2019 Data Compression Conference (DCC 2019)

Snowbird, Utah, USA
26 – 29 March 2019
Technical Sessions

Session 1

Learned Neural Iterative Decoding for Lossy Image Compression Systems
Alexander G. Ororbia II, Lee Giles, Ankur Mali, and David Miller
1Rochester Institute of Technology, 2Penn State University
Lossy Source Coding via Deep Learning
Qing Li and Yang Chen
1Scaleflux, 2University of Michigan
Lossy Image Compression with Filter Bank Based Convolutional Networks
Shaohui Li, Ziyang Zheng, Wenrui Dai, and Hongkai Xiong
1Shanghai Jiao Tong University, 2University of California, San Diego
Near-Lossless \( \ell_\infty \)-Constrained Image Decompression via Deep Neural Network
Xi Zhang and Xiaolin Wu
1Shanghai Jiao Tong University, 2McMaster University

Session 2

History-Based Motion Vector Prediction in Versatile Video Coding
Li Zhang, Kai Zhang, Hongbin Liu, Hsiao Chieng Chuang, Yue Wang
1Bytedance Inc., 2Beijing ByteDance Technology Co., Ltd., 3Beijing Bytedance Network Technology Co., Ltd.
Wide Angular Intra Prediction for Versatile Video Coding
Liang Zhao, Xin Zhao, Shan Liu, Xiang Li, Jani Lainema, Gagan Rath
1Tencent, 2Nokia, 3Technicolor
Fast Adaptive Multiple Transform for Versatile Video Coding
Zhaobin Zhang, Xin Zhao, Xiang Li, Zhu Li, and Shan Liu
1University of Missouri - Kansas City, 2Tencent America
Adaptive Wavelet Domain Filter for Versatile Video Coding (VVC)
Suhong Wang, Xiang Zhang, Shanshe Wang, Siwei Ma, and Wen Gao
Peking University

Session 3

Dv2v: A Dynamic Variable-to-Variable Compressor
Nieves R. Brisaboa, Antonio Fariña, Gonzalo Navarro, Adrián Gómez Brandón, and Tirso V. Rodeiro
1University da Coruña, 2University of Chile
AliCo: A New Efficient Representation for SAM Files ............................................................ 93

Idoia Ochoa¹, Hongyi Li¹, Florian Baumgarte², Charles Hergenrother³, Jan Voges²,
and Mikel Hernaez¹
¹University of Illinois at Urbana-Champaign, ²Leibniz University,
³University of Notre Dame

A Compact Representation of Raster Time Series.................................................................... 103

Nataly Cruces¹, Diego Seco¹, and Gilberto Gutiérrez²
¹University of Concepción, ²Universidad del Bio-Bio

Numerical Pattern Mining Through Compression ................................................................ 112

Tatiana Makhalova¹, Sergey O. Kuznetsov¹, and Amedeo Napoli²
¹National Research University Higher School of Economics,
²Université de Lorraine, CNRS, Inria

Session 4

Tunneling on Wheeler Graphs ................................................................................................ 122

Jarno N. Alanko¹, Travis Gagie², Gonzalo Navarro³, and Louisa Seelbach Benkner⁴
¹University of Helsinki, ²Universidad Diego Portales, ³University of Chile,
⁴University of Siegen

Space-Efficient Computation of the Burrows-Wheeler Transform........................................ 132

José Fuentes-Sepúlveda¹, Gonzalo Navarro¹, and Yakov Nekrich²
¹University of Chile, ²University of Waterloo

BWT Tunnel Planning is Hard But Manageable.................................................................... 142

Uwe Baier and Kadir Dede

Ulm University

Parameterized Text Indexing with One Wildcard ...................................................................... 152

Arnab Ganguly¹, Wing-Kai Hon², Yu-An Huang², Solon Pissis³, Rahul Shah⁴,
and Sharma Thankachan⁵
¹University of Wisconsin - Whitewater, ²National Tsing Hua University,
³CWI, Amsterdam, ⁴Louisiana State University, ⁵University of Central Florida

Session 5

CNN-Based Driving of Block Partitioning for Intra Slices Encoding.................................... 162

Franck Galpin, Fabien Racapé, Sunil Jaiswal, Philippe Bordes, Fabrice Le Léannec,
and Edouard Francois

Technicolor

Perceptually Optimized Bit-Allocation and Associated Distortion Measure
for Block-Based Image or Video Coding .............................................................................. 172

Christian R Helmrich, Sebastian Bosse, Mischa Siekmann, Heiko Schwarz,
Detlev Marpe, and Thomas Wiegand

Fraunhofer HHI

Hybrid Video Coding with Trellis-Coded Quantization ........................................................... 182

Heiko Schwarz, Tung Nguyen, Detlev Marpe, and Thomas Wiegand

Fraunhofer HHI
Deterministic Annealing Based Transform Domain Temporal Predictor Design
for Adaptive Video Coding ...................................................................................................... 192
Bharath Vishwanath, Kenneth Rose, and Tejaswi Nanjundaswamy
University of Santa Barbara

Session 6

Practical Indexing of Repetitive Collections Using Relative Lempel-Ziv ......................... 201
Gonzalo Navarro$^1$ and Victor Sepulveda$^2$
$^1$University of Chile, $^2$CeBiB
LZRR: LZ77 Parsing with Right Reference ........................................................................ 211
Takaaki Nishimoto and Yasuo Tabei
RIKEN Center for Advanced Intelligence Project
On Lempel-Ziv Decompression in Small Space ................................................................. 221
Simon J. Puglisi$^1$ and Massimilano Rossi$^2$
$^1$University of Helsinki, $^2$University of Verona
Polynomial Time Algorithms for Constructing Optimal AIFV Codes ............................. 231
Mordecai J. Golin and Elfarouk Y. Harb
Hong Kong University of Science and Technology

Session 7

Texture-Classification Accelerated CNN Scheme for Fast Intra CU Partition
in HEVC .................................................................................................................................. 241
Yongfei Zhang$^1$, Gang Wang$^1$, Rui Tian$^2$, Mai Xu$^1$, and C.-C. Jay Kuo$^3$
$^1$Beihang University, $^2$Beijing Institute of Electronic System Engineering,
$^3$University of Southern California
Enhanced Compression beyond HEVC for Next Generation Content ............................. 250
Kiran Misra, Andrew Segall, Weijia Zhu, Byeongdoo Choi, and Frank Bossen
Sharp
Recursive Partitioning Search Space Pruning Using Split Cost Prediction ...................... 260
Adam Wieckowski, Jackie Ma, Heiko Schwarz, Detlev Marpe, and Thomas Wiegand
Fraunhofer HHI
A DenseNet Based Approach for Multi-frame In-loop Filter in HEVC ............................ 270
Tianyi Li$^1$, Mai Xu$^1$, Ren Yang$^1$, and Xiaoming Tao$^2$
$^1$Beihang University, $^2$Tsinghua University

Session 8

Highly Flexible Coding Structures for Next-Generation Video Compression Standard..... 280
Fabrice Le Léannec$^1$, Tangi Poirier$^1$, Franck Galpin$^1$, Fabrice Urban$^1$,
Edouard François$^1$, Wei-Jung Chien$^2$, Vadim Seregin$^2$, and Marta Karczewicz$^2$
$^1$Technicolor, $^2$Qualcomm
Improved Video Coding Techniques for Next Generation Video Coding Standard .......... 290
Xiaoyu Xiu¹, Yuwen He¹, Yan Ye², Rahul Vanam¹, Philippe Hanhart¹, Taoran Lu³,
Fangjun Pu³, Peng Yin³, Walt Husak², and Tao Chen³
¹InterDigital Communications, ²Alibaba Inc., ³Dolby

Extended Quad-Tree Partitioning for Future Video Coding ................................................. 300
Meng Wang¹, Junru Li², Li Zhang³, Kai Zhang³, Hongbin Liu³, Shiqi Wang¹,
Sam Kwong¹, and Siwei Ma²
¹City University of Hong Kong, ²Peking University, ³ByteDance Inc.

New Video Codec for High-Quality Video Service and Emerging Applications............... 310
Kiho Choi¹, Jianle Chen², Anish Tamse¹, Haitao Yang², Min Woo Park¹,
Sergey Ikonin², Woongil Choi¹, and Semih Esenlik²
¹Samsung Electronics, ²Huawei Technologies

Session 9

Rate Allocation for Bayer-Pattern Image Compression with JPEG XS ......................... 320
Thomas Richter
Fraunhofer IIS

Graph-Based Transform with Weighted Self-Loops for Predictive Transform Coding
Based on Template Matching ................................................................................................. 329
Debaleena Roy, Tanaya Guha, and Victor Sanchez
University of Warwick

Quantizers with Parameterized Distortion Measures ......................................................... 339
Jun Guo, Philipp Walk, and Hamid Jafarkhani
University of California Irvine

Combating Packet Loss in Image Coding Using Oversampling, Irregular Interpolation
and Noise Shaping ................................................................................................................ 349
Mor Goren and Ram Zamir
Tel Aviv University

Quantized and Regularized Optimization for Coding Images Using Steered
Mixtures-of-Experts ................................................................................................................ 359
Rolf Jongebloed, Erik Bochinski, Lieven Lange, and Thomas Sikora
Technische Universität Berlin

Session 10

Super-Ray Based Low Rank Approximation for Light Field Compression .................. 369
Elian Dibi¹, Mikaël Le Pendu², Xiaoran Jiang³, and Christine Guillemot¹
INRIA Rennes Bretagne Atlantique¹, Trinity College Dublin²

Graph-Based Spatio-Angular Prediction for Quasi-Lossless Compression
of Light Fields ...................................................................................................................... 379
Mira Rizkallah, Thomas Maugey, and Christine Guillemot
INRIA Rennes Bretagne Atlantique
Session 11

An Overview of the OMAF Standard for 360° Video ............................................................... 418
   Miska Hannuksela1, Ye-Kui Wang2, and Ari Hourunranta1
   1Nokia Technologies, 2Huawei Technologies

The Bit Allocation Method Based on Inter-View Dependency for Multi-view
Texture Video Coding ................................................................................................................... 428
   Tiansong Li, Li Yu, Shengju Yu, and Yamei Chen
   Huazhong University of Science and Technology

Compact Representations of Dynamic Video Background Using Motion Sprites ............... 438
   Solomon Garber, James Storer, Ryan C. Marcus, Aaditya Prakash,
   and Antonella DiLillo
   Brandeis University

Intra Picture Prediction for Video Coding with Neural Networks ........................................ 448
   Philipp Helle, Jonathan Pfaff, Michael Schäfer, Roman Rischke, Heiko Schwarz,
   Detlev Marpe, and Thomas Wiegand
   Fraunhofer-Institut für Nachrichtentechnik, Heinrich-Hertz-Institut, HHI

A Multi-pass Coding Mode Search Framework for AV1 Encoder Optimization ............... 458
   Ching-Han Chiang, Jingning Han, and Yaowu Xu
   Google Inc.

Session 12

Intra-Prediction Side-Information Reduction Based on Gradient Boundary .................... 468
   Lucas Nissenbaum, Mumin Jin, and Jae Lim
   Massachusetts Institute of Technology

Machine Foveation: An Application-Aware Compressive Sensing Framework ............... 478
   Ekdeep S. Lubana1, Robert Dick2, and Vinayak Aggarwal1
   1Indian Institute of Technology, Roorkee, 2University of Michigan
M to 1 Joint Source-Channel Coding of Gaussian Sources via Dichotomy of the Input Space Based on Deep Learning ................................................................. 488
  Yashas Malur, Saidutta Afshin, and Abdi Faramarz Fekri
  Georgia Institute of Technology

Advanced 3D Motion Prediction for Video Based Point Cloud Attributes Compression ..... 498
  Li Li1, Zhu Li1,3, Vladyslav Zakharchenko2, and Jianle Chen2
  1University of Missouri-Kansas City, 2Futurewei Technologies, 3Peng Cheng Lab

Session 13

MR-RePair: Grammar Compression Based on Maximal Repeats .............................. 508
  Isamu Furuya1, Takuya Takagi1, Yuto Nakashima2, Shunsuke Inenaga2,
  Hideo Bannai2, and Takuya Kida1
  1Hokkaido University, 2Kyushu University

RePair in Compressed Space and Time ................................................................ 518
  Kensuke Sakai1, Tatsuya Ohno1, Keisuke Goto2, Yoshimasa Takabatake1,
  Tomohiro I1, and Hiroshi Sakamoto1
  1Kyushu Institute of Technology, 2Fujitsu Laboratories Ltd.

Regular Expression Search on Compressed Text ..................................................... 528
  Pierre Ganty1 and Pedro Valero1,2
  1IMDEA Software Institute, 2Universidad Politécnica de Madrid

Constructing Antidictionaries in Output-Sensitive Space ................................... 538
  Lorraine Ayad1, Golnaz Badkobeh2, Gabriele Fici3, Alice Heliou4, and Solon Pissis5
  1Kings College London, 2Goldsmiths University of London, 3Universita di Palermo,
  4Independent Researcher, 5CWI, Amsterdam

Poster Session

(listed alphabetically by first author)

Clustering Regression Wavelet Analysis for Lossless Compression of Hyperspectral Imagery ............................................................... 551
  Eze Ahanonu, Michael Marcellin, and Ali Bilgin
  University of Arizona

Fast Depth Decision in Light Field Compression .................................................. 552
  Hadi Amirpour1, Antonio Pinheiro1, Manuela Pereira1, and Mohammad Ghanbari2,3
  1Instituto de Telecomunicaoes and Universidade da Beira Interior, 2University of Tehran, 3University of Essex
Light Field Image Compression with Random Access .......................................................... 553
Hadi Amirpour¹, Antonio Pinheiro¹, Manuela Pereira¹, Fernando J. P. Lopes², and Mohammad Ghanbari³,⁴
¹Instituto de Telecomunicações and Universidade da Beira Interior, ²Instituto de
Telecomunicações and Polytechnic Institute of Coimbra, ³University of Tehran,
⁴University of Essex

RDO-Based Light Field Image Coding Using Convolutional Neural Networks
and Linear Approximation...................................................................................................... 554
Nader Bakir¹,², Wassim Hamidouche¹, Olivier Déforges¹, Khouloud Samrouth²,
Sid Ahmed Fezza³, and Mohamad Khalil²
¹INSA Rennes, ²Lebanese University, ³National Institute of Telecommunications
and ICT

Enhanced Context Sensitive Flash Codes .............................................................................. 555
Gilad Baruch¹, Shmuel T. Klein¹ and Dana Shapira²
¹Bar Ilan University, ²Ariel University

Deep Frame Interpolation for Video Compression ............................................................... 556
Jean Bégaint¹,², Franck Galpin¹, Philippe Guillotet¹, and Christine Guillemon²
¹Technicolor, ²INRIA

Speckle Reduction for Efficient Coding of Experimental Holograms ................................ 557
Marco V. Bernardo¹, Elsa Fonseca²,³, Antonio M. G. Pinheiro¹,², Paulo T. Fiadeiro¹,³,
and Manuela Pereira¹,²
¹Instituto de Telecomunicações (IT), ²Universidade da Beira Interior (UBI), ³Fiber Materials and Environmental Technologies (FibEnTech)

Humans are Still the Best Lossy Image Compressors .......................................................... 558
Ashutosh Bhown¹, Soham Mukherjee², Sean Yang², Shubham Chandak⁴,
Irena Fischer-Hwang⁴, Kedar Tatwawadi⁴, and Tsachy Weissman⁴
¹Palo Alto High School, ²Monta Vista High School, ³Saint Francis High School,
⁴Stanford University

Multiple Reference Line Coding for Most Probable Modes in Intra Prediction.................... 559
Yao-Jen Chang¹, Hong-Jheng Jhu¹, Hui-Yu Jiang¹, Liang Zhao², Xin Zhao², Xiang Li², Shan Liu², Benjamin Bross², Paul Keydel³, Heiko Schwarz³,
Detlev Marpe³, and Thomas Wiegand³
¹Foxconn, ²Tencent, ³Fraunhofer HHI

Multi-view Multi-modality Priors Residual Network of Depth Video Enhancement
for Bandwidth Limited Asymmetric Coding Framework...................................................... 560
Siqi Chen¹,², Qiong Liu¹,², and You Yang¹,²
¹Huazhong University of Science and Technology, ²Wuhan National Laboratory
for Optoelectronics

Fast CU Size Decision Based on AQ-CNN for Depth Intra Coding in 3D-HEVC............... 561
Yamei Chen, Li Yu, Tiansong Li, Hongkui Wang, and Shengwei Wang
Huazhong University of Science and Technology

Compressive-Sensed Image Coding via Multi-layer Closed-Loop Prediction ....................... 562
Zan Chen¹, Xingsong Hou¹, Ling Shao², and Yuan Huang¹
¹Xi’an Jitaotong University, ²Inception Institute of Artificial Intelligence

Accelerating Convolutional Neural Networks with Dynamic Channel Pruning............... 563
Chiliang Zhang¹, Tao Hu², Yingda Guan¹, and Zuochang Ye¹
¹Tsinghua University, ²University of Amsterdam
Online Machine Learning for Fast Coding Unit Decisions in HEVC .......................................................... 564
  Guilherme Correa, Pargles Dall’Oglio, Daniel Palomino, and Luciano Agostini
  Federal University of Pelotas, Brazil

Perceptual Video Coding Based on Visual Saliency Modulated Just Noticeable Distortion ................................................................. 565
  Jing Cui1, Ruiqin Xiong1, Xinjeng Zhang2, Shanshe Wang1, and Siwei Ma1
  1Peking University, 2University of Southern California

A Hardware-Friendly Extension of Line-Based Intra Prediction for Video Coding ............... 566
  Santiago De-Luxán-Hernández, Adam Wieckowski, Heiko Schwarz, Detlev Marpe, and Thomas Wiegand
  Fraunhofer HHI

Multidimensional Compression with Pattern Matching ................................................................. 567
  Olivia Del Guercio1, Rafael Orozco2, Alex Sim3, and Kesheng Wu3
  1Scripps College, 2Lawrence Berkeley National Laboratory, 3Bucknell University

An Efficient Coding Method for Spike Camera Using Inter-Spike Intervals ......................... 568
  Siwei Dong, Lin Zhu, Daoyuan Xu, Yonghong Tian, and Tiejun Huang
  Peking University

Hybrid Point Cloud Geometry Coding Using Planes and Octree Representation Models .......... 569
  Antoine Dricot and João Ascenso
  Instituto de Telecomunicações

Fast PU Intra Mode Decision in Intra HEVC Coding .............................................................. 570
  Kun Duan1,2, Pengyu Liu1,2, Zeqi Feng1,2, and Kebin Jia1,2
  1Beijing University of Technology, 2Beijing Laboratory of Advanced Information Networks

Separable KLT for Intra Coding in Versatile Video Coding (VVC) ........................................ 571
  Kui Fan1, Ronggang Wang1, Weisi Lin2, Jong-Uk Hou2, Lingyu Duan1, Ge Li1, and Wen Gao1
  1Peking University, 2Nanyang Technological University

Spike Coding: Towards Lossy Compression for Dynamic Vision Sensor ..................................... 572
  Yihua Fu, Jianing Li, Siwei Dong, Yonghong Tian, and Tiejun Huang
  Peking University

A New Distributed Source Coding Problem Related to the Classical-Quantum Slepian–Wolf Problem ....................................................... 573
  Hachiro Fujita
  Tokyo Metropolitan University

Dataflow-Based Joint Quantization for Deep Neural Networks .............................................. 574
  Xue Geng1, Jie Fu2, Bin Zhao2, Jie Lin1, Mohamed M. Sabry Aly4, Christopher Pal1, and Vijay Chandrasekhar1
  1I2R, A*STAR, 2Polytechnique Montreal, 3IME, A*STAR, 4Nanyang Technological University

DeepZip: Lossless Data Compression Using Recurrent Neural Networks ............................. 575
  Mohit Goyal1,3, Kedar Tatwawadi2, Shubham Chandak2, and Idoia Ochoa3
  1Indian Institute of Technology Delhi, 2Stanford University, 3University of Illinois

Fast Early Termination of CU Partition and Mode Selection Algorithm for Virtual Reality Video in HEVC ......................................................... 576
  Xiaohan Guan, Xiaoshua Dong, Mengmeng Zhang, and Zhi Liu
  North China University of Technology Beijing
Boosting Backward Search Throughput for FM-Index Using a Compressed Encoding

Jose M. Herruzo, Sonia González-Navarro, Pablo Ibáñez, Victor Viñals, Jesús Alastruey-Benedé, and Oscar Plata

1 University of Malaga, 2 University of Zaragoza

Evaluation of Prediction of Quality Metrics for IR Images for UAV Applications

Kabir Hossain, Claire Mantel, and Søren Forchhammer

Technical University of Denmark

Deep Learning Based Angular Intra-Prediction for Lossless HEVC Video Coding

Hongyue Huang, Ionut Schiopu, and Adrian Munteanu

Vrije Universiteit Brussels

Level-of-Detail Generation Using Binary-Tree for Lifting Scheme in LiDAR

Birendra Kathariya, Vladyslav Zakharchenko, Zhu Li, and Jianle Chen

1 Futurewei Technologies Inc., 2 University of Missouri-Kansas City

On the Randomness of Compressed Data

Shmuel T. Klein and Dana Shapira

1 Bar Ilan University, 2 Ariel University

Better Than Optimal Huffman Coding?

Shmuel T. Klein, Shoham Saadia, and Dana Shapira

1 Bar Ilan University, 2 Ariel University

Selective Dynamic Compression

Shmuel T. Klein, Elina Opalinsky, and Dana Shapira

1 Bar Ilan University, 2 Ariel University

A New Technique for Lossless Compression of Color Images Based on Hierarchical Prediction, Inversion and Context Adaptive Coding

Basar Koc, Ziya Arnavut, Dilip Sarkar, and Hüseyin Koçak

Stetson University, SUNY Fredonia, University of Miami

Generalized Word Equations: A New Approach to Data Compression

Michał Kutwin, Wojciech Plandowski, and Artur Zaroda

University of Warsaw

Signal Reconstruction Performance Under Quantized Noisy Compressed Sensing

Markus Leinonen, Marian Codreanu, and Markku Juntti

1 University of Oulu, 2 Linköping University

Bi-Intra Prediction for Versatile Video Coding

Congrui Li, Zhenghui Zhao, Junru Li, Xiang Zhang, Siwei Ma, and Chen Li

1 China University of Mining and Technology, 2 Peking University

Adaptive Quantization Parameter Selection Leveraging the Inter-Frame Distortion Propagation for HEVC Video Coding

Dong Li, Haibing Yin, Xiaofeng Huang, and Hang Li

Hangzhou Dianzi University

An End-to-End Encrypted Neural Network for Gradient Updates Transmission in Federated Learning

Hongyu Li and Tianqi Han

ZhongAn Information Technology Service Co., Ltd. Shanghai City
Incremental Deep Neural Network Pruning Based on Hessian Approximation
Li Li¹, Zhu Li¹, Yue Li², Birendra Kathariya¹, and Shuvra Bhattacharyya¹
¹University of Missouri-KC, ²University of Science and Technology China,
³University of Maryland
Improving Cube-to-ERP Conversion Performance with Geometry Features of 360
Video Structure
Ning Yu, Chunyu Lin, Huihui Bai, Meiqin Liu, and Yao Zhao
Beijing Jiaotong University
Perception-Optimized Encoding for Visually Lossy Image Compression
Yuzhang Lin¹, Feng Liu², Miguel Hernandez-Cabronero¹, Eze Ahanonu¹,
Michael Marcellin¹, Ali Bilgin¹, and Amit Ashok¹
¹The University of Arizona, ²Nankai University
Fast Intra Prediction Algorithm for Virtual Reality 360 Degree Video
Based on Improved RMD
Zhi Liu, Cai Xu, Xiaohan Guan, and Mengmeng Zhang
North China University of Technology
A CU Split Early Termination Algorithm Based KNN for 360-Degree Video
Zhi Liu, Peiran Song, and Mengmeng Zhang
North China University of Technology
Fast Encoding Algorithms for SHVC Intra/Inter Coding
Xin Lu¹, Chang Yu¹, and Graham Martin²
¹Harbin Institute of Technology, ²University of Warwick
Rice-Marlin Codes: Tiny and Efficient Variable-to-Fixed Codes
Manuel Martinez¹ and Joan Serra-Sagristà²
¹Karlsruhe Institute of Technology, ²Universitat Autònoma de Barcelona
Decoder-Side Intra Mode Derivation Based on a Histogram of Gradients
in Versatile Video Coding
Anthony Nasrallah, Elie Mora, Thomas Guionnet, and Mickael Raulet
ATEME
Vectorizing Fast Compression
Gregory Tucker and Roy Oursler
Intel Corporation
A Measurement Coding System for Block-Based Compressive Sensing Images
by Using Pixel-Domain Features
Jirayu Peetakul, Jinjia Zhou, and Koichi Wada
Hosei University
Rate Control Algorithm in HEVC Based on Scene-Change Detection
Jia Qin¹,², Huihui Bai¹,², and Yao Zhao¹,²
¹Beijing Jiaotong University, ²Beijing Key Laboratory of Advanced Information
Science and Network Technology
Dynamic Lists for Efficient Coding of Intra Prediction Modes in the Future
Video Coding Standard
Kevin Reuze¹, Wassim Hamidouche¹, Pierrick Philippe², and Olivier Déforges
¹INSA Rennes, ²Orange
Client-Driven Transmission of JPEG2000 Image Sequences Using
Motion Compensated Conditional Replenishment
J.J. Sánchez-Hernández¹, V. González-Ruiz¹, J.P. García-Ortiz¹, and D. Müller²
¹University of Almería, ²European Space Agency
Graph Filtering For Data Reduction and Reconstruction..................................................... 603

Ioannis D. Schizas
University of Texas at Arlington

Median Binary-Connect Method and a Binary Convolutional Neural Network for Word Recognition............................................................................................................... 604

Spencer Sheen1 and Jiancheng Lyu2
1UC San Diego, 2UC Irvine

FastIntra360: A Fast Intra-Prediction Technique for 360-Degrees Video Coding .......... 605

Iago Storch1, Bruno Zatt1, Luciano Agostini1, Luis A. da Silva Cruz2, and Daniel Palomino4
1Federal University of Pelotas, 2University of Coimbra

Hardware-Friendly Intra Region-Based Template Matching for VVC ............................. 606

Gayathri Venugopal, Philipp Helle, Karsten Müller, Detlev Marpe, and Thomas Wiegand
Fraunhofer Heinrich Hertz Institute (HHI)

Hard-Decision Quantization Algorithm Based on Deep Learning in Intra Video Coding................................................................................................................................. 607

Hongkui Wang, Shengju Yu, Ying Zhang, Zhuo Kuang, and Li Yu
Huazhong University of Science & Technology

A Global Co-saliency Guided Bit Allocation for Light Field Image Compression .......... 608

Kejun Wu1,2, Zongbang Liao1,2, Qiong Liu1,2, Yaguang Yin3, and You Yang1,2
1Huazhong University of Science and Technology, 2Wuhan National Laboratory for Optoelectronics, 3Academy of Broadcasting Science

Efficient and Fast Coefficient Sign Inference for Video Coding ........................................ 609

Daoyuan Xu1, Peiyin Xing1, Yuwei Wang2,3, and Yonghong Tian1,2
1Peking University, 2Pengcheng Laboratory, 3Beijing Institute of Technology

DNQ: Dynamic Network Quantization .............................................................................. 610

Yuhui Xu1, Shuai Zhang2, Yingyong Qi2, Jiaxian Guo1, Weiyao Lin1, and Hongkai Xiong1
1Shanghai Jiao Tong University, 2Qualcomm AI Research

Bank Select Method for Reducing Symbol Search Operations on Stream-Based Lossless Data Compression ................................................................. 611

Shinichi Yamagawa, Ryuta Morita, and Koichi Marumo
University of Tsukuba

Event-Triggered Stochastic Control via Constrained Quantization .................................. 612

Hikmet Yildiz1, Yu Su1, Anatoly Khina2, and Babak Hassibi1
1California Institute of Technology, 2Tel Aviv University

Enhanced Intra Block Copy with Planar Perspective Transformation for Urban Building Scenes ..................................................................................................................... 613

Qijun Wang, Chen Zhang, Jiafei Xu, and Chao Yang
Anhui University

Fast PU Early Termination Algorithm Based on WMSE for ERP Video Intra Prediction ................................................................................................................................. 614

Mengmeng Zhang1, Renbo Su1, Zhi Liu1, Fuqi Mao1,2, and Wen Yue2
1North China University of Technology, 2China University of Geosciences

Deep Multiple Description Coding by Learning Scalar Quantization .............................. 615

Lijun Zhao1, Huihui Bai1, Anhong Wang2, and Yao Zhao1
1Beijing Jiaotong University, 2Taiyuan University of Science and Technology
ResGAN: A Low-Level Image Processing Network to Restore Original Quality of JPEG Compressed Images

Chunbiao Zhu¹, Yuanqi Chen¹, Yiwei Zhang¹, Shan Liu², and Ge Li¹
¹Peking University, ²Tencent America
