8th Research in Engineering Education Symposium (REES 2019)

Making Connections

Cape Town, South Africa
10 - 12 July 2019

Editor:
Bruce Kloot

Table of contents: Volume I – Full papers

How to make pre-college STEM program and industry partner relationships successful: a systematized literature review of industry mentoring.................................................................1
Jessica Rush Leeker, Kayla Maxey, Monica Cardella and Morgan Hynes

Work-in-Progress: Engineering Students’ Changing Conceptions of the Value of Creativity ..........10
Sarah Zappe and Joseph Tise

Student Reflections on Proficiency with Learning Objectives: Early Semester Actions and Plans ......18
Heidi Diefes-Dux and Adam Carberry

Intent & Revision in Engineering Design ......................................................................................27
Douglas Lecorchick, Elizabeth McEneaney, Tamecia Jones, Cansu Tatar and Cigdem Meral

Student perceptions on intrapersonal skills required for academic succes .....................................37
Arthur James Swart

Patterns of Monthly Student Access to Feedback by Section in a Large Course using Standards-Based Grading and Reflection ..................................................................................46
Heidi Diefes-Dux and Laura Cruz Castro

Influence of Personal Epistemology on Research Method: Implications for Research Education ......56
David Walwyn

Through HER Lens: Examining How Black Women Create and Leverage Counter-Spaces in an Engineering Education Doctoral Program .................................................................64
Jessica Rush Leeker, Brianna Benedict, Kayla Maxey, H. Paige Brown and Monica Cardella

Re-Thinking the Industrial Engineering Curriculum in Light of Technological Changes ...............73
Tinashe Tendayi, Mncedisi Dewa, Mondolozi Gxamza and Joseph Akwunwa

Technology-Mediated Resources as a Substitute to Human Resources: Experiences of International Undergraduate Students in an Active, Blended, and Collaborative (ABC) Classroom in the USA ...........................................................................................................83
Rohit Kandakatla, Edward Berger, Jeffrey F. Rhoads and Jennifer DeBoer

Using Self-determination Theory to Evaluate Faculty Professional Development Programs ..........93
Camilo Vieira and Juan David Ortega-Alvarez

The role of the industry mentors in navigating the paradoxes inherent in work integrated learning .................................................................................................................................103
Tiyamike Ngonda, Corrinne Shaw and Bruce Kloot

Engineering teachers as action researchers through a community of practice at an alternative school for “street youth” in western Kenya ................................................................................113
Dhinesh Radhakrishnan, Sally Kimani, Esther Wairimu, Wesley Kimutai, Samwel Kimani and Jennifer DeBoer

Diversity in groups – students’ reflection ......................................................................................123
Martina Jordaan and Dolf Jordaan

Short Term International Service Learning: Reflections of Engineering Students on their Learning Experience ..........................................................................................................................132
Martina Jordaan, Hongwei Zhang, Li Liu and Hanxiao Zhou

An Analysis of Possible Predictors of Student Early Engagement with Professional Development Opportunities ..........................................................................................................................141
David Lowe and Anthony Kadi
Table of contents: Volume I – Full papers

Becoming a Researcher: A Narrative Analysis of U.S. Students’ Experiences in Australia .................. 150
Kirsten Davis and David Knight

Using continuous feedback as an alternative student evaluation of teaching .................................... 160
Homero Murzi

A strategy, harnessing the power of cooperative learning, suitable for problem-solving tutorials in mechanical engineering thermodynamics ......................................................................................... 170
Willem van Niekerk and Elsa Mentz

Why lecturers in an engineering school assess the way they do ......................................................... 180
Teresa Hattingh and Laura Dison

A comparative study to predict students’ performance based on their access pattern to the Learning Management System using an efficient machine learning algorithm ......................................................... 190
Sriudaya Damuluri, Pouyan Ahmadi and Khondkar Islam

Global Responsibility in Civil Engineering Practice in the UK: A Report of Work in Progress ................ 198
Shannon Chance, Inês Direito, Rob Lawlor, Katie Creswell-Maynard, Jon Prichard, Nick Tyler and John Mitchell

The development of engineering identity in an electrical engineering degree programme ........................ 208
Gabrielle Nudelman

Understanding Female Students’ Dissatisfaction in First-Year Engineering Teams ............................. 217
Laura Hirshfield and Robin Fowler

Integrating Computation into a Civil Engineering Curriculum Instructions at a Colombian Higher Education Institution ......................................................................................................................... 226
Camilo Vieira and Juan David Gomez

Gamification of a flipped classroom course: effects in students motivation and learning ..................... 236
Matías Recabarren and Benjamin Corvalán

Literature Review: Exploring Teamwork in Engineering Education ...................................................... 244
Tahsin Chowdhury and Homero Murzi

Assessing the grit and mindset of incoming engineering students with an emphasis on gender .......... 253
Inês Direito, Shannon Chance, Emanuela Tilley and John Mitchell

Exploring the Discursive Construction of Ethics in an Introductory Engineering Course .................... 262
Johanna Lönngren

Instructional Practice Learning Through Instructional Incubator Engagement .................................... 272
Cassandra Woodcock, Haley Antoine, Madison Tarnowski and Aileen Huang-Saad

Kristina Edström, Lars Geschwind, Sara Levander and Julia Engström

Creating Gender Inclusive Engineering and Science Classes: Establishing Baseline Experiences, Perceptions and Practices ....................................................................................................................... 292
Sally Male, Melissa Marinelli and Lee-Von Kim

Engineering students’ perceptions of the learning experience and its impact on student success ........ 302
Nancy Nelson and Robert Brennan
# Table of contents: Volume I – Full papers

Work-in-Progress: Attempted Authors’ Perspectives on the Peer Review Process of the Journal of Engineering Education

Stephanie Cutler, Kacey Beddoes and Rachel Croninger

- 311

Exploration of the Ethics and Societal Impacts Teaching Practices of Anglo and Western European Educators

Madeline Polmear, Daniel Knight, Angela Bielefeldt, Chris Swan and Nathan Canney

- 319

Moving from crime and punishment to success and reward: transitioning from technical to educational research

Sarah Dart, Kim Blackmore, Keith Willey, Anne Gardner, Jose Smitha, Raj Sharma, Sloan Trad and Lesley Jolly

- 329

Development of Socio-Technical and Co-Design Expertise in Engineering Students

Andrea Mazzurco, Scott Daniel and Jeremy Smith

- 339

Do Teaching and Learning Environments influence Students’ Conative Domain Development?

Nur Shahira Samsuri, Khairiyah Mohd Yusof, Azmahani Abdul Aziz, Maizam Alias and Syed Ahmad Helmi Syed Hassan

- 349

Identity in practice: Examining personal identities of engineering graduates in the transition to the workplace

James Huff

- 359

Access for All: Promoting Universal Design Thinking in a Rehabilitation Engineering Course

Brian Self and Jim Widmann

- 369

Constructing the Bourdieusian field of engineering education: Engineering education transformation as a field phenomena

Esther Matemba and Natalie Lloyd

- 378

Web tools for curriculum co-design: An indicator of engineering student graduate attributes

Cheryl Belford and Bronwyn Swartz

- 388

Perceptions of Interdisciplinary Learning: a qualitative approach

Renate Klaassen, Nanneke de Fouw, Remon Rooij and Youandi van der Tang

- 398

Legitimating Engineering Education Research: A View from Sociology of Knowledge

Mike Klassen and Jennifer Case

- 408

(Re-)validation of a standardised test instrument in a different national context

Julie Direnga and Christian Kautz

- 418

The CECI - Interview-based development of items for a control engineering concept inventory

Ferdinand Kieckhäfer, Julie Direnga and Christian Kautz

- 428

The smart engineering curriculum

Karin Wolff and Marthinus J Booysen

- 436

Changing instructor behavior and motivation related to active learning and strategies to reduce student resistance

Cynthia Finelli, Laura Carroll, Michael Prince and Jenefer Husman

- 445

Taking Teaching and Learning Online: A Sequential Mixed-Methods Study of an Online Chemical Engineering Module

Robert Huberts

- 454
Table of contents: Volume I – Full papers

Research-with-Practice: Insights From Delivering a Workshop Linking Undergraduate Research, Identity and Epistemic Thinking .................................................................464
Lisa Benson, Marian Kennedy, Cazembe Kennedy, Dennis Lee and Courtney Faber

Towards a collaborative strategy to research the teaching of ethics within the engineering curriculum across South African higher education institutions ........................................473
Alison Gwynne-Evans, Manimagalay Chetty and Sarah Junaid

University Dropout: A Prediction Ensemble Model for an Engineering Program in Bogotá, Colombia ..............................................................................................................483
Andrés Acero, Juan Camilo Achury and Juan Carlos Morales

Motivational insights into students' help-seeking behaviours in a resource-rich engineering course ................................................................................................................491
Amy Dunford, Edward Berger, Jeffrey Rhoads and Jennifer DeBoer

Assisting tutors to develop their student's competence when working with complexity ........501
Keith Willey and Tania Machet

Engineering Education Re-interpreted Using the Indigenous Sacred Hoop Framework .....................................................510
Jillian Seniuk Cicek, Afua Mante, Carolyn Gedert and Leah Fontaine

Design literacy practices in a mechanical engineering degree program: A multimodal social semiotic analysis of first and final year design reports ........................................520
Muaaz Bhamjee and Zachary Simpson

Teaching geotechnical engineering for practice-readiness: An action research project ........530
Maria Ferentinou and Zach Simpson

Academic SUCCESS: An Analysis of How Non-Cognitive Profiles Vary by Discipline for Engineering and Computer Science Students ..........................................................540
Jim Widmann, Brian Self, John Chen, Camaryn Chambers, Lisa Kusakabe, Jenna Landy, Edward Berger, Julianna Ge, Allison Godwin and Matthew Scheidt

Motivations and Offline Experience in a Blended STEM MOOC .................................................................549
Casey Haney, Jawaria Qureshey, S. Zahra Atiq, David Cox and Jennifer DeBoer

Individual versus collaborative study behaviors while using an automatic answer-checking feature ..........................................................................................................................558
Mohamed Aziz Dridi, Lori Breslow and Jennifer DeBoer

Busy Times, Productive Students: Cutoff Points Marking Time in University Engineering Culture ................................................................................................................568
Elizabeth Briody, Fredy Rodríguez-Mejía, Ruth Rothstein, Chuahao Wu and Edward Berger

Disciplinary learning in project-based undergraduate engineering education: the case for new knowledge ...................................................................................................................578
Ann Lahiff, Emanuela Tilley, Janet Broad, Andrea Detmer and Kate Roach

The Impact of Capstone Design Courses on New Engineering Graduates Preparation for Teamwork: A Mixed Methods Investigation ......................................................588
Daniel Knight, Christopher Gewirtz and Tahsin Chowdhury

Toward a Typology of the Sociotechnical in Engineering Practice .................................................................597
Brent Jesiek, Natascha Buswell, Andrea Mazzurco and Tasha Zephirin
Table of contents: Volume I – Full papers

National, disciplinary and institutional influences on curriculum: A preliminary exploration across two Washington Accord Countries .................................................................607
   Nicole Pitterson, Jennifer Case, Ashish Agrawal and Kevin Krost

First year engineering students’ perceptions of the purposes of classroom assessment .........617
   Ashish Agrawal, Nicole Pitterson and Jenni Case

The Role of Racial Identity in the Achievement Motivation of African American Engineering Students Engaged in Undergraduate Research Abroad .............................................................626
   Kendra DeLaine, Barbara Boakye, Stacie LeSure and Lorraine Fleming

A Translational Effort Focused on Student Reflection in Engineering Education ................635
   Jennifer Turns and Wendy Roldan

Extent and Depth of PBL Implementation – Survey results from over 300 PBL-implementing US engineering educators .................................................................................................645
   Angela van Barneveld and Johannes Strobel

The impact of prior transport-based experiences on academic interest and performance – a case study of undergraduate students in Transport Science modules at Stellenbosch University ..........654
   Megan Bruwer and Marion Sinclair

The diagnostic potential of admissions tests for South African Higher Education ..............664
   Robert Prince, Darlington Mutakwa and Janine Dunlop

An interrogation of the relationship between theoretical concepts and their application in practice in the curriculum of a professionally orientated higher education programme in South Africa ..........673
   Jonathan Pike

An exploration of first year engineering students’ perception of the university’s responsibilities ..........683
   Ashish Agrawal, Margaret Blackie and Reneé Smit

Multimodal representations for teaching problem solving in engineering dynamics: The case of a lecturer at a South African university ........................................................................693
   Kate le Roux and Bruce Kloot

The impact of the combined status of race and gender on the persistence of Black female STEM students .......................................................................................................................703
   Barbara Boakye, Dawn Williams, Kalynda Smith, Shaniqua Hodge and Lorraine Fleming

EngStarter: An Open-Hardware and IoT Integrated Education Kit for Increasing Community- Developed Solutions ........................................................................................................713
   Claudio Freitas, Zachary Beyer and Jennifer DeBoer

Development of Autonomy through Flipped Classroom Methodology in Probability and Statistics ........................................................................................................................................723
   Karen Angulo, Astrid Bernal and Mario Castillo

Trialling a problem-solving engineering learning environment ............................................733
   Karin Wolff, Lauren van Breda and Reynaldo Rodriguez

Identity in Practice: Reflections from Malaysian Women who are Practicing Engineers ..........741
   Jennifer DeBoer, Mohamed Dridi, S. Zahra Atiq, Daeyeoul Lee, Sarah Morton, Andrea De Labarrera Montppellier, Nehal Abu-Lail, Ashley Ater Kranov and Julie Kmec

Improving course retention rates in engineering education in refugee settings: Lessons from two case studies .............................................................................................................................751
   Moses Olayemi, Claudio Freitas, Dhinesh Radhakrishnan, Mohamed Aziz Dridi and Jennifer DeBoer
Table of contents: Volume I – Full papers

An Air Quality Inquiry: A Curricular Approach to Preparing Student Mentors of Air Quality Research Projects in Rural Schools ....................................................................................................761
   Daniel Knight, Leighanna Hinojosa, Joseph Polman and Michael Hannigan

Building a Repository of Instructional and Assessment Techniques for Instructional Module Development System .........................................................................................................................................771
   Srividya Bansal and Jeanette Mueller-Alexander

Building a national engineering educator community of practice .................................................................781
   Karin Wolff, Anton Basson, Deborah Blaine and Mandy Tucker

How do engineering lecturers perceive the Scholarship of Teaching and Learning (SOTL)? ..................790
   Deborah Blaine, Anton Basson and Cecilia Jacobs

Developing T-shaped individuals through the Master of Philosophy specialising in Sustainable Mineral Resource Development programme at the University of Cape Town? .............................................799
   Alexandra Himunchul, Alison Gwynne-Evans, Lorenzo Himunchul, Jennifer Broadhurst
# Table of contents: Volume II – Extended Abstracts

Designing Authentic Assessment in Engineering Education .................................810  
*Ekaterina Rzyankina*

Improving first year engineering students experiences: the role of providing psychosocial support through life coaching .................................................................817  
*Disaapele Mogashana, Moses Basitere and Ntsundeni Mapatagane*

The language question in Africa’s university engineering education: How optimal is multilingualism? .................................................................821  
*Kant Kanyarusoke and Tiyamike Ngonda*

Examining the socio-psychological phenomenon of shame in engineering with coupled interpretive methods .................................................................824  
*James Huff, Nicola Sochacka, Joachim Walther, Stephen Secules and Benjamin Okai*

Factors in Engineering Education that Influence Social Justice ........................827  
*Paula Barco-Alzate, Daniela Moreno-Luna and Catalina Ramírez*

Exploring the use of metacognition in learning science concepts ....................830  
*Kholisa Z. Papu, Paul Webb and Nokhanyo Mdzanga*

Developing a Conceptual Model of Construction Employees’ Professional Values 833  
*Hwangbo Bae, Denise Simmons and Cassandra McCall*

Grit as a key success indicator in engineering postgraduate studies, or: marks aren’t everything when choosing a student .......................................................836  
*Robbie Pott*

Professional engineering work: what knowledge matters? ...............................840  
*Nicky Wolmarans and Corinne Shaw*

Reflection on strategies and interventions used to reduce dropout in engineering first year courses: A case of Extended Curriculum Program .........................843  
*Moses Basitere, Disaapele Mogashana and Eunice Ivala*

Challenges and solution in an international collaborative aircraft design education project ...........846  
*Lelanie Smith*

Mathematical competencies of a cohort of engineering students at a university of technology ........850  
*Mark Jacobs and Pragashni Padayachee*

“Out of the Box” Low-Cost Portable Tinker Space for Elementary Engineering Education: A Classroom Resource .................................................................853  
*Douglas Lecorchick and Liz Gallo*

Assessment “as learning” in an extended engineering degree programme: implementing iPeer LMS feature to evaluate peer participation in teamwork ................................855  
*Erika Müller and Adriana Botha*

Enhancing Elementary Engineering Education with Stop-Motion Animation: An International Collaboration Project .................................................................859  
*Douglas Lecorchick*

Adoption of Computational Modelling in Introductory Engineering Course Modules: A Case Study ........................................................................................................862  
*Abel Nyamapfene*
Table of contents: Volume II – Extended Abstracts

Using a diagnostic test to inform and improve teaching for first year engineering students ..........865
  Helen Inglis, Adriana Botha, Janine Hechter, Derik le Roux, Hanlie Smuts and Alta van der Merwe

Engineering self-efficacy in former “street youth” in a residential school in Kenya: A case study ........868
  Casey Lynn Haney, Dhinesh Radhakrishnan, Samwel Kimani and Jennifer DeBoer

Developing growth mindsets to prevent dropout in engineering students at the University of
Cape Town............................................................................................................................................872
  Anita Campbell

The potential of utilising alternate capital in learning communities for managing alienation ..........875
  Kalpana Ramesh Kanjee and Corrinne Shaw

Extended abstract for the workshop: Unpacking the writing and publishing process for engineering
Education Researchers.........................................................................................................................879
  Lisa Benson, Adam R. Carberry, Jennifer Case, Kristina Edstrom, Cynthia J. Finelli,
  Kate le Roux, Arthur J. Stewart, Maartje van den Bogaard

Building the foreshore freeways: The politics of a freeway “artefact”.................................882
  L. Kane
