</table>
SURVEY DESIGN, BLENDED SEISMIC, SOURCES

VIBROSEIS CONTROLLERS: ARE YOUR LOW-FREQUENCY SWEEPS IN PHASE? ............................................................. 211
Zhikang Wei

THE APPLICATION OF SUPER-CRITICAL CO2 SOURCE IN SEISMIC EXPLORATION ............................................................. 216
Haijun Li, Bin Gao, Ying Shi, Lili Dai, Liqing Tong, Heng Yan, Deqiang Song, Lizi Guo, Qian Zhao

TIME-LAPSE IMAGING AND INVERSION OF DECENTRALIZED DISPERSED SOURCE ARRAY SEISMIC DATA ........................................... 221
Matteo Caporal, Gerrit Blacquière, Shun Qu

Simplified simulation of transducer used as source of acoustic-logging tool .......................................................... 226
Tao Lu, Jian Li, Fei Huang, Guodan He

The forward analysis of the influencing factors about the fault surface-wave imaging based on the staggered-grid finite-difference method .................................................................................................................. 231
Jialiang Xu, Jun Wang, Lien Bian, Jingyi Zhang

Combining direct imaging of blended data and data-space deblending using a pattern-based approach .................................................................................................................. 236
Joseph Jennings, Biondo Biondi, Robert Clapp, Shuki Ronen

MIGRATION AND TRAVELTIMES

VISCOACOUSTIC VTI AND TTI WAVE EQUATIONS APPLIED IN CONSTANT-Q ANISOTROPIC REVERSE TIME MIGRATION .................................................................................................. 241
Ali Fahalilh, Kristopher A. Innanen

Interaction between P, S1, and S2 waves in multilayered ort media at low frequencies .......................................................................................................................... 246
Alexey Stovas, Yuriy Roganov, Vyacheslav Roganov

3D WAVEFORM INVERSION OF MICROSEISMIC DATA FOR VTI MEDIA ............................................................................. 251
Oscar Jarillo Michel, Ilya Tsvankin

Attenuation compensation for time-reversal imaging in VTI media .................................................................................. 256
Tong Bai, Tieyuan Zhu, Ilya Tsvankin

An approximate method for the acoustic attenuating orthorhombic eikonal equation .......................................................................................................................... 261
Q. Hao, T. Alkhalifah

Azimuthally anisotropic effective parameters from full-azimuth reflection angle gathers .......................................................................................................................... 266
A fast-sweeping algorithm for high-order accurate solution of the anisotropic eikonal equation .................................................................................................................. 271
Umair bin Waheed

Normal-mode propagation in orthorhombic media: group vs phase domains .......................................................................................................................... 276
Yuriy Ivanov, Alexey Stovas

PRACTICAL APPLICATIONS

Shear-wave anisotropy in cracked rocks and its application to evaluate hydraulic fracturing from acoustic logging data .................................................................................................................. 281
J. Adam Donald, Jeroen Jocker, Scott Leaney, Sumedip Dasgupta, Francisucs Van Kleef, Frank Brindle

Seismic amplitude difference inversion for fracture weaknesses and attenuation factors .................................................................................................................. 291
Huatizen Chen, Kristopher Innanen

A case study for orthorhombic model building using 5D regularized full-azimuth land data .......................................................................................................................... 296
Jialiang Xu, Jun Wang, Lien Bian, Jingsi Zhang

Seismic response analysis of a 3D-printed dual-porosity physical model: marine case .......................................................................................................................... 301
Jiannan Wang, Robert R. Stewart, Nikolay I. Dyaur

Amplitude variation with offset and azimuth inversion for fluid and fracture using azimuthal seismic reflection data in an oil-bearing fractured porous reservoir .................................................................................................................. 306
Xinpeng Pan, Guanpeng Zhang

Effective porosity sensed changing by azimuth: a linear crossplot of azimuthal P-P (near-angle amplitude, AVO gradient) .......................................................................................................................... 311
Heloise Lynn, Bill Goodway
KINEMATICS AND VELOCITIES

SLOWNESS-DOMAIN KINEMATICAL CHARACTERISTICS FOR HORIZONTALLY LAYERED ORTHORHOMBIC MEDIA .......................................................... 321
Zvi Koren, Igor Ravve

A NEW APPROACH IN PHYSICAL MODELING FOR VELOCITY-ANISOTROPY STUDY ................................................................. 326
Dmitry Popov, Tatiana Chichinina, Viacheslav Polovkov, Dmitry Molodtsov, Pinbo Ding

EFFECTS OF WRONG ADJOINTS FOR RTM IN TTI MEDIA ............................................................................................................. 331
Mathias Louboutin, Philipp Wittke, Felix J. Herrmann

IDENTIFICATION OF NEAR-SURFACE FRACTURES VIA SEISMIC-RADIAL ANISOTROPY ........................................................... 336
Jer-Yu Jeng, Roohollah Askari, Snehamoy Chatterjee, Reza Dolatabadi

ANALYSIS OF TIP AND EDGE DIFFRACTIONS IN DIP-ANGLE GATHERS FOR ORTHORHOMBIC MEDIA ........................................... 342
Yagesh Arora, Ilya Tsvankin

THE EFFECT OF FLUIDS AND THEIR VISCOSITY ON THE ELASTIC-WAVE VELOCITY AND ANISOTROPY OF 3D-PRINTED VTI ROCK MODELS ......................................................................................... 347
Suresh Dande, Robert R. Stewart, Nikolay Dyur

CASE STUDIES AND WORKFLOWS

RISK REDUCTION AND ACCELERATING DRILL OR DROP DECISIONS USING DHI AND AVO ANOMALIES: A CASE STUDY FROM THE NYK HIGH, NCS .................................................. 351
Pierre-Yves Baya, Peter Brown, Jeet Singh, Stuart Greenwood, James Raffle, Ross O’Driscoll

A CASE STUDY OF AMplitude VERSUS OFFSET ANALYSIS BETWEEN KIRCHHOFF PSTM AND KIRCHHOFF PSDM DATA ............................................................................................................. 356
T. Ciauccio, B. Ciurlo

DECIPHERING THE SEISMIC SIGNATURE OF THE EDVARD GRIEG FIELD, NORTH SEA ................................................................. 361
Abel G. Ndiyuing, Odd Kollbjørnset, Knut B. Straath, Morton D. Bjørke

ENHANCED UNDERSTANDING OF FLUVIAL RESERVOIRS IN A BROWN FIELD USING GEOSTATISTICAL SEISMIC INVERSION, BARMER BASIN, INDIA .................................................................................. 366
Rajesh Soni, Namita Pahwa, Anil Malkani, Subhendu Sarkar, Kondal Reddy

SEISMIC-BASED DERISKING OF UNCONVENTIONAL PLAYS BY INTEGRATING ROCK PHYSICS, INVERSION, GEOPRESSURE, AND GEOMECHANICS ................................. 371
Sam Green, Jeremy Meyer, Marianne Rauch-Davies, Steve Smith, Bob Schmicker

RESEARCH ON SEISMIC-FLUID DETECTION DRIVEN BY ROCK PHYSICS: A CASE STUDY IN BOHAI BAY ............................................................................................................................................ 376
Yao Li, Wei Guo, Xinya Duan, Huihuang Tan

IMPACT OF SEISMIC-INVERSION PARAMETERS ON RESERVOIR PORE VOLUME AND CONNECTIVITY ................................................. 381
Leandro Passos de Figueiredo, Fernando Luis Bordignon, Dario Grana, Mauro Roisenberg, Bruno Barbosa Rodrigues

A FACIES-FIRST WORKFLOW FOR THE ESTIMATION OF ELASTIC-RESERVOIR PROPERTIES ........................................................................ 386
John F. Pendrel, Henk J. Schouten

FREQUENCY DEPENDENCE AND INVERSION METHODS

ANALYSIS OF FREQUENCY-DEPENDENT AVO RESPONSES IN INELASTIC THIN INTERBEDDED MEDIA ......................................................... 391
Xin Zhao, Shuangquan Chen, Xiang-Yang Li

SEISMIC IMPEDANCE INVERSION USING DICTIONARY LEARNING AND SPARSE REPRESENTATION .............................................. 396
Bin She, Kunhong Li, Zhining Liu, Yaqun Wang, Hanpeng Cai, Guangmin Hu

A NEW INSIGHT INTO THE HYDROCARBON INDICATOR OF TIGHT SANDSTONE RESERVOIR ........................................................................ 401
Kedong Wang, Xiaohong Chen, Dazong Yang, YuHua Zhuo, Jingye Li, Yonggang Wang, Na Zhang

FREQUENCY DISPERSION QUANTIFICATION BY USING FAVO INVERSION BASED ON THE GENERALIZED PROPAGATION MATRIX ................................................................................................................. 406
Guangtuan Huang, Xiaohong Chen, Cong Luo, Jingye Li, Xiangyang Li

SEISMIC ACOUSTIC IMPEDANCE INVERSION USING TOTAL VARIATION WITH OVERLAPPING GROUP SPARSITY ...................................................................................................................... 411
Shu Li, Yanggen Chen, Hao Wu, Zhenming Peng, Ru-Shan Wu

A NEW FREQUENCY-DEPENDENT REFLECTIVITY MODEL AND ESTIMATING SEISMIC AVO ATTRIBUTES ......................................................................................... 416
Zeyu Zhao, Dhananjay Kumar, Douglas J. Foster, Daniela D'ralus, Mrinal K. Sen

ESTIMATION OF FLUID MOBILITY WITH FREQUENCY-DEPENDENT BAYESIAN INVERSION ........................................................................ 421
Li Lu, Xingyao Yin, Zhaoyun Zong, Kun Li
SPECTRAL COMPENSATION TECHNOLOGY BASED ON LOW-FREQUENCY AVO TREND CONSTRAINT AND ITS APPLICATION IN HYDROCARBON DETECTION........................................................................................................................................................................426

Huihuang Tan, Wei Guo, Xinyi Duan, Shengguang Zhang

ANISOTROPIC MEDIA

REFLECTION AND TRANSMISSION RESPONSES OF LAYERED TRANSVERSELY ISOTROPIC MEDIA WITH ALIGNED HORIZONTAL SYMMETRY AXES .........................................................................................................................431
Song Jin, Alexey Stovas

INVERSION IN A VTI MEDIUM ........................................................................................................................................................................436
Mark Sams, Annamaria Annamalai

CHARACTERIZATION OF SHALE-GAS RESERVOIR BASED ON AN ANISOTROPIC AVO INVERSION AND QUANTITATIVE SEISMIC INTERPRETATION ..............................................................................................................441
Feng Zhang, Lin Wang, Xiang-yong Li

AZIMUTHAL ELASTIC-IMPEDEANCE INVERSION FOR FRACTURE PREDICTION WITH TWO ANISOTROPIC PARAMETERS ........................................................................................................................................................................446
Xin Ding, Guangzhi Zhang, Xinpeng Pan, Yunwei Tang

JOINT INVERSION OF PP- AND PS-WAVE FOR THE VTI MEDIUM: APPLICATION TO A LOWER SILURIAN SHALE-GAS RESERVOIR ........................................................................................................................................................................451
Gao-rui Ma, Peng Zhang, Xiang-Yang Li, Tao Zhang

INDIRECT-INVERSION METHOD FOR FRACTURE-ANISOTROPIC PARAMETERS BASED ON AVAZ ........................................................................................................................................................................456
Li Lin, Guangzhi Zhang, Xinpeng Pan

FIRST-ORDER PERTURBATION APPROXIMATION OF HTI MEDIUM BASED ON AZIMUTHAL OBSERVATION ........................................................................................................................................................................461
Jun-zhen Han, Guo-chen Wu, Cheng-cheng Gong

THEORY AND DECONVOLUTION METHODS

SPARSE SEISMIC DECONVOLUTION WITH ERRATIC DATA ........................................................................................................................................................................................................................................466
Ronghao Dui, Cheng Yin, Ying Hu

MULTITRACE REFLECTIVITY INVERSION WITH DIP REGULARIZATION ........................................................................................................................................................................................................................................471
Seihao Zhang, Guofa Li, Jiantu Wang, Xin Du, Wenbo Zhang

A NOVEL APPROACH FOR MULTICHANNEL SPECTRAL SPARSE REFLECTIVITY INVERSION ........................................................................................................................................................................476
Cheng Yuan, Mingjian Su

AVO MULTITRACE GROUP SPARSE INVERSION ........................................................................................................................................................................481
Yi-jun Xi, Xing-yao Yin, Zhao-yun Zeng

SEISMIC DECONVOLUTION USING THE MIXED NORM OF LP REGULARIZATION ALONG THE TIME DIRECTION AND L2 REGULARIZATION ALONG THE STRUCTURE DIRECTION ........................................................................................................................................................................486
Liang Cheng, Shangyu Wang, Sanyi Yuan, Guanchao Wang, Zehao Yu, Li Dong

THREE-DIMENSIONAL SPARSE SEISMIC DECONVOLUTION BASED ON Q ATTENUATION MODEL ........................................................................................................................................................................491
Deborah Perez, Israel Cohen, Anthony A. Vassiliou

STATISTICAL MODELING FOR FACIES-DEPENDENT SEISMIC INVERSION ........................................................................................................................................................................................................................................496
Iris Fernandes, Klaus Mosegaard, Andrea Zunino

ABSOLUTE ACOUSTIC-IMPEDEANCE ESTIMATION WITH L1 NORM CONSTRAINT AND COMBINED FIRST AND SECOND ORDER TV REGULARIZATIONS ........................................................................................................................................................................501
Song Guo, Huazhong Wang

AVO INVERSION

DIRECT DEPTH DOMAIN ELASTIC INVERSION ........................................................................................................................................................................506
Mita Sengupta, Huozhu (James) Zhang, Michael Jervis

ENSEMBLE-BASED JOINT INVERSION OF PP AND PS SEISMIC DATA USING FULL ZOEPPRITZ EQUATIONS ........................................................................................................................................................................511
Mingliang Liu, Dario Grana

THE NONLINEAR AVO INVERSION FOR COMPRESSIONAL MODULUS BASED ON QAMH ALGORITHM ........................................................................................................................................................................516
Chen Zhao, Guangzhi Zhang, Qicui Yu, Jiang Liu

STOCHASTIC INVERSION OF AVO BASED ON AN IMPROVED MCMC METHOD ........................................................................................................................................................................521
Li Wang, Guangzhi Zhang, Xingyao Yin

HOPFIELD NETWORKS FOR HIGH-RESOLUTION PRESTACK SEISMIC INVERSION ........................................................................................................................................................................................................................................526
Son Phan, Mritunj. K. Sen

A METHOD COMBINING SPECTRAL INVERSION AND PRESTACK ELASTIC-IMPEDEANCE INVERSION FOR MIDDLE DEEP RESERVOIR PREDICTION ........................................................................................................................................................................531
Jiehua Gao, Zhongqiao Zhang, Hongtian Shen, Lin Kang, Naichuan Guo

ELASTIC-WAVEFORM INVERSION WITH MULTIPLE REFLECTIONS FOR ONSHORE UNCONVENTIONAL RESERVOIRS ........................................................................................................................................................................536
Anthony Vassiliou, James Smith, Rodney Stromberg, Lionel Weng
REDUCING FACIES CLASSIFICATION ERROR IN THE PRESENCE OF GAS WITH JOINT PP-PS INVERSION........................................................................................................................................................................................................540
Carl Reine

THEORY, METHODS AND APPLICATIONS

PRESTACK FREQUENCY-DEPENDENT VISCOELASTIC FLUID FACTOR INVERSION AND APPLICATION IN SHENGLI OILFIELD
Ruyi Zhang, Haojie Liu, Huazhong Wang, Hongwei Yang
........................................................................................................................................................................................................545
SEISMIC INVERSION BASED ON ADAPTIVE EPS PRECONDITIONING
Ronghao Dai, Cheng Yin, Yang Liu
........................................................................................................................................................................................................550
PLAY SCALE SEISMIC CHARACTERIZATION: USING BASIN MODELS AS AN INPUT TO SEISMIC CHARACTERIZATION IN NEW AND EMERGING PLAYS
Alan Mur, Kester Waters
........................................................................................................................................................................................................555
DIRECT ESTIMATION OF LITHOFACIES AND GEOPHYSICAL PARAMETERS INCORPORATING GAUSSIAN MIXTURE PRIORI AND PRESTACK EVA INVERSION WITH BOUNDING CONSTRAINT
Kun Li, Ming Zhu, Jiayuan Du, Daoli Liu, Xingyao Yin, Zhaoyun Zong
........................................................................................................................................................................................................560
DIRECT INVERSION FOR SENSITIVE ELASTIC PARAMETERS OF TIGHT RESERVOIR
Jianhu Gao, Jinyong Gui, Shengquan Li, Hongqiu Wang, Han Liang
........................................................................................................................................................................................................565
ASYMPTOTIC INVERSION OF THE VARIABLE DENSITY ACOUSTIC MODEL
Bamian Daftin, William W. Symes
........................................................................................................................................................................................................570
INVESTIGATING THE RELATIONSHIP BETWEEN PRIOR INFORMATION AND RESOLUTION IN A BAYESIAN PRESTACK INVERSION
P. E.Harris, G. Castillo
........................................................................................................................................................................................................575
EXPLORING ZOEPPRITZ FOR MORE CONSTRAINED AND RELIABLE DENSITY-RATIO ESTIMATION
Ivan Lehocki, Frank Larson, Rafiq Manajov

THEORY AND METHODS 1

MULTICHANNEL IMPEDANCE INVERSION FOR NONSTATIONARY SEISMIC DATA BASED ON MODIFIED ALTERNATING DIRECTION METHOD OF MULTIPLIERS
Ming Ma, Rui Zhang
........................................................................................................................................................................................................585
ELASTIC-IMPEDANCE INVERSION BASED ON L1+L2 MINIMIZATION
Lingqian Wang, Hui Zhou, Yufeng Wang, Bo Yu, Teng Long
........................................................................................................................................................................................................590
JOINT PP AND PS AVA WAVEFORM INVERSION USING PROPAGATOR-MATRIX FORWARD MODELING
Cong Luo, Xiangyang Li, Guangtan Huang
........................................................................................................................................................................................................595
A HIGH-RESOLUTION PRESTACK AVO INVERSION METHOD FOR P- AND S-WAVE MODULI
Guo Zhang, Jingye Li, Lin Zhou, Xiaohong Chen, Chen Zhou, Xu Li, Guoai Ma
........................................................................................................................................................................................................600
AMPLITUDE VARIATION WITH INCIDENT ANGLE INVERSION FOR FLUID FACTOR IN THE DEPTH DOMAIN
Q.H. Sun, Z.Y. Zong, X.Y. Yin, X.J. Meng
........................................................................................................................................................................................................605
SECOND-ORDER PERTURBATION APPROXIMATION OF REFLECTION BASED ON SCATTERING-MATRIX DECOMPOSITION
Cheng-cheng Gong, Guo-chen Wu, Jun-zhen Shan
........................................................................................................................................................................................................610

THEORY AND METHODS 2

NONLINEAR-AMPLITUDE VARIATION WITH OFFSET INVERSION BASED A NOVEL EXACT PP REFLECTION COEFFICIENT
Guangsen Cheng, Xingyao Yin, Zhaoyun Zong
........................................................................................................................................................................................................615
AVA INVERSION BASED ON THE WAVE EQUATION WITH ATTENUATION COMPENSATION
Guangtian Huang, Xiaohong Chen, Cong Luo, Jingye Li, Hengchang Dai
........................................................................................................................................................................................................620
AMPLITUDE VARIATION WITH OFFSET (AVO) INVERSION MODELING WITH A LOCAL ELASTIC SOLVER
..............................................................625
Ligia Elena Jaimes Osorio, Alison Malcolm

IMPEDEANCE RECONSTRUCTION USING A DATA-DRIVEN STRUCTURAL REGULARIZATION TERM
Xin Du, Guofa Li, Bixiao Zhou, Jiaxing Wang, Bo Gao
........................................................................................................................................................................................................630
SEQUENTIAL BAYESIAN-GAUSSIAN MIXTURE LINEAR INVERSION COMBINED WITH SEQUENTIAL INDICATOR SIMULATION
Dongyang He, Xingyao Yin, Zhaoyun Zong, Kun Li
........................................................................................................................................................................................................635
ELASTIC-PARAMETERS INVERSION FROM EI BASED ON THE DEEP-LEARNING METHOD
Danping Cao, Peng An, Siyiyan Liu
METHODS AND APPLICATIONS

APPLICATION OF PSEUDOLINEAR ZOEPPRITZ EQUATION IN THE PREDICTION OF CBM "SWEET SPOT" .......................................................... 645

THE STUDY AND APPLICATION OF AVO ANALYSIS BASED ON SPECTRUM-RECONSTRUCTION METHOD .......................................................... 650

Xinyi Duan, Huihuang Tan, Shengqiang Zhang, Gongli Liu

3D PRESTACK SIMULTANEOUS INVERSION AND LAME-PARAMETER EXTRACTION APPLIED TO DISCRIMINATE THE LITHOLOGY AND PORE-FUID: CASE STUDY—GUMAI FORMATION, JAMBI SUB-BASIN, SOUTH SUMATRA ........................................................................................................................................................................... 655

Widia Anggraeni, Bagus Saptoro Mulyatmo, Moh Sarkawi, Mawar Indah Nurzina, Andri Syafriya

FUNDAMENTAL STUDY FOR MONITORING SWEEP FRONT IN FOAM-ASSISTED EOR USING SEISMIC AVO ANALYSIS ................................................ 659

Rei Tamura, Hitoshi Mikada, Junichi Takekawa

AVO ANALYSIS USING AN ALTERNATIVE FORMULATION FOR ESTIMATION OF SEISMIC PROPERTIES OF HYDROCARBON FLUIDS: A STUDY ON GAS CONDENSATE .......................................................................................................................... 664

Romulo Carvalho, Fernando Moraes, Ull Freitas

MECHANISTIC INSIGHTS INTO PAIRED PRIMARY AND MODE-CONVERTED AVO RESPONSES .................................................................................. 669

Priyank Jaiswal, Rohit Raj, Sumit Verma

SONIC AND ACOUSTIC LOGGING

COMPARISON OF SHEAR SLOWNESS MEASURED FROM MONOPOLE AND QUADRUPOLE LOGGING-WHILE-DRILLING SONIC LOGS IN A SLOW FORMATION ........................................................................................................... 674

Yuanda Su, Xinding Fang, Xiaoming Tang

ENHANCED-RESOLUTION DIPLOE SONIC LOGGING DATA PROCESSING ........................................................................................................... 679

Baijia Wang, Brian Hornby, Chang Chang, Baichuan Sun, Kristofer Walker

REFLECTION SONIC IMAGING OF COMPLEX NEAR-BOREHOLE STRUCTURE IN SLOW FORMATIONS ........................................................................... 684

Brian Hornby, Paul Peterman, Christian Hager, Anne Draucker, Alexei Bolshakov

EVALUATION OF DOWNHOLE HYDRAULIC FRACTURING BY SONIC ATTENUATION LOGGING ....................................................................................... 689

Sheng-Qing Lee, Huan-Ran Li, Xiao-Ming Tang, Zhen Li, Xi-Hao Gu, Yuan-Da Su, Chun-Xi Zhuang

ASSESSING CO2 LEAK PATHS BY ANALYSIS OF BOREHOLE-MONOPOLE WAVEFIELD MODES ......................................................................................... 694

Hua Wang, Mike Fehler, Aimé Fourrier

REMOVAL OF DISPERSIVE BOREHOLE WAVES AND BEAM IMAGING OF FRACTURES AROUND THE WELBORE USING SONIC LOGGING DATA ......................................................................................................................... 699

David Li, Xiao Tian, Hao Hu, Xiao-Ming Tang, Yingcai Zheng

SPECTRAL ELEMENT METHOD WITH CURVILINEAR MESH FOR COMPLEX BOREHOLE-ACOUSTIC MODELING ........................................................................ 704

Marwan Charara, Denis Sabitov

SONIC-TENSOR COMPLETION AND APPLICATIONS .......................................................................................................................... 709

Scott Leaney, Aivren Jocker

LWD AND GEOSTEERING

DETECTION SENSITIVITY AND NEW CONCEPT OF DEEP READING LOOK-AHEAD LOOK-AROUND GEOSTEERING TOOL .......................................................................................................................... 714

Teruhiko Hagiwara

DRILLCAM: A FULLY INTEGRATED REAL-TIME SYSTEM TO IMAGE AND PREDICT AHEAD AND AROUND THE BIT ............................................................................................................................................................................................................... 719

Abdulaziz Al-Muhaidib, Yujin Liu, Pavel Golikov, Emad Al-Hemyari, Yi Luo, Mustaja Al-Als

SENSITIVITY AND ERROR PROPAGATION IN WELL-PLACEMENT BED-BOUNDARY DETECTION .......................................................................................................................... 724

Xiaoyan Zhong, Ettore Mirto, Jean-Michel Denichou, Rajan Dua

WATER TANK MEASUREMENTS ON AN EXPERIMENTAL LWD MULTIPOLAR ACOUSTIC TOOL ........................................................................................................... 729

Tim Geerits, Tobias Colista, Niels Jensen

WAVEFIELD CHARACTERISTICS OF UNIPOLE SONIC LWD WITH ECCENTRIC TOOLS ......................................................................................................................... 734

Jianqjng Wei, Xiao He, Hao Chen, Xiuming Tang

A NEW BOUNDARY-DETECTION METHOD FOR GEOSTEERING BASED ON THE ELECTROMAGNETIC SCATTERING .......................................................................................................................... 739

Pian Zhang, Shaogui Deng, Xiong Yuan

MULTI-LAYER GEOSTEERING INVERSION USING PARTICLE-SWARM OPTIMIZATION .......................................................................................... 744

Li Yan, Han Lu, Qiuyang Shen, Hamming Wang, Xin Fu, Jiefu Chen

TRANSDIMENSIONAL GEOSTEERING INVERSION: A DATA-DRIVEN SCHEMATIC FOR GEOPHYSICAL INTERPRETATION AND UNCERTAINTY QUANTIFICATION ............................................................................................................................................................................................................... 749

Qiuyang Shen, Jiefe Chen, Xaqing Wu, Zhu Han, Hamming Wang
EMERGING TECHNOLOGIES AND NEW APPLICATIONS

JOINT INVERSION OF FORMATION SHEAR-WAVE TRANSVERSE ISOTROPY FROM BOREHOLE MULTIPOLAR DISPERSION DATA ................................................................. 754
Song Xu, Chau-Xi Zhuang, Yuan-Da Xu, Xian-Ming Tang

INVESTIGATING AZIMUTHAL RESISTIVITY LOGGING RESPONSES OF CAVERNOUS FORMATION BY PHYSICAL SIMULATION ................................................................................................................................. 759
Haitao Li, Shuangui Deng, Xiyong Yuan

FAST FINITE-DIFFERENCE SIMULATIONS OF DC BOREHOLE MEASUREMENTS USING A SCHUR COMPLEMENT APPROACH ................................................................................................................................. 764
Piyush Jyoty, Debanjan Datta, Mrinal K. Sen, Adrien F. Arnulf

FRACTURE DETECTION USING REPEAT CROSSWELL SEISMIC IN A MARCELLUS RESERVOIR .......................... 769
David Rampton, Richard Hammack

SALT-BODY INTERVAL VELOCITY VARIATION IN THE DEEPWATER GULF OF MEXICO .................................................. 774
Sharon Cornelius, John P. Castagna, Peter A. Emmet

NUMERICAL AND EXPERIMENTAL SIMULATIONS OF MULTIARRAY AZIMUTHAL RESISTIVITY LATERLOG RESPONSES IN FRACURED RESERVOIR ................................................................. 779
Yixiong Yuan, Shanggui Deng, Lei Wang, Pan Zhang

A MODELING STUDY OF BOREHOLE RADAR FOR MONITORING HYDROFRACTURING .................................................. 784
Chunguang Ma, Xianzheng Zhao, Qing Zhao

VOLUME 2

UTILIZING HIGH-FREQUENCY 4-C DOWNHOLE DRILLBIT ACCELEROMETERS TO OBTAIN MECHANICAL ROCK PROPERTIES IN A SERIES OF CONTROLLED LABORATORY EXPERIMENTS ..................................................... 789
Charlie Waltman, James Lakings

WIRELINE LOGGING TECHNOLOGY

INTRODUCTION OF THE COIL-TYPE COMPLEX RESISTIVITY SPECTRUM LOGGING METHOD ................................. 794
Zhenming Kang, Shichen Ke, Chengfeng Yin, Jiang Jia, Mingyu Li, Junjian Li, Depeng Zou, Yalin Cai, Xuerui Ma

NUMERICAL SIMULATION OF THE MAGNETIC CEMENT INDUCTION RESPONSE IN THE BOREHOLE ENVIRONMENT ................................................................................................................................. 799
Timofey Eltsov, Tudenev W. Patzek

MISSING WELL-LOG DATA PREDICTION USING BAYESIAN APPROACH IN THE RELATIVE-GEOLoGIC TIME DOMAIN ................................................................................................................................. 804
Sean Bader, Kyle Spikes, Sergey Fomel

IDENTIFICATION AND CHARACTERIZATION OF NATURAL FRACTURES IN GAS SHALE RESERVOIR USING CONVENTIONAL AND SPECIALIZED LOGGING TOOLS .................................................. 809
Qamar Yasin, Qichen Du, Atif Ismail, Yan Ding

TRIAXIAL INDUCTION TOOL RESPONSE IN DIPPING AND TRIAXIALLY ANISOTROPIC FORMATIONS .................................................. 814
Gong Li Wang, Aria Abubakar, David Allen

POROSITY PREDICTION AND APPLICATION WITH MULTIWELL-LOGGING CURVES BASED ON DEEP NEURAL NETWORK ................................................................................................................................. 819
Peng An, Danping Cao, Xiaoli Yang, Ming Zhang

NOVEL APPLICATIONS

USING GEOPHYSICAL WELL LOGS TO EVALUATE THE MECHANICAL PARAMETERS OF A TURBIDITIC RESERVOIR IN CAMPOS BASIN, SOUTHEAST BRAZIL ................................................................................................. 824
Laís Monteiro, Abel Carraquilla

AUTOMATIC DETECTION OF REFLECTORS AND THEIR LOCAL DIPS FROM BOREHOLE ACOUSTIC ARRAY DATA ............... 829
Anna Przebindowska, Tim Geerits

SIMULATION STUDY OF SIMULTANEOUS ANISOTROPY INVERSION METHOD ................................................................. 834

Xianning Wu, Sergey Fomel

UNDERSTANDING RESERVOIR COMPARTMENTALIZATION THROUGH INTEGRATED DATA-DRIVEN SEISMIC-PROCESSING STRATEGIES
Riaz Alai, M Afia B Mokhtar, Jun Wang, Pongga Wardaya, Yonghe Guo, Ecep Suryana, Wemphy Ferdiana, Tengku Rasidi B. Tengku Othman

3D SEISMIC INTERPRETATION OF PALEOZOIC PALEOKARST FEATURES IN THE ARKOMA BASIN OF OKLAHOMA
Olarenwaju Aboaba, Christopher Liner

CASE STUDIES 2

KARST AND PALEOKARST GEOLOGY INTERPRETATION REVEALED FROM THE SEISMIC AMPLITUDES OF THE MISSISSIPPIAN OSAGE RESERVOIR IN KANSAS
Tom W. Stander, Doug Paul

COMPREHENSIVE STUDY ON FORMATION IMAGING UNDERLYING THE GYPSUM ROCK: A CASE STUDY FROM EASTERN SICHUAN BASIN, CHINA
Qiang Zhang, Shijiang Wang, Tao Chen

CONFIGURATION CHARACTERISTICS AND FORMATION MECHANISM OF CENOZOIC VOLCANIC VENTS: A CASE STUDY IN THE EAST OF SHALETIAN UPLIFT, BOHAI BAY BASIN
Xijia Sun, Xiaoli Hua, Lien Bian, Teng Liu

MAPPING SEDIMENTARY BASINS AND CRUST ON/OFFSHORE WESTERN GREECE BY DEEP SEISMIC SOUNDINGS: THE CORFU AND LEFKAS-KILLINI PROFILES
Jannis Makris, Joanna Papoulia

A STUDY ON THE CHARACTERISTICS OF DEFORMATION WITH MULTILEVEL DETACHMENT IN EAST SICHUAN BASIN BASED ON SEISMIC DATA
Lu Zhou, Xinji Zhang, Yong Wu, Dengfa He
NEW INTERPRETATION OF THE MID-ATLANTIC OFFSHORE USING A NOVEL INTEGRATION OF SEISMIC SEQUENCE STRATIGRAPHY AND PETROPHYSICAL MOTIFS .......................................................... 1728
Bai Zhai, John D. Pigott

3D HIGH-RESOLUTION SEISMIC CHARACTERIZATION OF DEEP OFFSHORE NIGER DELTA BASIN: WHAT'S NEW! ................................................................. 1733
Uzonna Anyiam, Emmanuel Uzegbhu, Smart Igboke

SEISMIC FACIES IN THE PEARL RIVER SUBMARINE CANYON, northern SOUTH CHINA SEA ......................... 1738
Ke Huang, Guangyu Zhong, Liaoxiang Wang, Tiqun Guo

ATTRIBUTE APPLICATIONS

APPLICATION OF INSTANTANEOUS DOMINANT-FREQUENCY ATTRIBUTES AND GAMMA-RAY WIRELINE LOGS IN THE DELINEATION OF LITHOLOGY IN SERBIN FIELD, SOUTHEAST TEXAS: A CASE STUDY .......................................................... 1743
Osaeren C. Ogiesoba, William A. Ambrose, Robert G. Loucks

IDENTIFICATION OF A SHELF-EDGE SUBMARINE CANYON USING SEISMIC ATTRIBUTES AND SPECTRAL DECOMPOSITION IN THE CENTRAL GULF COAST REGION OF TEXAS .......................................................... 1748
Yani Lin, Tianze Zhang, Kelly H. Liu, Stephen S. Guo

ROCK MODELING AND SEISMIC ATTRIBUTE IDENTIFICATION OF THE GAS-HYDRATE STABILITY ZONE IN NEW ZEALAND .................................................................................. 1753
Heather Bedle, William C. Vincent

MULTIATTRIBUTE VARIABLE-WINDOW WAVEFORM CLASSIFICATION AND APPLICATION ....................................... 1758
Mingjun Su, Cheng Yuan, Lihai Liu

HIGH-PERMEABILITY ZONE PREDICTION BASED ON SEISMIC MULTIATTRIBUTES ANALYSIS WITH PCA FUSION IN IRAQ AHDEB OILFIELD .......................................................... 1763
Yugang Hong, lize Liu, Younan Anabuleiman, Hehuai Wang, Xin Li, Liping Jiang, Tao Yang

INTEGRATED SEISMIC-ATTRIBUTE ANALYSIS TO CHARACTERIZE TERTIARY RUS/RADHUMA RESERVOIRS: AN EMERGING EXPLORATION PLAY IN KUWAIT .................................................. 1768
Anjaneyulu Singaravelu, Sanil Kumar Singh, Afruh Al-Ajmi, Arun Dey, Abdulaziz Al-Busairi, Khalid Al-Ajmi, Mominoy Roy

INTERPRETATION METHODS

HARD STREAKS, POLARITY, AND PHASE IN REFLECTION SEISMIC DATA: STRATTON FIELD ................................................. 1773
Qiang Guo, Wayne D. Pennington

STRUCTURE-CONSTRAINED SPECTRAL DECOMPOSITION BASED ON MATCHING-PURSUIT METHOD .......................................................... 1778
Tengfei Lin, Bo Zhang, Xingfang Liu, Kurt J Marfurt

HOW TO CALCULATE SWEETNESS ACCURATELY: THEORETICAL ANALYSIS AND CASE STUDY .......................................................... 1783
Junhua Zhang, Yang Liu, Chengyan Lin, Yuchuan Du, Lei Liu, Yang Liu

SEISMIC-DATA DECOMPOSITION USING A FORWARD-BACKWARD MATCHING PURSUIT .......................................................... 1788
Shengjun Li, Bo Zhang, Bongchang Liu, Jie Qi

GEOLOGICAL APPLICATION OF A WELL-LOGGING BASED SEISMIC RESOLUTION-ENHANCEMENT TECHNIQUE .................................................................................. 1793
Yijia Wu, Dakui Wu, Zongwei Wu, Minghua Xu, Tianwen Hu, Minghua Ouyang, Xiaohai Ren

HIGHLIGHTING DISCONTINUITIES WITH VARIATIONAL-MODE DECOMPOSITION-BASED COHERENCE .......................................................... 1798
Bin Lyu, Fangyu Li, Jie Qi, Tao Zhao, Kurt J. Marfurt

CASE STUDIES

PLIO-PLEISTOCENE BIOGENIC GAS SYSTEMS AND THEIR UNCONVENTIONAL RESOURCE POTENTIAL IN THE CHIANAN Plain, SOUTHWEST TAIWAN .................................................. 1803
Shi-Chie Fuh, Kuo-Hsiung Chang, Tsy-Yi Chang, Shiang-Horng Hsu, Shih-Chia Lin, Bing-Cheng Chen, Chih-Wen Wang, Chia-Yen Ku, Wei-Yi Chiu

CORRELATING MICROSEISMICITY WITH RELEVANT GEOPHYSICAL AND PETROPHYSICAL DATA TO UNDERSTAND FRACTURING PROCESS DURING HYDRAULIC STIMULATION: A CASE STUDY FROM THE PERMIAN BASIN .................................................................................. 1808
Debotyam Maity, Jordan Ciezobka

PECULIAR GEOLOGICAL FEATURES IN THE NUGGET SANDSTONE OF THE MOXA ARCH .................................................. 1813
Rui Zhai, John D. Pigott

SEISMIC GEOMORPHOLOGICAL ANALYSIS OF LATE MIocene SEQUENCES, OFFSHORE SABAH BASIN .................................................................................. 1818
Jia Qi Xing, Devar Prasad Ghosh, Wan Ismail bin Wan Yawoff

ANALYSIS OF CONJUGATE STRIKE-SLIP FAULTS AND ITS CONTROL EFFECT ON DEPOSITION IN WESTERN BOHAI SEA .................................................. 1823
Deyu Li, Jiyan Cai, Dehai Qin, Mingchun Wang, Tao Jiang
## Structural Analysis of the Conjugate Area: A Case Study in Shaleitian Uplift

Jong Wu, Mingchun Wang, Lei Gao, Wenbo Gao, Tao Jiang

USE OF AMBIENT-NOISE SURFACE-WAVE TOMOGRAPHY IN MINERAL RESOURCE EXPLORATION AND EVALUATION ................................................................. 1937

Dan Hollin, John McBride, David Good, Nicholas Arndt, Florent Brenguier, Gerrit Olivier

CLASSIFICATION FOR INTERPRETATION

A DEEP-LEARNING METHOD FOR AUTOMATIC FAULT DETECTION ............................................................. 1941
Yue Ma, Xu Ji, Nather M. BenHassan, Yi Luo

CONVOLUTIONAL NEURAL NETWORKS FOR FAULT INTERPRETATION IN SEISMIC IMAGES .................................................. 1946
Xinxing Wu, Yunzhi Shi, Sergey Fomel, Luming Liang

A NEW METHOD FOR AUTOMATIC SEISMIC FAULT DETECTION USING CONVOLUTIONAL NEURAL
NETWORK .......................................................................................................................................................... 1951
Bowen Guo, Lu Liu, Yi Luo

AUTOMATED INTERPRETATION OF TOP AND BASE SALT USING DEEP-CONVOLUTIONAL
NETWORKS .................................................................................................................................................. 1956

Oddgeir Gramstad, Michael Nickel

IMPROVING FAULTS CONTINUITY FOR EXTRACTION BY TRANSFER LEARNING BASED ON
SYNTHETIC DATA ........................................................................................................................................ 1961
Liyuan Xing, Victor Aarre, Theoharis Theocharis

A FAULT-DETECTION WORKFLOW USING DEEP LEARNING AND IMAGE PROCESSING .......................... 1966
Tao Zhao, Pratip Mukhopadhyay

AUTOMATIC SALT-BODY CLASSIFICATION USING DEEP-CONVOLUTIONAL NEURAL NETWORK ............... 1971
Yunzhi Shi, Xinxing Wu, Sergey Fomel

APPLICATION OF DEEP LEARNING FOR SEISMIC HORIZON INTERPRETATION ...................................... 1976
James Lovell, Gaynor Paton

NOISE ATTENUATION AND SEISMIC PROCESSING

DEEP LEARNING FOR GROUND-ROLL NOISE ATTENUATION .................................................................. 1981
Haishan Li, Wuyang Yang, Xuexian Tong

RANDOM NOISE ATTENUATION BASED ON RESIDUAL LEARNING OF DEEP CONVOLUTIONAL
NEURAL NETWORK ..................................................................................................................................... 1986
Si Xu, Yuan Yijun

GENERATIVE ADVERSARIAL NETWORKS IN SEISMIC DATA PROCESSING .............................................. 1991
Stephen Alwon

AN UNSUPERVISED LEARNING METHOD FOR RESIDUAL SEISMIC SIGNAL RECOVERY ..................... 1996
Chengbo Li, Yu Zhang, Charles C. Mosher

INTELLIGENT SHOT-GATHER RECONSTRUCTION USING RESIDUAL LEARNING NETWORKS ............ 2001
Benfeng Wang, Ning Zhang, Wensui Lu

MEAN-FIELD BOLTZMANN MACHINES FOR HIGH-RESOLUTION KIRCHHOFF MIGRATION ................. 2006
Janaki Vamaraju, Mrinal K. Sen

LOW-FREQUENCY EXTRAPOLATION WITH DEEP LEARNING ................................................................. 2011
Hongyu Sun, Laurent Demanet

RANDOM-NOISE SUPPRESSION IN SEISMIC DATA: WHAT CAN DEEP LEARNING DO? ..................... 2016
Dawei Liu, Wei Wang, Wenchao Chen, Xiaokai Wang, Yanchai Zhou, Zhensheng Shi

FACIES CLASSIFICATION AND RESERVOIR PROPERTIES

ENHANCING QUANTITATIVE INTERPRETATION IN THE PRESTACK DOMAIN WITH MACHINE
LEARNING ......................................................................................................................................................... 2021
Laura Bandura

AUTOMATIC CHANNEL DETECTION USING DEEP LEARNING ............................................................... 2026
Nam Pham, Sergey Fomel, Dallas Dunlap

SAGD DYNAMIC RESERVOIR PROPERTY CHARACTERIZATION USING MACHINE LEARNING .............. 2031
Upendra Tiwari, Subash Roy, Luis E. Cardozo

DEEP-LEARNING SEISMIC FACIES ON STATE-OF-THE-ART CNN ARCHITECTURES ..................... 2036
Jesper S. Dransch, Mikael Lüthje

MACHINE LEARNING-BASED METHOD FOR AUTOMATED WELL-LOG PROCESSING AND
INTERPRETATION ....................................................................................................................................... 2041
Po-Yen Wu, Vikas Jain, Mandar S Kulkarni, Aria Abubakar

SEISMIC FACIES CLASSIFICATION USING DIFFERENT DEEP CONVOLUTIONAL NEURAL
NETWORKS ............................................................................................................................................... 2046
Tao Zhao

REAL-TIME SEISMIC-IMAGE INTERPRETATION VIA DECONVOLUTIONAL NEURAL NETWORK ............. 2051
Haibin Di, Zhen Wang, Ghassan AlRegib

SEISMIC FACIES CLASSIFICATION USING SOME UNSUPERVISED MACHINE-LEARNING METHODS .......... 2056
Satinder Chopra, Kurt J. Marfurt
### SEISMIC IMAGING AND INVERSION 2

- **Feature-Capturing Full-Waveform Inversion Using a Convolutional Neural Network**
  - Yuqiang Wu, George A. McMechan
  - Pages 2061

- **Automatic Velocity Picking with Convolutional Neural Networks**
  - Yue Ma, Xu Ji, Tong W. Fei, Yi Luo
  - Pages 2066

- **Convolutional Neural Network for Seismic Impedance Inversion**

  - Hayden Powers, Whitney Trainer-Guitton, G. Michael Hoversten
  - Pages 2111

- **Machine Learning to Reduce Cycle Time for Time-Lapse Seismic Data Assimilation into Reservoir Management**
  - Ryan Smith, Tapan Mukerji, Tony Lupi
  - Pages 2116

- **Learning to Label Seismic Structures with Deconvolution Networks and Weak Labels**
  - Yazeed Alaudah, Shan Gao, Ghassan AlRegib
  - Pages 2121

- **Application of Supervised Descent Method for Transient EM Data Inversion**
  - Rui Guo, Masukun Li, Fan Yang, Shengheng Xu, Guangyou Fang, Aria Abubakar
  - Pages 2126

- **Classification of Total Oil Production of Wells in Seam Life of Field from Stochastic AVO Inversion Attributes via Machine Learning**
  - Yuechen Jin, Wenyi Hu, Xiaqing Wu, Jiefu Chen
  - Pages 2131

- **Spatial-Temporal Densely Connected Convolutional Networks: An Application to CO2 Leakage Detection**
  - Zheng Zhou, Youzuo Lin, Yue Wu, Zan Wang, Robert Dilmore, George Guthrie
  - Pages 2136

### FAcIES CLASSIFICATION AND RESERVOIR 1

- **Petrophysical-Property Estimation from Seismic Data Using Recurrent Neural Networks**
  - Motaz Alfarraj, Ghassan AlRegib
  - Pages 2141

- **Machine Learning Approaches for Seismic-Facies Prediction and Reservoir-Property Inversion**
  - Long Jin
  - Pages 2147

- **Seismic-Facies Analysis Based on Deep-Encoder Clustering**
  - Yanting Du, Xiaodong Zheng, Lianliang Hu
  - Pages 2152

- **Integration of Petrophysical Data Analysis and Optimization for Use in Artificial Intelligence Neural Networks**
  - Russell Krug, Hendratta Ali
  - Pages 2157

- **Seismic-Facies Classification Using Random Forest Algorithm**
  - Yugi Kim, Robert Hardisty, Emilio Torres, Kurt J. Marfurt
  - Pages 2161

- **Automatic Labeling Strategy in Semisupervised Seismic-Facies Classification by Integrating Well Logs and Seismic Data**
  - Sigue Lee, Junhwan Choi, Daeung Yoon, Joongmoo Byun
  - Pages 2166
AUTOMATIC MICROSEISMIC-EVENT DETECTION VIA SUPERVISED MACHINE LEARNING ................................................................. 2287
Shan Qu, Eric Verschuur, Yangkang Chen

IMAGING AND INVERSION

GEOPHYSICAL JOINT INVERSION WITH MULTIPLE COUPLING OPERATORS ........................................................................... 2292
Daniele Colombo, Diego Rovetta
CROSSGRADIENT ANISOTROPIC 3D CSEM INVERSION INTEGRATED WITH SEISMIC AND WELL LOG DATA TO REDUCE UNCERTAINTY ................................................................. 2297
Max A. Meju, Randall L. Mackie, Federico Morelli, Shahir A. Saleh
IMAGING SAND DUNES USING HELICOPTER-BORNE TEM DATA FOR SEISMIC NEAR-SURFACE CORRECTIONS ................................................................. 2302
Er?an Türko?lu, Daniele Colombo, Gary McNeice, Diego Rovetta, Ernesto Sandoval-Curiel, Taqi Youssf
JOINT 3D INVERSION OF GRAVITY AND MT DATA USING GRAMIAN CONSTRAINTS: A CASE STUDY FROM YELLOWSTONE ........................................................................ 2307
Michael Jorgensen, Michael S. Zhdanov
PETROPHYSICALLYGuided GEOPHYSICAL INVERSION USING A DYNAMIC GAUSSIAN MIXTURE MODEL PRIOR .................................................................................................................. 2312
Thibaut Antic, Douglas W. Oldenburg
ON CARBONATE PROSPECT MAPPING AND RANKING USING INTEGRATED SHIPBORNE GRAVITY, WELL LOG, AND SEISMIC DATA ................................................................................................. 2317
Roger V. Miller, Fawwaz Nik A Aziz, Ong Swee Keong
INTEGRATED INTERPRETATION OF MULTIMODAL GEOPHYSICAL DATA FOR EXPLORATION OF GEOTHERMAL RESOURCES – CASE STUDY: YAMAGAWA GEOTHERMAL FIELD IN JAPAN ......................................................................................... 2322
Masashi Endo, David Sumwall, Michael S. Zhdanov, Takuya Miura, Hisako Mochinaga, Naoshi Aoki, Takuji Mouri
OVERCOMING SCALE INCOMPATIBILITY IN PETROPHYSICAL JOINT INVERSION OF SURFACE SEISMIC AND CSEM DATA ......................................................................................... 2327
David Andreis, Lucy MacGregor, Pedro Alvaro, Michelle Ellis

MODELING AND MONITORING

DUAL-PHYSICS MODELING AND INVERSION OF ELECTRICAL RESISTIVITY AND RELATIVE PERMITTIVITY ................................................................. 2332
Alireza Shahin, Mike Myers, Lori Hathon
MAGNETOSEISMIC RESISTIVITY MAPPING: FUNDAMENTALS AND CHALLENGES ......................................................................................... 2337
Qiuzi Li, Harry W. Deckman, Deniz Ertas
NEAR-SURFACE VELOCITY ANALYSIS FOR SINGLE-SENSOR DATA: AN INTEGRATED WORKFLOW USING SURFACE WAVES, AI, AND STRUCTURE-REGULARIZED INVERSION ......................................................................................... 2342
Taqi Alyousuf, Daniele Colombo, Diego Rovetta, Ernesto Sandoval-Curiel
PREDICTING HORIZONTAL RESISTIVITY TRENDS: AN EXAMPLE FROM THE BARENTS SEA ......................................................................................... 2347
Ying Wang, Kenneth Duffaut, Janniche I. Nordskag
MULTIPHYSICS MONITORING DESIGN UNDER UNCERTAINTY: A CASE STUDY USING A BENCHMARK WATERFLOOD FIELD DEVELOPMENT DATASET ......................................................................................... 2352
Y. Bilgin Alhundaz, Nikita Chugunov
IMPROVING THE PREDICTION ACCURACY OF SOURCE ROCKS’ THICKNESS: COMBINING SEDIMENTARY FACIES AND GEOPHYSICS ......................................................................................... 2357
Na Li, Jinliang Zhang, Jinshui Liu, Wenlong Shen, Hao Chen, Guangchen Xu

CASE STUDIES AND METHODOLOGY

APPLICATION OF MULTIWAVE INTERPRETATION TO IMPROVE THE PREDICTION ACCURACY OF THE SINIAN SYSTEM RESERVOIR IN SICHUAN BASIN ......................................................................................... 2361
Haitao Yang, Zhenhua He, Jing Wang, Hongyan Wang, Dong Wang

VOLUME 4

TIME-DOMAIN REGISTRATION OF P- AND C-WAVES BASED ON A DYNAMIC TIME-WARPING ALGORITHM ......................................................................................... 2366
Yichen Zhang, Shuangquan Chen, Lianbo Zeng, Xiangyang Li
THE DUERNAY FORMATION: THE APPLICATION OF STRUCTURE AND SIMULTANEOUS INVERSION FOR RESERVOIR CHARACTERIZATION AND INDUCED SEISMICITY ......................................................................................... 2371
Ronald Weir, L. Lines, D. Lawton, T. Eyre
APPLICATION OF MULTICOMPONENT JOINT INVERSION IN CANADA OIL-SAND PREDICTION ......................................................................................... 2376
Bo Wang, Jingru Guo, Qibai Nie, Yong Liu, Chunlong Shi
A RESEARCH AND SUCCESSFUL APPLICATION OF MULTICOMPONENT JOINT INVERSION TECHNIQUE IN LITHOLOGICAL IDENTIFICATION AND DECREASING PREDICTIVE MULTISOLUTION OF CLASTIC RESERVOIR ...............................................................2381
Dong Wang, Ya-Lin Li, Fu-Rong Wu, Hai-Tao Yang, Zhi-Guo Fu, Jing Wang, Hong-Yan Wang

HORIZON-FOCUSED BIREFRINGENCE ANALYSIS OF 3C PS SEISMIC DATA: PERMIAN BASIN — CASE STUDY, NE MIDLAND ...........................................................................................................................................2386
Tony Johns

THE COMPREHENSIVE PS-WAVE STATIC CORRECTION TECHNIQUE USED FOR CANADIAN OIL SAND RESERVOIRS .................................................................................................................................2391
Jun Yang, Wei Chai, Haizhong Yang, Bin Ning, Qian Zhang, Na Lei

PP-WAVE AND PS-WAVE 5D RECONSTRUCTION AND DENOISING TO ASSIST REGISTRATION .................................................................2396
Wenlei Gao, Mauricio D. Sacchi

IMAGING AND INVERSION ADVANCES

COMPUTING NEAR-SURFACE VELOCITY MODELS FOR S-WAVE STATIC CORRECTIONS IN THE T-P DOMAIN .................................................................2401
Raul Cova, David Henley, Kristopher A. Immancan

S-WAVE RADIATION SIGNATURES FROM VERTICAL SOURCES IN ORTHORHOMBIC MEDIA FOR SP-WAVE DATA .................................................................2406
James Gaiser

INFORMATION ON S-WAVE VELOCITY AND DENSITY OBTAINED FROM MULTIWAVE DATA ...........................................................................................................................................2411
Cong Luo, Xiangyang Li, Guangyan Huang

SCALAR PP AND PS IMAGING OF ELASTIC RTM BY WAVEFIELD DECOUPLING METHOD .................................................................2416
Xixin Zhou, Xu Chang, Yibo Wang, Zhengxing Yao

HORIZONTAL-VELOCITY ESTIMATION FROM PP- AND PS-JOINT AVO INVERSION BASED ON ZOEPPRITZ EQUATIONS: EAGLE FORD CASE STUDY ...........................................................................................................................................2421
Un Young Lim, Nural Kabir, Richard L. Gibson Jr.

9-C SEISMIC VVAZ IN HTI MEDIA: A SYNTHETIC STUDY ON THE NIORBARA RESERVOIR ..................................................................................................................................................2426
Samara Omar, Jim Simmons

SP-WAVE SURFACE-SEISMIC SIGNATURES IN ORTHORHOMBIC MEDIA ...........................................................................................................................................2431
James Gaiser

IMPACT OF LOG-GUIDED VELOCITY ANALYSIS ON 4-C SHEAR WAVE IMAGING: PRESSURE COMPONENT ...........................................................................................................................................2436
Hamdi Mahmood, Yuefeng Sun

RESEARCH AND APPLICATION

RESEARCH AND APPLICATION OF MULTICOMPONENT JOINT-PREDICTION HIGH-QUALITY SHALE METHOD BASED ON HIGH-RESOLUTION SPECTRAL INVERSION ...........................................................................................................................................2441
Hua Zhang, Zhenhua He, Furong Wu, Guangming He, Degang Jin, Jing Wang

VECTOR PROCESSING OF THREE-DIMENSIONAL CONVERTED WAVES OF ORTHOTROPIC MEDIA: A CASE HISTORY OF HUAINAN COALFIELD ...........................................................................................................................................2446
Jun Lu, Yun Wang, Ying Shi, Zhen Yang

THE STUDY OF PP/PSV WAVE DIFFERENCES AND RELATIONSHIP WITH HYDROCARBON ...........................................................................................................................................2451
Weifang Liu, Jiangguo Zhao, Yangming Hu, Fang Ouyang, Qing Miao

INTERPRETATION OF CONVERTED WAVE-SEISMIC SECTIONS TO DETERMINE TIME DIFFERENCES IN P-P AND P-S WAVES USING SHEAR-SONIC LOGS ...........................................................................................................................................2456
A. Portas, L. Alejandro, G. Andres, B. Espeso

USE OF 3-C 2D SEISMIC TECHNOLOGY TO IDENTIFY OIL-BEARING RESERVOIRS ...........................................................................................................................................2460
Marina Antipina, Ivan Perepletkin, Vladislav Kiznetsov

GEOSCIENTISTS WITHOUT BORDERS AND HYDROGEOFYSICS

A TIME-DOMAIN ELECTROMAGNETIC SURVEY OF WAINUI VALLEY, BANKS PENINSULA: EQUIVALENCE, SENSITIVITY, LOCAL GEOLOGICAL CONSTRAINTS, AND GROUNDWATER RESOURCE IMPLICATIONS ...........................................................................................................................................2465
David C. Nobes

ACTIVE DEFORMATION WITHIN THE CUL-DE-SAC PLAIN ON SOUTHERN HAITI ...........................................................................................................................................2470
Steeve Symithe, Eric Calais

IDENTIFICATION AND EVALUATION OF GROUNDWATER RESOURCES FOR SMALL RURAL AND ABORIGINAL COMMUNITIES IN CHACO, ARGENTINA ...........................................................................................................................................2475
Luís Guarancino, Macarena Amaya, Santiago Perdomo, Amilcar Juarez, Gabriel Gelpi, Jonatan Pendiuk, Soledad Lagos, José Gómez, Claudia Tocho, Jerónimo Ainchil

GROUNDWATER MAPPING USING DC RESISTIVITY IN LOGANE, HAITI ...........................................................................................................................................2480
Michael Kalinski, Nick Duda, Harry Donaghy, Herby Lissade
TIME-LAPSE GROUND-PENETRATING RADAR FULL-WAVEFORM INVERSION TO DETECT TRACER PLUMES: A NUMERICAL STUDY ................................................................. 2485

APPLICATION OF ELECTROMAGNETIC INDUCTION TO DEVELOP A PRECISION IRRIGATION FRAMEWORK TO FACILITATE SMALLHOLDER DRY SEASON FARMING IN THE NASIA-KPARIKU AREA OF NORTHERN GHANA
Jeremy M. Fontaine, Alexander Percy, Erasmus K. Oware, Patience Boompemana, Vincent Gbedzi, John W. Lane Jr. ........................................................................................................ 2490

GEOPHYSICAL INVESTIGATION OF FAULT-GROUNDWATER INTERACTION: SAN ANDREAS OASIS SITE STUDY ................................................................................................. 2495
Drew Fahlert, Jasha Poiot

GEOPHYSICS TO ENHANCE AGRICULTURAL PRODUCTIVITY AND LIVELIHOODS OF SMALLHOLDER FARMERS THROUGH IMPROVED GROUNDWATER MANAGEMENT OF THE VIENTIANE PLAIN, LAO PDR
Okke Batea, Eddie Banks, Michael Hutch, Somphasith Douangusavanh, Phingsalao Sethghem, Trine Enemark, Paul Pavetic, Viengphong Xayavong, Ounakone Xayviliya 2500

SURFACE WAVE STUDIES AND APPLICATIONS

OPTIMIZED PASSIVE SEISMIC INTERFEROMETRY FOR BEDROCK DETECTION: A SINGAPORE CASE STUDY ................................................................. 2505
Yunnao Zhang, Yinyue Elita Li, Heng Zhang, Taesoo Ka

WAVE-EQUATION RAYLEIGH WAVE INVERSION USING FUNDAMENTAL AND HIGHER MODES ................................................................. 2510
Zhengdong Zhang, Tariq Alkilifah

SURFACE-WAVE INVERSION BY WAVEFIELD RECONSTRUCTION AND WAVE-EQUATION INVERSION ................................................................. 2515
Ali Shalhami, Spierd de Riddler, Andrew Curtis

SEISMIC HAZARD CLASSIFICATIONS AND V\textsubscript{SN} IN CONNECTICUT USING MASW AND HVSR METHODS ......................................................................................... 2520
Sarah L. C. Morton, John W. Lane Jr., Margarete A. Thomas, Lanbo Liu

DISPERSION INVERSION OF GUIDED P-WAVES IN A WAVEGUIDE OF ARBITRARY GEOMETRY ......................................................................................... 2525
Jing Li, Sherif Hanafy, Gerard T. Schuster

SURFACE-WAVE TOMOGRAPHY FOR NEAR-SURFACE CHARACTERIZATION WITH CONTINUOUS-WAVELET TRANSFORM FOR TWO-STATION CROSS-CORRELATION ......................................................................................... 2530
Tatsunori Beda, Takehiko Taji

MULTISCALE AND LAYER-STRIPPING WAVE-EQUATION DISPERSION INVERSION OF RAYLEIGH WAVES ......................................................................................... 2535
Zhaoxun Liu, Lianjie Huang

EFFECTS OF THE ANGLE OF IMPACT ON SURFACE-WAVE GENERATION ......................................................................................... 2540
Sivash Mhavali, Joseph Thomas Coe, Alireza Kordjazi

NOVEL PROCEDURES AND AGRICULTURAL APPLICATIONS

CALIBRATION, INVERSION, AND APPLICATIONS OF MULTICONFIGURATION ELECTROMAGNETIC INDUCTION FOR AGRICULTURAL TOP- AND SUBSOIL CHARACTERIZATION ......................................................................................... 2545
Jan van der Kruk, Christian van Hebel, Cosmo Brogi, Manuela Sarah Kaufmann, Xile Tan, Lute Weitemueller, Achim Mester, Johan Alexander Huismann, Harry Vereecken

SURFACE-CONSISTENT AMPLITUDE BALANCING WITH REFRACTED WAVES ......................................................................................... 2550
Daniele Colombo, Diego Rovetta, Ernesto Sandoval-Curiel

TIME-LAPSE PARSIMONIOUS REFRACtion INTERFEROMETRY: A FIELD EXPERIMENT ......................................................................................... 2555
Sherif M. Hanafy, Jing Li, Gerard Schuster

RECOGNIZING SHINGLING SEISMIC DATA BY UNSUPERVISED MACHINE LEARNING ......................................................................................... 2560
Mengjux Sun, Jie Zhang, Yihao Wang

SPECTRAL INDUCED POLARIZATION OF ROOTS IN HYDROPONIC SOLUTION AND SOIL ......................................................................................... 2565
Tsukanov Kazma, Nimrod Schwartz, Robert H. Smith

NOVEL-REFINEMENT PROCEDURES FOR DIFFERENTIAL TRAVELTIME TOMOGRAPHY ......................................................................................... 2570
Hansreudi Maurer, Thomas Spillmann

GEOELECTRICAL INVESTIGATION OF THE ROOT-SOIL INTERACTION ......................................................................................... 2576
Luca Peraza, Yuxin Wu, Chunwei Chou, Yuxin Wu, Bill Riley, Peter Petrov, Gregory Newman, Xuefeng Ma, Boofen Versteeg, Baptiste Dafflon, Eoin Brodie, Myra Schmidt, Susan Hubbard

EVALUATING THE EFFICACY OF MAGNETIC SENSORS IN SMARTPHONES FOR GEOPHYSICAL INVESTIGATIONS ......................................................................................... 2581
Nathan Campbell, Estella Atewawna

TOMOGRAPHY FOR IMPROVED IMAGING AND AIRBORNE APPLICATIONS

DOTTING THE I AND CROSSING THE T OF THE ENTIRE MIT RESISTIVITY COMMUNITY BY THE GRAMIAN CONSTRAINED JOINT EM/ELECTRICAL INVERSION ......................................................................................... 2586

SITE STUDIES

USING THERMAL IMAGING TO CHARACTERIZE GROUNDWATER SEEPAGE IN A NORTH DAKOTA FEN .......................................................... 2795

PREINJECTION AVO CONCEPTUAL MODELING FOR THE SVELVIK CO2 FIELD LABORATORY .............................................................. 2799
Wolfgang Weintzierl, Bernd Wieze, Stefan Lüth, Dennis Rippe, Conny Schmidt-Hattenberger

STRATIFIED CONSTRAINED STATICS MODELING AND APPLICATION IN THE COMPLEX SURFACE AREA .................................................. 2804
Xiao Wang, Wenheng Liu, Haohua Zeng, Wei Yang

INTEGRATION OF NEAR-SURFACE GEOPHYSICAL MEASUREMENTS WITH DATA FROM AERIAL DRONES IN A HUDSON VALLEY VINEYARD .......................................................... 2809
James M. Meyers, Angelo Llampouelas, Olga Vargas

STUDY OF THE SPONTANEOUS POTENTIAL AND ELECTRICAL TOMOGRAPHY TO DETERMINE AREAS OF GREATER ACCUMULATION OF RAINWATER FOR THE CULTIVATION OF ORNAMENTAL PLANTS: REGION ANDES PERU EXAMPLE .................................................. 2812
Michael Choquehuanca

IMAGING LANDFILL LEACHATE PLUME BOUNDARIES USING ELECTRICAL-RESISTIVITY INVERSION, SPONTANEOUS POTENTIAL, EM 34 AND GEOCHEMICAL ANALYSIS: A CASE STUDY ON NORMAN LANDFILL .......................................................... 2817
Md. Iftekhar Alam, Andrew Katumwehe, Khumo Leseane, Fathiya Al-Hadhrami, Brooke Briand, Daniel Morse, Sam Wei, Estella Atekwana

ELECTRICAL AND POTENTIAL MODELING AND INVERSION

3D DC RESISTIVITY MODELING OF COMPLEX FRACTURE NETWORKS .................................................................................. 2822
G. Didem Beskardes, Chester J. Weiss

INVERSION OF POTENTIAL FIELD DATA USING WHALE OPTIMIZATION .................................................................................. 2827
Divakar Vashisth, Stalivahan Srivastava, Aamath Agarwal

IMPROVING OF COMPLEX ELECTRICAL SURVEYS INFORMATIVENESS ON THE BASE OF INDUSTRIAL MAGNETIC FIELD USE .................................................................................. 2832
Tatiana Laskina, Vladimir Kolesnikov

AN ELEMENT-FREE GALERKIN METHOD BASED ON ADAPTIVE BACKGROUND CELLS FOR 2.5D DC RESISTIVITY MODELING .................................................................................. 2837
Xiaohong Meng, Zhaoxi Chen, Zhaohang Yang

3D TIME-DOMAIN AIRBORNE EM FORWARD MODELING BASED ON ADAPTIVE FINITE-ELEMENT METHOD .......................................................... 2842
Bo Zhang, Changchun Yin, Yanhe Liu, Xiuyan Ren, Xin Huang, Jing Cai, Cong Wang, Aihua Weng

A NEW STUDY FOR AIRBORNE EM FORWARD MODELING BASED ON THE GALERKIN SPECTRAL-ELEMENT METHOD .................................................................................. 2847
Xin Huang, Colin G. Farquharson, Changchun Yin, Xiaoqin Cao, Bo Zhang, Yanhe Liu, Jing Cai

SHALLOW SEISMIC

A LOW-COST SYSTEM AND METHOD FOR ACQUIRING SMALL REFRACTION SEISMIC SURVEYS .................................................................................. 2852
Tim Dean, Nghia Nguyen, Alex Costall

JOINT ANALYSIS OF REFRACTIONS AND REFLECTIONS (JARR) FOR CALCULATING LONG-WAVELENGTH STATIC CORRECTIONS .................................................................................. 2857
Daniel Z. Feigenbaum, Julian Ivanov, Richard D. Miller, Steven D. Sloan

TARGET-ORIENTED DIVERSITY STACKING FOR VIRTUAL-SOURCE IMAGING AND MONITORING .................................................................................. 2862
Yang Zhao, Houzhu Zhang, Hongwei Liu

RAY-BASED TOMOGRAPHIC INVERSION OF NEAR-SURFACE ABSORPTION BY THE SPECTRAL-RATIO METHOD AND THE CENTROID FREQUENCY-SHIFT METHOD .................................................................................. 2867
Jaixing Wang, Guofo Li, Rixiao Zhou, Xiong Ma, Xin Du

JOINT INVERSION FOR GRAVITY AND SEISMIC DATA BASED ON THE MATCHING CONSTRAINT .................................................................................. 2872
Xiaohong Meng, Zhaoxi Chen, Zhaohang Yang

IMAGING IN KARST TERRAIN UTILIZING THE ELECTRICAL-RESISTIVITY AND MULTICHANNEL ANALYSIS OF SURFACE-WAVE METHODS .................................................................................. 2876
Ragab Jaafar, Neil Anderson, Evgeny Torgashov

DETECTION, LOCATION, AND CHARACTERIZATION

LOW S/N SEISMICITY DETECTION USING FEATURES OF 3D PARTICLE MOTIONS OF DIRECT P-WAVES .................................................................................. 2881
Yusuke Mukaihara, Oleg Y. Poliannikov, Michael C. Fekler, Hirokazu Moriya

FRAC-HITS MAPPED BY TUBE WAVES: A DIAGNOSTIC TOOL TO COMPLEMENT MICROSEISMIC MONITORING .................................................................................. 2886
Zhao Zheng, Henry Bland, Sean Machovoe
EVENT LOCATION AND VELOCITY INVERSION

FULL-WAVEFORM INVERSION OF MICROSEISMIC EVENTS INCLUDING MOMENT TENSORS AND LAYER DEPTHS ................................................................. 2921
Issa Meera Rodriguez, Joel Le Calvez

VELOCITY ANALYSIS AND EVENT ESTIMATION FOR PASSIVE SEISMIC DATA USING SOURCE FOCUSING FUNCTION .................................................. 2926
Chao Song, Tarig Alkiliff, Zedong Wu

REGULARIZED PASSIVE ELASTIC FULL-WAVEFORM INVERSION WITH AN UNKNOWN SOURCE .............................................................. 2931
Hanchen Wang, Qiang Guo, Tarig Alkiliff, Zedong Wu

SIMULTANEOUS MODEL BUILDING AND SOURCE LOCALIZATION: A 3D SYNTHETIC CASE STUDY .............................................................. 2936
Leon Diekmann, Benjamin Schwarz, Alexander Bauer, Dirk Gajewski

A DEBIASING APPROACH TO MICROSEISMIC .................................................. 2941
Shashin Sharan, Rajiv Kumar, Rongrong Wang, Felix J. Herrmann

A REVERSE TIME MIGRATION WORKFLOW OF PASSIVE SOURCE WITH JOINT-IMAGING CONDITIONS ................................................................. 2946
Bin Lyu, Nori Nakata, Kurt J. Marfurt

INCREASING ACCURACY AND PRECISION FOR MICROSEISMIC INTERPRETATION ......................................................................................... 2951
Matthew Bray, Isabel White

EXTENDED IMAGING CONDITIONS FOR PASSIVE SEISMIC DATA WITH GMRTM ............................................................................................. 2956
Nori Nakata

GEOMECHANICS AND INTERPRETATION

CAUSATIVE MECHANISM OF MICROSEISMICITY RECORDED IN AN UNDERGROUND MINE ................................................................. 2961
Himanshu Barathwal, Mirko van der Baan

EXAMINING THE USE OF STATISTICAL APPROACHES TO SIMULATE INDUCED SEISMICITY .............................................................. 2966
James P. Verdon, Jessica Budge

INVESTIGATING TRIGGERING MECHANISMS BEHIND HYDRAULIC FRACTURING-INDUCED SEISMICITY: ELASTIC STRESS TRANSFER ..................................... 2971
Tom Kettletty, James P. Verdon, Maximilian Werner, J Michael Kendall

FOCAL-TIME ESTIMATION: A NEW METHOD FOR STRATIGRAPHIC DEPTH CONTROL OF INDUCED SEISMICITY ................................................................. 2976
Ronald Weir, A. Poulin, Nadine Igonin, David W. Eaton, L. Line, D. Lawton

RESERVOIR CHARACTERIZATION USING PERFORATION SHOTS: ANISOTROPY AND ATTENUATION ................................................................. 2981
Zhizhuai Zhang, Jing Du, Gary M. Mavko

DIRECTIVITY OF MICROSEISMIC EVENTS AS A TOOL FOR INTERPRETATION ......................................................................................... 2986
Frantisek Stanek, Zuzana Jechumtalová, Leo Eisner

SIMULATED MICROSEISMICITY IN GEOMECHANICAL MODELS WITH NATURAL AND INDUCED FRACTURES ................................................................. 2991
W.S. Pettit, J. Hazard, A. Riash, S. Maxwell, D. Blankenship

ESTIMATES OF PRIMARY PRODUCTION VOLUMES OF UNCONVENTIONAL SHALE RESERVOIRS USING DYNAMIC-PARAMETER ANALYSIS OF MICROSEISMICITY: VALIDATION CASE STUDY APPLYING TOPOLOGY ON DISCRETE FRACTURE NETWORKS ................................................................. 2996
Gisela Viegas, Katie Bosman, Ted Urbanic, Doug Angus
### MICROSEISMIC CASE STUDIES 2

**PROCESSING PASSIVE SEISMIC DATA RECORDED ON A DENSE ARRAY FOR CCS SITE CHARACTERIZATION**  
Gerrit Olivier, Malgorzata Chmiel, Florent Bruguière, Philippe Roux, Aurélien Mordret, Philippe Dales, Thomas Locacoq, Ivan Djamaladin, Kevin Dodds  
3001

**MICROSEISMIC IMAGING OF UNCONVENTIONAL RESERVOIRS**  
Vladimir Grechka, Zhao Li, Bo Howell, Hugo Garcia, Tom Woodruffton  
3006

**MICROSEISMIC EVENT LOCATION AND ANISOTROPIC VELOCITY JOINT INVERSION: MARCELLUS CASE STUDY**  
Chang Li, Sudipta Sarkar, Chunchuan Yu  
3011

**PROBABILISTIC ESTIMATION OF FRACTURE DIMENSIONS FROM MICROSEISMIC AND OTHER DATA**  
Ulrich Zimmer  
3016

### MICROSEISMIC CASE STUDIES 1

**CALIBRATING ANISOTROPIC-VELOCITY MODELS USING VFSA: APPLICATION TO VACA MUERTA FORMATION**  
Daniel O. Pérez, Soledad R. Lagos, Danilo R. Velís, Juan C. Soldo  
3041

**PARAMETER TUNING OF DIFFERENTIAL EVOLUTION ALGORITHM FOR MICROSEISMIC LOCATION**  
Vicente Oropeza Bacci, Jeff Tan, Anne Halladay, Simon O'Brien  
3046

**MICROSEISMIC ACTIVITY AFTER 2+ YEARS OF CO₂ INJECTION AT QUEST**  
Lei Li, Yiqiang Xie, Dirk Gajewski, Yuyang Tan, Jingqiang Tan  
3051

**AUTOMATIC MICROSEISMIC DETECTION AND LOCATION VIA THE DEEP-CONVOLUTIONAL NEURAL NETWORK**  
Xiong Zhang, Congceong Yuan, Jie Zhang, Sen Liu, Zhibo Chen, Weiping Li  
3056

**THE FEASIBILITY ANALYSIS OF JOINT MICROSEISMIC MONITORING IN SICHUAN, CHINA**  
Chen Yin, Yalin Li, Furong Wu  
3061

**DEEP LEARNING APPLIED TO INDUCED-SEISMICITY LOCATION IN THE GRONINGEN GAS FIELD IN THE NETHERLANDS**  
Chen Gu, Oral Bıyıközürük, M. Nafi Toksöz  
3066

### INTEROMETRY AND AMBIENT NOISE

**APPLICATION OF AMBIENT-NOISE ANALYSIS AND VELOCITY MODELING IN MINERAL EXPLORATION**  
Hema Sharma, Sheri Molinar, Dan Hollis, John McBride  
3071

**Tp-BASED DATA SELECTION IN HIGH-FREQUENCY PASSIVE SURFACE-WAVE SURVEY: TOWARDS TRAFFIC NOISE**  
Feng Cheng, Junghai Xie, Michael Behm  
3076

**AN ISOTIME IMAGING METHOD FOR NOISE-SOURCE LOCATION**  
Qixin Ge, Zhenbo Zhang, Bo Mao, Liguo Han  
3081

**USE OF PASSIVE-SOURCE SEISMIC AND MAGNETOTELLURICS DATA IN EXPLORATION OF A FOLD-THRUST BELT**  
David Kirschner, Eddie McAllister, Christine Davies, Xander Campman, Bart Duijndam, Junhun Li, Guy Marquis  
3086

**SOURCE-DISTRIBUTION ESTIMATION FROM DIRECT RAYLEIGH WAVES IN MULTICOMPONENT CROSSCORRELATIONS**  
Zongbo Xu, T. Dylan Mikesell, Gabriel Grilter  
3089

**PRELIMINARY RESULTS OF THE ANALYSIS OF SITE RESPONSE ACROSS THE SAN GABRIEL AND SAN BERNARDINO BASINS USING AMBIENT-NOISE SPECTRAL-RATIO MEASUREMENTS**  
Anisha Tyagi, Margaret Grenier, Rachel Kreuziger, Jacob Kays, Jascha Polet  
3094

SEISMIC WHILE DRILLING, CHECK SHOT PROCESSING TECHNIQUES IMPACT ON DRILLING
TRAJECTORY DECISIONS .......................................................................................................................................................... 5366
Francesco Miranda, Maurizio Ferla, Neil Kelvall, Ludovice Euranie, Irina-Tulia Stoia

MULTICOMPONENT AND SOURCE-FREE CONVERTED-WAVE REVERSE TIME MIGRATION FOR VSP ........................................ 5371
Yue Du, Yanyue Elita Li, Jinhong Yang, Arthur Cheng, Xinding Fang

TIME-LAPSE VERTICAL SEISMIC PROFILE FOR CO2 MONITORING IN CARBON CAPTURE, UTILIZATION, AND SEQUESTRATION/EOR, FARNSWORTH PROJECT ................................................................. 5376
George El-kinaseeb, Paige Czoksi, Robert Will, Robert Balch, William Ampomah, Xinyuan Li

3D VSP IMAGING UNDER A COMPLEX SALT FINGER AT ATLANTIS, GULF OF MEXICO ............................................. 5381
Chang-Chun Lee, Jing Yang, Robert Christman, Jean-Paul Van Gestel, Mark Benson

STUDY OF INTRINSIC VERSUS SCATTERING ATTENUATION OF SEISMIC WAVES FROM BOREHOLE MEASUREMENTS ................................................................................................................................. 5386
Anastasia Pirogova, Boris Gurevich, Roman Pevzner, Sergey Vlasov

JOINT-VELOCITY MODEL BUILDING AND HIGH-RESOLUTION DEPTH IMAGING OF FULL-WAVEFIELD 3D VSP DATA ........................................................................................................................................ 5391
M. S. Albannagi, B. EL-Marhfaoul, D. J. Verschuur

MAPPING FAULTS AND FRACTURES IN A CARBONATE RESERVOIR FROM 3D VSP DATA ............................................ 5396
E.M. Takam Takougang, Mohammed Ali, Y. Bouzidi

BUSINESS IMPACTS OF A RECORD-BREAKING 3D VSP AT THE THUNDER HORSE SOUTH FIELD, GULF OF MEXICO .............................................................................................................................................. 5401
Corey Joy, Anya Reitz, Ken Hartman

DATA ANALYSIS AND DAS

INSIDE CT-DAS-VSP ACQUISITION USING A HIGHLY DEVIATED DEEP WELL, ONSHORE JAPAN ........................................ 5406
Ryohjii Naruse, Yuki Kobayashi, Yusuke Morishima, Ziqiu Xue

A TRAVEL-TIME-BASED OFFSET-TO-ANGLE TRANSFORM FOR BOREHOLE SEISMIC SURVEY DATA IN ANISOTROPIC MEDIA ............................................................................................................................... 5411
Amit Padhi, Mark Willis, Xiaomin Zhao

FEASIBILITY OF LOCAL ANISOTROPY ESTIMATION USING DAS VSP ........................................................................... 5416
Bao Zhou, Dongjie Cheng, Oscar A. Barrivas

MEASURING LOCAL PHASE SLOWNESS IN THE BEND ARCH-FORT WORTH BASIN .............................................................. 5421
David G. Tang, Kyle T. Spikes

DEPTH REGISTRATION OF VSP DAS FIBER ............................................................................................................................. 5426
Adriana Gordon, Don Lawton, Kevin Hall, Barry Freifeld, Tom Daley, Paul Cook

TRANSFORMING VSP DATA TO SURFACE SEISMIC DATA BY RADON DOMAIN INTERFEROMETRIC REDATUMING .............................................................................................................................. 5431
Jie Shao, Yibo Wang, Yi Kang Zheng, Xu Chang

NEW TECHNOLOGIES TO REVOLUTIONIZE RESOLUTION: GETTING MORE OUT OF THE DATA

HOLOGRAPHIC IMAGING FOR EXTENDING SEISMIC RESOLUTION ............................................................................. 5436
Norman S. Neidell, Duane Dopkin

PROMISES AND CHALLENGES IN LEAST SQUARES IMAGING

HYBRID APPROACH FOR LEAST SQUARES MIGRATION ........................................................................................................ 5439
Bin Wang, Chong Zeng, Shuqian Dong

ROBUST LEAST-SQUARES REVERSE TIME MIGRATION WITH INACCURATE VELOCITY MODELS ..................................... 5440
Yunyue (Elita) Li
TWENTY FIVE YEARS OF LEAST SQUARES MIGRATION: CURRENT DEVELOPMENTS AND ITS FUTURE ........................................................................................................................................................................5442
Jerry Schuster
LEAST-SQUARES REVERSE TIME MIGRATION OF CONTROLLED ORDER MULTIPLES ................................................................................................................................................................................5443
Yike Liu
THE BUSINESS VALUE OF MULTIPLE IDENTIFICATION AND REMOVAL – STATUS, CHALLENGES, AND ROAD AHEAD
MULTIPLE ELIMINATION AND TRANSMISSION COMPENSATION IN PRIMARY REFLECTIONS IN DATA DOMAIN ...............................................................................................................................................................................5444
Lele Zhang, Evert Slob
MARCHENKO REDATUMING BY ADAPTIVE DOUBLE-FOCUSING ON 2D AND 3D FIELD DATA OF THE SANTOS BASIN ........................................................................................................................................................................................................5448
Myrna Staring, Koos Wapenaar, Joost van der Neut
INTERNAL MULTIPLE ATTENUATION TO REDUCE THE RISK IN QUANTITATIVE INTERPRETATION A CASE STUDY ON ÅSGARD FIELD SMØRBUKK ........................................................................................................................................................................................................5453
Emin Sadikhov, Adriana Citlali Ramírez, Lill-Tove W. Sigernes, Ole Edvard Aaker, Børge Arnsen
INTEGRATED IMAGING
EFFECTIVE USE OF POTENTIAL FIELD AND SEISMIC METHODS TO REDUCE EXPLORATION COSTS AND AMBIGUITY IN MULTIPLE INTEGRATED IMAGING INTERPRETATIONS ...............................................................................................................................................................................5457
Rao Yalamanchili, Jurriaan Feijth, Jackie Hope
ELECTROMAGNETIC APPLICATIONS USING METALLIC WELL CASING
EXPERIENCES WITH THE METHOD OF MOMENTS FOR CASING PROBLEMS IN ELECTROMAGNETICS ........................................................................................................................................................................................................5462
Andrei Swidinsky, Rita Streich
TOP-CASING ELECTRIC SOURCE METHOD FOR ASSESSING WELLBORE INTEGRITY: ELECTROMAGNETIC APPROACH ........................................................................................................................................................................................................5463
Evan Schankee Um, Michael J. Wilt
DATA AND MODELING RESULTS FROM DEPTH TO SURFACE ELECTROMAGNETIC SURVEYS WITH MULTIPLE NEARBY METALLIC CASINGS AND UNDERGROUND PIPELINES ........................................................................................................................................................................................................5464
Greg Nieuwenhuis, Evan Schankee Um, Kris MacLennan, Honglin Yuan
A BRIEF HISTORY OF THE APPLICATION OF ELECTROMAGNETIC (EM) METHODS IN METALLIC CASED WELLS ........................................................................................................................................................................................................5469
Michael Wilt
ADVANCES IN GEOPHYSICAL TOMOGRAPHIC METHODS
BASIS-CONSTRAINED BAYESIAN-MCMC: HYDROLOGIC PROCESS PARAMETERIZATION OF STOCHASTIC GEOELECTRICAL IMAGING OF SOLUTE PLUMES ........................................................................................................................................................................................................5471
Erasmus Kofi Oware, Michael Awatey, Thomas Hermans, James Irving
GEOPHYSICAL TOMOGRAPHY: THE CURRENT STATE OF RESEARCH, CHALLENGES, AND PATH FORWARD ........................................................................................................................................................................................................5476
Frederick D. Day-Lewis
SPARSE BLIND DECONVOLUTION AND FULL-WAVEFORM INVERSION OF SURFACE GPR DATA, AN ENGINEERING EXAMPLE ........................................................................................................................................................................................................5481
Sajad Jazayeri, Sarah Kruse, Istiaque Hasan, Nur Yazdani
TIME-LAPSE WAVEFORM INVERSION REGULARIZED BY SPECTRAL CONSTRAINTS AND SOBOLEV SPACE NORM ........................................................................................................................................................................................................5486
Vladimir Kazei, Tariq Alkhudhifah
RECENT ADVANCES IN REMOTE SENSING TECHNOLOGIES FOR HYDROCARBON EXPLORATION AND ENVIRONMENTAL EVALUATION
LIGHTNING ANALYSIS – A REMOTE IMAGING EXPLORATION TOOL ........................................................................................................................................................................................................5491
DAS: VALIDATING MEASUREMENTS, DEVELOPING PROCESSING METHODS, AND INTEGRATING TO OPTIMIZE VELOCITY MODELS FOR IMPROVING SUBSURFACE IMAGING

DISTRIBUTED SURFACE SEISMIC SENSING BASED ON INTERFEROMETRY OF PHASE OPTICAL TIME-DOMAIN REFLECTOMETRY .......................................................... 5494
Chang Wang

ADVANCES IN DAS SEISMIC MONITORING FOR CO2 STORAGE .......................................................................................... 5499
Don Lawton, Kevin Hall, Adriana Gordon

MACHINE LEARNING ALGORITHMS FOR AUTOMATED SEISMIC AMBIENT NOISE PROCESSING APPLIED TO DAS ACQUISITION .......................................................... 5500
Fantine Huot, Biondo Biondi

FIBER ARMOR ACQUISITION CONTRAST EXPERIMENT AND NOISE SUPPRESSION TECHNIQUE IN DAS 3D-VSP .......................................................... 5505
Yuanzhong Chen, Guangmin Hu, Hanpeng Cai, Junjun Wu, Yanpeng Li, Gang Yu, Fei Li

DIAGNOSING AZIMUTHAL VARIATIONS OF VELOCITY MODEL UNCERTAINTIES USING 3D DAS-VSP IN GOM .......................................................................................... 5510
Y. Li, K. King, W. Wong, T. Chen, H. Wu

FREQUENCY DEPENDENT SEISMIC ANALYSIS INCLUDING PROCESSING AND MODELING AND INTERPRETATION

VISCO-AcouSTIC FULL-WAVEFORM INVERSION IN THE PRESENCE OF COMPLEX GAS CLOUDS ........................................ 5515
Min Wang, Yi Xie, Bingma Xiao, Andrew Ratcliffe, Thomas Latter
