
Singapore
27 – 30 April 2019
Chapter I: Power System

A Cloud Analytics-based Electrical Energy Management Architecture Empowered by Edge Analytics Arduino with Push Notifications for Demand-Side Management

 Yu-Hsiu Lin

Optimal Sizing of Energy Storage System at Fast Charging Stations Under Electricity Market Environment

 HuiJuan Tan, Dapeng Chen and Zhaoxia Jing

Early Warning Method for Power Station Auxiliary Failure Considering Large-scale Operating Conditions

 Yang Tingting, Bai Yang, Ge Weichun, Luo Huanhuan, Zhou Guiping and Lv You

Analysis of Variation in Steam Turbine Time Constant on Dynamic Frequency Regulation of a Deregulated Power System

 Arun V Jose, Sunitha R and Deepak M

Impact of Voltage Variation on Hydroelectric Doubly Fed Machines – An Electro-thermomechnaical Investigation

 R. Raja Singh, V. Indragandhi, S. Umashankar

Analysis of Electricity Power Consumption and Cost Impact of Soekarno-Hatta Airport Railink Project...

 Indira Untari, Hizkia Sandhi Raharjo, Nayusrizal N and Chairul Hudaya
Study of Coal Inventory Planning Analysis in a Coal-fired Power Plant using Continuous and Periodic Review .............................................................................................................................................................33

Indra Aditya, Arionmaro Asi Simaremare and Chairul Hudaya

Chapter II: Electronic Device and System

Circulation and Its Influence on Meshed Multiterminal DC Distribution System .................................................................37

Hailong Ding, Zhichang YUAN, Peiqian Guo, Meng Song and Li Li

Evaluation of Full-SiC-Based Integrated Inverter Prototype ....................................................................................................43

Wei Jie Li, Yingtao Ma, Weiyao Mei, Tengfei Qiu, Weizhi Liu and Lijun Diao

Switching Ringing Suppression of SiC MOSFET in a Phase-Leg Configuration ..............................................................................47

Chengbo Gu, Kan Dong, Bo Liu, Yang Liu, Lijian Diao, Dongyi Meng

Design and Performance Analysis of Digital Control Laws for Low Power High Frequency Switching Power Supply ........................................................................................................................................................................51

Shubha Rao K and Veena S Chakravarthi

Theoretical Increase In Power Output Of Si-Based Photo-Voltaic Cell By Series Connected Metallic Photocathodes .........................................................................................................................56

Niloy Dutta and Venkatesa Perumal

The Effects of Vacuum and Oil Impregnation Duration on Partial Discharge of 167 MVA 500/150 kV Single Phase Power Transformer .........................................................................................................................61

Agus Indarto, Rudy Setiabudy, Radin Rahmatullah, Iwa Garniwa, Chairul Hudaya

Maloperation of Distance Relay under Faulty Conditions in presence of Static Synchronous Series Compensator ........................................................................................................................................................................66

Anjali Purohit, Vijay Gohokar

Parameters Optimization of Electronic Components in Voltage Sharing Circuit ................................................................................71

Kuo ZHANG, Dong LIU

Low-cost and Compact Window Comparator Circuit with MOSFET-Resistor Voltage References .........................................................................................................................75

Chuthong Summatta, Tharathip Phurahong, Weera Rattanangam and Weerathum Chaiyong

Stability analysis of bidirectional DC-DC converter for energy storage ..........................................................................................79

Chunhui Guan, Wei Jie Li, Xinyue Zhang, Yi Lv and Weiwei Yu

Sliding Mode Observer Based Sensorless Model Predictive Current Control for Induction Motor ...........................................................................84

Zhen Zhao, Zheng Ruan, Dongyi Meng, Yaru Xue, Chengbo Gu
Speed Sensorless Vector Control of Parallel Connected Induction Motor with Anti-Windup Integral-Proportional Speed Controller

Fanniesha Hamada, Faiz Husnayain, Feri Yusivar

A Lumped Electromechanical Model for Output Power from Partially Covered Piezoelectric Energy Harvester

Suresh K, K Shankar and C Sujatha

An Analysis of the Effects of Flexibility Modification on System Frequency Regulation

Niu Yuguang, Du Ming, Dong Enfu, Zhou Ke, Ge Weichun and Luo Huanhuan

Liquid Level Measurement Using Sensors with Microstrip Parallel Coupled Lines

Somchat Sonasang, Ravee Phromloungsri, Somkuan Srisawat, Weera Rattanagam, and Niwat Angkawisittapan

Speed Sensorless Control of Dual Induction Motor using Direct Torque Control - Space Vector Modulation

Hatib Setiana, Faiz Husnayain, Feri Yusivar

A Numerical Model comprising the Effect of Number of Turns on AC Losses in 2G HTS Coated Conductor at 77K using H-formulations

Abhinav Kumar, Ashish Agrawal and JV Muruga Lal Jeyan

Design Equation for Directly Computing Two Gains of PR Controller

Jessada Pan-On and Wirote Sangtungtong

Design Tuning PID Controller For Temperature Control Using Ant Colony Optimization

Supachai Prainetr, Tharathip Phurahong, Kamrai Janprom and Natchanun Prainetr

Chapter III: Smart Grid

A Convenient Power Flow Method for Ship's Shore Power Supplying Networks

Wang Weigong, Yang Haitao, Han Yuejun, Li Chao, Lu Xiaoyi, Zhao Rongbing

The Development of Power Substation Communication Using Independent Network of Synchronous Digital Hierarchy

Hartonno, Ariono Verdianto, Chairul Hudaya

Dynamic Model System of a Smart Distribution Network Based on Fault Location Test

Fengge Zhang, Dexian Yang and Tong Wu

Power supply capability calculation of urban transmission power system

Dapeng CHEN, HuiJuan TAN, Zhaoxia JING
Chapter IV: Renewable Energy Power System

Statistical Approach for Wind Speed Forecasting Using Markov Chain Modelling as the Probabilistic Model .......................................................... 177

Ahmed Abubakar Elwan and Hafiz Habibuddin

Enhancing passive cooling and natural ventilation for houses of various climatic zones of India........ 183

Shubham Kashyap, Vivek Kumar Gaba and Anil Kumar Tiwari

Hydrodynamic Analysis and Metal Temperature Calculation for the Water Wall of a 660MW Supercritical Boiler at Severe Peak Load Regulation .................................................................................. 188

Xin NIE, Ke ZHOU, Huanhuan LUO, Honggang LIU, Guangcai ZHANG, Nan WU

Study on Operation Strategy of System Connected to Large Scale Offshore Wind Power ............. 197

Nan Li, Xiaochen Wang and Jun Liu

Measurement-Based Voltage Stability Assessment by Augmented Coupled Single-Port Models Considering Wind Power Generators .................................................. 202

He-Nan Hsun, Jian-Hong Liu, Jie-Sheng Cheng and Xiu-Bo Jiang

An MILP-Based Model for Hybrid Renewable Energy System Planning Considering Equipment Degradation and Battery Lifetime ........................................................................ 207

Reynaldo C. Guerrero Jr., Michael Angelo A. Pedrasa

A Multi-Input High Step-up Converter for Renewable Energy-Drive Systems ................................. 212

Sudarat Khwan-on and Kuagoon Kongkanjana
Characteristics of Disturbance in Frequency 9 -150 kHz of Photovoltaic System under Fluctuated Solar Irradiance ............................................................217

Budi Sudiarto, Alya Zahra, Fauzan Hanif Jufri, I Made Ardita, Chairul Hudaya

Chapter V: Energy Conversion and Conditioning Technologies

Appliance Prediction from Total Energy Data - A Demand Response Method Using Simple and Complex Networks .........................................................................................222

Lakshmi Nambiar M, Krishna Chandran K S, Akshay Mohan, Vinod Kumar Gopal

Impact of meteorological parameters on short-term forecasting: Application to the Dakar site ........227

Amy MBAYE, Mamadou Lamine NDIAYE, Joseph Ndông, Vieux Traoré and Pape Alioune Sarr

Ndiaye

Study on Splash of Oil Droplets Colliding with Wall in Engine Crankcase........................................232

Lin Chen, Ronghua Huang, Pei Zhou, Jin Li

Three-Phase Single-Stage VSC Controlled Solar Photovoltaic System with Harmonic Filtering Capability Applied to DG .................................................................238

Nirav Patel, Ajay Kumar, and Nitin Gupta

A Review on Building Energy Savings Strategies and Systems (BE3S) ........................................................243

Abbas M. Al-Ghaili, Hairoladenan Kasim, Marini Othman, Bo Nørregaard Jørgensen, and Zainuddin Hassan

A Novel Distribution Circuit Reconfiguration for Loss Minima With Symbiotic Organism Search Algorithm ........................................................................................................250

S Venkatesh, G Gokulakrishnan, K Sathish Kumar and N Murali

Variation of Cost of Unserved Energy depending on Interruption Duration: A Case Study for Sri Lanka .. 254

D. Punsara Colambage, H.Y. Ranjit Perera

Simulation on Effects of Various Heat Load Layouts in Air Temperature Distribution of Container Data Center ........................................................................................................259

Muhammad Akmal, Nasruddin and Indra Wibisono

The Fabrication and Testing Development of Heat Pipe Wicks: A Review ........................................264

Putri Fadhillah Nugraha, Nandy Putra

Cogeneration Plant: Optimization of Heat Recovery Steam Generator (HRSG) ..................................272

Filian Arbiyani, Stefanus Randy Raharja and Wegie Ruslan
Effects of Harmonic Distortions on the Accuracy of Energy and Power Losses Measurements in a Water Treatment Industry..................................................................................277

Nayusrizal N, Indira Untari, Andi Aulia Putra and Chairul Hudaya

Co-combustion Characteristics of Low- and Medium-Rank Coal of the Circulating Fluidized Bed Boiler Coal Power Plant............................................................................................................282

Nur Cahyo, Ruly Bayu Sitanggang, Hamdan Hartono Alif, Chairul Hudaya

Study and Analysis the Mechanical Designing Process of Factor Attributes Towards the Propose Dewatering Devices in Wastewater Industry ........................................................................286

Fevi Syaifoelida, A.M Megat Hamdan, Azleyanti Azmin and Shahmin Fadzil

Choo Yan Jia Nicholas, Dhivya Sampath Kumar

Author Index
