# TABLE OF CONTENTS

## PART 1

### PLENARY SESSION

**CHALLENGES IN CRYOCOOLING**

A T A M de Waele ............................................................................................................................... 1

**NEXT GENERATION MATERIALS FOR FUTURE MAGNET DEVELOPMENT AT CERN**

Glyn Kirby .................................................................................................................................................. 10

**STOPPING THE BIOLOGICAL CLOCK MERGING BIOLOGY AND CRYOGENICS IN APPLIED CRYOBIOLOGY**

N Getreu and B Fuller ............................................................................................................................... 13

**THE ECOSWING PROJECT**

T Winkler ................................................................................................................................................... 24

### E-01: LARGE SCALE REFRIGERATION, LIQUEFACTION, AIR SEPARATION AND INDUSTRIAL CRYOGENICS

**COMMISSIONING AND PERFORMANCE OF THE CRYOGENIC SYSTEM OF THE NEW TEST FACILITY FOR LARGE SUPERCONDUCTING DEVICES AT CERN**

**TRANSIENT NUMERICAL SIMULATION AND RESEARCH OF HYDROGEN CONDENSATION CHARACTERISTICS IN A THERMOSYPHON**

J Z Wang, C Lv, W Pan, J H Wu and Q Li ........................................................................................................... 38

**THERMODYNAMIC DESIGN OF A MOBILE SMALL SCALE NON-FLAMMABLE MIXED-REFRIGERANT AIR/OXYGEN LIQUEIFIER**

Haocheng Wang, Hao Guo, Yanxing Zhao, Guangfei Chen and Maoqiong Gong ............................................................................................................................... 43

**DEVELOPMENT OF 10 KW TURBO-BRAYTON REFRIGERATOR FOR HTS POWER APPLICATIONS**

S Ozaki, H Hirai, M Hirokawa and H Kobayashi ........................................................................................................... 51

**SCL3 CRYOGENIC PLANT PROCESS DESIGN FOR RAON**

**DESIGN AND COMPONENT DEVELOPMENT OF A 17 L/D LIQUEFIER FOR HELIUM RECONDENSATION**

J Kranthi Kumar, S Jacob, R Karunakiri and G SWL Narasimham ................................................................................ 65

**EXPERIMENTAL STUDY OF HEAT TRANSFER AND PRESSURE DROP CHARACTERISTICS OF TWO-PHASE MIXED HYDROCARBON REFRIGERANTS FLOW BOILING IN SHELL SIDE OF SPIRAL WOUND HEAT EXCHANGER**

Haitao Hu, Chao Ding, Guoliang Ding, Jie Chen, Xiaoguang Mi and Sicong Yu ............................................................................................................................... 70

**THE CONTROL STRATEGIES OF A 40L/H HELIUM LIQUEIFIER**

W Pan, J H Wu, X J Xie, X D Xu, M M Zhang, S Q Yang, Y L Wang, L H Gong and Q Li ............................................................................................................................... 75

**INTEGRATION AND COMMISSIONING OF A FULL LOCALIZATION 250 W @ 4.5 K HELIUM REFRIGERATOR AT TIPC**

X J Xie, S Q Yang, B C Deng, W Pan, Y L Wang, W P Zhu, J H Wu, Q Li, L H Gong and Y Zhang ............................................................................................................................... 79

**COOL DOWN RESULTS FROM A FULLY LOCALIZED 250W @ 4.5 K HELIUM REFRIGERATOR AT TIPC**

Shaoqi Yang, Xiujuan Xie, Bichai Deng, Wei Pan and Qing Li ............................................................................................................................... 84

**CONFIGURATION OPTIMIZATION OF STAND-ALONE LIQUID AIR ENERGY STORAGE FOR EFFICIENCY IMPROVEMENT**

Xiaohui She, Xiaodong Peng, Tongtong Zhang and Yulong Ding ............................................................................................................................... 90

**THEORETICAL AND EXPERIMENTAL STUDY OF COILED FINNED TUBE HEAT EXCHANGER FOR HELIUM LIQUEFACTION PLANT**

S M Mehta, R M Damle, K P Desai and H B Naik ............................................................................................................................... 96

**DEVELOPMENT OF COMMISSIONING AND OPERATION OF CSNS CRYOGENIC SYSTEM**

He Chongchao, Ye Bin, Li Na, Ding Meiying, Wang Yaqi, Zhang Yu and He Kun ............................................................................................................................... 101
E-02: CRYOCOOLERS: PULSE TUBE, GM, STIRLING, MAGNETIC AND OTHER COOLERS

NUMERICAL STUDY ON THE PERFORMANCE SENSITIVITY OF A PULSE TUBE CRYOCOOLER WITH ACTIVE PHASE SHIFTER .......................................................... 108
K. Liang, A. Abolghasemi, C.R. Stone, M.W. Dadd and P.B. Bailey

STARTUP AND DYNAMIC ANALYSIS OF FREE PISTON STIRLING ENGINE ....................................................................................................................... 113
Moujian Li, Lin Mingliang, Chichunyun and Hong Guotong

LOW COST FLEXURE SPRING TESTING ........................................................................ 118
P B Bailey, H Ran and Geoff Gilley

STUDY OF STAGING METHOD FOR A 25 K TWO STAGE PULSE TUBE COOLER ...................................................................................................................... 123
J Kranthi Kumar, S Jacob, R Karunanithi and GSVL Narasimham

A STUDY ON THE INTERSTAGE COOLING CAPACITY SHIFTING OF STIRLING/PULSE TUBE HYBRID COOLER BASED ON AN IDEALIZED MODEL .................................................. 128
Y X Guo, J J Chao, B Wang, Z H Gao and S Z Li

INVESTIGATION OF MULTI BYPASS PULSE TUBE CRYOCOOLER ........................................... 133
A Shilledar, A Patil and M D Atrey

OPTIMIZATION OF AN 8K LEVEL HIGH FREQUENCY PULSE TUBE CRYOCOOLER ........ 138
J Quan, Y Li, Y Q Xue, Y X Ma and JT Liang

THEORETICAL AND CFD INVESTIGATIONS ON A 200 HZ THERMOACOUSTIC HEAT ENGINE USING PIN ARRAY STACK FOR OPERATIONS IN A PULSE TUBE CRYOCOOLER .................................................. 143
S. K. Gupta, P. Ghosh and T. K. Nandi

DEVELOPMENT AND EXPERIMENTAL INVESTIGATIONS ON TWO STAGE GM TYPE PULSE TUBE REFRIGERATOR FOR 20 K APPLICATIONS ................................................................. 148
P B Gujarati, K P Desai, H B Naik and M D Atrey

HEAT TRANSFER AND PRESSURE DROP IN THE MAIN HEAT EXCHANGER OF A CRYOGENIC MIXED REFRIGERANT CYCLE .................................................. 153
D Gomse and S Grohmann

DESIGN AND ANALYSIS OF A PULSE TUBE CRYOCOOLER FOR LOW TEMPERATURE FRIDGE ....................................................................................... 159
N L Wang, M G Zhao, J Quan, H L Chen, J T Liang, Q L Zhu and J H Cai

THERMODYNAMIC ANALYSIS OF REVERSE BRAYTON CYCLE BASED CRYOCOOLERS FOR COOLING HTS CABLES ................................................................. 160
A K Dhillon and P Ghosh

DEVELOPMENT OF STIRLING-TYPE PULSE TUBE CRYOCOOLER ........................................... 170
Yong-Ju Hong, Juneo Ko, Hyoung-Bong Kim, Han-Kil Yeom, Sehwan In and Seong-Je Park

MODELLING AND EXPERIMENTAL STUDY OF A 700 G MICRO COAXIAL STIRLING-TYPE PULSE TUBE CRYOCOOLER OPERATING AT 100-190 HZ ........................................... 175
Jiaqi Li, Jun Tan, Rui Zha, Tao Zhang, Bangjian Zhao, Yongjiang Zhao and Haizheng Dang

INVESTIGATION OF A COAXIAL STIRLING-TYPE PULSE TUBE CRYOCOOLER WITH THE COOLING CAPACITY OF 600 W AT 77 K ......................................................... 180
Jiaqi Li, Jun Tan, Rui Zha, Tao Zhang, Bangjian Zhao, Yongjiang Zhao and Haizheng Dang

EXPERIMENTAL RESEARCH ON THE JT CYCLE OF HYBRID 4.5K JT CRYOCOOLER ................................................................. 185
Yaexue Ma, Jia Quan, Juan Wang, Tanjie Liu, Jianguo Li and Jingtao Liang

REVIEW OF RECENT ADVANCES IN STIRLING-TYPE PULSE TUBE CRYOCOOLERS ................................................................. 190
Haizheng Dang, Jun Tan, Rui Zha, Jiaqi Li, Tao Zhang, Yongjiang Zhao, Bangjian Zhao, Han Tan and Renjun Xue

EXPERIMENTAL INVESTIGATION OF COOLING CAPACITY OF 4K PULSE TUBE CRYOCOOLER IN MAGNETIC FIELDS ................................................................. 195
Takashi Hirayama, Takaaki Morie and Mingyao Xu

IMPROVEMENT OF COOLING CAPACITY OF 4K GM CRYOCOOLER IN MAGNETIC FIELDS ..................................................................................................................... 199
Takashi Morie, Tatsuke Shiraiishi, Yoji Mizuno and Mingyao Xu

CFD MODELING AND EXPERIMENTAL VERIFICATIONS OF A FOUR-STAGE STIRLING-TYPE PULSE TUBE CRYOCOOLER ...................................................................................... 203
Rui Zha, Tao Zhang, Jiaqi Li, Jun Tan, Yongjiang Zhao, Bangjian Zhao and Haizheng Dang

INVESTIGATIONS ON THE THREE-STAGE GAS-COUPLED STIRLING-TYPE PULSE TUBE CRYOCOOLER ................................................................. 208
Rui Zha, Tao Zhang, Jiaqi Li, Jun Tan, Yongjiang Zhao, Bangjian Zhao and Haizheng Dang

THEORETICAL AND EXPERIMENTAL INVESTIGATIONS ON A 12 KW OXFORD-TYPE DUAL-Opposed MOVING-COIL LINEAR COMPRESSOR ............................................................. 213
Jun Tan, Jiaqi Li, Rui Zha, Tao Zhang, Dingli Bao and Haizheng Dang
INVESTIGATION ON NUMERICAL OPTIMIZATION METHOD FOR HIGH CAPACITY TWO-STAGE 4 K PULSE TUBE CRYOCOOLER .................................................................................................................... 218

K Fang, K Nakano, X G Lin, H Takayama, M Saito and M Y Xu

A 15K TWO-STAGE GAS-COUPLED STIRLING-TYPE PULSE TUBE CRYOCOOLER ............................................................................................................................... 223

Xianlin Wu, Liubiao Chen, Xuming Liu, Jue Wang, Yuan Zhou and Junjie Wang

NUMERICAL STUDY OF A NOVEL SINGLE-STAGE VUILLEUMIER TYPE PULSE TUBE CRYOCOOLER ............................................................................................................................... 228

Jue Wang, Chongzhao Pan, Liubiao Chen, Xiuming Yi, Xianlin Wu, Junjie Wang and Yuan Zhou

OUTGASSING CHARACTERISTICS ANALYSIS OF MECHANICAL CRYOCOOLER MATERIALS ............................................................................................................................... 233

Kenichiro Sawada, Takamasa Ibushashi, Tomoyuki Urabe, Yoichi Sato, Ken-ichi Shinohzaki, Hirohiko Sugita, Kenichi Kanao, Shoji Tsunematsu, Kiyomi Otsuka and Katsushiro Narasaki

MINIMISING FLOW LOSSES WITHIN THE PULSE TUBE OF A STIRLING PULSE TUBE CRYOCOOLER ............................................................................................................................... 238

M. A. Abolghasemi, R. Stone, M. Dudd, P. Bailey and K. Liang

DESIGN AND DEVELOPMENT OF MINIATURE FREE PISTON FREE DISPLACER DUAL OPPOSED STIRLING CRYOCOOLER ............................................................................................................................... 243

Ajay Singh Bisht and Biju T Kazhiveli

EFFECT OF INDUCED PRESSURE FLUCTUATION IN RESERVOIR OF A PULSE TUBE CRYOCOOLER ............................................................................................................................... 248

Derick Abraham and Biju T Kazhiveli

E-03: EXPANDERS, CRYO-PUMPS, COMPRESSORS, REGENERATORS AND OTHER COMPONENTS

A NEW TYPE OF HELIUM PURIFIER WHICH USES A GM CRYOCOOLER AS THE COLD SOURCE ............................................................................................................................... 253

X Hu, J Chen and Z Xu

THERMO-MECHANICAL-DYNAMIC COUPLING ANALYSIS ON COLD COMPRESSOR ROTOR ............................................................................................................................... 258

C B Wei, X B Dong, S Q Yang, Q M Jia, S Y Zhang, C Lv and J H Wu

DEVELOPMENT OF A CRYOGENIC PERFORMANCE EXPERIMENT SYSTEM FOR CENTRIFUGAL COLD COMPRESSORS ............................................................................................................................... 263

C Lv, J Zhang, X B Dong, J H Wu, M M Zhang, S Q Yang, Q M Jia, W Pan and Q Li

ANALYSIS OF AN ON-LINE SUPERCONDUCTING CRYOFAN MOTOR FOR INDIRECT COOLING BY LH2 ............................................................................................................................... 268

V Climente-Alarcon, A Baskys, A Patel and B A Glowacki

PERFORMANCE ANALYSIS FOR 2K HEAT EXCHANGER FOR SUPERFLUID CRYOGENIC SYSTEM AT KEK ............................................................................................................................... 273

A Kumar, H Nakai, K Nakanishi, H Shimizu, Y Kojima, K Haru and T Honma

HELIUM TURBINES DESIGN AND ROOM TEMPERATURE TESTING OF A 500 W AT 4.5 K REFRIGERATOR ............................................................................................................................... 278

B Fu, Q Y Zhang, S X Chen and S S Li

DESIGN OPTIMIZATION OF PERFORATED PLATE MATRIX HEAT EXCHANGERS FOR CRYOGENIC APPLICATIONS USING TEACHING LEARNING BASED OPTIMIZATION (TLBO) METHOD ............................................................................................................................... 283

L Ratna Raju and T K Nandi

RESEARCH ON THE STATIC PERFORMANCE OF A GAS THRUST BEARING FOR THE EDDY CURRENT BRAKE HELIUM TURBO-EXPANDER ............................................................................................................................... 288

S S Li, B Fu and Q Y Zhang

ROBUST CONTROL OF ACTIVE MAGNETIC BEARING SYSTEMS FOR HELIUM CENTRIFUGAL COLD COMPRESSORS ............................................................................................................................... 293

S Y Zhang, C B Wei, S Q Yang, Q M Jia, X B Dong and J H Wu

CHARACTERIZATION OF A SCROLL-TYPE COMPRESSOR FOR DRIVING JT CRYOCOOLERS WORKING AT LIQUID HELIUM TEMPERATURE ............................................................................................................................... 298

Y W Shen, Z H Gan, D L Liu, S F Chen and Y F Yao

EXPERIMENTAL INVESTIGATION OF 2 K JT (JOULE-THOMSON) COOLING SYSTEM USING "DISTRIBUTED JT EFFECT HEAT EXCHANGER" ............................................................................................................................... 303

Kyoung Joong Kim, Lingxue Jin and Sangkwon Jeong

CHARACTERIZING HELIUM PULSATING HEAT PIPES ............................................................................................................................... 308

J.M. Pfothenauer, L.D. Fonseca, C. Xu and F.K. Miller
DEVELOPMENT AND INVESTIGATION OF A REGENERATOR FOR A REVERSE STIRLING CYCLE BASED CRYOGENIC GENERATOR .......................................................... 313
D R Chowdhury, N R Chakraborty and S C Sarkar

E-04: SPACE CRYOGENIC APPLICATIONS

THE CRYOGENIC DETECTOR FOR COSMOLOGY OBSERVATION .................................................. 318
Baurzhan Alzhanov, Mehdi Shafiee, Zhaksylyk Kazykenov, Marchun Bekbolanova, George Smoot and Bruce Grossan

DESIGN AND DEVELOPMENT OF INTEGRAL COLD TRANSPORTATION SYSTEM ............................... 323
S Addala, GSFL. Narasimham, R Karunanithi and H K Hassan

DEVELOPMENT OF A NEW MLI FOR ORBITAL CRYOGENIC PROPULSION SYSTEMS - THERMAL PERFORMANCE UNDER ONE ATMOSPHERE TO A VACUUM .......................................................... 328
Takeishi Miyakita, Kazuya Kitamoto, Kiyoshi Kinefuchi, Masanori Saihoh, Tomoyuki Hirai and Hiroaki Sugita

A STUDY OF MK COOLING SYSTEM FOR SPACE APPLICATION ......................................................... 333
Chen Liubiao, Jin Hai, Wang Jue, Pan Changzhao, Wu Xianlin, Cui Wei, Zhou Yuan and Wang Junjie

ANALYSIS OF A NEW SELF-PRESSURIZATION MODEL FOR CRYOGENIC FLUID TANK ..................... 338
Guopeng Wang, Jianguo Li, Yanan Zhao and Guotong Hong

EXPERIMENTAL INVESTIGATION OF LINE CHILL-DOWN PROCESS WITH LIQUID OXYGEN ............. 344
Lingxue Jin, Jisung Lee and Sangkwon Jeong

HEAT TRANSFER ASPECTS AND ANALYSIS OF REGENERATIVE COOLING IN SEMI-CRYOGENIC THRUST CHAMBER WITH FIXED AND VARIABLE ASPECT RATIO COOLANT CHANNELS .......................................................... 349
Thomas Sathish and Biju T Kuzhiveli

EVOLUTION OF STRATIFICATION IN A CRYOGENIC PROPELLANT TANK AT REDUCED GRAVITY ENVIRONMENT ........................................................................ 354
S B Vishnu and Biju T Kuzhiveli

DESIGN AND ANALYSIS OF MINIATURE FREE PISTON STIRLING ENGINE (FPSE) FOR ON-BOARD POWER PRODUCTION ........................................................................ 359
M R Jineesh and Biju T Kuzhiveli

COOLING PERFORMANCE OF JOULE THOMSON COOLERS IN 300 K -50 MK CRYOCHAIN DEMONSTRATION FOR ATHENA X-IFU .......................................................... 364

CRYOGENIC RADIATOR WITH CAVITY-IN-CAVITY STRUCTURE FOR SPACE MISSIONS ................. 369
Keisuke Shinozaki, Ikuma Nishikawa, Kohsuke Tanaka, Makiko Ando and Hiroaki Sugita

EMISSIVITY OF BLACK PLATED OPEN HONEYCOMB AND BLACK COATINGS AT CRYOGENIC TEMPERATURES ........................................................................ 374
M Ando, K Tanaka, K Shinozaki, I Nishikawa and H Sugita

E-05: CRYOSTAT TECHNOLOGY AND THERMAL INSULATION

EXPERIMENT OF LOW HEAT LOSS LIQUID HELIUM TRANSFER LINE FOR NSRRC CRYOGENIC SYSTEM ............................................................................... 379

NUMERICAL CALCULATION AND MEASUREMENT OF LOW TEMPERATURE CONDUCTIVITY OF POLYURETHANE RIGID FOAM ..................................................................................... 384
J Shang, C Lv, S Q Yang and J H Wu

CRYOGENIC SAFETY CONSIDERATIONS FOR VERTICAL TEST FACILITY FOR QUALIFYING HIGH-B SRF CAVITIES FOR THE EUROPEAN SPALLATION SOURCE ...................................................... 389
I Bizel-Bizzotto, S Patialwar, N Patialwar, P J May, P Wong and M Liffredo

DESIGN OF A MULTI-LAYER INSULATION(MLI) MEASUREMENT SYSTEM WITH A G-M CRYOCOOLER ........................................................................ 394
X Li, D Xu, FZ Shen, HM Liu and LF Li

DESIGN OF THE HELIUM GAS TRANSFER LINE FOR THE WARM REGENERATION SYSTEM OF THE ITER FUSION REACTOR ........................................................................ 399
F. Dinh, S. Giers, S. Hughes, G. Kouzmenko, A. Musininato, L. Popova, G. Roveta and M. Roveta

QUALIFICATION OF A VERTICAL CRYOSTAT FOR MLI PERFORMANCE TESTS BETWEEN 20 K AND 60 K TO 4.2 K ........................................................................................................... 405
V Venturi, T Koettig, M Chorowski, J Polinski, V Parma and A Kopczynski
A CRYOGEN RECONDENSING COOLING SYSTEM FOR SCIENTIFIC EXPERIMENT IN THE PULSED HIGH MAGNETIC FIELD ................................................................. 410
Mengyu Liu, Huakun Zuo, Jun You, Liang Li and Shaoliang Wang

A SEPARATED TWO STAGE HELIUM LIQUEIFIER USING A 4 K GM CRYOCOOLER ........................................... 415
Mengyu Liu, Huakun Zuo, Jun You, Liang Li and Shaoliang Wang

CALCULATION AND POSITION OPTIMIZATION ON VAPOR COOLED SHIELD FOR LIQUID HYDROGEN STORAGE ............................................................................................................................................................................................... 420
Jianpeng Zheng, Liubiao Chen, Chen Cui, Yuan Zhou and Junjie Wang

THERMAL PERFORMANCE OF THE NEW SUPERFLUID HELIUM VERTICAL TEST CRYOSTATS FOR MAGNET TESTS AT CERN ................................................................................................. 425
A Vande Craen, M Bajko, V Benda, J-B Deschamps, C Giloux, A Lees, Y Parma, F Passdeloup and O Pirotte

STUDY ON BREAK OF THERMAL STRATIFICATION IN CONTAINER TARGETED TO THERMODYNAMIC VENT SYSTEM FOR FUTURE SPACECRAFT ................................................................................................. 430
Ryoji Imai, Osamu Kawamani, Yutaka Unemura and Takehiro Himeno

DEVELOPMENT OF LIGHT AND HIGHLY RADIATION TRANSPARENT CRYOSTATS FOR FCC DETECTOR MAGNETS: FIRST ANALYSES OF INSULATION MATERIALS ........................................... 435
V Ilardi, H Silva, A Dudarev, T Koettig, P Borges de Sousa, L N Busch, T Kulenkampff, E R Bielert and H H J ten Kate

DESIGN OF AN ULTRA-THIN, RADIATION THICKNESS MINIMIZED, METALLIC CRYOSTAT FOR A 2T/4M FREE BORE DETECTOR SOLENOID ......................................................................................... 440
H F P Silva, V Ilardi, T Kulenkampff, A Dudarev and H H J ten Kate

DESIGN OF 650MHZ 2-CELL CAVITY CRYOMODULE FOR THE CEPC ACCELERATOR ................................................................................................................................. 445
Ruixiong Han, Rui Ge, Shaopeng Li, Jianqin Zhang, Jiuyan Zhai, Peng Sha, Minjing Sang, Qing Ma and Zhenghu Mi

DESIGN AND THERMAL CALCULATIONS OF FRESCA2 HEAT EXCHANGERS FOR PRESSURISED SUPERFLUID HELIUM BATHS TEMPERATURE CONTROLLING .................................................. 450
J. Polinski, M. Grabowski, M. Chorowski, A.V. Crean and V. Parma

E-06: THERMO-PHYSICAL PROPERTIES OF SOLIDS AND FLUIDS IN CRYO-SYSTEMS

SET-UP OF THE CRYOGENIC PHASE EQUILIBRIA TEST STAND CRYOPHAEQTS ................................................................................................................................. 455
J Tamson, M Stamm and S Grohmann

STUDY ON HEAT TRANSFER BETWEEN THE HIGH-LUMINOSITY LHC BEAM SCREENS AND THE HE II-COOLED BEAM TUBE ......................................................................................................................... 460
P Borges de Sousa, M Morrone, C Garion, R van Weelderen, T Koettig and J Bremer

FILM BOILING HEAT TRANSFER FROM A WIRE TO UPWARD FLOW OF LIQUID HYDROGEN: EFFECT OF WIRE DIAMETER ......................................................................................................................... 465
M Shiotsu, Y Shirai, T Matsumoto, K Fujita, Y Iwami, H Kobayashi, S Nonaka, Y Naruo and Y Inatani

FILM BOILING HEAT TRANSFER PROPERTIES OF LIQUID HYDROGEN FLOWING INSIDE OF HEATED PIPE ................................................................................................................................. 470
T Matsumoto, Y Shirai, M Shiotsu, K Fujita, Y Iwami, Y Naruo, H Kobayashi, S Nonaka and Y Inatani

A HYBRID ANALYTICAL METHOD FOR EVALUATING THERMODYNAMIC PROPERTIES OF MIXTURES BY THE PENG-ROBINSON EQUATION OF STATE ................................................................................................................................. 475
A Hamersztein and N Tezbar

STUDY ON BOILING BEHAVIOR OF PRESSURIZED LIQUID NITROGEN UNDER RAPID DEPRESSURIZATION ................................................................................................................................. 480
M Takeda, T Usui and K Maekawa

A STUDY OF THE THERMAL BEHAVIOR OF A NITROGEN HEAT PIPE FOR A WIDE RANGE OF HEAT LOADS AT SEVERAL FILLING RATIOS ................................................................................................................................. 485
R Wanison, K Kimura and M Murakami

STUDY ON TRANSIENT HEAT TRANSFER AT METAL TO DIELECTRIC INTERFACES IN THE TEMPERATURE RANGE BETWEEN 3.5 K AND 30 K ................................................................................................................................. 490
T Koettig, J Golm, J Liberaerzka, P Borges de Sousa and J Bremer

E-07: MAGNET TECHNOLOGY, DESIGN AND EVALUATION

ASSESSMENT OF RESIDUAL STRESSES IN ITER CS HELIUM INLET WELDS FATIGUE TESTED AT CRYOGENIC TEMPERATURE ................................................................................................................................. 495
S. Szobba, L Aviles Santillana, L Langeslag, P. Fernandez Pison, S. Castillo Rivero, P. Libeure, C. Jong, D. Everitt and K. Freudenberg
CRYOGENIC TEST RESULTS OF THE SUPERCONDUCTING MAGNETS FOR THE NICA COMPLEX AND THE SIS100 SYNCHROTRON OF FAIR

H Khodzhibagiyan, A Bleile, V Borisov, V Datskov, E Fischer, S Kostromin, A Mierau and D Nikiforov

TEST STAND FOR THE CHARACTERIZATION OF SUPERCONDUCTING MAGNETS COOLED WITH CRYOCOOLERS

C Zoller, C Calzolaio, A Gabard and P La Marca

STUDY AND TEST OF AN ACTIVE THERMOSYPHON EXPERIMENTAL SET-UP TO VALIDATE SUPER-FRS DIPOLES COOLING SYSTEM

EXPERIMENTAL AND NUMERICAL STUDY OF THE DIFFERENT QUENCH ACCELERATION PHENOMENA IN THE JT-60SA TOROIDAL FIELD COILS

Y Huang, W Abdel Maksoud, B Baudouy, D Ciazynski, P Decool, L Genini, B Lacroix, S Nicollet, F Nunio, A Torre, R Vallcorba and L Zani

COOLING LARGE HTS MAGNET COILS USING A GAS FREE-CONVECTION COOLING LOOP CONNECTED TO COOLERS

Michael A Green

DESIGN OF A HALF-SIZE 3T REBCO SUPERCONDUCTING MAGNET WITH ACTIVE SHIELDING COILS FOR MRI

S Yokoyama, H Miura, T Matsuda, T Inoue, Y Morita, S Otake and S Sato

THERMOHYDRAULIC BEHAVIOUR OF THE CRYOGENIC SYSTEM DURING PROTECTED QUENCHING OF THE SUPERCONDUCTING MAGNET OF A HYBRID MAGNET

H Li, Z Guoyang and W Chen

LONG TERM OPERATION OF THE SUPERCONDUCTING TRIPLET QUADRUPOLES WITH CRYOCOOLERS FOR BGRIPS IN-FLIGHT SEPARATOR AT RIKEN

K Kusaka

A NEW MEMBER OF HIGH FIELD LARGE BORE SUPERCONDUCTING RESEARCH MAGNETS FAMILY

W Ma, R Vizinchenko, A Twin, A Varney, N Clarke, D Warren, R Wotherspoon and T Hollis

REBCO SPLIT COIL MAGNET FOR HIGH GRADIENT MAGNETIC SEPARATION

D N Diev, V M Lepehin, M N Makarenko, A V Polyakov, V I Shcherbakov, D I Shutova and M I Surin

PART 2

COOLING LARGE HTS MAGNET COILS USING A GAS FREE-CONVECTION COOLING LOOP CONNECTED TO COOLERS

Michael A Green

DESIGN OF A HALF-SIZE 3T REBCO SUPERCONDUCTING MAGNET WITH ACTIVE SHIELDING COILS FOR MRI

S Yokoyama, H Miura, T Matsuda, T Inoue, Y Morita, S Otake and S Sato

THERMOHYDRAULIC BEHAVIOUR OF THE CRYOGENIC SYSTEM DURING PROTECTED QUENCHING OF THE SUPERCONDUCTING MAGNET OF A HYBRID MAGNET

H Li, Z Guoyang and W Chen

LONG TERM OPERATION OF THE SUPERCONDUCTING TRIPLET QUADRUPOLES WITH CRYOCOOLERS FOR BGRIPS IN-FLIGHT SEPARATOR AT RIKEN

K Kusaka

A NEW MEMBER OF HIGH FIELD LARGE BORE SUPERCONDUCTING RESEARCH MAGNETS FAMILY

W Ma, R Vizinchenko, A Twin, A Varney, N Clarke, D Warren, R Wotherspoon and T Hollis

REBCO SPLIT COIL MAGNET FOR HIGH GRADIENT MAGNETIC SEPARATION

D N Diev, V M Lepehin, M N Makarenko, A V Polyakov, V I Shcherbakov, D I Shutova and M I Surin

E-08: LARGE SCALE CRYOGENICS: FUSION REACTORS, ACCELERATORS, SUPERCONDUCTING CAVITIES AND DETECTORS

CRYOGENIC PROCESS OPTIMIZATION FOR SIMULTANEOUS COOL DOWN OF THE TF AND PF SUPERCONDUCTING COILS OF SST-1 TOKAMAK

THERMAL ACOUSTIC PHENOMENA IN A CRYOGENIC HELIUM DISTRIBUTION SYSTEM

CHALLENGES OF PARALLEL ESS CRYOPLANTS INSTALLATION AND COMMISSIONING ACTIVITIES

P Arnold, H Gous, D Phan, Xiaotao Su and J G II Weisend

CONCEPT FOR THE CRYO DISTRIBUTION FOR THE WENDELSTEIN 7-X CRYO VACUUM PUMPS

H.-S. Bosch, C.P. Dhard and Th. Rummel

DESIGN, CONSTRUCTION AND COMMISSIONING OF THE PROXIMITY CRYOGENICS SYSTEMS SERVING TWO LARGE-SCALE PROTOTYPES OF THE FUTURE DUNE NEUTRINO DETECTOR

J Creus, J Bremer, M Chalifour, C Fabre and D Montmaroti

DYNAMIC MODELING AND CONTROL OF THE SPIRAL2 CRYOMODULES

A Voss, F Bonne, A Ghribi, F Millet, P Bonnay and P-E Bernaudin

HYDRAULIC ADJUSTMENT OF THE TWO-PHASE HELIUM FORCED FLOW COOLED SUPERCONDUCTING MAGNETS OF THE SIS100 HEAVY ION SYNCHROTRON FOR FAIR

A Bleile, V. Datskov, E. Fischer, H. Khodzhibagiyan, A. Mierau and D. Nikiforov

E-09: LOW TEMPERATURE REFRIGERATION FOR QUANTUM COMPUTERS, DETECTORS AND LT EXPERIMENTS

HEAT TRANSFER AT DIELECTRIC - METALLIC INTERFACES IN THE ULTRA-LOW TEMPERATURE RANGE
J Liberadzka, J Golm, T Koettig, J Bremer and H J M ter Brake .................................................. 691

PRE-COOLING A 3He/4He DILUTOR MODULE WITH A SEALED CLOSED-CYCLE CONTINUOUS COOLER
S T Chase, T L R Brien, S M Doyle and L C Kenny ........................................................................... 696

DEVELOPMENT OF A SORPTION-COOLED CONTINUOUS MINIATURE DILUTION REFRIGERATOR FOR 100 MK DETECTOR TESTING
AJ May, S Azzoni, D Banys, G Coppi, V Haynes, MA McCulloch, SJ Melhuish, L Piccirillo and J Wenninger .......................................................................................................................... 702

STABLE TEMPERATURE REGULATION FOR TES TESTING BELOW 200MK EMPLOYING IMPROVED COHEN-COON METHOD
H Jin, W Cui and Y Zhou ....................................................................................................................... 707

AN ULTRA-LOW VIBRATION HELIUM RELIQUEFIER FOR DUAL-HELMET MAGNETOENCEPHALOGRAPHY (MEG)
C Wang, A Olesh and Y H Lee .................................................................................................................. 712

E-10: SUPERCONDUCTING CURRENT LEADS AND LINKS

DEVELOPMENT OF 10 KA CURRENT LEADS COOLED BY A CRYOGENIC MIXED-REFRIGERANT CYCLE
Eugen Shabagin and Steffen Grohmann .................................................................................................. 717

E-11: CRYOGENICS FOR POWER APPLICATIONS AND TRANSPORTATION

ROTOR COOLING CONCEPT FOR THE ASSUMED SUPERCONDUCTIVE MOTOR
A Perez, R R van der Woude and R Dekker ............................................................................................... 722

EXPERIMENTAL TEST OF 4 KW-CLASS STIRLING CRYOCOOLER FOR SUPERCONDUCTING CABLE COOLING SYSTEM
Jiho Park, Junseok Ko, Hyobong Kim, Yongju Hong, Hankil Yeom, Sehwan In and Seongje Park .......................................................................................................................... 727

NUMERICAL SIMULATION OF 4-TURNS NITROGEN PULSATING HEAT PIPE
M.N. Li, Z.X. Wu, D. Xu and L.F. Li .............................................................................................................. 732

STUDY OF THE HEAT TRANSFER CAPACITY OF THERMOSYPHON COOLING SYSTEM UNDER THE INCLINED CONDITION
K Yamaguchi, E Shaanika, M Miki, M Izumi, Y Murase, T Oryu and T Yamamoto .................................. 737

E-12: VARIOUS APPLICATIONS OF SUPERCONDUCTORS

OPTIMAL LOCATION OF RESISTIVE SFCL FOR PROTECTING ELECTRICAL EQUIPMENT IN INDIAN POWER GRID: A CASE STUDY
Abhay S. Gour and V V Rao ....................................................................................................................... 742

ELECTROMAGNETIC ANALYSIS OF 0.2 MW HIGH TEMPERATURE SUPERCONDUCTING (HTS) SYNCHRONOUS MACHINE FOR HTS POLE COILS DEVELOPMENT
V A S Muralidhar Bathula, Abhay S Gour, U K Choudhury and V V Rao .............................................. 747

E-13: LNG AND HYDROGEN SYSTEMS

THERMODYNAMIC ANALYSIS OF A NOVEL HYBRID SOLAR-LNG COLD ENERGY RECOVERY SYSTEM
W Ji, Y Zhou, L B Chen, B L An, J X Chen and J J Wang ......................................................................... 754

PERFORMANCE ANALYSIS OF SMALL-SCALE POWER CYCLES FOR LNG PHYSICAL EXERGY RECOVERY
W Gizicki, T Banaszkiewicz, P Wojcieszak and Z Rogala ............................................................................... 759

PERFORMANCE TEST AND ANALYSIS OF THE DEVELOPED EMERGENCY RELEASE SYSTEM FOR LIQUEFIED HYDROGEN INSTALLED IN LOADING SYSTEMS
A Inomata, T Umemura, J Kawaguchi, T Kawai, Y Naruo, Y Muru, T Senda and M Takeda .................. 764
PROGRESS OF LIQUEFIED NATURAL GAS COLD ENERGY UTILIZATION ................................................................. 769
L N Guo, B L An, L B Chen, J X Chen, J J Wang and Y Zhou

AN INTEGRATED MIXED REFRIGERATION CYCLE FOR PRE-COOLING OF REFRIGERATION BELOW 25 K ...................................................................................................................................... 774
S Kloeppel, H Quack and C Haberstroh

THE LIQUID-HYDROGEN ABSORBER FOR MICE ............................................................................................... 778

ANALYSIS OF THE LNG RE-CONDENSATION SYSTEM BASED ON JOULE-THOMSON COOLER ........................................................................................................................................ 783
P. Dorosz, A. Piotrowska, P. Pyrka and P. Bogdan

E-14: NEW DEVICES AND NOVEL CONCEPTS

THERMAL STUDY OF A ONE-METER LONG NEON CRYOGENIC PULSATING HEAT PIPE .................................................. 788
M Barba, R Bruce, F Bouchet, A Bonelli and B Baudouy

ACTIVE MAGNETIC BEARING FOR A LIQUID NITROGEN PUMP ........................................................................... 793
Yasuharu Kamioka, Kazuhiro Kajikawa, Hirokazu Hirai, Shinsuke Ozaki, Taketsune Nakamura, Shinsaku Imagawa and Atsushi Ishiyama

AN EDDY-CURRENT BASED RRR MEASUREMENT TECHNIQUE FOR SRF CAVITIES ....................................... 798
P Sagar, R Karenumathi, H K Hassan, K Akber, P S Girish, S Chandran and EDA Lakshmi

QUENCH LOCALISATION IN SRF CAVITY TESTS WITH TRANSITION EDGE SENSORS ........................................ 804
H Fuci, G Vandoni, A Macpherson, S Barriere, A Castilla, N Shipman, K Turaj, M Wartik and A Zwozniak

ALL POLYMER CRYOGEN FREE CRYOSTAT FOR µ-MRI APPLICATION AT CLINICAL FIELD ................................................................. 809
G Authelet, A Bonelli, M Poirier-Quinot, J-C Ginefri, J Sanour and B Baudouy

COLD, CLEAN AND GREEN: IMPROVING THE EFFICIENCY AND ENVIRONMENTAL IMPACT OF A CRYOGENIC EXPANDER ............................................................................................................. 814
Iestyn M. N. Stead, Abbie Roberts, H K Hassan, K Akber, P S Girish, S Chandran and EDA Lakshmi

NUMERICAL STUDY ON A CRYOGENIC TREATMENT PROCESS WITH NEARZERO LOSS OF COLD ENERGY ...................................................................................................................... 819
Y H Zhao, L B Chen, J Guo, K X Gu, Y Zhou and J J Wang

DESIGN AND TEST OF THE 4.5 K SUPERCRITICAL HELIUM COILED SUBCOOLER ........................................ 824
S Zhang, Z Ouyang and J Li

CRYOGENIC HYDROGEN TARGETS FOR PROTON BEAM GENERATION WITH ULTRA-INTENSE LASERS. ............................................................................................................................. 829
A. Girard, D. Margarone, P. Bonnay, S. Michaux, N. Luchier and D. Chatain

ORTHO-PARAHYDROGEN MIXER, CATALYSTS, MEASUREMENT DEVICES AND THEIR APPLICATION ................................................................................................................................. 834
M Klaus, A Schwab, C Haberstroh, K Eckhardt, Y Befller, J Baggemann and T Cronert

E-15: BIOLOGICAL, MEDICAL AND FOOD APPLICATIONS

AN EFFICIENT LIQUID HELIUM / GAS-GAP SWITCH ALLOWING RAPIDLY SERVICING LOW-TEMPERATURE DYNAMIC NUCLEAR POLARIZATION SYSTEMS ................................................................. 839
W Stautner, R Chen, A Comment and E Budesheim

PERFORMANCE TEST AND NUMERICAL OPTIMIZATION OF THE GOLDEN POMFRET QUICK FREEZER ................................................................................................................................. 849
Y H Zhao, L B Chen, J Guo, K X Gu, Y Zhou and J J Wang

A COMPACT HIGH FIELD MAGNET SYSTEM FOR MEDICAL APPLICATIONS ................................................................. 854
M J Hills, S AmirKhaniou, V Bayliss, T W Bradshaw, M R Crook, G Damiani, J H Durrell, S Greenwood, C R M Grovenor, G Matthews, S C Speller and D Zhou

E-16: INSTRUMENTATION, TELEMETRY AND PROCESS CONTROL

IMPLEMENTATION OF PREVENTIVE DIAGNOSTIC MEASURES FOR THE CERN CRYOGENIC SYSTEM ................................................................................................................................. 859
R Cirillo, Ph Gayet and B Brada
CHARACTERIZATION OF THE VENTURI FLOWMETERS FOR THE CONTROL OF ITER MAGNETS ................................................................. 864
S Varin, J-M Poncet, J André, E Ercolani, N Luchier, C Mariette, N Clayton and J-Y Journeaux

MEASUREMENTS OF PRESSURE OSCILLATIONS AND MECHANICAL VIBRATIONS ................................................................. 869
S Putselyk

THE CRYOGENIC CONTROL SYSTEM OF 40 T HYBRID MAGNET ................................................................. 874
Ming Fang, Zhengrong Ouyang, Lei Shi, Junjie Li, Qiumin Meng, Xin Ai, Xiaoheng Chen, Dazhi Kuang, Shuai Zhang and Hong Xu

DESIGN AND IMPLEMENTATION OF THE INSTRUMENTATION AND SENSOR SYSTEM FOR TESTING OF A SUB MODELLED 10 MW OFFSHORE SUPERCONDUCTING WIND TURBINE ................................................................. 879
R Ramalingam, J Sun and H Neumann

E-17: SAFETY, RELIABILITY AND STANDARDS

STUDY ON THE HEAT TRANSFER OF HELIUM CRYOSTATS FOLLOWING LOSS OF INSULATING VACUUM ................................................................. 884
C Weber, A Henriques and S Grohmann

STATUS OF A EUROPEAN STANDARD FOR THE PROTECTION OF HELIUM CRYOSTATS AGAINST EXCESSIVE PRESSURE ................................................................. 889

TEST STAND FOR DETERMINATION OF THE HEAT FLUX TO THE COLD ELEMENTS OF CRYOGENIC SYSTEMS IN CASE OF THE VACUUM VESSEL FAILURE ................................................................. 894
A. Kopczynski, Z. Malecha and J. Polinski

A COMPARATIVE THERMODYNAMIC ANALYSIS OF HELIUM DISTRIBUTION SYSTEMS WITH CENTRAL AND DISTRIBUTED PRECOOLING HEAT EXCHANGERS ................................................................. 899
J Fydrych and S Pietrowicz

M-01: PROCESSING AND PROPERTIES NBTI/NB3SN/A15/RE123/BSCCO AND MGB2

THE MICROSTRUCTURE OF NB3SN SUPERCONDUCTORS DIFFERING IN THE NUMBER OF COPPER INSERTS AT VARIOUS STAGES OF HEAT TREATMENT ................................................................. 904

SUPERCONDUCTIVITY UNDER UNIAXIAL TENSILE STRAIN ON INTERNAL REINFORCED NB3SN MULTIFILAMENTARY WIRE USING CU-SN-ZN TERNARY ALLOY MATRIX ................................................................. 909
Yoshimitsu Hishinuma, Hidetoshi Oguro, Hiroiyasu Taniguchi, Satoshi Awaji and Akihiro Kikuchi

FORMATION OF MG2SI INCLUSIONS IN IN SITU SiC DOPED MGB2 WIRES MADE FROM VARIABLE CONCENTRATION OF LARGE MICROMETER-SIZE MG POWDER BY CONTINUOUS METHOD ................................................................. 914
B A Glowacki, M N Kutukcu, S Atamert, C Dhulst and J Mestdagh

CIC CABLE TECHNOLOGIES FOR HIGH-CURRENT WINDINGS ................................................................. 919
Daniel Chavez, Jeffrey Brietschopf, Tim Elliot, Joshua Kellams, Peter McIntyre and A. I. Sattarov

M-03: SUPERCONDUCTOR STABILITY, AC LOSSES AND ELECTROMAGNETIC PROPERTIES

ANALYSIS OF BEHAVIOUR OF HTS TAPES COOLED BY LIQUID NITROGEN UNDER CURRENTS MORE THAN THE CRITICAL CURRENT ................................................................. 924
V Zubko, S Fetisov, S Zanegin and V Vysotsky

COLD TEST AND NUMERICAL ANALYSIS OF THE COMPACT 2G HTS POWER CABLE ................................................................. 929
S Fetisov, V Zubko, S Zanegin and V Vysotsky

STUDY ON OPTIMAL THICKNESS OF COPPER LAYER OF REBCO-COATED WIRE FOR QUENCH PROTECTION ................................................................. 934
A Kojima, Y Fuchida, H Toriyama, A Nomoto, T Takao, K Nakamura, O Tsukamoto and M Furuse
M-04: HTS BULK, THIN FILMS AND CABLES

COMPARISON OF THE SUPERCONDUCTING PROPERTIES OF Y-Ba-Cu-O AND Y-Ba-Cu-O-Ag BULK SUPERCONDUCTORS .............................................................. 942

J V J Congreve, Y H Shi, A R Dennis, J H Durrell and D A Cardwell

DESIGN CONSIDERATIONS FOR ELECTRIC MOTORS USING STACKS OF HIGH TEMPERATURE SUPERCONDUCTING TAPE AS PERMANENT MAGNETS .......................... 949

V. Climente-Alarcon, A. Patel, A. Baskys and B. A. Glowacki

ENHANCED-TEXTURED-POWDER BI-2212/Ag WIRE DEVELOPMENT ........................................... 954

J N Kellams, P McIntyre and K O'Quinn

M-05: FLUX PINNING AND CRITICAL CURRENT

SCALING ANALYSES ON THE CRITICAL CURRENT DENSITY IN MgB2/SiC/Si THIN FILM PROCESSED AT HIGHER TEMPERATURE ......................................................... 960

Akihiko Nishida, Chihiro Taka and Stefan Chromik

M-06: METALLIC, COMPOSITE MATERIALS, INSULATION AND IMPREGNATION MATERIALS PROCESSING AND PROPERTIES

EXTRACTION OF INSTRUMENTATION WIRES THROUGH THE HIGH-VOLTAGE INSULATION OF THE ITER MAGNET FEEDER SYSTEM .............................................. 965

N Clayton, D Evans, C-Y Gung, O Pastor, R Piccin, S Cerignat, X Huang, G Li and M Crouchen

FLASHOVER CHARACTERISTICS OF G-11 AT DIFFERENT CRYOGENIC TEMPERATURES ................. 970

J Li, L M Luo, R J Huang, J H Ma, Y Q Liang, C J Huang, Z X Wu, F Z Shen, Y G Wang, D Xu, H M Liu, H Zhang and L F Li

GROWTH CHARACTERISTICS OF ELECTRICAL TREES IN EPOXY RESIN AT CRYOGENIC TEMPERATURES ................................................................. 975

AEROGEL-BASED INSULATION MATERIALS FOR CRYOGENIC APPLICATIONS ................................ 980

J E Fesmire

M-07: CRYOGENIC MATERIALS TESTING AND METHODS

FATIGUE CYCLIC TESTING OF THE ITER CS INLETS ...................................................................... 985

Nicolai Martovetsky, Robert Walsh, Kevin Freudenberg, Wayne Reiersen, David Everitt, Dustin McRae, Leonard Myatt, Kristine Cochran and Cornelis Jong

CRYOGEN-FREE APPARATUS FOR RAPID THERMAL EMISSIVITY MEASUREMENTS AT LOW TEMPERATURE ................................................................. 994

FZ. Shen, D. Xu, X. Li, HM. Liu and LF. Li

INVESTIGATION ON THE WEAR BEHAVIOUR OF ALUMINIUM ALLOYS AT CRYOGENIC TEMPERATURE AND SUBJECTED TO CRYO-TREATMENT ......................... 999

B V Padmini, P Sathishkumar, S Seetharamu, G J Naveen and H B Niranjan

METALLURGICAL CHANGES OF CRYOGENICALLY TREATED COATED CARBIDE (KC-9225) AND ITS PERFORMANCE DURING WET MACHINING OF AUSTENITIC STAINLESS STEEL – 310. ................................................................. 1007

Meghna Das Chaudhury, Raju and Anbarasu Subramanian

M-09: CRYOGENIC LOW AND HIGH POWER ELECTRONICS, SUPERCONDUCTING DETECTORS

A COMPACT 4 K COOLING SYSTEM FOR SUPERCONDUCTING NANOWIRE SINGLE PHOTON DETECTORS ............................................................... 1012

M J Hills, T W Bradshaw, S Dobrovolskiy, S N Dorenbos, N R Gemmell, B Green, R M Heath, T Rawlings, K Tsironakidis, V Zwiller, M R Crook and R H Hadfield

FIRST STUDIES TOWARDS A CRYO-COOLED PHASED ARRAY RADAR SYSTEM FOR SPACE SURVEILLANCE ................................................................. 1017

N Ben Bekhti, A Fröhlich, O Grenz, F König, L Naumann, S Putselyk, F Rahlf, M Tiising, T Wirths and H Wilden
M-10: RADIATION AND OTHER DEGRADATION EFFECTS

STUDY ON IRRADIATION EFFECT OF INSULATING MATERIALS FOR FUSION SUPERCONDUCTING MAGNET: CHANGE IN ELECTRIC INSULATION PERFORMANCE BY IRRADIATION ............................................................................................................................... 1022
S Kito, Y Akiyama and S Nishijima

RADIATION HARDNESS OF THE SIEMENS SIPART INTELLIGENT VALVE POSITIONER ...................... 1027
Juan Casas and Jean Marc Quetsch

M-11: HEAT TRANSFER, THERMODYNAMIC AND FLUID PROPERTIES OF CRYOGENIC MATERIALS

THERMAL CONDUCTIVITY STUDIES ON ACTIVATED CARBON BASED CRYOPANEL ......................... 1032
Ravi Verma, H N. Nagendra, S. Kasthurirengan, N.C. Shivaparakash and Upendra Behera

NUMERICAL AND EXPERIMENTAL INVESTIGATIONS ON TWO-PHASE FLOW OF LIQUID NITROGEN IN A FLEXIBLE TRANSFER LINE .................................................................................................................. 1037
H N Nagendra, A V Karthik, Ravi Verma, S Kasthurirengan, N C Shivaprakash, A K Sahu and Upendra Behera

DESIGN AND OPTIMIZATION OF A COLD COMPRESSOR IMPELLER IN A LARGE SUPERFLUID HELIUM CRYOGENIC SYSTEM ................................................................................................................................. 1043
L Zhang, Z Zhang and S Li

EFFECT OF INSERTED HTS POWER TRANSMISSION CABLES ON FRICTION LOSS IN CORRUGATED PIPES .......................................................................................................................................................... 1048
Z Q Zuo, W B Jiang, Z G Yu and Y H Huang

TURBULENT VELOCITY MEASUREMENTS IN HIGH REYNOLDS CRYOGENIC HELIUM FACILITIES AT SERVICE DES BASSES TEMPÉRATURES (SBT) ................................................................. 1053
S Kharche, J P Moro, C Baudet, B Rousset, A Fuchs, J Peinke and A Girard

Author Index
