Applied Aerodynamics

Papers Presented at the AIAA SciTech Forum and Exposition 2019

San Diego, California, USA
7 - 11 January 2019

Volume 1 of 4

ISBN: 978-1-5108-8400-7
# TABLE OF CONTENTS

**VOLUME 1**

**Subsonic Aerodynamic Evaluation of NASA Mars Entry Vehicle Concepts** ................................................................. 1  
Brandon T. Cambio, David C. Lee, Thomas R. Yechout

**Aerodynamic Center at the Root of Swept, Elliptic Wings in Inviscid Flow** ................................................................. 12  
Bruno Moorhampsers, Douglas F. Hunsaker

**Effect of External Rib Structure on Aerodynamic Performance of Thin Wing in Low Reynolds Number** ............................................. 26  
Shun Tamura, Akira Oyama

**Study of 3D Co-Flow Jet Wing Induced Drag and Power Consumption at Cruise Conditions** .............................................. 39  
Yang Wang, Gecheng Zha

**Computational Study of a Generic T-tail Transport** .............................................................................................................. 59  
Susan N. McMillin, Neal T. Frink, Patrick C. Murphy, Kevin Cunningham, Gautam H. Shah, Sudheer N. Nayani

**Global Shock Buffet Instability on NASA Common Research Model** .................................................................................. 83  
Sebastian Timme

**Experimental Validation for Globally Optimized Tractor-Trailer Base Flaps** ............................................................... 95  
Jacob A. Freeman, Mark F. Reeder, Anna C. Demore

**Further Development of the Amplification Factor Transport Transition Model for Aerodynamic Flows** .................................. 112  
James G. Coder

**Improvements to the Amplification Factor Transport Transition Model for Finite-Element Implementations** ......................... 136  
Douglas L. Stefanksi, Ryan S. Glasby, Jon T. Erwin, James G. Coder

**NATO AVT-239 Task Group: ‘Innovative Control Effectors for Maneuvering of Air Vehicles’ – Introduction and Overview** ................................................................................................. 152  
David R. Smith, Clyde Warsop

**NATO AVT-239 Task Group: Trade Study Approach Toward Assessing Prospects of Active Flow Control on a Future UAS** ........................................................................................................................................... 161  
Daniel N. Miller, David R. Williams, Clyde Warsop, Douglas R. Smith

**NATO AVT-239 Task Group: Flight Control Derivatives using Active Flow Control Effectors on the ICE/SACCON UAS Model** .......................................................................................................................... 169  
David R. Williams, Jurgen Seidel, Ryan Osterroos, Thomas E. McLaughlin

**NATO AVT-239 Task Group: Supercritical Coanda Based Circulation Control and Fluidic Thrust Vectoring** ................................ 179  
Clyde Warsop, William Crowther, Matthew Forster

**On the Use of Active Flow Control to Change the Spanwise Flow on Tailless Aircraft Models, Thus Affecting their Trim and Control** .......................................................................................................................... 203  
Elisa Phillips, Marvin P. Jentzsch, Philip M. Menge, Lutz Taubert, Matthew Forster, Israel J. Wygnanski, J. Ladd, C. Heinritz

**NATO AVT-239 Task Group: Air Vehicle Integration Considerations for Active Flow Control on a Future UAS** ..................... 238  
Brant H. Maines, Daniel N. Miller

**Study of the Effectiveness of Plasma Induced Flow in Manipulating a Near-Wall Vortex** ......................................................... 246  
Tobias Wittig, Giovanni Nino, Robert Breidenthal

**Velocity Measurements of Projectiles Propelled by Underexpanded Supersonic Jets** ...................................................... 263  
Finn van Donkelaar

**Establishing Best Practices for X-57 Maxwell CFD Database Generation** ........................................................................ 271  
Jared C. Duensing, Seung Yoo, Daniel Maldonado, Jeffrey A. Houseman, James C. Jensen, Cetin C. Kiris

**A Study of the Fluid-Structure Interaction Response of a Parachute Suspension Line under a Range of Operating Tensions using ICFD and CPFD** ........................................................................................................... 291  
Catherine Barry, Bradford G. Olson, Keith Bergeron, David J. Wills, James Sherwood

**High-Order Implicit Large Eddy Simulations of a VFE-2 Delta Wing** .................................................................................. 302  
Tarak Dzanic, Luigi Martinelli

**Assessing Turbofan Modeling Approaches in the DLR TAU-Code for Aircraft Aerodynamics Investigations** ..................... 315  
Arne W. Stuermer

**Reduced Domain Method Applied to a Mach 6.9 Circular Arc Airfoil with a Trailing Edge Flap** .............................................. 332  
Robert Decker, James H. Miller

**NATO AVT-239 Task Group: Active Flow Control Simulation of the Tailless ICE Aircraft** .................................................. 347  
Michael A. Niestroy, David R. Williams, Jurgen Seidel

**NATO AVT-239 Task Group: Control Effectiveness and System Sizing Requirements for Integration of Fluidic Flight Controls on the Saccon Aircraft Configuration** .............................................................................. 362  
Christopher R. Hutchin

**NATO AVT-239 Task Group: An Assessment on the Prospects of Active Flow Control on a Future UAS** .................................. 373  
Daniel N. Miller, Brant H. Maines, Michael A. Niestroy, David R. Williams, Clyde Warsop, Douglas R. Smith

**NATO AVT-239 Task Group: Flight Demonstration of Fluidic Flight Controls on the MAGMa Subscale Demonstrator Aircraft** ......................................................................................................................... 383  
Clyde Warsop, William Crowther, Thomas Shearwood

**NATO AVT-239 Task Group: Flight Test of Compressed and Bleed-Air Driven Control Effectors on the ICE/SACCON UAS Subscale Aircraft** .............................................................................................................. 403  
Steven Brandt, Thomas E. McLaughlin, David R. Williams, Jason Holmes, Brock Crawford
NATO AVT-239 Task Group: Innovative Control Effectors for Maneuvering of Air Vehicles - Conclusions and Next Steps

Computation and Quantification of Uncertainty in Predictions of HVAB Rotor Performance in Hover

Rajneesh Singh, Ethan Corle, Rohit Jain, Joon Lim

Turbulent Transition Prediction of PSP Hovering Rotor Using γ-Re τ-SA with Crossflow Transition Model

Bumsok Lee, Yong Su Jung, Dylan Jude, James D. Baeder

Numerical Simulations of Various Rotor Designs in Hover and Forward Flight

Kazato Barakos, Thomas Fitzgibbon, Mark A. Woodgate, Antonio Jimenez-Garcia, George N. Barakos, Thomas Fitzgibbon

Computational Assessment of the HVAB Rotor in Hover Using Laminar-Turbulent Transition Modeling

Jared Carnes, James G. Coder

Effects of Anhedral on S-76 Hover Aerodynamics

Chong Zhou, Lakshmi N. Sankar, Phillip Griffin

High-Lift Simulations of Slotted, Natural-Laminar-Flow Airfoils

Hector D. Ortiz-Melendez, James G. Coder, Arvin Shmilovich

High Lift Configuration of a Slotted Natural Laminar Flow Airfoil

Dan Twist, Christopher Colletti, Phillip J. Ansell

Effect of Geometric Parameters and Flow Conditions on the Frequency of Fluidic Oscillators for Active Flow Control

Christopher Colletti, Vanessa G. Awate, Phillip J. Ansell

CFD Analysis of Slotted Natural-Laminar-Flow Concepts for Ultra-Efficient Commercial Aircraft

Douglas L. Stieflanski, Ryan S. Glansby, Jon T. Erwin, James G. Coder

Discrete Adjoint Formulation for Turbulent Flow Problems with Transition Modelling on Unstructured Meshes

Zhi Yang, Dimitri J. Majerpli

Numerical Prediction of Interference Drag of a Strut-Surface Intersection in Supersonic Flow

Nandita Hari, Joseph A. Schetz, Rakesh K. Kapuria

The Impact of Roughness Size on the Shock-wave Boundary-layer Interaction on Aero-engine Intakes at Incidence

Charlotte Coles, Holger Babinsky, C. Sheat

Unstart Control in Scramjet Engines

Mihai Voronoi, MP Baig

Sonic Boom Assessment in Primary Boom Carpet of Low-Boom Supersonic Airplane (NASA C25D)

Hirotoki Ikishawara, Yoshikazu Makino, Atsushi Ueno, Masashi Kanamori

Side Force Characteristics of Supersonic Flight Vehicle Equipped with Asymmetric Protuberance

Toshiki Ikada, Kazuaki Kawanishi, Keiichi Kitamura, Satoshi Nonaka

Similitude Between 3D Cellular Patterns in Transonic Buffet and Subsonic Stall

Frédéric Plante, Julien Dandess, Eric Laurendeau

Effects of Compressibility on Dynamic-Stall Onset Using Large-Eddy Simulation

Stan T. Benton, Miguel R. Ysibol

Transition Regime and Its Effects on the Unsteady Aerodynamic Characteristics of a Pitching Airfoil

Amir S. Rezaei, Haitham E. Taha

Aerodynamic Response of a NACA-0012 Airfoil Undergoing Non-Sinusoidal Pitching Waveforms

Hitam Shepatha, Mohamed Y. Zakaria, Muhammad R. Haji, Craig A. Woolsey

Reynolds Scaling Effects on Dynamic Stall of VR-7 and VR-12 Airfoils

Yoichi Zhu, Jeffrey P. Bons, James W. Gregory

Experimental Analysis of the Interaction between Streamwise Vortices and a High-Lift Airfoil

Tim Landa, Lorenz Klug, Rolf Radespiel, Silvia Probst, Tobias Knopp

Parametric Study of Aerodynamic Performance of an Airfoil with Active Circulation Control using Leading Edge Embedded Cross-Flow Fan

M.A Qazzyum Q. Mazumder, Vladimir V. Golubev, Snorri Gudmundsson

Investigation of Wake Survey over a Wing with Conformal Vortex Generators

Real KC, Nicholas A. Lucido, Trevor C. Wilson, Brian R. Elbing, Jamey D. Jacobs, Aaron S. Alexander, Peter Ireland, James A. Black

Effect of Slot Height Variation on the Aerodynamic Performance of a Circulation Control Airfoil: A CFD Analysis

Vincent Capobianco, Praveen Shankar, Minyee Jiang

Simultaneous Flow Field Investigation and Force/Moment Measurements of a Generic Blown Wing with Control Surface

Murat Bronz, Egemen Aydin, Idil Fenercioglu, Nuruye L. Cetiner Yildirim

Stability of Cylindrical and Conical Hypersonic Boundary Layers

Jeffrey Andrews, Jonathan Podgers

Assessment of Fan/Airframe Aerodynamic Performance using 360° URANS Computations: Code-to-Code Comparison between ONERA, DLR, NLR and Airbus

Michael Meheut, Fulvio Sartor, Maxime Vergez, Martin Laban, Rainer Schnell, Arne W. Stuermer, Guillaume Lefevre

VOLUME 2

Wake Modelling with Embedded Lateral and Directional Stability Sensitivity Analysis for Aerial Refuelling or Formation Flight

Luke H. Persity, Ruben E. Perez, Peter W. Jansen
Simple Shock Detector for Discontinuous Galerkin Method ................................................................. 876

Second-Moment-Closure Modeling for Low-Reynolds-Number Regions of Aeronautical Applications ................................................................. 888

Ana Carolina Botelho e Souza, Rolf Radespiel

Recent Developments in flowPsi CFD Code .................................................................................. 908

Adam Jirasek, Mehdi Ghoreyshi, Matthew Satchell

Investigations into the Effects of Unsteady Blowing on the Wake of a Coanda Flap ................................................................. 916

Yousef El Sayed, Natalia Cristina Gomes de Paula, Dominik Seilhace, Richard Seamann, Rolf Radespiel

Steady Blowing to Control the Lift and Drag on a Free Shear Layer Airfoil ........................................... 928

Yan Ren, Gecheng Zha

Design of Injection Jet Span Profile for Co-Flow Jet Airfoil ................................................................. 939

Matteo Di Luca, Kenneth Breuer

Microjet Configuration Sensitivities for Lift Enhancement in High-Lift Systems ........................................... 952

Seyedeh Shaida Hosseini, Aubryn Cooperman, Case (CP) P. Van Dam, Shishir A. Pandyra

Direct Lift Control using Distributed Aerodynamic Bleed ................................................................. 972

Ted Giblette, Douglas F. Huntsacker

Improvements in NASCAR Race Vehicle Side Force and Yawing Moment Stability in Race Conditions Using Active or Passive Blowing ................................................................. 993

Eric Jacuzzi, Maria Aleman Chona, Kenneth O. Granlund

Wake Breakdown of High-fidelity Simulations of a Rotor in Hover ........................................................ 1006

Jennifer Abras, Nathan S. Hartharan, Robert P. Narducci

NASA PSP Rotor Hover Simulation with Fuselage Effect ................................................................. 1026

Qiang Zhao, Skyler Baugher, Chunchu Sheng

Numerical Study of PSP Rotor Blades using a γ-Reθ+CF+ Turbulent Transition Model ......................... 1036

Je Young Hwang, Oh Joon Kwon

Analysis of Rotor/Airframe Interaction in Hover and Near-Hover Flight Conditions .......................... 1046

Todd R. Quackenbush, Glen R. Whitehouse, Pavel V. Danilov, Christine L. Solomon

Free-Vortex Wake and CFD Simulation of a Small Rotor for a Quadcopter at Hover ............................ 1062

Andres M. Perez, Omar Lopez, Svetlana Y. Porozeva, Jaime A. Escobar

Experimental Investigation on Penetration Performance Affected by the Air-Guiding Grooves on Small Spinning Projectile ................................................................. 1076

Junkyu Kim, Hyunjung Kim

Controlling Sonic Boom Loudness Through Outer Mold Line Modification: A Sensitivity Study ..................... 1080

Forrest L. Carpenter, Paul G. Cizmas, Sohail R. Reddy, George S. Dulikravich

Extended 3D Class/Shape Transformation Equations for Multicomponent Aircraft Assemblies ............. 1098

Pedro B. Leal, Ted Giblette, Douglas F. Huntsacker, Darren J. Hurll

Prediction of Sonic Boom Loudness Using High-Order Panel Methods for the Near-Field Solution .......... 1109

David S. Lazzara, Todd Magee, Hao Shen, James H. Mabe

Overview of New Capabilities in Helios Version 9.0 ........................................................................ 1138

Andrew M. Wissink, William J. Staruk, Steven A. Tran, Beatrice Bogot, Vinod K. Lakshminarayan, Jayanarayanan Sitaraman, Buvaneswari Jayaraman

HPCMP CREAtE-TM Kestrel New Capabilities and Future Directions .................................................. 1159

David R. McDaniel, Todd R. Tuckey

Advances in Domain Connectivity for high-order methods and Overlapping Surface Dual Mesh/Solver Computations .............................................................................................................. 1186

Jay Sitaraman, Mark A. Potsdam, Beatrice Bogot

Integrated 3-D Structural Dynamics Using the Helios v9 Rotorcraft Analysis Framework .......................... 1208

William J. Staruk, Buvaneswari Jayaraman, Jayanarayanan Sitaraman

Design and Analysis of a Spin Stabilized Projectile Using Magnetic Resonance Velocimetry .................... 1233

Noah W. Siegel, Aaron P. Schlenker, Kevin D. Sullivan, Ianahel Velez, Gregory P. Rodebaugh, Christopher J. Elkins, Breet Van Poppel, Michael J. Benson, Christopher J. Elkins

Experimental Investigation on the Development of Asymmetric Vortices on a Long Slender Body at High Incidence .................................................................................................................. 1245

Roopesh Kumar, Tufan K. Guha, Rajan Kumar

The Effect of Acceleration and Exit Velocity on Hypersonic Projectiles Launched by a Ground-based Railgun .................................................................................................................. 1261

Hirotaka Kasahara, Akiko Matsu

Comparative Analysis of Store Release Trajectory using Numerical and Experimental Techniques ............ 1274

Zakria G. Toor, Tiusha I. Khan, Omar Khan, Bilal Mifti, Jehanzeb Masud

Impact of Coherent Structures on Aerodynamics Performance at Low Reynolds Numbers .................... 1285

Vibhav Durgesh, Rodrigo Padilla, Eliflafe N. Garcia, Hamid Jafari

Experimental Study on Bio-Inspired Wings with Tubercles ................................................................. 1293

Mohamed A. Shorbagy, Bomsan El-Hudidi, Gamal El-Bayoumi, Osama Said, Moatassem Fouad

NACA 4415 Airfoil Modification Using Spherical and Sinusoidal Tubercle Leading Edge ......................... 1324

Syed M. Afzal, Kumaral A. Ahmed

Further Parametric Investigation of Leading Edge Tubercles on the Propeller Performance .................... 1350

Asad Asghar, Ruben E. Perez, William D. Allan

Application of Deployable Tubercles as High-Lift Leading-Edge Devices ............................................ 1365

William D. Allan, Asad Asghar, Ruben E. Perez, S. A. Pym, C. Rider

</table>
Is the Problem with the Mesh, the Turbulence Model, or the Solver? Statistical Analysis of High Lift and Drag Prediction Workshop Data ................................................................. 1989

Indicial Method in Reduced Order Modeling using CFD at NAVAIR ........................................... 2009

Elliott Kandlar, Yiikoon Lee, JaeMoon Lee, David Findlay

Computational Fluid Dynamics Analysis of Inverted Multi-Element Airfoils in Ground Effect .......................................................................................................................... 2025

Michael Grabis, Ramesh K. Agarwal

Overview Analysis of Unmanned Aircraft Systems ........................................................................ 2036

Paul M. Sreemel, Jason Ahmed

Effect of Flexible Inverted PVDF in Free Shear Layer Wake ......................................................... 2050

Sidaard Gunasekaran, Grant V. Ross, Daniel Curry

Influence of Control Surface Deflections on a Thin Aerofoil at Transonic Buffet Conditions ........................................................................................................................... 2068

Nicholas F. Gianneli, Adam J. Murray, Gareth A. Vio

Geometry Effects on the Galloping Instability of Rectangular Cylinders at Low Reynolds Number .................................................................................................................. 2080

Mark Feero, Ahmed M. Naguib, Mansoor M. Khan, healthy

Application of the Hilbert-Huang Transform in the Identification of Frequency Synchronisation in Transonic Aerelastic Systems .................................................................................. 2093

Nicholas F. Gianneli, Adam J. Murray, Gareth A. Vio

A Summary of the Turbulence Models in the CREATE™-AV Kestrel Flow Solvers ...... 2104

Robert H. Nichols

Addition of a Local Correlation-Based Boundary Layer Transition model to the CREATE™-AV Kestrel Unstructured Flow Solver ................................................................. 2139

Robert H. Nichols

Evaluation and Improvement of Robustness, Speed, and Accuracy of the DoD HPCMP CREATE™-AV Kestrel Component COFFE CFD Solver ........................................................................................................................................................................... 2160

Daniel Prosser, Ryan S. Glasby

High-Order Shock Capturing Techniques using HPCMP CREATE™-AV Kestrel ......................... 2176

Kevin R. Holst, Ryan S. Glasby, Jon T. Erwin, Douglas L. Stefanski, James G. Coder

A Comparison of Approaches to Multi-Body Relative Motion using the Kestrel Solver ................................................................................................................................. 2209

Haimin Huang, Regina B. Blythe, Matthew A. Prior, Matteo Giacobello, Rafael Perez, Michael E. Young

Shock Wave/Boundary Layer Control Using Nanosecond Repetitively Pulsed Dielectric Barrier Discharges .................................................................................................................. 2235

Aarthi Devaraj, Ravichandra Jagannath, Latiff K. Rajendran, Kyle Neumeim, Sally P. Bane

Parametric Surfaces with Volume of Solid Control for Optimisation of Three Dimensional Aerodynamic Topologies ........................................................................................................ 2251

Alexandre D. Payot, T. Rendall, Christian B. Allen

ADGAR: A GPU Accelerated Adjoint Solver for Shape Optimization in Viscous Flows ................................................................................................................................. 2269

Asitav Mishra, Dylan Jude, James D. Bucker

Hybrid Inverse/Optimization Design Approach for Transonic Natural-Laminar-Flow Airfoils ................................................................................................................................. 2284

Jiang-Bo Chi, Zhang-Hua Han, Tian-Lin Fan, Zhen Zhu, Wen-Peng Song

Screened Expanding Turning Vane Concept .................................................................................. 2303

Mark Drela, Arthur C. Huang, David Darmofal

Effect of Curved Boundary Layer Fences on Aerodynamic Efficiency ........................................ 2321

Asa E. Palmer, Sidaard Gunasekaran

Solar-Powered Uninhabited Aerial Vehicle for Autonomous Soaring ........................................ 2335

Jesse G. Rosales, Eugene Engel, Joseph E. Miller

Flight Testing Data Set for Subscale GA Aircraft: 26%-scale Cub Crafters CC11-100 Sport Cub S2 ................................................................................................................................. 2358

Or D. Dantskov, Renato Manussso, Moiz Yuhora

Wake Measurements on Blended Wing Body with Gurney Flaps in Low Speed Flows .............. 2397

Tatsuya Yamada, Masato Taguchi, Nguyen Thai Duong, Masashi Kashitmi, Kazuhiro Katsunoe, Yoshihiro Takita

Propulsion Characteristics of Flapping Caudal Fins and its Upstream Interaction with Pectoral Fins .................................................................................................................. 2420

Quan Qu, Lianchao Xu, Feiqing Liu, Yunlong Zheng, Ramesh K. Agarwal

Numerical Study on Aerodynamics and Flow Physics of a Flapping Wing Hovering in Ground Effect .................................................................................................................. 2433

Quan Qu, Lianchao Xu, Feiqing Liu, Yunlong Zheng, Ramesh K. Agarwal

Numerical and Experimental Investigation of Tandem Wing Flyers ........................................ 2447

Thomas Lambert, Nicolas Warbecq, Patrick Hendrick, Robert Nudds, Thomas Andrianne, Grigorios Dimitriadis

Soaring Energetics for a Nature Inspired Unmanned Aerial Vehicle ........................................ 2458

Imran Mir, Adnan Maqsood, Haitham E. Tuha, Sameh A. Eisa

Practical Viscous Drag Reduction: Charting a Course out of the Valley ......................................... 2469

Wilson N. Felder, Gary A. Dale, Carol Cash

Viscous Drag Measurements on Non-Smooth Surfaces ................................................................. 2476

Jonathan W. Naughton, Nicholas M. Huxen, Eric J. DeMillard, Gary A. Dale

Experimental and Numerical Investigation of the Reduction in Skin Friction Due to Riblets Applied on the Surface of a Taylor-Couette Cell ......................................................................... 2489

Peter A. Leitl, Stefan Kuntzgarc, Andreas Flenscher, Kai Pflugsten

Direct Contactless Microfabrication of 3D Riblets: Improved Capability, Metrology and Durability ......................................................................................................................... 2508

Henry C. Bilinsky

Computational Simulation of 3-D Riblets for Skin Friction Drag Reduction ................................ 2513

Brian R. Smith, Patrick J. Yagle, Paul D. McClure

Effect of Reynolds Number on Cylinder Drag Reduction Using Micro-Fiber Coating .................. 2532

Mitsugu Hasegawa, Hirotaka Sakane
ASPIRE Supersonic Parachute Shape Reconstruction

Quantifying the Structural Response of a Slender Cone to Turbulent Spots at Mach 6

Capturing Laminar to Turbulent Transition within the LBM based CFD solver PowerFLOW

Very-Large Eddy Simulations of the M219 Cavity at High-Subsonic and Supersonic Conditions

Community Noise of Urban Air Transportation Vehicles

Predicting Flow Separation on the Axisymmetric Transonic Bump with a Lattice-Boltzmann Method

Numerical Simulation of Main Landing Gear Noise Reduction in FQUROH Flight Demonstration

Kestrel Results at LiftOff Conditions for a Space Launch System Configuration in Proximity to the Launch Tower

Conceptual Design of a Co-Flow Jet Hybrid Electric Regional Airliner

Self-sustained Shock-wave Oscillation Mechanisms of Transonic Airfoil Buffet

Secondary Crossflow Instabilities on the JAXA Transonic Aircraft Wing

Conceptual Design of a Co-Flow Jet Hybrid Electric Regional Airliner

Techniques for Improving Neural Network-based Aerodynamics Reduced-order Models

Novel Reduced Order Modeling Methods for CFD Data: Application to Ship Airwake Data

Modal Decomposition Analysis of Subsonic Unsteady Flow Around An Atmospheric Entry Capsule with Forced Oscillation

Extension of the Unsteady Vortex Lattice Method: Viscous Oseen Vortices and Thickness Effects

On the Dynamics of Unsteady Lift and Circulation and the Circulatory-Non-circulatory Classification

Computation of Leishman-Beddoes Model Parameters Using Unsteady RANS Simulations

Analysis of Aerodynamic Flows over Partially Undulating Airfoil Surfaces

DSMC Computations of SARA Reentry Capsule Exposed to Weakly Ionized Gas Flow

Flow and Stability Analysis of a Hypersonic Boundary Layer over an Axisymmetric Cone Cylinder Flare Configuration

Viscous-Inviscid Analysis of Transonic Swept Wings using 2.5D RANS and Parametric Shapes

Development and Testing of a Lagrangian-Eulerian CFD Analysis for Moving Body and Interactional Aerodynamics Analysis

Effect of Sweep on Airfoil Section Properties

A New Non-Linear Lifting Line Method for 3D Analysis of Wing / Configuration Aerodynamic Characteristics with Application to UAVs

Comparison of Induced and Parasitic Drag on Wings with Minimum Induced Drag

Feasibility Study on Highly Distributed Lift Configurations
Aerodynamic Force Breakdown Based on Vortex Force Theory
Linlin Kang, Lorenzo Russo, Renato Tognaccini, Jiezhi Wu, Weidong Su

Investigation of the Effect of Taper Stacking Location on Drag Force for ONERA M6 Wing
Mustafa Kaya, Munir Elfarra, Ferhat Kadioglu

Comparison of SLS Sectional Loads from Pressure-Sensitive Paint and CFD
Jamie Meeroff, Henry C. Lee, Derek J. Dulle, Stuart E. Rogers, Nettie Roozeboom, Jennifer Baerny

Preliminary Results from an Experimental Assessment of a Natural Laminar Flow Design Method
Michelle N. Lynde, Richard L. Campbell, Melissa B. Rivers, Sally A. Vikan, David T. Chan, Anthony N. Watkins, Scott E. Goodliff

Investigation of a Local Correlation-based Transition Model in a Newton-Krylov Algorithm
Michael Piotrowski, David W. Zingg

On the Integrated Aerodynamic Design of a Propeller-Wing System
Julia A. Cole, Travis D. Krebs, Devin F. Barcelos, Alton Yeung, Goetz Bramesfeld

Minimum Induced Drag Conditions for Winglets: the Best Winglet Design Concept
Luciano Demasi, Giovanni Monegato, Rauno Cavallaro, Rachel Bybarczyk

Propeller Blades Design for the Bidirectional Rotor Systems of Fault Tolerant Multirotors
Hao Xu, Yu Sheng

Verification of Wind Gust Models in the FlowPsi Flow Solver
Tyler Miller, Michael Nuzum, Adam Jirasek, Mehdi Ghoreyshi, Matthew Satchell

Trajectory Prediction Using Coupled CFD-RBD with Dynamic Meshing
Nidhi D. Sathyanarayana, Klaus Hoffmann

Numerical Simulation of the Cavitation Flow around a Hydrofoil Based on a Coupled CFD-PBM Model
Quanzhong Liu, Kefan Xu, Han Gao, Ramesh K. Agarwal

Aerodynamic Simulations of a High-Lift configuration by Lattice Boltzmann Method with Block-Structured Cartesian Grid
Takashi Ishida

Analysis of High Alpha Aerodynamic Characteristics of a Supersonic Aircraft
Taufa I. Khan, Jehanzeb Masud, Zakria G. Toor, Bilal Mufti

Numerical Simulation of Incipient Rotating Stall Characteristics in a Mixed-Flow Pump
Wei Li, Ramesh K. Agarwal, Leilei Ji, Enda Li, Ling Zhou

Separated Wake Flow and Tail Loads of the Common Research Model in Low Speed Stall Conditions
Andreas Waldmann, Thorsten Lutz, Ewald Kraemer

Effect of Body Nose Fairing on the Unsteady Flow Characteristics over Spiked Flat Faced Cylinder at Supersonic Speed
Devabrata Sahoo, Sudip Das, Jacob Cohen

Tracking Shock Movement on the Surface of an Oscillating, Straked Delta Wing
Justin Pung, Darrell S. Crowe

Using a Stochastic Approach to Estimate the Aerothermal Performance of the Giant Magellan Telescope
Konstantinos Vogiatzis, Kaushik Dan, Breann Sitarsky, David Schwartz, Rod Conan, George Angelis
