

International Conference on Sustainable Materials, Systems and Structures (SMSS 2019)

New Generation of Construction Materials

RILEM Proceedings Pro 128, Volume 1

Rovinj, Croatia
20-22 March 2019

Editors:

**Marijana Serdar
Nina Štirmer
John Provis**

ISBN: 978-1-5108-9294-1

Preface	<i>XXIII</i>
Marijana Serdar, Nina Štirmer, John Provis	
KEYNOTE LECTURES	1
Nanotechnology and sustainability in concrete construction	2
Surendra P. Shah	
Roadmap of development and application of sustainable materials	3
Karen Scrivener	
SESSION 1: SCM Reactivity	4
Particle size optimization in multi-component cement	5
S. Adu-Amankwah, S. A. Bernal and L. Black	
The limiting factors of SCMs reaction at later age	6
Yosra Briki (1), Karen Scrivener (1) and Mohsen Ben Haha	
Comparative evaluation of use silica fume, blast furnace slag, limestone, metakaolin and red mud as supplementary cementitious materials for concrete	11
Roberto Cesar de Oliveira Romano, José Augusto Ferreira Sales de Mesquita, Gabriel Carpinelli Perozzi Brasileiro, Maria Alba Cincotto and Rafael Giuliano Pileggi	
Characterization and pozzolanic activity of UK alum water treatment sludge	19
M. Shamaki, L. Black	
Investigating the origins of metakaolin surface reactivity in the context of alkali-activated binders	27
V. Benavent (1), Q. H. Nguyen (1), J.-B. d’Espinose de Lacaillerie (1), M. Marinova-Atanassova (2), A.-M. Blanchenet (3) and C. A. Davy	
SESSION 2: Special session of TC 280-CBE Cold bitumen emulsion	35
Evaluation of local aggregate with chemical additives for microsurfacing mix	36
eiborlang Lyngdoh Ryntathiang (1), Alan Carter (2), Anjan kumar Siddagangiah	
Thermal impact of adding recycled glass in microsurfacing	44
Apparao Gandhi (1), Abdelghafour Zabayou (2), Saeed Badeli (3), Alan Carter (4), and, Michel Vaillancourt	

Characterisation and treatment of tunnel boring muds for their valorisation in road construction	52
A. Cabrerizo (1), D. Bulteel (1), J. Waligora (2), D. Bonneau (3) and F. Olard	
Influence of coarse recycled concrete aggregate on the durability of asphalt mixtures	60
A. Radević (1), G. Mladenović (1), D. Jevtić (1), D. Zakić (1), M. Aškračić	
Stone mastic asphalt reinforced by vegetable yarns	68
Peter Gallo (1), Jan Valentin	
Strength mechanism and improvement methods of cement bitumen emulsion mixture	76
Jian Ouyang, Wen Xu, and Lijun Hu	
Evaluation of the stiffness modulus and phase angle of cold in-place recycled mixtures for long curing periods	84
Bohdan Dolzycki (1), Mariusz Jaczewski (1) and Cezary Szydłowski	
Evaluating the cracking resistance of cement-bitumen treated materials using the semi-circular bending test	92
Chiara Mignini (1), Fabrizio Cardone (1), Alessandro Morbi (2), Luca Setti (2) and Andrea Graziani	
Field behaviour of cold-recycled asphalt mixtures for binder courses	100
Andrea Grilli (1), Chiara Mignini (2) and Andrea Graziani	
Experimental application of synthetic lightweight aggregates for the production of special asphalt concretes	108
P. Tataranni (1) and C. Sangiorgi	
SESSION 3: Durability of AAMs	116
Testing the durability of alkali-activated concretes	117
John Provis	
Behaviour of reinforced alkali-activated fly ash mortars under leaching conditions	118
Petr Hlaváček (1), Steffi Reinemann (2), Gregor J.G. Gluth (1), Gino Ebell (2) and Jürgen Mietz	
Thermal properties and steel corrosion in lightweight alkali activated mortars	125
L. Carabba (1), G. Masi (1), S. Pirskawetz (2), S. Krüger (2), G. J. G. Gluth (2), M. C. Bignozzi	
Durability of fly ash-based alkali-activated mortars reinforced with short hemp fibres	133
Bojan Poletanović (1), Ivan Janotka (2), Michal Bačuvčík (2), Ildiko Merta	

Durability of alkali-activated concrete mixtures – a requirement for success in the market	141
Katja Dombrowski-Daube, Jan Sachl	
Non-classical reaction pathways in alkali-activated systems	150
L. Valentini	
SESSION 4: Waste ashes as SCMs	155
Properties of cementitious materials with sewage sludge ashes	156
M. Saillio (1), L. Andrade (1) M. Mehdi (1)(2) T. Chaussadent (1) and Arezki Tagnit-Hamou	
Early-age structural development of cement blended with flash calcined dredging sediments	164
Céline Van Bunderen (1), Ruben Snellings (2), Lucie Vandewalle (1) and Özlem Cizer	
Durability of high carbon biomass ash-based binder	172
Piyush Chaunsali (1), Hugo Uvegi (2), Brian Traynor (2) and Elsa Olivetti	
The effect of MSWI fly ash on mortar workability	180
Benjamin A. R. Ebert (1), Britt-Marie Steenari (2), Mette R. Geiker (3) and Gunvor M. Kirkelund	
Pre-treatments of MSWI bottom ash for the application as supplementary cementitious material in blended cement paste	187
Boyu Chen (1), Yubo Sun (1), Loic Jacquemin (1), Shizhe Zhang (1), Kees Blom (2) Mladena Luković (3) Guang Ye	
SESSION 5: UHPC	194
Effects of different chemical pretreatments of natural fibers on the mechanical properties of cement mortar	195
S. Juradin (1), I. Boko (1), I. Netinger Grubeša (2) and S. Mrakovčić	
The influence of nano SiO₂ and curing regimes on mechanical properties of UHPFRC	202
Ksenija Janković (1), Marko Stojanović (1), Dragan Bojović	
Strain-hardening ettringite-based composite with polypropylene fiber reinforced ladle slag: durability under combined chloride and sulfate attack	210
Hoang Nguyen (1), Paivo Kinnunen (1), Valter Carvelli (2), and Mirja Illikainen (1)	
Mechanical and insulation properties of ultra-high performance concrete with expanded polystyrene	217
Anjaneya Dixit (1), Sze Dai Pang (1) and Juhyuk Moon (2)	
Effect of pre-impregnation process on the tensile behavior of glass yarn/ettringitic matrix composite	223
Omayma HOMORO, Marie MICHEL and Thouraya. N. BARANGER	

Rubberised concrete refinement by cement substitution and rubber particle pre-treatment	231
Dr. Thomaida Polydorou, Dr. Kyriacos Neocleous, Dr. Loukas Koutsokeras, Dr. Georgios Constantinides, Dr. Nicholas Kyriakides, Prof. Kypros Pilakoutas and Prof. Diofantos Hadjimitsis	
Experimental investigation of corroded steel anchorages in strain resilient cementitious composites	239
Souzana P. Tastani, Christos Dakidis	
SESSION 6: Trends in aggregate	247
Early-age evolution of recycled concrete strength: insights from micromechanics modeling and experimental testing	248
Markus Königsberger, Brice Delsaute and Stéphanie Staquet	
The study on fundamental properties and self-healing performance of concrete using belite-gehlenite clinker as fine aggregate	255
Fumihiro Watanabe, Hiromi Fujiwara, Masatoshi Maruoka, Shunnosuke Ito and Kensuke Hayashi	
The producing technology and improved methods of the recycled concrete aggregate	263
Ting Du	
Experimental study on properties of concrete containing molten slag from integrated coal gasification combined cycle as fine aggregate	264
Ryotaro Kobayashi, Hiromi Fujiwara, Masanori Maruoka, Yuto Yamanaka	
Recycled aggregates produced from two different feedstock materials – Applied in ready-mixed concrete	272
Hernan Mujica, Egil Velde, Christian J. Engelsen, Monica S. Nodland	
Variation in physical and environmental properties of recycled concrete aggregates from C&D waste in Delhi	280
Christian J. Engelsen, Harsha Meenawat, Arun Kumar Sharma, Gaurav Bhatiani, Kshemendra Nath P, Monica S. Nodland	
Optimizing performances of recycled aggregates for improving concrete properties	287
L. Courard, E. Tabarelli, F. Michel, S. Delvoie, M. ElKarim Bouarroudj, Ch. Colman, Z. Zhao	
SESSION 7: Innovation in chemistry and nanotechnology	295
Effects and potentials of plant-based chemical admixtures on the performance of cementitious construction materials	296
Wolfram Schmidt, Ines L. Tchegnina Ngassam, Kolawole A. Olonade, Rose Mbugua and Hans-Carsten Kühne	

Mechanical behavior and neutron shielding performances of TiO₂-incorporated cement composites	297
Jaeyeon Park, Sungwun Her, Heongwon Suh, Seung Min Woo, Keunhong Jeong and Sungchul Bae	
Effect of titanate nanotubes on the properties of cement-based composites	304
Hyeonseok Jee, Jaeyeon Park, Sungwun Her, Erfan Zalnezhad, Keunhong Jeong and Sungchul Bae	
Influence of PRAH crystalline admixtures on the durability of concretes	312
Kosmas K. Sideris, Christos Tassos, Alexandros Chatzopoulos, Panagiota Manita	
A comparison of graphene oxide, reduced graphene oxide and pure graphene: early age properties of cement composites	318
Tanvir S. Qureshi and Daman K. Panesar	
A new admixture for concrete with clay contaminated sand	326
O. Mazanec, F. Morati, A. Große-Sommer	
SESSION 8: Candidates for AAMs	327
Instantaneous activation energy of alkali activated materials	328
Shiju Joseph, Siva Uppalapati and Özlem Cizer	
Mechanical parameters of metakaolin-based geopolymer with CRT glass waste fine aggregate	329
Natalia Paszek, Marcin Górski	
Development of alkali-activated magnesium aluminosilicate binders from soap-stone	337
Z. Abdollahnejad, T. Luukkonen, M. Mastali, J. Yliniemi J, P. Kinnunen, M. Illi-kainen	
Production of alkali-activated binders from iron silicate fines	345
John L. Provis, Angel L. Muñoz Gomez, Oday H. Hussein, Gaone Koma, Emanuela Manolova, Vladislav Petrov	
Mixture proportioning for alkali-activated slag-based concrete	353
Ning Li, Caijun Shi, Zuhua Zhang, Deju Zhu	
Alkali activation of high MgO BFS with sodium carbonate added dry vs. wet	354
Abeer M. Humad, John L. Provis, Andrzej Cwirzen	
SESSION 9: Alternative binders	362
Hydration of MgO in the presence of hydromagnesite	363
Frank Winnefeld, Eugenia Epifania, Fabio Montagnaro and Ellis M. Gartner	
Radioactive waste conditioning using alumina-silicate binary blends	371
Bastien Planel, David Lambertin and Catherine A. Davy	

Chemical and microstructural characterisation of lime and lime-metakaolin pastes with linseed oil	378
C. Nunes, P. Mácová, D. Frankeová, R. Ševčík and A. Viani	
Use of biomass fly ash for the production of low energy blended calcium sulfoaluminate cements	386
M. Marroccoli, M. De Biasi and A. Telesca	
A preliminary study of thermodynamic modelling of calcium sulfoaluminate cement-based material	394
Yoon, H.N., Park, S.M., Kil, T.G. and Lee, H.K.	
Properties of Ordinary Portland Cement Clinker with municipal solid waste incineration bottom ash as raw meal additive	400
Aneeta M. Joseph, Stijn Matthys and Nele De Belie	
SESSION 10: Novelties in SCMs	406
Ternary binder made from coal combustion products: mechanical properties and microstructure evolution	407
Vít Šmilauer, Rostislav Šulc, Pavel Reiterman, Petr Hlaváček, Martina Šídlová, František Škvára, Adéla Peterová, Roman Snop	
Use of Carbonated Waste Hardened Cement Powder as a Supplementary Cementitious Material	415
Bao Lu, Caijun Shi	
Early strength improvement of sustainable shotcrete	416
Lukas G. Briendl, Joachim Juhart, Markus Krüger, Florian Mittermayr, Isabel Galan	
Utilization of rice husk ash as reactive filler for enhancing material properties of ultra-high performance concrete	424
Sung-Hoon Kang, Yang-Hee Kwon and Juhyuk Moon	
Potential USE of ash from the paper industry as SCM	432
Sabina Kramar, Vilma Ducman	
A study on feasibility of cement clinker manufacture using oyster shell as limestone substitute	439
Sungwun Her, Hyeonseok Jee, Taehoon Park, Dongcheon Park and Sungchul Bae	
SESSION 11: Calcined clay	447
Comparing the reactivity of different natural calcined clays under alkali activation	448
Ahmed Zohair Khalifa, Yiannis Pontikes, Jan Elsen, Özlem Cizer	
Summary of 4-years of research at IIT Madras on concrete with limestone calcined clay cement (LC3)	449
Ravindra Gettu, Manu Santhanam, Radhakrishna G. Pillai, Yuvaraj Dhandapani, T. Sakthivel, Sripriya Rengaraju, Sundar Rathnarajan, Fathima Suma M., Anusha S. Basavaraja, Sanoop Prakasan and Nithya Nair V.G.	

Limestone calcined clay cements (LC3): effect of raw material properties on hydration and strength	457
Franco Zunino, Karen Scrivener	
Investigation of calcined brick clays from central Germany for use as a sustainable pozzolan	462
Nsesheye S. Msinjili, Gregor J. G. Gluth, Nico Vogler, Sebastian Simon and Hans-Carsten Kühne	
Pozzolan potential of calcined clay in high-performance concrete	470
Nancy Beuntner, Andrea Kustermann and Karl-Christian Thienel	
Influence of temperature on the hydration of limestone calcined clay cements (LC3)	478
François Avet and Karen Scrivener	
SESSION 12: Bio-based materials	484
Influence of hydric solicitations on the morphological behavior of hemp concrete	485
F. Bennai, C. El Hachem, K. Abahri and R. Belarbi	
Sustainable Hemp-Clay-Lime Concrete	486
Rotem Haik, Isaac A. Meir and Alva Peled	
Self – compacting concrete with tailings and fly ash as ecological material	494
Iva M. Despotović, Ksenija S. Janković, Dragan M. Bojović, Marko S. Stojanović	
Influence of aggregate type on basic properites of cement mortars blended with mixture of wheat and soya straw ash	500
Mirjana Malešev, Slobodan Šupić, Miroslava Radeka, Vlastimir Radonjanin, Tiana Milović, Olivera Bukvić	
Improving resilience of earth construction - current perspectives and future outlook	508
S. S. Lucas, F. Ahmed, H. Varum	
Effect of tire powder and wood biomass ash on properties of self compacting concrete	515
Robert Bušić, Nina Štirmer and Ivana Miličević	
SESSION 13: 3D printing	523
Surface modification as a technique to improve inter-layer bonding strength in 3D printed cementitious materials	524
J. Van Der Putten, G. De Schutter and K. Van Tittelboom	
Powder bed 3D printing with geopolymers	525
Vera Voney, Pietro Odaglia, Gnanli Landrou, Coralie Brumaud, Andrei Jipa, Isolda Agustí-Juan, Benjamin Dillenburger, Guillaume Habert	
High-performance 3d printable concrete enhanced with nanomaterials	533

Jacques Kruger, Marchant van den Heever, Seung Cho, Stephan Zeranka and Gideon van Zijl

SESSION 14: AAMs for specific applications	541
LowCopReCon – Low Carbon Precast Concrete ProdUcts for an energy efficient built Environment	542
T.E. McGrath, J. Kwansy, T. Aiken, S. Cox, M. Soutsos, J.F. Chen, J. Mariotti, R. Correia and S. Toal	
Improving mechanical characteristics of lightweight geopolymers through mechanical activation of fly ash	550
Tijana G. Ivanović, Miroslav M. Komljenović, Nataša M. Džunuzović, Violeta M. Nikolić and Gordana G. Tanasijević	
Preliminary studies on brown coal fly ash as a cement replacement for geopolymer brick applications	558
Muhamed Khodr, David Law, Chamila Gunasekara and Sujeeva Setunge	
Reactivity of alkali-activated binders for stabilization/solidification of tunnel boring muds	566
Thomas Wattez, Martin Cyr, Cédric Patapy, Julien Waligora, François Olard, Laurent Frouin and Nicolas Musikas	
Irradiation resistance of MK-based geopolymers encapsulating oily wastes	574
Daniel A. Geddes, Susan A. Bernal, Martin Hayes and John L. Provis	
SESSION 15: Self-Healing	581
Chloride Migration Coefficient of Cracked Mortar Incorporating Self-Healing Materials	582
Fahad R. Abro, Abdul S. Buller, Kwang Myong Lee and Seung Yup Jang	
Investigation on self-healing characteristic of cementitious materials incorporating supplementary cementitious material and crystalline admixture according to exposed environment	587
B. Park, S. W. Oh, Y. C. Choi, S. W. Yoo and S. W. Jung	
Self-sealing of cracks in cementitious materials incorporating superabsorbent polymers under wet/dry cyclic conditions	593
S. Choi, G. Hong and C. Song	
Self-healing performance of engineered cementitious composites through the use of nano-silica	598
Oğuzhan Öztürk, Gürkan Yıldırım, Ülkü S. Keskin and Mustafa Şahmaran	
Effect of superabsorbent polymers on plastic shrinkage cracking and properties of fresh state mortars reinforced by polymeric fibres	606
Rohollah Rostami, Agnieszka J. Klemm	

Design and testing of anionic superabsorbent polymers for use in durable concrete structures 614

Laurence De Meyst, Els Mannekens, Maria Araújo, Didier Snoeck, Kim Van Tittelboom, Sandra Van Vlierberghe, Geert Deroover, Nele De Belie
