monday: Students Bring Real-Life Control System Experiences into the Classroom .................................................. 12402

Rebecca M. Reck

**T139A – CURRICULUM AND INSTRUCTION IN ENGINEERING MECHANICS**

Can It Work for Us Too? Results from Using West Point’s Fundamentals of Engineering Mechanics and Design Course Redesign ................................................................................................................................................................. 12410

Scott R. Hamilton, Jakob C. Bruhl, Joshua Richard Wyrick

Exploring the Relationships Between Resilience and Student Performance in an Engineering Statics Class: A Work in Progress ............................................................. 12423

Peter H. Carnell, Nathaniel J Hunsu, Davis F. Ray, Nicola W. Sochucka

Implementation of an Innovation and Entrepreneur Mindset Concept into Mechanics of Materials Course .................................................. 12438

Javad Bagersad, Yaoming Dong, Arnaldo Mazzei, Azadeh Shididast, Basem Alzahabi

Students – Ask Them to Eat Their Vegetables! .......................................................... 12458

Julian Ly Davis, Tom McDonald

Teaching Mechanics in Another Country – Reflections on a Professorenaustausch .................................................................................. 12467

Brian P. Self, Peter Michael Becker

**T140 – MINORITIES IN ENGINEERING DIVISION TECHNICAL SESSION 4**

I Lead, Therefore I Am: The Impact of Student-mentor Leadership Opportunities on STEM Identity Development and Sustainability ........................................................................................................... 12483

Monique S. Ross, Trina L. Fletcher, Vishnudana Thamotharan, Atulie Garcia

An Assessment of HBCU STEM Student Experiences: Towards the Development of a Student Persistence Model .................................................. 12497

Shabnam Etemadi Brady, Yaoming Dong, Arnaldo Mazzei, Azadeh Shididast, Basem Alzahabi

Re-framing and Reimagining the Doctoral Student Narrative: Black Women’s Experiences in Engineering and Computer Science ............................................................................................................................. 12510

Sharminia Arto, Marjorie C. Shavers, Stacie Leslie, Breauna Marie Spencer, Aishwarya P Joshi

Effects of Research and Internship Experiences on Engineering Task Self-Efficacy on Engineering Students Through an Intersectional Lens .................................................................................................................. 12522

Abisola Coretta Kusimo, Marissa Elena Thompson, Sara A. Atwood, Shani Shipward

Institutional Barriers to Black and Latino Male Collegians’ Success in Engineering and Related STEM Fields ................................................................................................................................. 12541

LeeRoy L. Long III, Trevis S Henderson, Michael Steven Williams

**T145 – ENGINEERING PHYSICS AND PHYSICS DIVISION TECHNICAL SESSION 2**

Innovative Energy Elevator: A Physics and Engineering Wonder! .............................................................................................................. 12556

Bala Maheswaran, Cristian Scott Stransky, Haridas Kumarakuru

Pilot Study on Experience of Engineering Students in Multimedia-enhanced Introductory Physics Labs .................................................. 12567

Kosta Popovic, Janie Szabo

Problem Design in Homework ................................................................................................................................. 12578

Yumin Zhang, David K. Probst

Undergraduate Research and Curricular Redesign of IPLS Laboratory Courses .......................................................................................... 12584

Nathanial Raymond Nunez, E. Prasad Venugopal

**T149 – TECHNOLOGICAL AND ENGINEERING LITERACY / PHILOSOPHY OF ENGINEERING DIVISION TECHNICAL SESSION 3**

Technological Literacy, Engineering Literacy, Engineers, Public Officials and the Public .................................................................................. 12595

John Heywood, Michael Patrick Lyons

Engineering and Technology Literacy Introduced in Cornerstone Design Courses .......................................................................................... 12606

Richard Wayne Freeman, J. Alex Birdwell, Emma Tevaarwerk, Ken Gentry, Ordel Brown

Development of Virtual Environment to Introduce Spatial Reasoning to First- and Second-year Engineering Students ................................................................................................................................. 12622

Usman Oskayev, Reg Recayi Pecen, Faruk Yildiz, Shah Alam

Work in Progress: Projects in Engineering Education – Cross-fertilization Between Communication and Situated Learning ................................................................................................................................. 12635

Joakim Sigurd Wren
Technical Communication for Engineers: Improving Professional and Technical Skills

Alyson Grace Eggleston, Robert J. Rubb

T150 – TWO YEAR COLLEGE POTPOURRI

Advancing the Engineering Field: Opportunities to Support Transfer Students

Yulica M. Jovanovic, Narketta Sparkman-Key, Konstantin F. Sigalarov, Daniela Cigalarova, Bonita G. Anthony

Development of a Cohort-Based Program to Strengthen Retention and Engagement of Underrepresented Community College Engineering Students

Nicholas Langhoff, Jenny Ngoc Le

VOLUME 19

Mentoring is a Full Contact Activity in Engineering Education

Dan G. Dimitriu, Diana Carmen Dimitriu

University – State College Curriculum Model for Student Success in Engineering and Computer Science Programs

Ali Zilouchian, Nancy Romance, Dana Hamadeh, Annie Laurie Myers, Michael Vitale

Student Perceptions of a Summer Research Internship Program for Underrepresented Community College Engineering Students

Nicholas Langhoff, Anelito G. Enriquez, Eva Schiorrung

T156 – MILITARY AND VETERANS DIVISION TECHNICAL SESSION 3: VETERANS IN THE LAB ENVIRONMENT

Creating the Fleet Maker: Lessons Learned from the First Series of Workshops on Maker Concepts for Active Duty Personnel

Karrina Arcaute, Michel Albert Audette, Yukica M. Jovanovic, Anthony W. Dean, Dipankar Ghosh

Using Veterans’ Technical Skills in an Engineering Laboratory

Noah Saltman, Thad B. Welch, Harish Subbaraman, Cameron H. G. Wright

Integrating Army Doctrine and Engineering Design: Preparing Millennials to Become Future Officers

Landon M. Ruby, Erick Martinez, Jeffrey A. Starke, Richard Francis Rogers III, Patrick Baker

Commercial Cyber Certifications for Military Reserve Components

John A. Hamilton Jr., Demarcus Montrez Thomas, Patrick Pape

T180 – FACULTY DEVELOPMENT MEDLEY

Executing COE Faculty Development at the Intersection of a Strategic Plan and Faculty Well-being

Christine S. Grant, Barbara E. Smith, Louis A. Martin-Vega, Matthew T. Stimson

The IMPACT Mentoring Program: Exploring the Benefits of Mentoring for Emeriti Faculty

Sylvia Mendez, Valerie Martin Conley, Comas Lamar Haynes, Rosario A. Gerhardt, Jennifer Tygret

A Framework for Disciplinary Learning Communities: Professional Development in Action

Michael J. Reese Jr., Eileen Haase, Ahmed Ibrahim, Jane Brock Greco, Kelly F. Clark

A Framework for Faculty Development

Pradeep Kashinath Waychal, Om Prakash Jain

T304 – BIOMEDICAL DIVISION POSTER SESSION

Work in Progress: Using Video Tutorials to Assist Biomedical Engineering Students in Learning Solid Modeling Skills

Ari Khoa Amini, Marnie M Saunders, Michael Coon, Robert Paul Thorner

Work in Progress: Dialogue Videos Foster Interaction Between Homework Partners

Michael R. Caplan, Joshua Adams, Micheleene T. H. Chi

Work in Progress: Flipping Synchronous Online Courses to Increase Engagement and Enhance Learning

Karen R Thickman

Work in Progress: Problem-based Learning in a Flipped Classroom Applied to Biomedical Instrumentation Teaching

Josef E Bokhoyrquez

Work in Progress: Teaching Effective Teamwork Skills in Biomedical Engineering Laboratory Courses

Monica D. Okon, Tanya M. Nocera

Work in Progress: Developing Assignments to Reinforce Process Knowledge for a Medical Equipment Troubleshooting Laboratory Course

Renata Fortuna Ramos, Kathryn Kandrud

Work in Progress: An Economical and Open-source Mechanical Testing Device for Biomaterials in an Undergraduate Biomechanics Laboratory Course

Julien Henri Arrizabalaga, Matthias U. Nollet, Rachel C Childers
Work in Progress: Streamlining the Biomedical Engineering Design Process .............................................................. 12881

Work in Progress: Prosthetic Design Cases as an Educational Tool In and Out of the Classroom ................................... 12886

Work in Progress: Learning from Two Little Blue Lines: Introducing Biomedical Engineering by Reverse Engineering a Low-Cost Diagnostic Device .......................................................... 12892

Work in Progress: Biomedical Prototype Design in Collaborative Teams to Increase Students' Comprehension and Engagement ........................................................................................................ 12897

Work in Progress: Designing an Introduction to Biomedical Engineering Course Around a Design Challenge .................. 12901

Work in Progress: Pilot Shadowing Experiences to Introduce Engineering Students to Speech-Language Pathology .......... 12906

Work in Progress: Incorporating Global Context into a Biomechanics Course through Service-learning ....................... 12911

Work in Progress: Project Tadpole - A Student-led Engineering Service Club ............................................................... 12916

Work in Progress: Fostering Cross-Disciplinary Collaborations between Biomedical Engineering and Occupational Therapy Students - A Model for Clinical Exposure for BME ......................................................... 12922

Work in Progress: Exploring the STEM Education and Learning Impacts of Socially-relevant Making through the Challenge Problem of Making Prosthetics for Kids ........................................................................... 12927

Work in Progress: Improving Biomedical Engineering Student Technical Writing through Rubrics and Lab Report Re-submissions ........................................................................................................ 12931

Work in Progress: Healthcare Economics and Information Literacy - Resources for Success in Undergraduate Biomedical Engineering Education ......................................................................................... 12936

Work in Progress: The Use of Scaffolding and Peer Reviews to Improve Effective Writing Skills in Biomedical Engineers ................................................................................................................ 12940

Work in Progress: Spicing Up Instruction of Professional Topics in Biomedical Engineering ............................................ 12948

Work in Progress: Peer-Induced Competition Among Design Teams - Do Weekly Updates Among Leaders Accelerate Progress? .......................................................................................................... 12954

Work in Progress: Mandatory Attendance in Office Hours to Improve Students' Learning Experience .......................... 12959

Work in Progress: Knowledge Translation for Biomedical Engineering Graduate Students ............................................. 12964

Work in Progress: Effective Use of Engineering Standards in Biomedical Engineering .................................................. 12974

Work in Progress: A New Approach to Student Learning of Real-time Biomedical Digital Signal Processing ................ 12979

Work in Progress: 3-D Curriculum - An Innovative Structure to Model the Co-curricular Experience in Biomedical Engineering .................................................................................................................. 12986

Work in Progress: Are We on Track with Tracks? .................................................................................................................. 12991

Work in Progress: Bridging Research and Entrepreneurship - Master’s Certificate in Translational Biomedical Research at Northwestern University ................................................................. 13001

Work in Progress: Creating an Engineering-based Medical School to Address a Critical Gap in Medical Innovation ............................................................................................................................................ 13006

Work in Progress: #FunTimesWithTheFA - A Series of Fun Supplementary Lessons for Introductory Level Biomedical Instrumentation Students (Part II) ........................................................................... 13011

Work in Progress: A Hybrid Engineering Course Combining Case-based and Lecture-based Teaching .......................... 13017

WIP: Toy Adaptation as Engineering Outreach to Diverse High School Students ............................................................... 13021
T305 – CHEMICAL ENGINEERING DIVISION POSTER SESSION

Building Spreadsheet Skills Using an Interactive Textbook
Matthew W Liberatore, Katherine Roach

Effect of Online Recorded Video “Review Session” on Student Test Preparation and Performance for Fluid Mechanics Midterm at a University in the Netherlands
Michael D M Barankin, Kevin Stratman

Work in Progress: Developing a Multi-dimensional Method for Student Assessment in Chemical Engineering Laboratory Courses
Daniel D. Anastasio, Heather Chenette, Gregory T. Neumann, Tony Rihera

Work-in-Progress: Conceptual Activities for Separations Courses
Janie Brennan

Incorporation of Process Sustainability Concepts in a Senior Design Course at a Minority Serving University
Matthew Lucian Alexander

Work in Progress: Assessment of Google Docs and Drive for Enhanced Communication and Data Dissemination in a Unit Operations Laboratory
Christopher James Barr

Work In Progress: Development and Evaluation of an Online Chemical Engineering Bridging Course
Hassan Golpour, Matthew Cooper, Lisa G. Bullard

T306 – CIVIL ENGINEERING DIVISION POSTER SESSION

A Project-based Learning Method to Teach Concepts of Viscoelasticity and its Applications to Seniors and Graduate Students in Biomedical, Civil, Chemical, and Mechanical Engineering
Yusuf A Mehta

Analysis of a Trial of Mentoring between Civil Engineering Students and Practicing Engineers
Mark W. Milke, Annelies Kamp, Dave Brierley

Bridging the Gap: a Co-taught Field Course with Integrated History and Civil Engineering Content
Charles Riley, Mark Henry Clark

Defining and Assessing Competencies in an Undergraduate Reinforced Concrete Design Course
Matthew D. Lovell

Effective Stress and Upward Seepage Laboratory Demonstration
Matthew William Wooden, Jiliang Li, Evan Laviolette, Yun Liu

Evaluation of the Effectiveness of Using Mobile Learning in Engineering Dynamics and Vibrations Courses
Zhaoshuo Jiang, Alec William Maxwell, Zahira H Merchant, Philip Scott Harvey Jr., Nolan Tsuchiya, Cheng Chen

Examining the Impacts of Academic and Community Enrichment Resources on First-Year Civil Engineering Students
Mary Katherine Watson, Ally Kindel Martin, Ronald W. Welch, Kevin C Bower

Integration of SHRP2 Solutions into Civil Engineering Curricula at Rowan, Temple, Villanova, and West Virginia Universities
Yusuf A Mehta, Ayman Ali, Parth Bhavsar, Seri Park, Kakan C Dey

Making the Case for Temporary Structures as a Required Course and Recommending an Instructional Design
George Okere, Chris Souder

Peer Mentoring for All: Investigating the Feasibility of a Curricular-Embedded Peer Mentoring Structure
Molly A. McVey, Caroline R. Bennett, William N Collins, Remy Lequesne, Carl W. Luchies, Elaine J. Sutley, Matthew F. Fadden, Chris Melgares

Playing Relieves Stress…Concentrations!
Ronald W. Welch

Using 3-D Printing in a Laboratory Setting to Teach Design Principles
Suzette B. Burchard, Calvin Wampol

Using Mobile Learning to Improve Low Success Rate in Engineering Courses
Zhaoshuo Jiang, Alec William Maxwell, Zahira H Merchant

Meg E. West

T307 – COLLEGE INDUSTRY PARTNERSHIPS DIVISION POSTER SESSION

Concept Map-based Aviation Competency Mapping and Training
Yuetoong Lin, Ali Mehran Shahhosseini, Christian Janke

Industry and Academia: Together Spells Success
Raymond Edward Floyd

Investigation of Factors Promoting Competitive Candidates for Entry-level Bioengineering Positions
Marcia Pool, Madeline R Darling, Gabriella Rose Dupont

STEM Education from the Industry Practitioners’ Perspective
David Dylan John, Yunfeng Chen, Shahnam Navae, Weitao Gao

Social Cognitive Impact of Industry internships upon Engineering Technology Students Developing Professional Identity: A Case Study
Bobbi J. Spencer, Vedaraman Sriraman, Kimberly Grau Talley, Araceli Martinez Ortiz
T308 – COMPUTERS IN EDUCATION DIVISION POSTER SESSION

Development of a Virtual Reality Educational Game for Waste Management: Attack of the Recyclops
Fadi Castronova, Semih Yilmaz, Akash Rao, Walter Conord Jr., Karan Monga, Hadiseh Goorourzini

VOLUME 20

Technology Enhanced Pre-Calculus Classrooms (Work in Progress) ................................................................. 13384
Melissa Danforth, Charles Lam, Ronald Hughes

ROS as an Undergraduate Project-based Learning Enabler .................................................................................. 13393
Stephen Andrew Wilkerson, Stephen Andrew Gadsten, Andrew Lee, Robert Nicholas Vandemark, Elyse Hill, Amy Domenique Gadsten

Mourya Reddy Narasaraditygari, Ganesimran Singh Walla, Alex Budermacher, Otto Borchert

Applications of Artificial Intelligence in Peer Assessment ................................................................................... 13417
Edward F. Gehringer, Ferry Pramudianto, Abhinav Medhekar, Chandrasekar Rajasekar, Zhongcan Xiao

Work in Progress: Developing Engineering Students’ Professional Development Skills through Augmented and Virtual Reality Gaming Environments ........................................................................ 13426
Matthew Nelson, Benjamin Atn

Work in Progress: Constructing a Prediction Model of Creativity and Cognitive Concept Connections Based on Learning Portfolio ..................................................................................................................... 13437
Ting-Ting Wu, Yueh-Min Huang, Pei-Yu Cheng

Work in Progress: Integrating Computational Thinking in STEM Education through a Project-based Learning Approach ................................................................................................................................. 13449
Dazhi Yang, Steve R Swanson, Bhaskar B. C. Chittoori, Youngkyun Baek

Work in Progress: Exploring the Method to Design an Equal Engineering Class Environment for Students’ Collaborative Learning under Head-mounted Display Virtual Reality (HMD VR) Condition ............................................................................................................................. 13460
Wen Ieu Huang

Work in Progress: Introductory Mobile Robotics and Computer Vision Laboratories Using ROS and MATLAB .................................................................................................................. 13471
Robert L. Advantzu, Cullien G Wilcox

T309 – CONSTRUCTION DIVISION POSTER SESSION

Assessment of Scientific Literacy Skills and Attitudes of Undergraduate Construction Management Students ................................................................................................................................. 13481
Andrea Nana Ofori-Boadu

T315 – ELECTRICAL AND COMPUTER DIVISION POSTER SESSION

Establish Feedback Loops in an Electrical Engineering Core Course with Adaptive Release ................................................................. 13492
Yufang Jin, Timothy Yuen, Stephanie Ann Garcia, Robin Lynn Nelson, Ruitao Jin

A Wearable Electrocardiograph as a Means to Combine Measurement and Makerspace Concepts in a Biomedical Instrumentation Course Sequence ......................................................................... 13504
Steve Warren, Charles Carlson, Andrew McKittrick, Shangxian Wang

The Sensor Signal and Information Processing REU Site ...................................................................................... 13535

Work in Progress: Do It Early and Do It Often – Engineering Math for First-Term EE Students ......................... 13549
Jay Wierer, Jennifer L. Bonnivell, Sheila Ross, Richard W. Kelboffer

Work in Progress: Reinforcement of Engineering Education with Hands on Learning of Through Technical Skills ................................................................................................................................. 13556
Thomas Vernon Cook, James Arthur Lyle, Robert J Kerestes

Work in Progress: Reinventing the Undergraduate Electrical Engineering Curriculum to Address Tomorrow’s Cross-Disciplinary Global Challenges .................................................................................................................. 13573
Jamie Phillips, Cynthia J Finelli, Khalid Najafi, Lisa R. Lattuca

Work in Progress: A Study of Transparent Assignments and Their Impact on Students in an Introductory Circuit Course ................................................................................................................................. 13582
Jack Ou

Work in Progress: An Analysis of Correlations in Student Performance in Core Technical Courses at a Large Public Research Institution’s Electrical and Computer Engineering Department ................................................................................................................................. 13594
Christopher Robbiano, Anthony A. Maciejewski, Edwin K. P. Chong

Work in Progress: Implementation of Electrostatics Tutorials Utilizing an Electronic Response System in Upper Level Electromagnetics .................................................................................................................. 13604
Matthew Garrett Young, Jessica Patricia Conrey, Edward Carl Greco Jr.

Trending Mistakes in Signals and Systems Courses ............................................................................................................... 13614
Farrah Fayyaz

T347 – STUDENT DIVISION POSTER SESSION

EEGRC Poster: Laboratory Improvements for Mechanical Engineering (Phase 2) ................................................... 14206
Joseph Michael Derrick, Michael Golub, Vaibhav R. Shrivastav

Exploring Design Failure in the Design Process: A Comparative Case Study of Young Engineering Students ................. 14208
Jessica Cellitti

T350 – TWO YEAR COLLEGE DIVISION POSTER SESSION

The Re-Energize Undergraduate Research Program in the Third and Final Year ...................................................... 14210
Dan C. Dimitru, Klaus Bartsch, Steven F. Lewis

Study Success of Transfer Students in Engineering Technology: the Effect of a MOOC and a Math Diagnostic Test ................................................................. 14231
Lynn Van Den Broeck, Ka Leuwen, Tinne De Laet, Carolien Van Soom, Marlies Lacante, Greet Langie Langie

The Development of a Context-based Summer Research Program for Community College Faculty in Science and Engineering ................................................................. 14246
Lea K. Marlor, Catherine T. Amelink

T355 – POSTER SESSION ENGINEERING LEADERSHIP DEVELOPMENT DIVISION

The UTEP Edge: A Student Success Initiative for Developing High-impact Practices .................................................. 14257
Peter Golding, Mike Thomas Pitcher, Celena Arreola, Crystal Fernandez-Pena, Helen Elizabeth Geller, Diane Elisa Golding, Melissa Shearman, Daniel Santiago Torres, Alejandro Rodriguez, Fernando Monroy, Sebastian Moncayo

What is Engineering Leadership? A Proposed Definition .................................................................................. 14271
Robyn Paul, Arindom Sen, Emily Wyatt

T405 – DIVERSITY AND GLOBAL EXPERIENCES

Assessment of a Global Engineering Outreach Course ..................................................................................... 14285
Randy S. Lewis, Terri Christiansen Bateman, Carol J. Ward

Damascus, AK to Pyongyang, NK: Developing an Entrepreneurial Mindset by Connecting Nuclear Weapons Safety, Chemical Process Safety and Global Politics ........................................................................ 14301
David Dibiastio, Kristin Boudreau, Leslie Dobson, Curtis Abel

Supporting Diversity in Teams Through Asset Mapping .............................................................................. 14313
Jamie Gomez, Vanessa Svhla

T410 – CAREER DEVELOPMENT FOR ENGINEERING PROFESSIONALS

Dwindling Graduate Student Enrollments in Distance-Based Programs: A Researched-Based Exploration with Underlying Findings and Premise ...................................................... 14329
Mitchell L. Springer, Mark T. Schuver
T4112 – UNDERSTANDING DIVERSITY, EQUITY, AND INCLUSION FROM STUDENTS’ PERSPECTIVES

A Failed Attempt to Develop a Measure of Engineering Students’ Subjective Task-value for Diversity and Inclusion in Engineering ..................................................... 14418
Ashley R. Taylor, Walter C. Lee, Benjamin David Lutz, Holly M. Matusovich, Cynthia Hampton

How Granular is the Problem? A Discipline-specific Focus Group Study of Factors Affecting Underrepresentation in Engineering Undergraduate Programs .............................................................................. 14446
Amy Tranah, Tia Naveleme Barnes, Jenni Buckley, Joshua A. Enzer, Sarah Ilkhanipour Rooney, Rachel Davidson, Xiaoxue Zhang

Investigating Student Perceptions of an Engineering Department’s Climate: The Role of Peer Relations ................................................................. 14470
Susannah C. Davis, Naem Cheon, Elba Camila Moise, Susan Bobbit Nolen

Preliminary Findings of a Phenomenological Study of Middle Eastern Women’s Experiences Studying Engineering in Ireland ......................................................... 14489
Shannon Massie Chance, Bill Williams

T413 – DEED POSTCARD POSTER SESSION

Work in Progress: Senior Design Day – Multi-discipline and Multi-department Capstone Presentation Event. ................................. 14506
Austin Talley, C. Richard Compeau Jr

Work in Progress: Tackling the Problems of Knowledge Integration and Barriers to Active Learning in a CDIO Course of Embedded Operating Systems – The Flipped Classroom Approach. ........................................... 14521
Yu-Lun Huang, Chao-Yang Cheng

Work in Progress: Visualizing Design Team Analytics for Representing and Understanding Design Teams’ Process ......................................................... 14534
Corey T Schimpf, Rob Sleezer, Charles Xie

Evaluating the Impact of Design Sessions on Participants’ Perceptions of Diversity and Inclusion in the Professional Formation of Biomedical Engineers .............................................................................. 14550
Rucha Joshi, Curtis B. Zellowski, Andrew O. Brightman, Sean Eddington, Patrice Marie Buzzanell, David Forrester

T413B – DESIGN AND THE CAPSTONE EXPERIENCE

Breaking Down the Silos with an Integrated Laboratory Experience .................................................................................................................. 14566
Barbara E. Marino

Continued Development of an Integrated Capstone Design Curriculum ........................................................................................................ 14578
Shayne Kelly McConomy, Rutaraj Soman, Nikhil Gupta, Chiang Shih

Navigating Process-Product Tensions using a Design Canvas ................................................................. 14591
R. Alan Cheville, Michael S. Thompson

Literature Review and Methods Paper: Identifying Influencers That Contribute to Transformative Learning in an Electrical and Computer Engineering Undergraduate Capstone Design Project and Selecting Action Research Methods to Frame a Study ......................................................................................... 14610
Rachael E. Cate, Donald Heer

Assessment of an Industry-Sponsored Mechatronics Capstone Design Project ........................................................................................................ 14624
Matthew Quincy Marshall, Chan Ham

T414A – MOTIVATION, ATTITUDES, AND BELIEFS

Cluster Analysis Methods and Future Time Perspective Groups of Second-Year Engineering Students in a Major-Required Course ........................................................................................................... 14643
Heather Lee Perkins, Mary Wyrer

Fitting In Across STEM: Comparing Science/Math and Engineering/Technology Students’ Perceptions of Their Fields and Futures .............................................................................. 14664
Jostine Chasmar, Katherine M. Ehlers

Validation of an Interview Protocol to Explore Students’ Beliefs about Intelligence ................................................................. 14689
Allison Adams, Amy Rachel Betz, Emily Dringenberg

Developing a Measure of Engineering Students’ Makerspace Learning, Perceptions, and Interactions ........................................................................ 14702
Sarah Lenci, Louis Nadelem, Idalia Villanueva, Jane Bouwma-Gearhart, Katherine L. Yousman, Adam Lens

Motivational Attitudes and Behaviors in Capstone Projects: Quantitative Validation of Assessment Instruments ................................. 14714
Bashirah Ibrahim, Peter Rogers, Denny C. Davis, Lin Ding, Kaycee Ash
Intersecting Self-Efficacy and Interest: Exploring the Impact of Soft Robot Design Experiences on Engineering Perceptions

Andrew Jackson, Nathan Mentzer, Rebecca Kramer-Bottiglio

T414B – PRACTICE II: CURRICULAR INNOVATIONS

Open Educational Resources in the Undergraduate Engineering Curriculum: A Materials Science Case Study

Amir Behbahani, Erin L. Davis, Nick A. Roberts

Integration of Research Topics into Undergraduate Information Technology Courses and Projects

George Stefanek, Niranjana Hemant Desai

VOLUME 22

Efforts to Improve Undergraduate Grader Consistency: A Qualitative Analysis

Nathan M. Hicks, Kerrie A. Douglas

A Study of the Testing Effect in an Engineering Classroom

Ronald F. Demaro, Damla Turgez, Edwin Nassiff, Sahil Safa Bacardi, Neda Hajjejkhoub Moobi, Jun Xu

Instructional Strategies in K-12 Informal Engineering Education - Deep Case Study Approaches to Educational Research

Sarah Hug, Suzanne Eyerman

Research on Comprehensive Quality Evaluation System of Engineering Undergraduates Based on Developmental Evaluation: Taking X University as an Example

Zhi Fang, Shuiting Ding, Qing Lei, Dan Dun Hua

T414D – WORKS IN PROGRESS II

WIP: Exploration of Conceptions and Attitudes of Colombian and American Chemical Engineers about Chemical Engineering

Cristian Eduardo Vargas Ordoñez, Mariana Tapia-Arciniegas

WIP: Student and Faculty Experience with Blended Learning in a First-Year Chemistry for Engineers Course

Eline Boghuert, Jason Grove

WIP An Interview Study of Faculty, Course Assistant, and Student Insight within Teaching and Learning Assistant Programs for Undergraduate Engineering Courses

Hernan Gallegos, Kristen B. Wendell, Jessica E. S. Swenson

WIP: High-Achieving Students’ Perceptions of and Approaches to Problem Solving in Introductory Engineering Science Courses

Rebecca Lebow, Kristen B. Wendell, Jessica E. S. Swenson

WIP: Curricular Renewal for System Engineering: Project-based Capstone Framework to Hatch Autonomy and Creativity

Chao-Yang Cheng, Yu-Lun Huang, Bing-Fei Wu, Yon-Ping Chen, Sunny S. J. Lin

WIP: Unpacking the Black Box: How Does A Cultural Engineering Student Organization Support the Persistence of Students of Color?

Tasha Zephirin, Brent K. Jesiek

T415A – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 5

Using Student Video Presentations to Develop Communication Skills

Thomas J. Siller, Anthony A. Maciejewski, Andrea M. Leland, Tom Chen, Branislav M. Notaros, Sourajee Roy, Adam C. Hicks

Improving the Teaching and Learning of Writing through the Writing Studio Model

Michelle Miley, Todd Kaiser, Liz Kovalchuk

Automated Formation of Peer-learning Cohorts Using Computer-based Assessment Data: A Double-blind Study within a Software Engineering Course

Ronald F. Demaro, Damla Turgez, Edwin Nassiff, Sahil Safa Bacardi, Neda Hajjejkhoub Moobi, Jun Xu

Assessing and Monitoring Project Management and Teamwork in Electrical and Computer Engineering Courses

Branimir Pejcicnovic, Robert B. Bass, Phillip Wong

Active Techniques Implemented in an Introductory Signal Processing Course to Help Students Achieve Higher Levels of Learning

Saharmaz Baghadadchi, Rebecca Anne Hardesty, Paul Andreas Hadjipieris, Jace Harris

T419 – ENGINEERING ECONOMY DIVISION TECHNICAL SESSION 1

Incorporating Active Learning Strategies into an Engineering Economics Course

Ona Eghae

Integrating Ethics in Undergraduate Engineering Economy Courses: An Implementation Case Study and Future Directions

James Burns, Bob E. White, Azim Houshyvar
Work in Progress: Do Engineering Students Gain Financial Literacy Skills by Taking an Engineering Economy Course? .......................................................................................................................... 14978
Erick Jones, Billy Gray

Using the Education of Engineering Economy to Impact the Reduction of Engineering Student Loan Debt ................................................................. 14988

T421 – ENGINEERING LIBRARIES DIVISION TECHNICAL SESSION 3

Applicability of Evidence-based Acquisition Model to Collection Development in Engineering Subjects .......................................................... 14999
Daniela Solomon, Brian C. Gray

Is It Worth It? Implementation of Electronic Lab Notebook Software Among the STEM Community at an American University in the UAE ........................................................................................................... 15012
Amani Megid

Chemical Pricing Information for Student Design Projects and Cost Engineering: Challenges and Opportunities .......................................................... 15026
David E. Hubbard

Empowering Underrepresented Groups to Excel in STEM Through Research Sprints .................................................................................. 15045
Daniel Christe, Jay J. Bhatt, Christopher Michael Sales, Yaghoob Farnam

T423B – ALTERNATIVE TEACHING METHODS

Flipped Classroom or Active Learning: Integrating Alternative Teaching Methods into Engineering Technology Curriculum .................................................................................................................. 15060
Susan Scachitti, James B. Higley

Flipped Classroom Video Analytics .......................................................................................................................... 15072
Rob Garrick

Experience Gained in Teaching in an Introductory Plastics Engineering Technology Course .................................................................................. 15081
Rex C. Kamu

Assessing the Effects of Authentic Experiential Learning Activities on Teacher Confidence with Engineering Concepts .......................................................................................... 15089
Emel Cevik, Michael Johnson, Bugrahan Yalvac, Jennifer G. Whitfield, Mathew Kuttalamadom, Jay R. Porter, Joseph A. Morgan

Is Unaided Active Learning an Effective Teaching Method for Those with Learning Disabilities? ................................................................. 15104
Jennifer A. O’Neil, Martin E. Gordon, Abigail Gordon, Brain Scott Rice, Gary De Angelis

T427A – FIRST YEAR PROGRAMS DIVISION VISUALIZATION AND MATHEMATICS

An Application-Oriented Course to Improve Student Performance in Mathematics Courses .......................................................................................... 15115
Jaskirat Sudhi, Ashish Borgaonkor, Edwin Hou, Moshe Kam

Developing a Coding Rubric for Students' Spatial Visualization Strategies .................................................................................................................. 15126
Adetoun Oludara Yeaman, Diana Bairaktarova, Tamara Knott

Student Performance on Drawing Free Body Diagrams and the Effect on Problem Solving .......................................................................................... 15137
Jeffrey A Davis, Shelley Lorimer

Impact of Initiatives for Helping First Year Students Start on Track in Mathematics Sequence .......................................................................................... 15149
Ashish Borgaonkor, Jaskirat Sudhi, Moshe Kam, Edwin Hou

Using Concept Maps to Assess Student Learning in a Multi-Section Introduction to Engineering Course .................................................................................. 15165
Kristen L. Sanford Bernhardt, Mary Roth

T427B – FIRST YEAR PROGRAMS DIVISION: DESIGN

Introduction to Heat Transfer in a First-year Mechanical Engineering Course .......................................................................................... 15182
Dani Fadda, Oziel Rios

A Conceptual Design Activity for a First-year Mechanical Engineering Course .......................................................................................... 15191
Oziel Rios, Dani Fadda

Evolution of Cornerstone: Creating a First-year Culture with a Multifaceted Approach.......................................................................................... 15202
Richard Whalen, Susan F. Freeman, Jennifer Ocj/Love, Kathryn Schulte Grahame, Joshua L. Hertz

Critical Thinking, Design Practices, and Assessment in a Fundamentals of Engineering Course .......................................................................................... 15222
Ryan Munden, Marcia Arambulo Rodriguez, Djedjiga Belzayades, Michael Zahinski

Evaluation of Online Learning in a First-year Engineering Design Course .......................................................................................... 15237
Liang Li Wu, Christian Fischer, Fernando Rodriguez, Gregory N. Washington

T429 – IED TECHNICAL SESSION: PREPARING FOR THE FUTURE THROUGH PROJECTS AND RESEARCH

A Project-based Learning Approach in Teaching Simulation to Undergraduate and Graduate Students .......................................................................................... 15247
Gokhan Erolmez, Dusan Sormaz, Rajvee Gokh

Implementation of a Project-based Learning Approach to Undergraduate Education: Case Study of Optimization Course in Industrial Engineering .......................................................................................... 15258
Behin Elahi
Implementing a Course-based Undergraduate Research Experience (CURE) into an IE Curriculum.......................................................... 15270
Leslie Potter, Richard Stone, Audrey Fyock, Devna Fay Papejoy-Sheriff

Janis P. Terpenny, Catherine M. Harmonosky, Amine Lehtihet, Vital Prabhu, Andris Freivalds, Elena M. Joshi, Jose A. Ventura

Reality Gaps in Industrial Engineering Senior Design or Capstone Projects .......................................................................................... 15301
Desen Sevi Ozkan, Homero Gregorio Murzi, Alejandro Salado, Chris Gewirtz

T433A – PROFESSIONAL DEVELOPMENT FOR TEACHERS

Nano-environmental Engineering for Teachers (Work in Progress) ............................................................................................................... 15318
Carolyn Aiken Nichol, Christina Anthynette Crawford, Jorge Loyo-Rosales, Alice Chow, Carrie Oebenland

Fundamental: A Teacher Professional Development Program in Engineering Research with Entrepreneurship and Industry Experiences .................................................................................................................................................................................... 15325
Sat Prasanth Krishnamoorthy, Sheila Borges Rajguru, Vikram Kapila

Interests and Needs of Secondary Science Educators Regarding Professional Development on Engineering Standards (Fundamental) ........................................................................................................................................................................................................... 15346
Sarah E. Lopez, Wade H. Goodridge, Kurt Henry Becker

Teacher Implementation of Structured Engineering Notebooks in Engineering Design-based STEM Integration Units (Fundamental) ........................................................................................................................................................................................................... 15357
Hillary Elizabeth Merzdorf, Amanda C. Johnston, Kerrie A. Douglas, Tamara J. Moore

T433B – ENGINEERING CAREER ATTITUDES

Assessment of the Impact of Summer STEAM Programs on High School Participants’ Content Knowledge and Attitude Towards STEAM Careers ........................................................................................................................................................................................................... 15376
Marcelo Caplan

Promoting the STEM Pipeline and Enhancing STEM Career Awareness Through Participation in Authentic Research Activities (RTP, Diversity) ........................................................................................................................................................................................................... 15390
Bugrahan Yalvac, Ohawatson A. Bwaji, Madison Elaine Spier, Gustavo Mosqueda Elizondo III, Chiamaka Theclar Umah, Todd Sherron, J. Timothy Lightfoot, Carolyn L. Cannon, Robin S. L. Puch-Yong

Student Attitudes Toward STEM: A Revised Instrument of Social Cognitive Career Theory Constructs (Fundamental) ........................................................................................................................................................................................................... 15405
Sarah A. Roller, Sandra A. Lampley, Monica Lete cree Dillihunt, Michael P. J. Benfield, Matthew William Turner

The Influence of Early STEM Career Exploration as Related to Motivation and Self-determination Theory ........................................................................................................................................................................................................... 15420
Araceli Martinez Ortiz, Hiroko Kawaguchi Warshauer, Sara Garcia Torres, Laura Rodriguez Amaya

(Fundamental) Fregados Pero no Jodidos: A Case Study of Latinx Rasquachism .......................................................... 15439
Joel Alejandro Mejia, Alberto Lopez Pulido

T433C – PCEE RESOURCE EXCHANGE

Learning Advanced Mathematics Through Engineering Design (Resource Exchange) ............................................................................................................. 15451
Euisuk Sung, Scott R. Bartholomew, Greg J. Strimel

Make-an-Engineer Introduction to Engineering Activity (P12 Resource/Curriculum Exchange) ........................................................................................................................................................................................................... 15458
Morgan M. Hynes, Chanel Beebe, Avneet Hira, Kayla R. Maxey

Model-Eliciting Activities to Develop Problem-scoping Skills at Different Levels (Resource Exchange) ........................................................................................................................................................................................................... 15465
Arun W. Glancy, Tamara J. Moore

Neural Engineering for Secondary Science Classrooms (Resource Exchange) ............................................................................................................. 15468
Kristen Clapper Bergman, Eric H. Chandler

Polymers in the Classroom: Developing a Summer Workshop for High School Science Teachers (Resource Exchange) ........................................................................................................................................................................................................... 15471
Alex Vincent Jannini, Shelby Buffington, James I. Henderson, Sally B. Mitchell

VOLUME 23

There’s No Place Like Home: Designing Tornado-proof Structures (Resource Exchange) ........................................................................................................................................................................................................... 15474
Abeer P. Rehmat, Marissa Christina Owens

T434 – IMAGINING AND REIMAGINING ENGINEERING EDUCATION AS A DYNAMIC SYSTEM

The Distributed System of Governance in Engineering Education: A Report on Initial Findings ........................................................................................................................................................................................................... 15477
Atsushi Akeria, Donna M. Riley, Alan Cheville, Jennifer Karlin, Thomas A. De Pree

Building Your Change-agent Toolkit: The Power of Story ........................................................................................................................................................................................................... 15500
Jennifer Karlin, Rebecca A. Bates, Cheryl Allendorf, Dan Ewert, Ronald R. Ulseth
Scaling Up or Scale-making? Examining Sociocultural Factors in a New Model for Engineering Mathematics Education
Janet Y. Tsai, Kevin O'Connor, Beth A. Myers, Jacquelyn F. Sullivan, Derek T. Reamon, Kenneth M Anderson

T435A – STRATEGIES FOR EFFECTIVE EDUCATION IN MANUFACTURING

An Advanced Manufacturing Workshop for Enhancing Engineering and Technology Education
Richard Chion, Tzu-Liang Bill Tseng, Michael G Maak, Yalcin Erteklin, Irina Nicoleta Cioabaneasu Husanu, Carlos Michael Ruiz

Improving Student Engagement in a Senior-Level Manufacturing Course for Mechanical Engineering Students
Joshua Gargac

T435B – INTEGRATING ADDITIVE MANUFACTURING PRACTICES IN EDUCATION

An Outreach Program Focusing on Design Process and 3-D-printing
Ahmed Cheryf Megri, Sameer Hamouss, Donna Lynn Stallings

Analyzing the Composite 3-D Printer Frame for Rigidity
Jonathan Mark Holman, Tumkur Serdar

T438 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 5

Combining Course Flipping and a Low-Cost Experiment to Teach Frequency Response
Ryan W Krauss

Increased Student Engagement in Problem Solving Courses in Engineering through Active Learning
Puttagounder Dhanasekaran Swaminathan, Ping Zhao

Using Distinctive Student Engagement Elements in a Technical Elective Course
Rambod Rayegian, Karla C. Lewis

An Initial Exploration of Engineering Students' Emotive Responses to Spatial and Engineering Statics Problems
Idalis Villanueva, Wade H. Goodridge, Benjamin James Call

What Can DISC and Motivation Profiles Disclose About Student Retention in Engineering?
Breigh Nonte Rozelle, Karen Kaye Langenberg, Jason Andrew Roney, Matt Gordon

Take Flight Robotics: A STEM Education Workshop for High School Students
Elyse Hill, Andrew Lee, Amy Domenique Gadsden, Stephen Andrew Gadsden, Stephen Andrew Wilkerson

Work in Progress: Sustainable Engineering Education in the Mechanical Engineering Curriculum
Huihui Qi

Implementation and Assessment of a Remotely Accessible Laboratory in an Engineering Dynamic Systems Course
Nolan Tsai, Zhushuo Jiang, Alex William Maxwell, Zahira H. Merchant

T440 – MINORITIES IN ENGINEERING DIVISION TECHNICAL SESSION 5

Developing Communities of Practice to Serve Hispanic Students: Supporting Identity, Community, and Professional Networks
Sarah Hug

Community: Voices from a Small Cohort
Monica Lauren Singer, Elizabeth T. Schlemer, Emily E. Liptow, Katherine Chen

Reflections on a New Community Partnership: How Does an Engineering Summer Camp Evolve to Meet the Needs of an Increasingly Diverse Student Population? (WIP)
Emily E. Liptow, Katherine Chen, Berizohar Padilla Cerazo, Maria Manzano

Engineering Connections in a Native American Community and Culture
Ieshya Anderson, Shawn S. Jordan

Preliminary Insights from Exploring Engineering Learning Ecosystems of Black Youth
Nina McDaniel, Delean Tolbert

T441B – MULTIDISCIPLINARY ENGINEERING PROGRAMS

Social Network Analysis: Peer Support and Peer Management in Multidisciplinary, Vertically Integrated Teams
J. Sonnenberg-Klein, Randal T. Abler, Edward J. Coyle

Correlation Between Academic Credit-use Policies and Student Persistence in Multidisciplinary Vertically Integrated Project (VIP) Courses
J. Sonnenberg-Klein, Edward J. Coyle, Randal T. Abler

Growing Entrepreneurial Mindset in Interdisciplinary Student Engineers: Experiences of a Project-Based Engineering Program
Elizabeth Plaskiwik, Eleanor Leung, Andrew Lillie

Nanotechnology Fellows Program: Integrating Interdisciplinary Education, Professional Development, and Outreach
Sanjaya LeBlanc, Ikunbayo Shibura
Work in Progress: Co-curricular and Extra-curricular Experiences of NSF-supported Scholars .................................................. 15822

Huihua Wang, Lee Ann Jerome Clements, Cindy Leong, Misha M Chalkley, Crandall Maines

T451B – WOMEN IN ENGINEERING TECHNICAL SESSION

Improving Middle-School Girls’ Knowledge, Self-Efficacy, and Interests in ‘Sustainable Construction Engineering’ through a STEAM ACTIVATED! Program ................................................................. 15831
Andrea Nana Ojovi-Badu

Impact of “Imagineer Day”, an Outreach Program, on K-8 girls and Women in Engineering .................................................. 15852
Hadi Mustafa, Shelby Ann Freese

Inspiring Girls to Pursue STEM (Ages Three to Thirteen): a Recipe for a Successful Outreach Event ........................................ 15865
Jodi Prassue, R R Romatoski, Susa H Stonedahl, Tanye Shi Shi

Intervention Designed to Increase Interest in Engineering for Low-interest, K-12 Girls Did So for Boys and Girls .................................................. 15889
Samuel Alberto Acuña, Joseph E Michaelis, Joshua Daniel Roth, Joseph Towles

Monitoring Motivation Factors for Girls in Summer Robotics Program .................................................................................. 15899
Michele Miller, Saeedeh Ziaeezafar, Brian R Page, Lauren Nicole Knop, Guitherme Aramizo Ribeiro, Mo Rastgaar, Nina Mahmoodian

T480 – RESEARCH IN FACULTY DEVELOPMENT

Moving Toward Student-centered Learning: Motivation and the Nature of Teaching Changes Among Faculty in an Ongoing Teaching Development Group ................................................................. 15911

Jill K. Nelson, Margery Hjalmarson

Forming Strategic Partnerships: New Results from the Revolutionizing Engineering and Computer Science Departments Participatory Action Research .................................................................................. 15920
Cara Margherio, Kerice Doten-Snitzer, Julia M. Williams, Elizabeth Litzler, Ella Lee Ingram

Exploring Engineering Faculty Experiences with COPUS: Strategies for Improving Student Learning ........................................ 15929
Tareq Daher, Lance C. Pérez, Wayne A. Babchuk, Leilani A. Arthurs

Exploring Faculty Beliefs About Teaching Evaluations: What is Missing from Current Measures? .................................................. 15939
Benjamin David Lutz, Allyson Jo Ironside, Shane A. Brown, Dominga Sanchez

T506 – EDUCATIONAL & PROFESSIONAL ISSUES OF STRATEGIC IMPORTANCE TO THE CIVIL ENGINEERING PROFESSION AND ASCE II

Revising the Civil Engineering Body of Knowledge (BOK): The Application of the Cognitive Domain of Bloom’s Taxonomy ........................................................................................................................................... 15953
Decker B. Hains, Kenneth J. Fridley, Leslie Volen Cae, Brock E. Barry

Assessing the Civil Engineering Body of Knowledge in the Affective Domain ........................................................................ 15972
Norman D. Dennis Jr., Decker B. Hains, Horst Brandes

The Practitioners’ Point of View of the ASCE Body of Knowledge ......................................................................................... 15988
Muthusamy Krishnamurthy, David Anthony Pezza, Kenneth J. Fridley, Decker B. Hains

The Civil Engineering Body of Knowledge: Supporting ASCE’s Grand Challenge ........................................................................ 15995
Decker B. Hains, Michael O’Connor

Comparison Between the New Bodies of Knowledge for the Civil Engineering Professional and the Civil Engineering Technologist ........................................................................................................... 16008
Horst Brandes, Joe D. Manous Jr, Kenneth J. Fridley

T507 – COLLEGE INDUSTRY PARTNERSHIPS DIVISION TECHNICAL SESSION 2

An Example from Construction Safety: Professional Certifications as Potential Drivers of Degree Program Enhancements ........................................................................................................................................... 16021
Susan Gallagher, Natalie Marie Villwock-Witte

Development of a Multi-skilled Craftsman Program Through Collaboration Between Industry, Technical Community College, and Four-year University ........................................................................ 16038
Ali Ahmad, Mike Wolff

Industry-based Case Studies for an Online Graduate Certificate Wind Energy Program ........................................................................ 16050
Susan White Stewart, Stephanie Cutler, Sven Schmitz, Alexa Kottmeyer

Innovative Graduate Engineering Education Implemented with Project-focused Learning: A Case Study—The Clemson University Deep Orange 3 Vehicle Prototype Program ........................................................................ 16058
David Schmueser, Johnell O. Brooks, Robert Gary Prucka, Pserlaig Pei

Three Examples of a New Industry-authored Flexible Plan B.S. Degree ......................................................................................... 16077
R. Andrew Schaffer, John Carlson

T508 – COED: IOT AND CYBERSECURITY

Using the Internet of Things (IoT) to Motivate Engineering Technology and Management (ETM) Students ......................................................................................... 16085
Curtis Cohenour
Effectiveness of Current-generation Virtual Reality-based Laboratories ............................................................................................................................. 16094
   Alan Jones, Michael Golab

Single-board Computer Used for Network Streaming Audio Player TFT Touchscreen-based Application ............................................................ 16103
   David Border

T510 – SUPPORTING FACULTY IN COURSE DEVELOPMENT AND PEDAGOGY

Using a Collaborative Design Model for Developing Quality Online Courses ................................................................. 16118
   Caitlin A. Keller

Is There a Connection Between Classroom Practices and Attitudes Towards Student-Centered Learning in Engineering? ........................................................................................................................................................................... 16132
   Lydia Ross, Eugene Judson, Casey Jane Ankeny, Stephen J. Krause, Robert J. Culbertson, Keith D. Hjelmstad, Lindy Hamilton

Facilitating Change in Instructional Practice in a Faculty Development Program through Classroom Observations and Formative Feedback Coaching ........................................................................................................................................................................ 16146
   Kara L. Hjelmstad, Keith D. Hjelmstad, Stephen J. Krause, Lindy Hamilton Mayled, Eugene Judson, Lydia Ross, Robert J. Culbertson, James A. Middleton, Casey Jane Ankeny, Ying-Chih Chen

Assessing Faculty and Organizational Change in a Professional Development Program with Workshops and Disciplinary Communities of Practice ........................................................................................................................................................................... 16163
   Stephen J. Krause, Keith D. Hjelmstad, Eugene Judson, James A. Middleton, Robert J. Culbertson, Casey Jane Ankeny, Ying-Chih Chen, Lydia Ross, Lindy Hamilton Mayled, Kara L. Hjelmstad

VOLUME 24

The Impact of Free Lunch on Attendance at Voluntary Teacher Training ........................................................................................................ 16180
   Todd Easton

T514B – MENTORING PRACTICES AND PROJECT TEAMS

Cultivating the Next Generation: Outcomes from a Learning Assistant Program in Engineering ........................................................................................................ 16189
   Ying Cao, Christina Smith, Benjamin David Lutz, Milo Koretsky

Student Preferences in Mentoring Practices and Program Features in an S-STEM Scholarship/Mentoring Program ........................................................................................................................................................................... 16204
   Suzette R. Burckhardt, Joannita M. Kant, Francis Arpan, Ross Peder Abraham, Gregory J. Michna

Reflections of S-STEM Faculty Mentors ........................................................................................................................................................................... 16226
   Suzette R. Burckhardt, Joannita M. Kant, Gregory J. Michna, Ross Peder Abraham, Richard Reid

The Two Worlds of Engineering Student Teams .............................................................................................................................................................. 16242
   Shane Paul Lorona, Susan Bobbit Nolen, Milo Koretsky

Comparing Peer-to-Peer Written Comments and Teamwork Peer Evaluations ........................................................................................................ 16257
   Catherine E. Bressner, Olivia W. Murch, Daniel M. Ferguson, Matthew W. Ohlone

Influences on Variability of Perceptions of Behavior on Student Engineering Project Teams ........................................................................................................ 16273
   Emily Miller, Reid Bailey

T514C – PRACTICE III: MULTIMEDIA LEARNING

Effective Review of Prerequisites: Using Videos to Flip the Reviewing Process in a Senior Technical Course .......................................................................................................................... 16291
   Qi Dunsworth, Yi Wu

A Protocol-Based Blended Model for Fluid Mechanics Instruction .......................................................................................................................... 16307
   John T. Solomon, Eric Hamilton, Vimal Kumar Viswanathan, Chitra R. Nayak, Firas Akasheh

Successfully Flipping a Fluid Mechanics Course Using Video Tutorials and Active Learning Strategies: Implementation and Assessment ........................................................................................................................................................................... 16326
   Faye Linda Wachs, Juliana Lynn Fiqua, Paul Morrow Nissenson, Angeta C. Shih, Michael Pavel Ramirez, Laura Quertez Davila, Nguyen Nguyen, Cheyenne Romero

Impact of the Flipped Classroom on Students’ Learning and Retention in Teaching Programming ........................................................................................................................................................................... 16342
   Shamima Miahun, Nancy Evans

Strengthening Student Understanding Through Interactive Classroom Methods in Computer Science and Engineering ........................................................................................................................................................................... 16357
   Rania Al-Hammoud, Ona Eghue, Archias Khan, Daryanne Kathleen Hagen

The Graphic Novel: A Promising Medium for Learning Research .......................................................................................................................... 16368
   Petr Johanes

T515A – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 6

A Pilot Program in Internet-of-things with University and Industry Collaboration: Introduction and Lessons Learned ........................................................................................................................................................................... 16381
   Mohsen Sarraf, Bijan Karimi, Ali Golbazi, Arthur Lizotte

Mohsen Sarraf, Bijan Karimi, Ali Golbazi, Arthur Lizotte
A New Course for Teaching Internet of Things: A Practical, Hands-on, and Systems-level Approach .................................................................16393
Nicholas Barends, Nigamanth Sridhar, Kenneth A. Loparo

Development of a New Course on Smart-grid Communication and Security for Senior Undergraduate and Graduate Students .................................................................................................................................16412
Sasan Haghani

A Hardware Security Curriculum and its Use for Evaluation of Student Understanding of ECE Concepts ...........................................................16425
Aaron Carpenter

Design and Implementation of Electric Drives Laboratory using Commercial Microcontroller Development Kits ..........................................................16442
Bhanu Babaraihagiri, Zhizhao Chen, Jae-Do Park

T518 – EDGd: CAD, CAM, AND AI

Integrating CAD and CAM for Design-build Projects .................................................................................................................................16453
Joseph Rudy Ortway

Case Study of a Blind Student Learning Engineering Graphics ..................................................................................................................16472
Steven C. Zemke

A Study of Augmented Reality for the Development of Spatial Reasoning Ability .....................................................................................16489
John D. Bell, Cui Cheng, Hannah Klauske, William Cain, Daniel Joseph Freer, Timothy J. Hinds

From Learning to CAD to CADing to Learn: Teaching the Command, Strategic, and Epistemic Dimensions of CAD Software ..................................................................................................................16503
Dean Nocemmo, James W. Malazita, Lydia Rebekha Kraus, Andrea M. Ukleja, Timothy Andrews

T523 – ET PROJECTS

End-of-Semester Control System Design Projects by Senior-level EET Students .........................................................................................16522
Biswaigit Ray, Robert Chambers, Nathan Henry, Paul Michael Karcher

Student-made Video Projects in Engineering Technology Courses ..............................................................................................................16536
Rachel Mosier, William E. Generoux, Katie Rieger

Simple, Low-cost IoT/UHF RFID-based Lab Equipment Identification and Tracking System ..................................................................................16546
Ghassan Y Ibrahim

Student Community Project to Design a Mini-golf Project for the City of Leesville, LA ....................................................................................16562
Mohammed Byanalla

Product Development Process and Student Learning in an Engineering Technology Capstone Project: Electrical Go-kart ..........................................................16573
Angran Xiao, Andy S. Zhang, Joyce Tam

T523B – ET PEDAGOGY II

Undergraduate Research-based Learning for Engineering Technology Students .................................................................................................16591
Mihaela Radu

Introducing Project-based Engineering Laboratory to Non-engineering Undergraduate Students ........................................................................16603
Sudhir Shrestha, Parid Farahmand

Lessons from Two Years of ePortfolio Implementation in Engineering Technology Courses ..................................................................................16615
Orlando M. Ayala, Otilia Popescu

Developing Improved Methodology for Online Delivery of Coursework Providing a Framework for Quality Online Education ..................................................................................................................................................16634
Yeto Matthew Ray, Joe Tabas

A Comparative Study of Distance Education and Face-to-Face Lab Students .................................................................................................16647
Garth V. Crosby

T524 – ENTREPRENEURSHIP & ENGINEERING INNOVATION DIVISION TECHNICAL SESSION 5

Critical Incidents in Engineering Students’ Development of More Comprehensive Ways of Experiencing Innovation .................................................................................................................................16658
Nicholas D. Fila, Justin L. Hess

Making Sense of Gender Differences in the Ways Engineering Students Experience Innovation: An Abductive Analysis ......................................................................................................................................................16686
Nicholas D. Fila, Rachel E. Friedensen, Mani Mina, Benjamin Ahn

Integrating an Innovation Concentration into the Engineering Curriculum .........................................................................................................16703
Karl D. Schubert, Leslie Bartisch Masse, Clint E. Johnson

Assessing the Development of Empathy and Innovation Attitudes in a Project-based Engineering Design Course .................................................................................................................................16720
Antti Oskari Surma-Aho, Taavu A. Björklund, Katja Holita-Otto

Analysis of Student Utilization and Activities in a Campus Innovation Center .................................................................................................16735
William A. Kline, Timothy Chow, Tony Ribera
T527A – FIRST YEAR PROGRAMS DIVISION: RETENTION

A Creative First-year Program to Improve the Student Retention in Engineering ............................................................ 16751
Maryam Darbeheshti, Dakota Ryan Edmonds

A Strategic Plan to Improve Engineering Student Success: Development, Implementation, and Outcomes .......................... 16762
Jerome P. Lavelle, Matthew T. Stimpson

An Integrated Supplemental Program to Enhance the First-year Engineering Experience ................................................. 16783
Oriel Brown, Robin A. M. Hensel, Melissa Lynn Morris, Joseph Dygert

Effectiveness of Freshman Level Multi-disciplinary Hands-on Projects in Increasing Student Retention Rate and Reducing Graduation Time for Engineering Students in a Public Comprehensive University ................................................. 16801
Binod Tivari, Pradeep Nair, Susamma Barua

Bridges and Barriers: A Multi-year Study of Workload-related Learning Experiences from Diverse Student and Instructor Perspectives in First-year Engineering Education ........................................................................................................... 16814
Darlee Gerrard, Chirag Variawa

T527B – FPD AND DEE DS JOINT POSTCARD SESSIONS

Tracking Skills Development and Self-efficacy in a New First-year Engineering Design Course .............................................. 16833
Jessica Daniels, Sophia T. Santillan, Ann Saterbak

Work In Progress: Using Current Crowdfunding Projects as Case Studies to Enhance Students’ Understanding of the Design Process ................................................................................................................................. 16856
Derek Breid

Work in Progress: Building the Undergraduate Chemical Engineering Community by Involving Capstone Design Students in Undergraduate Courses .............................................................................................................. 16871
Ryan Anderson, Abigail M. Richards

VOLUME 25

Work in Progress: Development and Implementation of a Self-guided Arduino Module in an Introductory Engineering Design Course ................................................................................................................................. 16887
Jillian Beth Schmidt

Work in Progress: Building a Functional Cardiograph Over Four Semesters ............................................................................. 16902
Gail Baura, Leanne Kellemeyn, Noe Arroyo, Vincent C. F. Chen, Allan Beale

Enhancing 3D Modeling with Augmented Reality in an After-school Engineering Program (Work in Progress) ....................... 16915
Srishti Bhaduri, Katie Van Horne, Peter Gyory, Hannie Ngo, Tammy Sumner

Work in Progress: Introduction of Failure Analysis to a First-year Robotics Course ................................................................. 16930
Kathleen A. Harper, Richard J. Freuler, Lauren Corrigan

T532 – GLOBAL AND INTERCULTURAL COMPETENCY

Comparison of International Students' Competency Levels in the Fundamentals of Engineering Technology Courses................................................................. 16942
Mauricio Torres, Morteza Sadat-Hossieny

Development of Students' Intercultural Knowledge and Competence ......................................................................................... 16954
James Warnock, Galya Melnychuk

Global Engineering Competency: Assessment Tools and Training Strategies ...................................................................... 16969
Brent K. Jesiek, Natalcha Tregilinger Buswell, Qin Zhu

Integration of Global Competencies in the Engineering Curriculum .......................................................................................... 16984
Eugene Ratz

Preparing Engineering College Students for a Culturally Diverse Global Job Market ................................................................ 16995
Maria Claudia Alves

Broadening Participation in Engineering: U.S.-Trinidad-Anguilla Partnership ................................................................. 17021
Monica Gray

T533A – ROBOTICS

Do After-school Robotics Programs Expand the Pipeline into STEM Majors in College? (RTP) ........................................... 17028
Cathy Burack, Alan Melchior, Matthew Hoover

Fundamental: Determining Prerequisites for Middle School Students to Participate in Robotics-based STEM Lessons: A Computational Thinking Approach ................................................................. 17053
S. M. Mizanoor Rahman, Sonia Mary Chacko, Sheila Borges Rugguru, Vikram Kapila

Fundamental: Analyzing the Effects of a Robotics Training Workshop on the Self-efficacy of High School Teachers ................................................................................................................................. 17080
Abhidipta Mallik, Sheila Borges Rugguru, Vikram Kapila

Fundamental: Examining the Variations in the TPACK Framework for Teaching Robotics-aided STEM Lessons of Varying Difficulty .............................................................................................................. 17103
Abhidipta Mallik, S. M. Mizanoor Rahman, Sheila Borges Rugguru, Vikram Kapila
Fundamental: Optimizing a Teacher Professional Development Program for Teaching STEM with Robotics
Through Design-based Research ........................................................................................................................................17126
S. M. Meznoor Rahman, Veena Jayasree Krishnan, Vikram Kapila

T533B – NGSS & ENGINEERING EDUCATION

A Content Analysis of NGSS Science and Engineering Practices in K-5 Curricula .........................................................................................................................................................17146
Jessica Cellitti, Rasheda Likely, Magdalene Kate Moy, Christopher George Wright
Design of Design: Empowering K-12 Educators to Develop Unique Standards-aligned Engineering Design
Amy Trauth, Jenni Buckley, Debra J. Coffey
Tensions Arising When Teaching Scientific Disciplinary Core Ideas via Engineering Practices (Evaluation) .................................................................17181
Hannah Smith Brooks, Todd L. Hamer, Victor Sampson, Lawrence Chu, Richard H. Crawford, Stephanie Biviale, Christina L. Baze
The State of Engineering Integration in K-12 Science Standards: Five Years After NGSS (Fundamental) ..............................................................17198
Sarah E. Lopez, Wade H. Goodridge

T533C – GIRLS IN ENGINEERING

Believing Girls Belong in Engineering: Do We? So What? (Fundamental, Diversity) ........................................................................................................17209
Henriette D. Burns, Sean Palmer Marquardt Rice
Developing and Assessing a Music Technology and Coding Workshop for Young Women .................................................................17228
Abigail Jagiela, Jenna Laleman, Paige Huschka, Deborah Besser, Annamarie Thomas
The Effectiveness of a Multi-year Engineering Enrichment ......................................................................................................................17246
Linda Hirsch

T534 – IMAGINING OTHERS, DEFINING SELF THROUGH CONSIDERATION OF ETHICAL AND SOCIAL IMPLICATIONS

Examining the Relationships Between How Students Construct Stakeholders and the Ways Students Conceptualize Harm from Engineering Design .................................................................17265
Alexis Papak, Ayush Gupta, Chandra Anne Turpen
Engineers’ Imaginaries of ‘The Public’: Dominant Themes from Interviews with Engineering Students, Faculty, and Professionals ...........................................................................................................17290
Nathan E. Conney
Exploring Students’ and Instructors’ Perceptions of Engineering: Case Studies of Professionally Focused and Career Exploration Courses .............................................................................................17314
Idalis Villanueva, Louis S. Nadelson, Jana Bouwma-Gearhart, Katherine L. Youmans, Sarah Lucci, Adam Lenz
Challenges and Opportunities in International Service Learning ......................................................................................................................17328
Tina Lee, Devin R. Berg, Elizabeth A. Buchanan

T535 – MANUFACTURING CURRICULUM AND COURSE INNOVATIONS

Additive Manufacturing Studios: a New Way of Teaching ABET Student Outcomes and Continuous Improvement .................................................................17343
Ismail Fidan, George Chitiyo, Thomas Singer, Jamshid Moradmand
Development of Multifunctional Educational Spaces .................................................................................................................................17354
Arif Sirinterlikci
Understanding Surface Quality: Beyond Average Roughness (Ra) .................................................................................................................................17363
Chittaranjan Sahay, Suhash Ghosh

T536 – MATERIALS DIVISION TECHNICAL SESSION 2

Integrating Experimental Studies into a Senior Level Course: Smart Materials and Structures ........................................................................................................17383
Ping Zhao, Hongyan Liu, Puttagounder Dhanasekaran Swaminathan
Development of a Materials Science Educational Program at Houston Community College: University Partnerships and Assessment Dynamics ........................................................................................................17390
Barclift Michael Steinberg, Amanda Smith Hackler
Undergraduate Research in a Materials Independent Study at a Small College: From Building Modern Fabrication Equipment to Experimental Testing ........................................................................................................17423
Tristan M. Ericson, Stephen N Kuchnicki
Incorporating Active Learning and Sustainable Engineering Concepts into a Required Materials Class ........................................................................................................17439
William M. Jordan
m-POGIL (modified-Process Oriented Guided Inquiry Learning) based Plastics Laboratory .................................................................................................................................17451
Spencer Seung-Hyun Kim
T537A – MATHEMATICS DIVISION TECHNICAL SESSION 4

Design of an International Bridge Program for Engineering Calculus .......................................................... 17464
Sandra B. Nino, Brady Creel, Jim Morgan, Joaovah E. Almarri

Prevalent Mathematical Pathways to Engineering in South Carolina .......................................................... 17473

Technology’s Role in Student Understanding of Mathematics in Modern Undergraduate Engineering Courses .......................................................... 17489
Andrew Phillips

The Benefit of Training Undergraduate Teaching Assistants ............................................................................ 17497
Guanluca Guadagni, Hui Ma, Lindsay Wheeler

University Students’ Ability to Interconnect the Calculus Concepts and Function Graphing .......................... 17508
Emre Tokgoz, Hazel Ceyhan

T538 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 6

Using Capstone Projects for Community Outreach ...................................................................................... 17520
Carmen Cioc, Sorin Cioc, Richard A. Springman

Implementing Collaborative Projects Using a National Academy of Engineering (NAE) Grand Challenge: Provide Access to Clean Water. ........................................................................ 17528
Kamasi Wright, Ivana Milamovic, Tom A. Eppes

Introducing Social Relevance and Global Context into the Introduction to Heat Transfer Course .................. 17547
Elizabeth A. Reddy, Breeanne Ponzstrzelz, Susan M. Lord, Imane Khalil

Students’ Perception of a Summer Undergraduate Research Experience: Across the Disciplines ............... 17569

VOLUME 26

Designing and Building Devices for Industry: A Capstone Design Project Experience .................................. 17581
Moezica Nurchesmeh

T538B – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 7

Redesign of an Introduction to Mechanical Engineering Course to Keep Students Engaged and Interested ........................................................................ 17593
Olivier Putzeys, Masoud Raia-Bohani, Serge Raymond Maalouf

Stimulating Interest in First-Year Mechanical Engineering Students through Design Modeling/Analysis and CNC Manufacturing ........................................................................ 17608
Todd Letcher, Gregory J. Michna, John D Versteeg, Sarah M. Michna

Faculty Perceptions of the Teaching and Learning Experience in Fundamental Mechanical Engineering Courses .......................................................... 17622
Michelle Soledad, Holly M. Matzovitch, Cheryl Carrico

A Foundational Engineering Science Course and Its Impact on Those Who Teach It ................................. 17639
Philip Cornwell, Donald E. Richards, Glen A. Livesay

Let’s Not Throw Away that Big and Bulky Manipulator – Revitalize It! ..................................................... 17651
Trung H. Duong, Nebajisa J. Jakisic

T539 – ENHANCING THE STATICS CLASSROOM

Standardizing the Statics Curriculum Across Multiple Instructors ............................................................... 17661
Kimberly B. Demore, Jennifer Schlegel, Matthew James Jensen

Statics Modeling Kit: Hands-On Learning in the Flipped Classroom ............................................................. 17677
Eric Davyshahi, Russell Pearce, Todd R. Haskell, Kordel J. Clarks

Teaching Statics Using Agile Methodologies ................................................................................................. 17698
Anna K. T. Howard

Toward a Multi-Dimensional Taxonomy for Statics Problem Classification and Problem-Solving .................. 17708
Ruth E. H. Wertz

T541 – MULTIDISCIPLINARY CURRICULAR DESIGN AND ASSESSMENT

Work in Progress: Flexibility and Professional Preparation via a Multidisciplinary Engineering Curriculum ........................................................................ 17713
Noah Salzman, Vicki Stieha, Amy J. Moll, Joaovah E. Almarri

Redesigning Undergraduate Engineering Education at MIT – The New Engineering Education Transformation (NEET) Initiative .................................................................................. 17722
Edward P. Crawley, Anette Hossi, Amitava Mitra

Robotics as an Undergraduate Major: 10 Years’ Experience .................................................................... 17743
Michael A. Gennert, Craig B. Putnam
Lessons Learned in the Paths of Developing a Multidisciplinary Certificate Program ................................................................. 17760
Chi-Ning Chang, Courtney Lavadia, Douglas Alleire, Debra A Fowler, Raymundo Arroyave

Assessing Student Interdisciplinarity: Results from an Interdisciplinary Graduate Program in Science and Engineering Fields ........................................................................................................................................... 17770

T542 – CLASSROOM STRATEGIES – NEW ENGINEERING EDUCATORS DIVISION

Building a Physical Model to Teach Creative Problem-solving Skills in Online and Live Courses .................................................................................................................................................. 17783
Ralph Ocon

It’s Not Rocket Science: The Flipped Classroom in Space Mechanics ........................................................................................................................ 17802
Kaela Martin, Jonathan Mark Gallimore

It Takes All Kinds: Incorporating Diversity Education in the Engineering Classroom ........................................................................................................... 17812
Elfie Miskogioglou

A Study on the Student Success in a Blended-Model Engineering Classroom .......................................................................................... 17821
Vimal Kumar Viswanathan, John T. Solomon

Lowman’s Model Goes Back to the Movies .......................................................................................................................................................................................... 17831
Clifton B. Farnsworth, Jennifer Retherford, David A. Saftner

T547 – EDUCATION RESEARCH CONSORTIUM (EEGRC) POSTER SESSION

Active Learning Group Work: Helpful or Harmful for Women in Engineering? .......................................................................................... 17848
Megan Keogh, Malinda S Zarske

Connecting with First-year Engineering Students’ Interest in Social Responsibility Issues Through Ethics Lessons ................................................................... 17850
Kathryn Wasganan, Janet Y Tsai, Malinda S Zarske

Cross-Case Analysis: K-12 International Teachers’ Perspectives on Integrated STEM and Computational Thinking Practices ............................................................................. 17852
Cristina Diordiev, Ibrahim H. Yeter, Walter Smith

Exploration of Expert and Novice Reasoning in Mechanics of Solids ............................................................................................................. 17854
Johanna Paulette Doulakais

Exploring the Unique Skills and Challenges Disabled Veterans Bring to College: A Qualitative Study in Engineering ........................................................................................................... 17856
Michael Scott Sheppard Jr.

SRobot Project ......................................................................................................................................................................................... 17858
Phuong Ngoc Binh Do

Teaching K-8 Students Engineering Design Process through Zoombinis ........................................................................................................... 17880
Anna Newley, Erdogan Kaya, Hasan Deniz, Ezgi Yesilyurt

Investigating Computational Thinking Self-Efficacy Beliefs of Pre-Service Elementary Teachers .................................................................................. 17882
Erdogan Kaya, Ezgi Yesilyurt, Anna Danielle Newley, Hasan Deniz

T547B – STUDENT DIVISION TECHNICAL SESSION 1

Changing of the Guard: Tips for Enabling Smooth Officer Transitions .............................................................................................. 17884
Monika Ingalls, Elizabeth Hill, Helene Finger, Marcia J. Lam, Gloria Guohua Ma, Diane L. Peters, Stephanie G Wettstein, Deborah S. Won, Claudia Mara Dias Wilson, Cheyenne Florenia Rivera, Emily Silva, Tara Sundsted

Work in Progress - The Undergraduate Perspective: How to Survive an Undergraduate Engineering Program .............................................................. 17896
Bryan Kucharski, Aaron Carpenter, Joan Giblin, Mehmet Ergenecer

Peer-led Research Methods Workshop for First-year Ph.D. Students (Student Paper) .................................................................................. 17914
Vincent Joseph Tosco Jr., Kevin Buettner, Madeline G Sciullo, Jennifer Sinclair Curtis, Jason E. Butler

First Year Engineering Students Perceptions of Engineering .......................................................................................................................... 17921
Marigold F. Bays-Muchmore, Alexandra Chronopoulos

T548 – SYSTEMS ENGINEERING DIVISION TECHNICAL SESSION 4 – SYSTEMS THINKING INTEGRATION AND SYSTEMS ENGINEERING SKILLS EVALUATION

Integrating Systems Thinking in Interdisciplinary Education Programs: A Systems Integration Approach ................................................................. 17937
Adedeji B. Badiru, Leeann Racz

Development of a Survey Instrument to Evaluate Student Systems Engineering Ability .......................................................................................... 17949
Diane Constance Aloinio, Karen Marais, Huaxi Sun

Developing a Systems Thinking Integration Approach for Robust Learning in Undergraduate Engineering Courses ................................................................................. 17974
FedERICA Robinson-Bryant

Automated Assessment of Systems Engineering Competencies .......................................................................................................................... 17985
Peizhu Zhang, Jon Patrick Wade
T552 – ENGAGEMENT IN PRACTICE: CREATING A ROBUST INFRASTRUCTURE FOR COMMUNITY ENGAGEMENT

Engagement in Practice: Scaling Community-based Design Experiences ................................................................. 17998
William G. Oakes, Andrew Pierce, Nasrullah Ata-Malawe
Engagement in Practice: A Case Study on Improving Community Sustainability through Service Learning ....................................................................................................................................................................... 18006
Jennifer Lyn Benning, Andrea E. Sarovek, Christopher Ryan Shearer
Engagement in Practice: Lessons Learned While Developing Community Partners (and a New Engineering Program) for Service Learning ....................................................................................................................................................................... 18016
Timothy J. Kennedy, Lori Houghtalen
Engagement in Practice: Partnering with a Local Community in an Effort to Promote Revitalization ....................................................................................................................................................................... 18024
Joan A. Kowalski, Ruth Ann Herstek
Engagement in Practice: The Student Engagement Continuum (SEC) – Opportunities and Challenges for a Sustainable Pipeline Enhancement Model at an Urban Institution ................................................................. 18031
Gregory E. Triplett, Jenilee Stanley-Shanks, Lori A. Floyd-Miller
Engagement in Practice: Socio-technical Project-based Learning Model in a Freshman Engineering Design Course ....................................................................................................................................................................... 18038
Raghv Pucha, Carol J Thurman, Ruth Yow, Connor Rylan Meeds, Jennifer Hirsch

W104 – ACTIVE LEARNING IN BME, SESSION II

Benefits of Active Learning Embedded in Online Content Material Supporting a Flipped Classroom ......................................................................................................................................................................... 18051
Jean-Michel I. Maurek
The Impact of Integrating a Flipped Lecture in a Biotransport Laboratory Course on Student Learning and Engagement ......................................................................................................................................................................... 18061
Asem Farooq Abuelzahab, Tamara Lea Kinzer-Ursem
Student Choice of Traditional or Blended Learning Activities Improves Satisfaction and Learning Outcome ......................................................................................................................................................................... 18074
Brian P. Helmk
Evolution of Biomedical Engineering Students’ Perceptions of Problem Solving and Instruction Strategies During a Challenge-Based Instruction Course ......................................................................................................................................................................... 18086
John R Clegg, K. R. Diller
Enhancing Student Leadership Competencies Through Reflection ......................................................................................................................................................................... 18106
Dianne Grayce Hendricks, Ken Yasuhara, Alyssa Catherine Taylor

W105 – WORKS IN PROGRESS POSTCARD SESSION

Exploring Mind Maps for Assessment in an Introductory Chemical Engineering Course ......................................................................................................................................................................... 18116
Joshua A Enzer
Ten Years in the Trenches: An Updated Suite of Scenario-based Academic Integrity Videos ......................................................................................................................................................................... 18122
Adam T Melvin, Lisa G. Ballard
Work in Progress: Identifying Current Standards and Addressing the Need for Further Process Safety Education in Unit Operations Courses ......................................................................................................................................................................... 18128
Tracy L. Carter, Samara M. Azarin, Jamie Brennan, Elizabeth Hill, Amy J. Karlsson
Work in Progress: Development of Web-based Pre-laboratory Modules to Increase Motivation and Reduce Cognitive Load ......................................................................................................................................................................... 18140
Kimia Moozeh, Deborah Tihanzy, Jennifer Lyn Farmer, Greg Evans
Work in Progress: Transforming a Course ......................................................................................................................................................................... 18150
Judy R. Pergiarront
Work in Progress: Content Validation of an Engineering Process Safety Decision-making Instrument (EPSRI) ......................................................................................................................................................................... 18156
Brittany Lynn Butler, Daniel D. Anastasio, Daniel D. Burke, Matthew Cooper, Cheryl A Bodnar
Work in Progress: Integrating Process Safety and Ethics in Classroom Discussion through Surveys ......................................................................................................................................................................... 18163
Reginald E Rogers Jr

W106 – FOSTERING BUSINESS AND PROFESSIONAL SKILLS IN THE ENGINEERING CLASSROOM

Developing an Understanding of Civil Engineering Practitioner Problem-solving Rationale Using Multiple Contextual Representations ......................................................................................................................................................................... 18170
Sean Lyle Gestson, Benjamin David Lutz, Shane A. Brown, Matthew Stephen Barner, David S. Hurwitz, Masoud Ghodrat Abadi
Leadership for Engineers: A Course for Developing Professional and Business Skills for Engineers ......................................................................................................................................................................... 18186
Decker B. Hains, Bret J. Wagner
Contributions of the Industry Involvement in Civil and Environmental Engineering Capstone Design Projects ......................................................................................................................................................................... 19202
Ashraf Badir, Long Duy Nguyen, Robert O'Neill, Kristoph-Dietrich Kinzli, Simeon J. Komisar, Jong-Yeop Kim
Understanding the Expectations of Writing Skills in Engineering Design Courses and Professional Practice ......................................................................................................................................................................... 18218
Veera Gnanasvar Gade
Utilizing Reflective Practice to Develop Agency in Goal Setting and Achievement in Workplace Learning Environments ......................................................................................................................................................................... 18231
Andrea Goncher
W108 – COED: MECHANICAL ENGINEERING RELATED TOPICS

Use of Computer Coding to Teach Design in a Mechanics Course, Resulting in an Implementation of a Kinematic Mechanism Design Tool Using PYTHON

Peter L. Schmidt, Philip Andrew Lax

VOLUME 27

A Low-cost Affordable Viscometer Design for Experimental Fluid Viscosity Verification and Drag Coefficient Calculation

Joseph Michael Derrick, Michael Golub, Vaibhav R. Shrivastav, Jing Zhang

Library and Student Innovation Center: Makerspace!

Steven F. Barrett, Tonia A. Dousay, Tyler J. Kerr, Larry Schmidt, Brandon Seth Gellis, Jesse Ballard

Implementation of a 3D Interactive Mobile App for Practicing Engineering Laboratory Experiment

Shuo Ren, Zelin Zhu, Rick McKenzie, Yechong Shen

Conceptual Framework for Integrating a Wireless Sensor and Control Network into a Robotics Course for Senior Students of Mechanical Engineering Technology

Zhou Zhang, Andy S. Zhang, Mingshao Zhang, Sven K. Esche

W113 – DESIGN ASSESSMENT

An Introductory Design and Communication Course Intended for all Engineering Majors Takes it to the Farm

Jennifer S. Mullin, Jean S. Vandergeest

An Evaluation of an Engineering Design Class using Mixed Methods Techniques

Martina Margaret Moyne, Maxwell Herman, Conor Walsh, Donal Padraic Holland

Differences and Similarities in Student, Instructor, and Professional Perceptions of "Good Engineering Design" through Adaptive Comparative Judgment

Scott R. Bartholomew, Greg J. Strimel, Senay Purzer, Liwei Zhang, Emily Yoshikawa

Customer Review-driven Function Formulation for Design Education

Ang Liu, Yuchen Wang, Yun Dai

Development and Implementation of a Longitudinal Design Assessment

John Crepeau, Michael Maughan, Dan Gordon, Steven W. Bayerlein, Matthew John Swenson, Daniel J. Robertson, Sean Michael Quaddlen

W114A – ACTIVE LEARNING METHODS IN ACTION

Active Learning Model as a Way to Prepare Students for Knowledge Integration

Sourajeet Roy, Braniislav M. Notaros, Ali Pezeshki, Tom Chen, Thomas J. Siller, Anthony A. Maciejewski, Laura B. Sample McMeeking

Pedagogical Effectiveness of Classroom Demonstrations Devices

Tom McCormick, James C. Squire, Gerald Sullivan

Dissemination of Active Learning Tools for Software V&V Education and Their Pedagogical Assessment

Priya A. Manohar, Sushil Acharya, Peter Y. Wu, Mary A. Hansen

Using a Paper-Based Supply Chain Game to Enhance Student Learning with Enterprise Software

Scott Abney, Mark Angolia, Leslie Pagliari

All Games Are Not Created Equally: How Different Games Contribute to Learning Differently in Engineering

John Ray Morelock, Holly M. Matusovich

Moving Beyond "Does Active Learning Work?" with the Engineering Learning Observation Protocol (ELCOT)

Megan Sanders, Sam Spiegel, Jennifer Zolniers Sherer

W114B – CAREER DECISION AND FACULTY DEVELOPMENT

Understanding the Socializer Influence on Engineering Students’ Career Planning

Rebinti Abhayankar, Cheryl Carrico, Holly M. Matusovich, Samantha Ruth Brunhaver

Early-career Plans in Engineering: Insights from the Theory of Planned Behavior

Trevion S. Henderson, Katie A. Shoemaker, Lisa R. Lattuca

To Map or to Model: Evaluating Dynamism in Organically Evolving Faculty Development

Lori C. Bland, Jill K. Nelson, Margret Hjalmarson, Anastasia P. Samaras

W114C – INSTITUTIONAL CHANGE

A Model for Spurring Organizational Change Based on Faculty Experiences Working Together to Implement Problem-based Learning

Stephen Secules, James John Bale Jr., Nicola W. Sochacka, Joachim Walther

Examining a Novel Theory-to-practice Effort in Engineering Education through Multiple Theoretical Lenses of Systems and Change

Stephen Secules, James John Bale Jr., Nicola W. Sochacka, Joachim Walther
Transforming an Institution by Engineering Learning ................................................................. 18615
    Sam Spiegel, Megan Sanders, Jennifer Zolners Sherer

Work in Progress: Ways of Thinking of Interdisciplinary Collaborators ........................................ 18630
    Medha Dalal, Adam R. Carberry

Work in Progress: Undergraduate Socialization in Engineering: The Role of Institutional Tactics and Proactive Behaviors ................................................................. 18640
    Trevion S. Henderson, Cynthia J. Finelli, Joanna Mirecki Millunchick

W115 – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 7

Lessons Learned from a Radio Spectrum Coexistence Competition: A Road Map to Engagement in Informal Education of Wireless Communication ................................................................. 18651
    Joshua Alevitz Garcia Sheridan, Richard M. Geff, Seungmo Kim, Vuk Marojevic, Carl B. Dietrich

Design of Experiment in a Junior-level RF Systems Lab ................................................................. 18667
    J. Craig Praether, Stuart M. Wentworth

SDRs Used as Motivational Tool for Communications and DSP ..................................................... 18678
    Randall L. Masselman

Incorporating PlutoSDR in the Communication Laboratory and Classroom: Potential or Pitfall? ................................................................. 18691
    John E. Post, Dennis A. Silage

Different Strategies for Preparing Students to Tackle the RF Engineering Challenges of Tomorrow: a Panel Discussion ................................................................. 18704
    Erica Messinger, Kathleen L. Melde, Jonathan Chisum, Julia Urbina, Jing Wang, Stephen E. Ralph

W120 – ENGINEERING ETHICS DIVISION TECHNICAL SESSION 4

Framing Engineering Ethics Education with Pragmatism and Care: A Proposal ........................................ 18717
    Indira Nair, William M. Bulleit

Toward a More Caring Code of Engineering Ethics ............................................................................ 18737
    Elsa Warford

Identifying Moral Foundations and Disciplinary Frameworks of Engineering Ethics ................................. 18749
    Jonathan Beever, Laurie A. Pinkert

Ethics Education as Enculturation: Student Learning of Personal, Social, and Professional Responsibility ................................................................. 18759
    Dean Nieuwma, Mitch Cieminski

Investigating Influences on First-year Engineering Students’ Views of Ethics and Social Responsibility ................................................................. 18777
    Sveeta Nittala, Tasha Zephirin, Shiloh M. James Howland, Dayoung Kim, Andrew Katz, Brent K. Jesiek

W121 – ENGINEERING LIBRARIES DIVISION TECHNICAL SESSION 1

Beyond Our Horizon: Reaching out to Engineering Faculty to Teach Spatial Literacy .......................... 18794
    Sylvia George-Williams, Jessie Marshall Zarazaga

How to Be a Subject Specialist When You Aren’t: Engineering Librarianship for the Non-engineer ......................... 18812
    Crystal L. Renfro, Lori J. O斯塔powsicz Critz

Project Shhh! A Library Design Contest for Engineering Students .................................................. 18824
    Lindsay Anderberg, Matthew Frenkel, Mikolaj Wilk

Engineering Information for Non-engineers: A Case Study in Interdisciplinary Application of the ACRL Framework ............................................................................. 18838
    Chelsea Leachman

W122 – COURSE TOOLS AND PRACTICES

Work in Progress: Impact of Exposure to Broad Engineering on Student Perceptions ................................. 18849
    Katie Grauman, Julie Phelps

A Retention Model for Community College STEM Students .................................................................. 18859
    Jennifer Snyder, Elizabeth A. Cadney

Implementing Lean Practices in an Academic Department: A Case Study ......................................... 18869
    Ekaterina Koromyslova, Carrie Steinhicht, Teresa J. K. Hall, Albena Yuliyanova Yordanova, Byron G. Garry

Lessons Learned from Implementing a Textbook’s Companion Website into a Production Operations Management Course ............................................................................. 18881
    John P Richards

Tools for Creating and Managing Student Teams ................................................................................. 18894
    Eric M. Rice, William Smedick

W123 – MET AND MECHATRONICS

Course Learning Evaluation in MET Using MATLAB GUIs for Low-stake Assignment Feedback of Graphical Solutions ............................................................................. 18903
    M. Austin Creasy
Design of a Transparent Hydraulic/Pneumatic Excavator Arm for Teaching and Outreach Activities .................................................. 18916
Keith Scott Pate, Joseph David Marc, Abdullah A. Chehade, Farid Breidi

Mechatronics and Academic Success: Towards Understanding the Impacts of Age, Major, and Technical Experience .................................................................................................................................................................. 18925
John B. Haughey

Planning of Curriculum Modules for Teaching of Fluid Power Concepts ............................................................................................................ 18937
Jorge Rodriguez, Alamgir A. Choudhury

Tensile Comparison of Polymer Specimens Produced with Different Processes .......................................................................................................................... 18944
Wei Dai Vian, Nancy L. Denison

W123B – ET PERSPECTRALS

Motivating STEM Participation through a 'Making as Micro-manufacture (M3)' Model ........................................................................ 18959
Osama Al, John Okundaye Jr, Matthew Kuttalamadom, Melissa Natrajrajatinam, Sharon Lynn Chu, Francis Quek

STEM Educators: Who Are They? .................................................................................................................................................................................. 18972
Anne M. Lucietto, Lisa Ann Russell

Hands Across the Sea: Lessons Learned from the U.S. Fulbright Scholar Experience in the State of Qatar .......................................................... 18984
Nasser Alaraj, Mohammed Sayer Elaraj

International Experience of Engineering Technology Students Learning About Renewable Energy ........................................................................ 18991
Anne M. Lucietto

VOLUME 28

W124 – ENTREPRENEURSHIP & ENGINEERING INNOVATION DIVISION TECHNICAL SESSION 8

Implementing the Tech Startup Model: A Retrospective on Year One ........................................................................................................... 19000
Kevin Buffardi, William Zamora, Colleen Robb, David Bahn

A Methodology to Involve Students in the Evaluation of an Engineering Curriculum in Design, Entrepreneurship, and Innovation .................................................................................................................................................................. 19015
Isabel Hiligter, Constanza Miranda Mendoza, Mar Perez-Sanagustin

Maintaining Excellence in Undergraduate Education: The Faculty Development Seminars of the Baylor University School of Engineering & Computer Science (ECS) Over the Last Six Years ............................................................................................................. 19030
Cynthia C. Fry, Kenneth W. Van Treuren

Using Business Entrepreneurship Practices to Engage Middle School Students in STEM Learning: Three Years' Perspective .................................................................................................................................................................. 19042
Jidong Huang

Using the Design Thinking Approach to Develop an Entrepreneurial Development Center ................................................................. 19062
Pradeep Kashinath Waychal, Vinit Kishor Agpah, Vediyasaitaram Raghavanshi, Jayantrao Bhaurao Patil, Pramod Jagan Deore

W127 – FIRST YEAR PROGRAMS DIVISION POSTCARD SESSION 2: IDENTITY AND SENSE OF BELONGING

Work in Progress: Baseline Survey about Community and Identity ........................................................................................................ 19077
Abigail M. Clark, Rachel Louis Kajfez, Mahnas Jean Mohammad-Aragh

Work in Progress: Engineers from Day One ........................................................................................................................................................................ 19087
Tirupalavanan G. Ganesh, Kyle D. Squires, James Collofello, Robin R. Hammond

Work in Progress: Leveraging the Diverse Backgrounds of Community College Students to Teach Team-based, Multidisciplinary Engineering ........................................................................................................................................... 19099
David R. Elly, Jason E. Bice, Kendra A. Erk

Work in Progress: Students' Reflection Quality and Effective Team Membership ...................................................................................................... 19117
Saira Anwar, Maksin Menekse, Damji Heo, Dowyoung Kim

Work in Progress: Common Reading Experience: Assessing the Impact on Perceptions, Identity, and Belonging Among First-year Engineering Students ........................................................................................................................................... 19129
Laura Hirschfield, Michael Deiley, Stacie Edington

Growing Character Strengths Across Boundaries ................................................................................................................................................... 19147
Peter Golding, Celeno Arreola, Mike Thomas Pitcher, Crystal Fernandez-Pena, Helen Elizabeth Geller, Giselle Andrade, Diane Elisa Golding, Hector Erick Lugo Nevarez, Pedro Arturo Espinoza, Hugo Gomez, Herminia Henmmit, Melissa Stearns

Investigation of Sense of Belonging to Engineering in Undergraduate Introductory Classes .................................................................................. 19169
Sura Al-Qudah, Jill Davishahl, Eric Davishahl, Michael Andrew Greiner

Aksense: A General-purpose Wireless Controlling and Monitoring Device for Teaching First-year Electrical and Computer Engineering .......................................................................................................................................................... 19181
Farid Farahmand, David Andrew Story, David Anthony House, Robert Evan Rowlands
W127B FIRST YEAR PROGRAMS DIVISION POSTCARD SESSION 1: RETENTION AND STUDENT SUCCESS STRATEGIES

Work in Progress: Developing a Model for Student-led Peer Mentorship Programs ................................................................. 19193
Krystie S. Corbett, Katie Evans, Stacey J. Adams, Julie Gaudin, Madison Abigail Walker, Tyler Scott Fontenot

Work in Progress: Online Training in Spatial Reasoning for First-year Female Engineering Students ............................................ 19201
Suzanne Zarn-Birkhimer, Ing. Mayari Illarij Serrano Anaczo, Beth M. Holloway, Rachel Ann Baker

Work in Progress: Institutional Context and the Implementation of the Redshirt in Engineering Model at Six Universities .................................................. 19214
Emily Knaphus-Sorin, Ann Delaney, Katherine Christine Tetrick, Sonya Cunningham, Pamela Cosman, Tanya D. Ennis, Beth A. Myers, Jana Milford, Donna C. Llewellyn, Eve A. Riskin, Janet Callahan, Kevin Pitts, Michelle Ferrez

Identifying At-risk Freshmen and Providing Enhanced Advising Support Through Intrusive Academic Advising Interventions ........................................................................................................................................................................ 19233
Jeremy C. Helm, Tami Coronella, Tim Rooney

Work in Progress: Strategic, Translational Retention Initiatives to Promote Engineering Success .................................................. 19245
Elizabeth Anne Stephan, Laurel Whisler, Abigail T. Stephane

Work in Progress: Modeling a Tutoring Center to Improve Retention and Promote Student Success in Lower-level Engineering Classes .......................................................................................................................................................... 19260
Huda Mustafa

Assessing the Impact of Peer Mentoring on Performance in a Fundamentals of Engineering Course ......................................................... 19271
Krystie S. Corbett

Work in Progress: Redesigning Curriculum to Foster Student Success .............................................................................................. 19281
Elizabeth R. Kurban, Paige E. Smith, Kurush Belay

Work in Progress: Assessing the Impact of the First-year Summer Experience Program on Engineering Student Development and Transfer into Engineering ........................................................................................................................................................................ 19295

W132A – INTERNATIONAL COLLABORATIONS

Assessment of a Peer Mentoring Program to Build Capacity for Course Development and Delivery .................................................. 19321
Steven J. Burian, Mercedes Ward, Sajjad Ahmad, David Lawrence Stevenson, Tariq Banuri, Muhammad Aslam Chaudhry, Raxsol Bux Mahar, Jeffrey D. Ullman

Some Challenges to Building STEM Capacity in Emerging Economies: The Case of Namibia .............................................................. 19332
Gary Bruce Gehrig

Teaching in a Foreign Land: Experiences of International Teaching Assistants in U.S. Engineering Classrooms ................................................. 19342
Ashish Agrawal, Lisa D. McNair, Marie C. Paretti

What Should be Taught in Engineering Ethics Education Under Globalization?: Based on the Comparative Analysis of University Textbooks in China and the United States .......................................................................................................................... 19360
Jiaojiao Fu, Qing Lei, Deborah M. Grzybowski, Dongya Cheng

After-action Review of a U.S.-based M.S. Degree Program Delivered in Kilimanjaro, Africa: Challenges and Opportunities for Future Consideration .................................................................................................................................................. 19372
Mitchell L. Springer

W132B – COOPERATIVE AND PROJECT BASED GLOBAL LEARNING

A Methodology and Experience of Facilitating International Capstone Projects for Multidisciplinary Fields: Costa Rica Internet of Things (IoT) Case Study .............................................................................................................................. 19385
Karim Altaii, Shannon N. Conley, Samy El-Tawab

A Summer Immersive Program for Global Engineering Education with Focus on 3D Design and Structural Analyses ........................................................................................................................................................................ 19400
Soonsik Kweon, Jun H. Park, Kookhyn Kim, Kee-Joo Kim, Jeonghoon Song, Hoon-Siang Kang, H. Felix Lee

A Core Leading Scheme in Deeply Cooperative Learning with a Mobile Focus .......................................................................................... 19412
Takahiro Ichido

Deliverables from International Cooperation on an NIH-Funded Biomedical Engineering Project in Africa .................................................. 19425
David W. Gatchell, Akhinyi Akediran Osumtoki, Akinwale Oladotun Coker, Matthew R. Glucksberg, Tania Douglas, Kara M. Palamountain

International Students’ Projects as a Part of Engineering Education ................................................................................................. 19437
Anna Friesel

W133A – UNDERREPRESENTED POPULATIONS

Equity in Collaboration: My Ideas Matter, Too! K-12 Students’ Negotiation of Social Status in Collaborative Engineering Teams (Fundamental Research) .................................................................................................................................................. 19446
Kyla R. Macey, Morgan M. Hynes

From Toys to Tools: UAVs in Middle-school Engineering Education (RTP) .......................................................................................... 19460
Srinjita Bhaduri, Katie Van Horne, John Daniel Ristvey Jr., Randy Russell, Tamara Sumner
Investigating the Fit Between Students’ Personal Interests and Their Perceptions of Engineering in a National Society of Black Engineers (NSBE) Pre-college Summer Workshop (Fundamental Research) ................................................................. 19483
Morgan M. Hynes, Kayla R. Masey

**W133B – MIDDLE SCHOOL STUDENTS’ ENGINEERING IDENTITY, EFFICACY, ATTITUDES, AND PERCEPTIONS**

Developing Engineering Proficiency and Self-Efficacy Through a Middle School Engineering Course (Fundamental) .................................................................................................................................................. 19490
Jessica D. Gale, Meltim Alemdar, Jeremy Lingle, Sunni Haag Newton, Roxanne A. Moore, Jeffrey H. Rosen

Engaging Children in Design Thinking Through Transmedia Narrative (RTP) ........................................................................................................................................................................... 19510
Glenn W. Ellis, Isabel Huff, Al Rudnitsky, Beth McGinnis-Cavanaugh, Sonia K. Ellis

Encouraging Exploration, Creativity, and Joy through Compressed Engineering Immersion (Evaluation) ......................................................................................................................... 19526
Jenna Laleman, Annmarie Thomas, Deborah Beyer

Student Perceptions of Engineering Based Upon Board Game Participation ........................................................................................................................................................................... 19528
Alexis Basantis, Megan Dipietroantonio, Amy B. Geary, Melanie V. Ware, Kaitlin Malloak, Cheryl A. Bodnar

**W134 – SEEKING RESILIENCE AND LEARNING TO THRIVE THROUGH ENGINEERING EDUCATION**

Thriving for Engineering Students and Institutions: Definition, Potential Impact, and Proposed Conceptual Framework ................................................................................................................................................. 19540
Julianna Sun Ge, Edward J. Berger

Inner Engineering: A Convergent Mixed Methods Study Evaluating the Use of Contemplative Practices to Promote Resilience Among Freshman Engineering Students ........................................................................................................................................................................... 19562
Mark V. Huerta

Work in Progress: Understanding Student Perceptions of Stress as Part of Engineering Culture ........................................................................................................................................................................... 19572
Karim Jensen, Kelly J. Cross

Fostering Engineering Thinking in a Democratic Learning Space: A Classroom Application Pilot Study in the Azraq Refugee Camp, Jordan ........................................................................................................................................................................... 19583
Claudio Cesar Silva De Freitas, Zachary James Beyer, Hassan Ali Al Yagoub, Jennifer Deboer

**W135A – GREEN AND SUSTAINABLE MANUFACTURING PRACTICES**

A Look into Badging Strategies in Engineering Education and Its Application to Energy and Manufacturing Certification Programs ........................................................................................................................................................................... 19602
Glenn W. Ellis, Isabel Huff, Al Rudnitsky, Beth McGinnis-Cavanaugh, Sonia K. Ellis

4-D Printing of Pressure Sensors and Energy Harvesting Devices for Engineering Education ........................................................................................................................................................................... 19611
Tzu-Liang Bill Tseng, Aditya Akundi, Hoejin Kim

PCM Heat Exchanger for Manufacturing Environment: Independent Study Case for Integrative Project-Based Learning ........................................................................................................................................................................... 19621
Irina Nicoleta Ciobanescu Husanu

Undergraduate Freshman Developing Advanced Research Project: Learn-by-Discovery Module to Investigate Energy Efficiency and Energy Conservation Principles ........................................................................................................................................................................... 19630
Irina Nicoleta Ciobanescu Husanu, Carlos Michael Ruiz, Benjamin G Cohen, Sarah Renee Andreux

**W135B – AUTOMATION IN MANUFACTURING**

Engaging Students’ Creativity through Designing a Low-Cost Educational Robotic Arm ........................................................................................................................................................................... 19639
Shunafrica C. White, Jason D. Farmer, Akbar M. Esfami

Lessons Learned from an Intelligent Tutoring System for Computer Numerical Control Programming (CNC Tutor) ........................................................................................................................................................................... 19651
Sheng-Jen Hsieh, Qinbo Li

Measurement and Analysis of Carved Surfaces Made on a Self-Assembled and Tested Mini 3-Axis CNC Router ........................................................................................................................................................................... 19660
R. Badhwaranam

Multi-Sensors for Robot Teaming Using Raspberry Pi and VEX Robotics Construction Kit ........................................................................................................................................................................... 19674
Shouling He, Sheng-Jen Hsieh

New Mechatronics Education Initiatives ........................................................................................................................................................................... 19690
Marilyn Barger, Richard Gilbert

VOLUME 29

The Internet of Things Prototyping Platform Under the Design Thinking Methodology ........................................................................................................................................................................... 19698
Victor Taratukhin, Yulia Tadjgarova, Joerg Becker
W138 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 8

Alternatives to Textbook Homework Assignments ................................................................. 19708
Amir Karimi, Randall D. Manteuffel
A Study of Voluntary Problem Sets on Student Interest, Motivation, and Performance ................................................................. 19729
Philip Jackson
Generating Automated Problem Sets for Rapid Content Delivery and Adaptive Learning Modules ................................................................. 19751
Philip Jackson
Creating Problem Taxonomies for WeBWorK in Mechanical Engineering ................................................................. 19771
Agnes Germaine D'Entremont, Juan Abelló
Standards-Based Specifications Grading in a Hybrid Course ................................................................. 19792
Julie Mendez

W139 – APPLICATIONS OF TECHNOLOGY IN MECHANICS EDUCATION

If We Can’t Model a Cantilevered Beam, What Can We Model? Helping Students Understand Errors in Vibration Experiments and Analyses ................................................................. 19805
Philip Cornwell, Simon Jones, Daniel Takashi Kawano
Analysis of Basic Video Metrics in a Flipped Statics Course ................................................................. 19818
Benjamin Keith Morris, Siddharth Savadatti
Helping Students Learn Engineering Mechanics Concepts Through Integration of Simulation Software in Undergraduate Courses ................................................................. 19839
Jakob C Bruhl, Richard J. Gash, Aaron Freidenberg, Christopher H Comley, Paul M. Moody
Teaching FEA as a Pedagogical Tool for Teaching Machine Component Design ................................................................. 19874
Wendy S. Reffoe

W141 – INVESTIGATING INSTRUCTIONAL STRATEGIES

Application of Virtual Reality Simulation in Photolithography Laboratory Experiments ................................................................. 19892
Reza Kamali, Afsaneh Minaie, Julie Clingo, Marty J Clayton, Cody Anderson
Work in Progress: Visual and Tactile Aids in Multidisciplinary Engineering for Better Learning Outcomes ................................................................. 19910
K. Jo Min, John Jackman, Zhuoyi Zhao
Effectiveness of Gamification Activities in a Project-based Learning Classroom ................................................................. 19926
Eleanor Leung, Elizabeth Pluskwik
International Engineering Student Motivation to Develop Communication Skills: a Case for an Integrated Training Approach ................................................................. 19942
John Pringle, Gabriel Potvin
Preparing the Engineering Student for Success with IDEAS: A Second Year Experiential Learning Activity for Large-size Classes ................................................................. 19959
Ricardo Zaurin

W151 – WOMEN IN ENGINEERING DIVISION TECHNICAL SESSION 4

Building and Breaching Boundaries: An Intersectional Coherent Group Approach to Advancing Women Faculty in Engineering ................................................................. 19980
Coleen Carrigan, Saejin Kwak Tanguay, Joyce Yen, Julie Simmons Ivy, Cara Margherio, Eve A. Riskin, Christine S Grant, M. Claire Horner-Devine
Salary Negotiations and Gender in Engineering Education ................................................................. 19998
Grace Panther, Kacey Beddoes, Cheryl Llewellyn
Women in STEM: What Experiences Influence Decisions ................................................................. 20009
Stephany Coffman-Wolph, Kimberly Gray
Women’s Motivation to Pursue Engineering Education and Careers: A Case Study of Malaysia ................................................................. 20019
S. Zahra Aqit, Sarah Morton, Nehal J. Abu-Lail, Ashley Ater Kranov, Julie A. Knue, Jennifer Deboer
Women in Science and Engineering: A Framework for an Honors Undergraduate Curriculum ................................................................. 20041
Angela M Kelly, Doreen Aveni, Monica Bugallo

W152 – ENGAGEMENT IN PRACTICE: ENGAGING THE COMMUNITY THROUGH EDUCATIONAL OUTREACH

Engagement in Practice: Developing a Sustainable K-12 Outreach STEM Program ................................................................. 20048
Jean B. Schuman, Katie Shannon
Engagement in Practice: Integration of an Engineering Service Learning Course with a High School Robotics Team ................................................................. 20055
Ryan A Munden
Engagement in Practice: Infusing the STEM Pipeline Through Community Engaged Learning.................................................................20065

Engagement in Practice: Lessons Learned Partnering with Science Educators and Local Engineers in Rural Schools ........................................................................................................................................................................20073

Engagement in Practice: STEM Engagement through Mentoring .............................................................................................................20081

Engagement in Practice: Tensions and Progressions of a Robotics Service-learning Program........................................................................................................20093

W314 – RESEARCH METHODS

Developing an Observation Protocol to Categorize Formative Assessment in Engineering Courses..................................................20370

Lean LaunchPad and Customer Discovery as a Form of Qualitative Research ..........................................................................................20376
Data Visualization for Time-Resolved Real-Time Engineering Writing Processes ................................................................. 20387
Catherine G. P. Berdanier, Natasha Trellinger Buswell, Zexuan Zhao

VOLUME 30

Using a Critical Incident-centered Transition Theory Framework to Explore Engineering Education Research
Faculty Transitions ........................................................................................................................................................................... 20401
Alexandra Coo Strong, Courtney S. Smith-Orr, Cheryl A. Bodnar, Walter C. Lee, Courteny June Faber, Erin J. McCave

Establishing Quality in Qualitative Research with Linguistically and Culturally Diverse Research Participants ........................................... 20414
Amy Wilson-Lopez, Karen Hazel Washburn Washburn, Indhira Maria Hashin

Work in Progress: A Markov Chain Method for Modeling Student Behaviors ................................................................. 20431
Corey T. Schimpf, Molly H. Goldstein, Robin Adams, Jie Chao, Senay Purzer, Charles Xie

W316 – ENERGY CONVERSION AND CONSERVATION DIVISION TECHNICAL SESSION ON CONSERVATION AND OPTIMIZATION

Occupancy Detection Chair Sensor: An Energy Conservation Tool .................................................................................. 20445
Maher Shehabi

An Experiential Learning Exercise: Optimization of Evaporators and Condensers in a Vapor Compression Cycle ................. 20458
David C. Zietlow, John Sullivan

Work in Progress: Research-based Teaching in Undergraduate Thermofluid Mechanical Engineering Courses in a Primary Undergraduate University ........................................................................................................... 20480
Farshid Zabihian

Development and Implementation of a Power and Energy Engineering Minor with Limited Resources: First Results and Lessons Learned ........................................................................................................... 20493
Radian G. Belfu, Lucian Ionel Cioca, Richard Chion

Regenerative Braking System on a Conventional Bike ........................................................................................................... 20507
Bala Maheswaran, Nicolas Berna Tedori, Eamon J. Whitmore, Bailey L. Ritchie, Logan Gross

W321 – ENGINEERING LIBRARIES DIVISION TECHNICAL SESSION 5

Assessment of Library Instruction for Freshmen Engineering Students ......................................................................... 20521
Jeff McAdams, Rebecca Croxton

Effective Methods of Engineering Information Literacy: Initial Steps of a Systematic Literature Review and Observations About the Literature ........................................................................................................... 20552
Kari Kozak, Claire M. Szeszycki, David Snyder

Detecting Information Literacy: Choose Your Own Adventure Video Series ............................................................................. 20565
Samuel R. Putnam, Amy G. Buhler, Caroline Reed, Jean L Bossart, Neelam Bharti, Mickey S. Schafer

Enhancing Student Learning Outcomes: A Library and Writing Center Partnership ............................................................. 20573

W322 – PROGRAMS AND PEDAGOGIES

Applying Systems Engineering Tools to Teach Systems Engineering in an Engineering Management Program ....................... 20590
Sandra L. Furterer

Impact of Process Tampering on Variation ............................................................................................................................. 20605
Mustafa Shraim

A Systems Approach to Stakeholder Engagement in Accountability of Regional Universities ...................................................... 20616
David Elizandro, Angela A. Volpe, David H. Huddleston

Innovative Higher Education Teaching and Learning Techniques: Implementation Trends and Assessment Approaches ......................................................................................................................... 20630
Piush Taneja, Elnaz Safapour, Sharareh Kermanshachi

The Role of Internet of Things (IoT) and Big Data as a Road Map for Smart Management Systems: Case Studies Across Industries ........................................................................................................... 20645
Mousumi Roy

W324 – ENTREPRENEURSHIP & ENGINEERING INNOVATION DIVISION TECHNICAL SESSION 6

Integrating Entrepreneurial-minded Learning in Electronic Design Course .................................................................................. 20660
Jing Guo, John M. Santiago Jr.

Changing Minds, Transforming Learning Environments: A Collaborative Approach to Innovation and Entrepreneurship ............................................................................................................................... 20678
Brian Bielenberg, Ali Bouabid, Sami Amin

Fusing Introduction to Engineering and Intercultural Communication and Its Effect on the Customer Awareness
Aspect of the Entrepreneurial Mindset ................................................................................................................................. 20691
Haolin Zhu, Ian Derk, Natasha Trellinger Buswell, Natalie Nailor
Effect of Entrepreneurial Mindset on Funding Opportunities for Fundamental Research ................................................................. 20710
Samarth Gupta, Eunhye Kim, Greg J. Strimel

W333 – MAKERSPACES

Hk Maker Lab: Creating Engineering Design Courses for High School Students (Evaluation -or- Other) ............................................ 20721
Aaron Kyle, Christine Kovich, Michael A. Carapezza

K-2 Students’ Computational Thinking Engagement in Formal and Informal Learning Settings: A Case Study
(Fundamental) ........................................................................................................................................................................ 20734
Hoda Ehsan, Tikyna Monique Dandridge, Ibrahim H. Yeter, Monica E. Cardella

Youth Attitudes Towards Assessment Tools in After-school Informal Learning and Employment Training
...................................................................................................................................................................................... 20757

“But, What Do You Want Me to Teach?”: Best Practices for Teaching in Educational Makerspaces (RTP) ....................................... 20773
Avmeet Hira, Chanel Beebe, Kayla R. Marey, Morgan M. Hynes

W334B – UNDERGRADUATE PEER EDUCATORS: MENTORING, OBSERVING, LEARNING

Successes and Challenges in Supporting Undergraduate Peer Educators to Notice and Respond to Equity
Considerations within Design Teams .............................................................................................................................................. 20786
Chandra Anne Turpen, Ayush Gupta, Jennifer Radeff, Andrew Elby, Hannah Sao, Gina Marie Quan

Motivational Factors of Undergraduate Engineering Students in Introductory Non-technical Courses ............................................. 20814
Yujie Song Chang, Rider W. Foley

Peer Review and Reflection in Engineering Labs: Writing to Learn and Learning to Write .......................................................... 20833
Vanessa Stohl, Catherine Anne Huhka, Eva Chi

Using Undergraduate Mentors to Scale the Teaching of Engineering Writing .................................................................................. 20858
Michael Alley

W334C – EMBEDDING SOCIOTECHNICAL SYSTEMS THINKING I

Measuring Change over Time in Sociotechnical Thinking: A Survey/validation Model for Sociotechnical Habits of Mind.................. 20875
Jon A. Leydens, Kathryn Johnson, Stephanie Claussen, Jennifer Blacklock, Barbara M. Moskal, Olivia Cordova

Engineering and Sustainability: The Challenge of Integrating Social and Ethical Issues into a Technical Course ............................... 20897
Natasha A. Andreade, David Tomblin

Connecting with First-year Engineering Students’ Interest in Social Justice Issues through Ethics Lessons to Sustain Student Retention in Engineering .................................................................................. 20915
Kathryn Waugaman, Janet Y Tsai, Malinda S Zarske

W339 – TEACHING METHODS FOR ENGINEERING MECHANICS COURSES

Efforts to Improve Free Body Diagrams ........................................................................................................................................... 20939
Kate N. Leipold, Sarilyn R. Irancic

Engaging Engineering Students in Lectures Using Anecdotes, Activities, and Games ................................................................. 20956
Rania Al-Hammoud, Kamyrgh Gharanne

Exam Wrappers, Reflection, and Student Performance in Engineering Mechanics ........................................................................ 20965

Time Limited Exams: Student Perceptions and Comparison of Their Grades versus Time in Engineering Mechanics: Statics .......... 20979
Carisa H. Ramming, Rachel Mosier

Work in Progress: Use of Storytelling in Mechanics Assessments .................................................................................................. 20993
Carrie A. Francis

W342 – ASSESSMENT OF STUDENT LEARNING – NEW ENGINEERING EDUCATORS DIVISION

Investigating Students' Performance for Textbook and in-House Homework Assignments ............................................................. 21006
Hani Serhal Saad, Kyle Frederick Larsen, Hyecheung Bae, N. M. A. Hossain

Implementation and Assessment of New Techniques in Technical Writing ....................................................................................... 21017
Hani Serhal Saad

Improved Pedagogy Enabled by Assessment Using Gradescope ..................................................................................................... 21028
Sara A. Atwood, Arjun Singh

Standards-Based Grading Derived Data to Monitor Grading and Student Learning ................................................................. 21046
Heidi A. Diefes-Dux, Hossein Ebrahiminejad

A B or not a B? A Proposed Framework for Discussing Grade Aggregation in Standards-Based Assessment .................................. 21061
James Blake Hylton, Matthew Walker
W345 – ENGINEERING PHYSICS AND PHYSICS DIVISION TECHNICAL SESSION 1

A Preliminary Classroom Survey Explains the Students’ Reflections on Engineering Physics I (Mechanics) in Their Freshman Year ................................................................................................. 21073
Haridas Kumarakuru, James G. O’Brien

VOLUME 31

Modern Physics: A Modern Approach .................................................................................................................. 21089
Robert A. Ross

Resistors, Capacitors and Inductors Are Not as They Appear ........................................................................ 21113
Paul Benjamin Crilly, Tooran Emami

STEM-oriented Students’ Perception of the Relevance of Physics ...................................................................... 21124
Genaro Zavala, Angeles Dominguez

W355 – ENGINEERING LEADERSHIP COMPETENCY AND SKILL DEVELOPMENT

Perceived Importance of Leadership in their Future Careers Relative to Other Foundational, Technical and Professional Skills among Senior Civil Engineering Students .................................................................................. 21144
Angela R. Biedefeldt

Convergent Approaches for Developing Engineering Leadership in Undergraduates ............................................ 21160
Meagan R. Kendall, Debbie Chachra, Kate Roach, Emanuela Tilley, Kyle G. Gipson

Self-Awareness of Student Leaders in an Experiential Undergraduate Engineering Clinic Program ....................... 21180
Jessica Lupanow, Donald S. Remer

Flipped Classroom and Emotional Learning in an Engineering Leadership Development Course .......................... 21191
Dean H. Lang, Meg Handley, Andrew Michael Erdman

W380 – FACULTY DEVELOPMENT LESSONS LEARNED POSTER SESSION

De-risking Transdisciplinary Research by Creating Shared Values ........................................................................ 21210
Donna C. Llewellyn, William L. Hughes

Engaging Faculty in Continuous Improvement: The Context of an ABET Accreditation Process ...................... 21217
Anéjlica Burbano, Gonzalo V. Ulloa, Juliana Jaramillo, Norha M. Villegas, Lina M. Quintero, Alvaro Pachón

Lessons Learned: Collaborative Faculty Development in Civil Engineering—Moving from an Individual Practice of Teaching to a Community of Scholars of Teaching and Learning ...................................................... 21226
Elizabeth G. Jones

Lessons Learned: A Database-supported Workflow for Midterm Course Assessments ........................................ 21233
Ken Yasuhara, Jim L. Borgford-Parnell

Lessons Learned: Improving the New Faculty Orientation Program ............................................................... 21243
Alice E. Grimes, Sharon Claxton Bommer, Adelebi B. Badiru

W434 – MAPS, METAPHORS, TWEETS, AND DRAFTS

Undergraduate Engineering Students’ Use of Metaphor in Presenting Prototypes to a Technical and Non-technical Public Audience .......................................................................................................................... 21249
Jared David Berezin

Refining Concept Maps as Method to Assess Learning Outcomes Among Engineering Students ....................... 21271
Sean Michael Ferguson, Rider W. Foley, John Kofi Esikrow, Jr., Catherine Claire Pollack

Improving Senior Design Proposals Through Revision by Responding to Reviewer Comments ........................ 21291
Judy Randi, Ronald S. Harichandran, Joseph A. Levert, Bijan Karimi

Classical Rhetoric and the Political Tweet .......................................................................................................... 21314
Caroline Carvill, Annelleise Watt

W401 – AEROSPACE DIVISION TECHNICAL SESSION 2

Aerospace Engineering Initiative at the University of Maine .................................................................................. 21326
Masoud Rais-Rohani, David S. Rubenstein, Wilhelm A. Fries

Aerospace Capstone Design: Interactive Initial Sizing Estimates for Increasing Designer Intuition and Mitigating Risk in the Early Stages of Aircraft Conceptual Design ........................................................................ 21339
D. Blake Stringer, Dakota William Bunner, Robert William Winkler

An Elective in Rocketry ........................................................................................................................................ 21352
Paul F. Penko

Inclusion of Sustainability Analysis in a National Airport Design Competition .................................................. 21362
Mary E. Johnson, Yue Gu, Lorraine E. Holtaway

Mapping Design Processes to Practicing Engineers’ Perceptions of Uncertainty in Aerospace Design .................. 21377
Marty Mathews Jr., Antonette T. Cummings
W406 – COURSE STRUCTURING FOR EFFECTIVE STUDENT ENGAGEMENT

Possibilities for Technology-enhanced Active Learning of Structural Steel Design ..........................................................21392
Ryan L. Solomon

Where Grammar, Content, and Professional Practice Meet: The Case of the Passive Voice ..................................................21410
Susan Conrad, Kenneth Lamb, Timothy James Pfeiffer

The Use of GeoGebra Virtual Interactives in Statics to Increase Conceptual Understanding ........................................21425
Daniel W. Baker

Strategies for Flipping Geology for Engineers with Limited Time and Resources ..........................................................21435
Kristin M. Sample-Lord, Andrea L. Welker, Patricia M. Gallagher

The Influence of Grading Bias on Reinforced Concrete Exam Scores at Three Different Universities .............................21448
Benjamin Z. Dymond, Matthew Swenny, Chris Carroll

W408 – COED: ONLINE AND BLENDED LEARNING PART 2

A Virtual Reality Course Using EON Reality: Students’ Experiences .............................................................................21463
Nebosa J. Jaksic

The Internet Will Not Replace Us ........................................................................................................................................21480
Michelle E. Jarvie-Eggart, Amber Kemppainen, Thomas M. Freeman

Student and Instructor Perceptions of Online Engineering Education Videos ..................................................................................21493
Luke S. Lee, Hector Estrada, Mehdi Khazaeli

Evaluating the Effects of Highlighting Text Animations on the Attention Distribution of Students with Math Learning Difficulties ........................................................................................................................................21509
Shuang Wei, Qingli Lei, Yingjie Chen, Yan Ping Xin, Signe Kasberg

W414 – CURRICULAR TRANSFORMATION

Faculty and Student Experiences of Curriculum Reform: A Case Study of the Chemical Engineering Program at the University of Cape Town ........................................................................................................21520
Hilton Heydenrych, Jennifer M. Case

Development and Evaluation of an Evidence-based Instrumentation Course in Civil Engineering ........................................21525
Shawn Griffitts, Janet Seeley

Examining the Replication – or Mutation – Processes of Implementing a National Model for Engineering Mathematics Education at a New Site ..................................................................................................21536
Janet Y. Tsai, Kevin O’Connor, Beth A. Myers, Jacquelyn F. Sullivan, Derek T. Reaman, Kenneth M. Anderson

How Engineering Educators Use Heuristics When Redesigning an Undergraduate Embedded Systems Course .............21555
Nicholas D. Fila, Seda McKilligan, Steven Joseph Abramsky

W414B – MAKER COMMUNITIES AND AUTHENTIC PROBLEM SOLVING

What Have We "Learned" from Maker Education Research? A Learning Sciences-base Review of ASEE Literature on the Maker Movement ........................................................................................................................................21576
Steven Weiner, Micah Lande, Shawn S. Jordan

Impact of Prior Experiences on Future Participation in Active Learning .................................................................................21590
Robert Matthew Demonbrun, Cynthia J. Pinelli

Professional and Personal Use of Reflection by Engineering Faculty, Students, and Practitioners ...........................................21598
Adam R. Carberry, Trevor Scott Harding, Patrick J. Cunningham, Kristine R. Cavin, Michelle Choi Ausman, Diana Lau

Engaging Undergraduate Students in Hands-on Research Using Undergraduate-specific Small Internal Grants from the University ........................................................................................................................................21614
Muhammad Pervej Jahan, Shahnaz J. Aly

Engineering Design Days: Engaging Students with Authentic Problem-Solving in an Academic Hackathon ..........................21633
Christopher Bemmick, Carol Halls, Derek Wright, Andrew J. B. Milne, Eugene Li, Sanjeev Bedi

Exploring Making-based Pedagogy in Undergraduate Mezzanine-level Engineering Courses .............................................21656
Michael Scott Sheppard Jr., Shawn S. Jordan, Micah Lande, Ann F. McKenna

W415 – ELECTRICAL AND COMPUTER DIVISION TECHNICAL SESSION 8

Harnessing State-of-the-art Internet of Things Labs to Motivate First-year Electrical and Computer Engineering Students ........................................................................................................................................21664
David John Orser, Kia Bazargan, John Sartori

Design and Implementation of a Health-monitoring Design Project in an Introductory Digital Design Course .......................21679
Matthew A. Watkins

Requirements for the Effective Application of Personal Instrumentation in ECE Undergraduate Courses ..................................21694
Developing Portable Lab Kits for a Foundational Circuits Class
Curtis Cohencour

Bridging the Gap between Computer Engineers and Software Developers by Incorporating the PYNQ Platform into a Graduate Course on Embedded System Design Using FPGA
Chirag Parikh, Ryan T. Aldridge

W423A – ELECTRICAL/ELECTRONIC ET ISSUE

An Arduino-based Programmable Logic Control (PLC) Lab Activity for Undergraduate Engineering and Technology (ETM) Students
David Boelter

Design and Implementation of a New Instrumentation and Interface Undergraduate Course Using LabVIEW™
myDAQ
Reg Reccati Pocen, Farkh Yildiz

Collaborated Efforts in TI ARM M4/32Bits Microcontroller Curricula Developments and Assessments
Steve C. Hsiung, Feng Jao, Lijian Xu, Marjaneh Ixrahpur

Phasor Toolbox for AC Circuit Analysis Using MATLAB
Jai P. Agrawal, Omer Farook, Wangfing Yu

VOLUME 32

Promoting Critical Thinking Through Troubleshooting Exercises in Fundamental Electric Circuits Labs
Joe Delvicario, Dominick Gerard Lauria, Patricia Melloidge, Ying Yu

W423B – A TECHNOLOGY POTPOURRI II

Programmable Logic Controllers and Data Traffic Handling Solutions
David Boelter

Assessment of Discrete Concept Knowledge, Integrated Understanding, and Creative Problem Solving in Introductory Networking Courses
Mark J. Indelicato, Jeanne Christman, George H. Zion

A System Designed to Convert Plastic Waste Product into Utilitarian Artifacts
Duang Vu, Ashfaq Ahmed, Omer Farook

When Emerging Technologies Cross Academic Boundaries: Collaboration or Competition?
Barbara Christie, Joe Tabas

W424 – ENTREPRENEURSHIP & ENGINEERING INNOVATION DIVISION TECHNICAL SESSION 7

Lessons Learned in the Labyrinth: Navigating Campus Resources to Bring a Student and Faculty Smart Gardening Startup to Life
Dustyn Roberts, Trevor Scott Stephens

Incorporating Design Thinking into the First-year Engineering Curriculum
Mary Raher, Mary Fraley, Amber Kempainen

The Engineering-science Intellectual Property (ESIP) Project: A Novel Method for Promoting Innovation
Hamid R. Pirooz, Justin L. Hess, Charles Feldhaus

Teaching Entrepreneurial Thinking Through a Companion Course for All Types of Capstone Senior Design Projects
Sandra Furnbach Clavijo, Leslie R. Brunell, Keith G. Sheppard, Kishore V. Pochiraju

W426 – DIVISION FOR EXPERIMENTATION & LAB ORIENTED STUDIES TECHNICAL SESSION 4

Design and Implementation of a Course in Experimental Design and Technical Writing
Natasha Smith, Andrew Jason Hill, Tom McDonald

No-cost Implementation of Electronic Lab Notebooks in an Intro Engineering Design Course
Daishake Aoyagi

Using Mechatronics to Develop Self Learners and Connect the Dots in the Curriculum
Robert J. Rabb, Nathan John Washuta, Coleman D. Floyd

Design of a Cross-curricular Circuits Laboratory Experiment
William Michael Delaney, Heather Dillon, Joseph P. Hoppbeck

BYOE: Activities to Map Intuition to Lumped System Models
Raina White, Christopher G. Levey, Laura Ray

W429 – IED TECHNICAL SESSION: PREPARING COURSES FOR THE FUTURE

A Gamification Approach for Experiential Education of Inventory Control
Gokhan Egilmez, Ridvan Gedik
Designing a Converged Plant-wide Ethernet/IP Lab for Hands-on Distance Learning: An Interdisciplinary Graduate Project

22003

Immersion Virtual Training Environment for Teaching Single- and Multi-queuing Theory: Industrial Engineering Queuing Theory Concepts

22020

Mastery Learning and Assessment Approach in Operations Research Course

22042

Simpson's Paradox and Equity in a Classroom: When Dropping the Worst Homework is Prejudicial to Your Students

22052

Jessica Ohanian Perez

Jennifer A Gatz, Angela M Kelly, Monica Bugallo

Tyler Byrne Cole, Emma Kaeli, Bradley Joseph Priem, Caroline Ghio, Paul A. Dimilla, Rachelle Reisberg

Marissa H. Forbes, Angela R Bielefeldt, Jacquelyn F. Sullivan, Ray Lynn Littlejohn

Kristin E. Sherwood, Angela M Kelly, Monica Bugallo

Subbian

Xavier Subbian

W438 – MECHANICAL ENGINEERING DIVISION TECHNICAL SESSION 9

Good Practices in Finite Element Method with a Frequecy Analysis Example

22063

Luis E. Monterrubio

An Integrated Active Learning Approach for Understanding Fatigue Theory

22075

Xiaobin Le; Richard L. Roberts, Anthony William Davia, Herb Consors

Uniaxial Tension Testing Lab: Fewer Instructions for Better Results?

22089

Hadas Ritz, Meredith N. Silberstein, Nelly Andarawis-Puri

Machine Design: Different Pedagogical Approaches to Achieve Targeted Outcomes

22107

Robert Scott Pierce, Rungun Nathan, William E. Howard, Brian Silcott

Designing 3-D Printed Heat Exchangers in a Senior-level Thermal Systems Course

22123

Gregory J. Michna, Todd Letcher

Peace Engineering: Investigating Multidisciplinary and Interdisciplinary Effects in a Team-Based Course About Drones

22134

Elizabeth A. Reddy, Gordon D Hoople, Austin Choi-Fitzpatrick, Michelle M. Camacho

Validating a Sustainable Design Rubric by Surveying Engineering Educators

22153

Mary Katherine Watson, Elise Barrella, Charles McDonald Cowan II, Robin D Anderson

Work in Progress: Sustainable Engineering for non-Engineers

22171

Katherine Sievers, Melissa Stewart Beauregard, James B. Pocock, Adam M Strecker, Kimberly Kays, John A. Christ

Environmental Forensics: An Authentic Blend of Science, Engineering, and Liberal Arts Ingredients

22183

Ashraf Ghaly

W441 – ENGINEERING IN A SOCIETAL CONTEXT

Soft Skills Boot Camp: Designing a Three-day Student-run Seminar and Workshop Series for Graduate Students

22197

Shelby Buffettung, Ryan L. Falkenstein-Smith, Alexander Johnson, Katy Pieri, Alex Vincent Jannini

Small-Scale Intelligent Vehicle Platform for Future Controls Course in the Application of Advanced Driving Assistance Systems

22214

Sarah De Rosier, Dominic Emilio Riccoboni, Paul Michael Rothhammer-Ruiz, Charles Birtsong

Teaching an Undergraduate Flight Dynamics Class for Three Semesters During PhD Studies to Prepare for an Academic Career

22224

Dipanjan Saha

Re-envisioning the Role of the Engineering Education Chapter at a Research-I Institution: Lessons from a Cross-disciplinary Model

22239

Beau Vezino, Alexander M Alvarez, Byron Hempel, Christina Julianne Loera, Samantha Davidson, Savannah Boyd, Vignesh Subbian

W447 – STUDENT TECHNICAL SESSION 2

Peer Mentoring of Undergraduate Women in Engineering as a Mechanism for Leadership Development

22253

Kristin E. Sherwood, Angela M Kelly, Monica Bugallo

Probing Correlations Between Undergraduate Engineering Programs’ Customizability and Gender Diversity

22265

Marissa H. Forbes, Angela B Bielefeldt, Jacqueline F. Sullivan, Ray Lynn Littlejohn

The Influence of Preconceptions, Experience, and Gender on Use of Supplemental Instruction and Academic Success in a Freshman Chemistry Course for Engineers

22273

Tyler Byrne Cole, Emma Kaeli, Bradley Joseph Priem, Caroline Ghio, Paul A. Dimilla, Rachelle Reisberg

The Power of Peer Mentoring of Undergraduate Women in Engineering: Fostering Persistence through Academic and Social Integration

22287

Jennifer A Gaiz, Angela M Kelly, Monica Bugallo

Understanding the Experience of Women in Undergraduate Engineering Programs at Public Universities

22302

Jessica Ohanian Perez
W480 – FACULTY DEVELOPMENT WORK IN PROGRESS POSTER SESSION

Faculty Development Program on Active Learning for Engineering Faculty in Chile: Sharing Step .......................................................... 22336
Antonia R. Gonzalez, Maria Elena Truyol, Renato Zavala

Work in Progress: Coaching as a Midcareer Faculty Development Approach ............................................................. 22345
Heidi M. Sherick

Work in Progress: Collaborating with Faculty Development in Retention Improvement ............................................................ 22351
Amy B. Chan Hilton

Work in Progress: Engineering Student Instructors, What Are Their Needs and How Can We Best Prepare Them? ................................................................................................................ 22357
Teresa A. Pinder-Grover, Stephanie Marie Kasano, Grenmarie Agresar

Work in Progress: Promoting Group Work for Learning: Student Characterizations of Exemplary Project Group

Members .......................................................................................................................... 22365
Jim L. Borgford-Parnell, Ken Yasuhara, Kamal Abdulla Ahmed, David Schipf

W505 – NOVEL CLASSROOMS

A Graduate Student Pedagogy Seminar in Chemical Engineering .......................................................... 22378
Christina Smith, Ann Sitomer, Milo Koretsky

BioEngineering Lab Techniques: A Novel Lab Course for Protein Expression in Bacterial and Mammalian Cells .......................................................... 22394
Jacob James Elmer, Andre Palmer, Jessica O. Winter

Just the Flippin’ FAQs .......................................................................................................................... 22412
Julie L. P. Jessep, Anna L. Fleming

Students’ Responses to Professionally Contextualized Activities in a Studio Class .......................................................... 22438
Ayman M. Alahdabullatiff, Shane Paul Lorona, Milo Koretsky

W506 – ACCREDITATION AND THE BOK

Lessons Learned from the First Round of Course Assessments After Curriculum Restructure Based on ASCE

BOK2 .......................................................................................................................................................... 22448
Kelly Brumbelow, Luciana R. Barroso, Debra Fowler, James Michael Kaihatu, Veronica S. Rodriguez Chavarría

The Impact of EAC-ABET Program Criteria on Civil Engineering Curricula .......................................................................................... 22469
Brian J. Swenty, Matthew K. Swenty

Enhancing Student Learning Through Accreditation .......................................................................................................................... 22484
Ronald W. Welch, Tara Hornor, Robert J. Rabb, Kevin C. Bower

VOLUME 33

Industry Partnerships Assist Programs for Accreditation .......................................................................................................................... 22499
Ronald W. Welch, Robert J. Rabb, Kevin C. Bower

Perceptions of the Civil Engineering Body of Knowledge Outcomes by Senior Students: Effect of Activities, Internships, and Career Goals .......................................................................................... 22514
Angela R. Bielefeldt

What Do First-year and Senior Civil Engineering Students Think About Raising the Bar on the Education Requirements for Professional Licensure? .................................................................................. 22535
Angela R. Bielefeldt

W514 – PROBLEM SOLVING, ADAPTIVE EXPERTISE, AND SOCIAL ENGAGEMENT

Bridging the Gap Between Academia and Industry in Approaches for Solving Ill-Structured Problems: Problem Formulation and Protocol Development .......................................................................................................................... 22555
Selcii Akinci-Ceylan, Kristen Sara Cetin, Renee Fleming, Benjamin Ahn, Andrea E. Sarovek, Bora Cetin, Paige Taylor

Situated Information Seeking for Learning: A Case Study of Engineering Workplace Cognition among Cybersecurity Professionals .......................................................... 22565
Hieu-Trung Le, Aditya Johri, Aqdas Malik

Engineering Undergraduates’ Task Interpretation during Problem-Solving in Thermodynamics .......................................................................................... 22582
Oenardi Lawanto, Angela Minichiello, Jacek Uziak, Andreas Febrian

Measuring Engineering Students’ Meta-cognition with a Think-Aloud Protocol .......................................................................................... 22592
Carolyn Plumb, Rose M. Marra, Douglas J. Hacker, John Dunlosky

Adaptive Expertise: The Development of a Measurement Instrument .......................................................................................................................... 22615
Jasma H. Ferguson, Jennifer Lehmann, Yevgeniya V. Zastavker, Susan Chang, Reid P. Higginson, Cigdem P. Tulgar

Developing an Instrument of Classroom Social Engagement .......................................................................................................................... 22634
Nathaniel Huntu, Denise Batledge Simmons, Shane A. Brown, Oluwada Adeojo
