

PROCEEDINGS OF SPIE

Synthesis and Photonics of Nanoscale Materials XVI

Andrei V. Kabashin
Jan J. Dubowski
David B. Geohegan
Editors

2–3 February 2019
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 10907

Proceedings of SPIE 0277-786X, V. 10907

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Synthesis and Photonics of Nanoscale Materials XVI*, edited by Andrei V. Kabashin, Jan J. Dubowski, David B. Geohegan, Proceedings of SPIE Vol. 10907 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PHOTONIC NANOMATERIALS FOR BIOMEDICAL APPLICATIONS II

10907 08	Femtosecond laser-ablative synthesis of plasmonic Au and TiN nanoparticles for biomedical applications [10907-7]
----------	---

PHOTONIC PROPERTIES AND APPLICATIONS OF NANOMATERIALS

10907 0D	Visualization of lattice dynamics and atomic motion in WSe₂ monolayer [10907-12]
10907 0G	Trace level pesticide detection utilizing gold nanoparticles and surface enhanced Raman spectroscopy (SERS) [10907-33]

LASER SYNTHESIS OF NANOPHOTONIC MATERIALS II

10907 0P	Synthesis of GeSn particles with high substitutional Sn concentration by pulsed laser deposition [10907-23]
----------	--

SYNTHESIS AND PHOTONICS OF NANOMATERIALS I

10907 0R	Laser fabrication of plasmonic nanostructures with controllable chirality by spiral-shape and vortex beams [10907-25]
10907 0S	Formation of nanoporous SiO₂ films with super-low dielectric constant by F₂ laser deposition [10907-26]
10907 0U	Laser-ablative synthesis of aggregation-induced enhanced emission luminophore dyes in aqueous solutions [10907-28]

SYNTHESIS AND PHOTONICS OF NANOMATERIALS II

10907 0X	Fluorescence cell imaging using carbon quantum dots generated by continuous fragmentation [10907-31]
----------	---

10907 0Y

Preventing spin relaxation of optically pumped alkali metal atoms by atomically thin hybrid polymer film coating [10907-32]
