CONTENTS

CODES AND STANDARDS

ASME CODE SECTION XI ACTIVITIES

PVP2019-93211........................................................................................................... V001T01A001
Quantification of the Conservatisms in the Flaw Acceptability Assessment of Doel 3 and Tihange 2 RPVs Containing Hydrogen Flakes
Valery Lacroix, Pierre Dulieu

PVP2019-93218........................................................................................................... V001T01A002
Further Improvements to ASME Section XI Code Case N-806 in a Proposed Second Revision
Robert O. McGill, George A. Antaki, Mark A. Moenssens, Douglas A. Scarth

PVP2019-93508........................................................................................................... V001T01A003
A Co-Reliability-Target-Based Fatigue Failure Probability Model for Implementing the New ASME Boiler and Pressure Vessel Section XI Division 2 Reliability and Integrity Management Code: A Technical Brief
Jeffrey T. Fong, N. A. Heckert, J. J. Filliben, Stephen W. Freiman

PVP2019-93870........................................................................................................... V001T01A004
Consideration on Fatigue Crack Growth Thresholds Under Negative Stress Ratio
Kunio Hasegawa, Saburo Usami, Valery Lacroix

PVP2019-93988........................................................................................................... V001T01A005
Technical Basis for Expansion of ASME BPVC Section XI, KIC Curve Applicability
Hongqing Xu, Nathan Palm, Anees Udyawar

PVP2019-94009........................................................................................................... V001T01A006
Application Examples of ASME Code Case N-513 Implementation
Robert O. McGill, Russell C. Cipolla, Eric J. Houston, Ronald J. Janowiak

PVP2019-94080........................................................................................................... V001T01A007
Paul Donavin, Warren Bamford, Stephen Marlette

DEVELOPMENTS IN HDPE AND NON-METALLIC PIPE CODES AND STANDARDS

PVP2019-93071........................................................................................................... V001T01A008
Sustained Pressure Test Results for Surface Scratches in PE4710, Cell Classification 445574C High Density Polyethylene Pipe Material
Jason Hebeisen, Timothy M. Adams, Douglas Munson
PVP2019-93499
Development of Chinese Standard on Ultrasonic Inspection for Electrofusion Joint of Polyethylene Pipe
Weican Guo, Yangji Tao, Jianfeng Shi, Cunjian Miao, Haijian Zhong, Jinyang Zheng

PVP2019-93767
Technical Basis for Maximum Allowable Indentation Depths in HDPE Pipes for Proposed ASME Section III Code Case on Alternative Requirements to Appendix XXVI for Inspection and Repair
Douglas Scarth, Prabhat Krishnaswamy, Phillip Rush, Douglas Munson

ENVIRONMENTAL FATIGUE ISSUES (JOINT WITH M&F)

PVP2019-93085
Environmentally Assisted Fatigue Data From the INCEFA-PLUS Project
Matthias Bruchhausen, Alec McLennan, Roman Cicero, Caitlin Huotilainen, Kevin Mottershead, Jean-Christophe le Roux, Marc Vankeerberghen

PVP2019-93134
Environmentally-Assisted Fatigue Behavior of 316 Stainless Steels in Simulated PWR Primary Environment: Strain Holding, Zn-Addition, and Their Combined Effect
Hyeon Bae Lee, Ho-Sub Kim, Junjie Chen, Changheui Jang, Tae Soon Kim, Gary L. Stevens, Kawaljit Ahluwalia

PVP2019-93271
Study on Effects of Non-Isothermal Condition and Strain Holding on Environmentally Assisted Fatigue in PWR Primary Water Environment (Step III)
Daiki Takagoshi, Seiji Asada, Yuichirou Nomura, Gary Stevens, Kawaljit Ahluwalia

PVP2019-93276
INCEFA-PLUS: Increasing Safety in NPPs by Covering Gaps in Environmental Fatigue Assessment
Kevin Mottershead, Matthias Bruchhausen, Sergio Cicero, Sam Cuvilliez

PVP2019-93279
Strain-Controlled Low Cycle Fatigue of Stainless Steel in PWR Water
Tommi Seppanen, Jouni Alhainen, Esko Arilahti, Jussi Solin

PVP2019-93317
Particular Fatigue Resistance of Stabilized Stainless Steel: Endurance Limit, Strength and Ductility of Fatigued Steel
Jussi Solin, Jouni Alhainen, Esko Arilahti, Tommi Seppanen, Wolfgang Mayinger

PVP2019-93563
A Critical Review of Recent Fatigue Crack Growth Data in Relation to ASME Code Case N-809
Jonathan Mann, Chris Currie, David Tice, Norman Platts
Fatigue of NPP Components Simulated by Non-Uniformly Strained Stainless Steel Specimens
Jussi Solin, Jouni Alhainen, Esko Arilahti, Tommi Seppanen, Wolfgang Mayinger

Scaling of SN Curves for Varying ‘Initiation’ Crack Definitions From Striation Counted Environmental Fatigue Specimens: A 250 Micron Austenitic Stainless Steel SN Curve and Associated Fen Factors
Joseph Batten, Chris Currie, Jonathan Mann, Keith Wright

Critical Review of Strain Measures for Characterisation of Fatigue Damage in ASME Section III Fatigue Assessments
Daniel Leary, Chris Currie, Keith Wright

Extension of Weighted Stress Intensity Factor Rate (WKR) Method to Characterisation of Varying Temperature and Loading Rate in Plant Realistic Waveform Fatigue Crack Growth Calculations
Chris Currie, Jonathan Mann, Peter Gill, Daniel Leary, Keith Wright

Important Effects in Environmentally Assisted Fatigue (EAF) of Austenitic and Ferritic Steel Components Including Welds and Their Consideration in a Fatigue Assessment Concept
Jurgen Rudolph, Matthias Herbst, Armin Roth, Christian Swacek, Tim Schopf

Fatigue Initiation of 304L Stainless Steel Subject to Thermal Shock Loading in a PWR Environment
Peter Gill, Peter Brown, David Tice, Norman Platts, Chris Currie

Tensile Behavior of 82/182 Filler, Butter and Heat-Affected-Zones in a 508 LAS - 316 SS Dissimilar Weld: Tensile Test, Material Model and Finite Element Model Validation
Subhasish Mohanty, Joseph Listwan, Saurindranath Majumdar, Krishnamurti Natesan

Implementation and Validation of a Fully Mechanistic Fatigue Modeling Approach in a High Performance Computing Framework
Bipul Barua, Subhasish Mohanty, Saurindranath Majumdar, Krishnamurti Natesan

Time-Series Fatigue Damage States Forecasting and Probabilistic Environmental Fatigue Life Prediction Using Markov-Chain-Monte-Carlo Techniques
Jae Phil Park, Subhasish Mohanty, Chi Bum Bahn
Environmental Fatigue Management for Long Time Operation: Finnish Point of View
Jussi Solin, Tommi Seppanen, Petri Lemettinen, Juha Isometsa, Erkki Pulkkinen

FATIGUE AND RATCHETING ISSUES IN PRESSURE VESSEL AND PIPING DESIGN

Mode I Ductile Crack Growth of 1TCT Specimen Under Large Cyclic Loading: Part III
Kiminobu Hojo

Method B Fatigue Screening in ASME BPV Code, Section VIII, Division 2, Part 5
Kenneth Kirkpatrick, Christopher R. Johnson, J. Adin Mann III

Ratcheting due to Thermal Stratification
R. Adibi-Asl, D. O’Kane, E. Chen

FATIGUE ASSESSMENT AND MANAGEMENT: A PROBABILISTIC PERSPECTIVE

Lower Tail Estimation of Fatigue Life
D. Gary Harlow

Uncertainty Quantification and Sensitivity Analysis for Net Section Collapse Criterion of Pipes Under Pressure and Bending
Y. S. Garud, Gary L. Stevens

FATIGUE MONITORING AND RELATED ASSESSMENT METHOD

Fatigue Assessment and Monitoring of a Dented Pipeline Specimen

Evaluation of Fatigue Crack Growth at Piping of Austenitic Stainless Steel Under Biaxial Stress
Shogo Harada, Takanori Kitada, Takao Nakamura

Determination of Inspection Intervals Based on Realistic Load Monitoring and Fracture Mechanics
Jurgen Rudolph, Steffen Bergholz, Dalibor Jerinic, Detlef Rieck
FRACTURE TOUGHNESS AND OTHER SMALL SPECIMEN MECHANICAL PROPERTIES

PVP2019-93797
Master Curve Fracture Toughness Characterization of Eurofer97 Steel Variants Using Miniature Multi-Notch Bend Bar Specimens for Fusion Applications
Xiang Chen, Mikhail A. Sokolov, Arunodaya Bhattacharya, Logan N. Clowers, Tim Graening, Yutai Katoh, Michael Rieth

PVP2019-93964
PTS Evaluation Case Study Considering Actual Through-Wall Fracture Toughness Distribution
Masato Yamamoto, Masaki Nagai

PVP2019-94064
A Framework for Estimating Burst Test Fracture Toughness for Zr-2.5Nb Pressure Tubes Using Data From Small Specimen Tests
Steven X. Xu, Kim Wallin, David Cho

HIGH TEMPERATURE CODES AND STANDARDS

PVP2019-93096
The Influence of Multiaxial Stress Relaxation on Component Creep Damage Accumulation
Nayden Matev, Robert A. Ainsworth, Meini Su, Mark Stevens, Alan Jappy

PVP2019-93641
A Unified Engineering Inelastic Model for 316H Stainless Steel
V.-T. Phan, M. C. Messner, T.-L. Sham

PVP2019-93777
Development of the External Pressure Charts for 2\([\text{frac}14]\)Cr-1Mo and Mod.9Cr-1Mo Steel at Elevated Temperature Design
Masanori Ando, Satoshi Okajima, Kazumichi Imo

HYDROGEN EFFECTS ON MATERIAL BEHAVIOR FOR STRUCTURAL INTEGRITY ASSESSMENT

PVP2019-93447
Assessment of Leak Before Break of a Newly Developed Type II Pressure Vessel With High-Pressure Hydrogen Gas
Hiroshi Okano, Akihide Nagao, Kazuki Matsubara, Nobuyuki Ishikawa, Shusaku Takagi, Satoshi Kitagawa, Toshio Takano

PVP2019-93533
Managing the Risks Associated With Operating a Hydrotreater Reactor With Possible High-Temperature Hydrogen Attack Damage
Phillip E. Prueter, Ryan Jones, Jacki Hess, Joel DeLuca
Technical Basis for Master Curve for Fatigue Crack Growth of Ferritic Steels in High-Pressure Gaseous Hydrogen in ASME Section VIII-3 Code

Chris San Marchi, Joseph Ronevich, Paolo Bortot, Yoru Wada, John Felbaum, Mahendra Rana

Evaluation of the Crack Interaction and Failure Behavior of Components With Crack Fields Using a Damage Mechanical Approach

Christian Swacek, Patrick Gauder, Michael Seidenfuss

IMPROVEMENT OF FLAW CHARACTERIZATION RULES FOR FFS

Plastic Collapse Stresses for Thick Wall Pipes With External Cracks

Kunio Hasegawa, Yinsheng Li, Valery Lacroix, Vratislav Mares

A Comparison of Proximity Rules for Surface Planar Flaws

Araf Bouydo, Pierre Dulieu, Valery Lacroix, Kunio Hasegawa, Vratislav Mares

Comparison of Allowable Bending Moments for Circumferentially Flawed Pipes in ASME Boiler and Pressure Vessel Code Section XI Nonmandatory Appendices C and H

Hune-Tae Kim, Ji-Su Kim, Jun-Min Seo, Yun-Jae Kim, Kuk-Hee Lee, Nam-Su Huh

Generic Proximity Rules for Multiple Radially Oriented Planar Flaws: Technical Basis of Code Case N-877 Revision 1

Pierre Dulieu, Valery Lacroix, Kunio Hasegawa

INTEGRITY OF CAST STAINLESS STEEL PIPE

Recent Improvements in Toughness Prediction of Cast Duplex Stainless Steel Components

Patrick Le Delliou, Sebastien Saillet

Flaw Evaluation Procedure for Cast Austenitic Stainless Steel Materials Using a Newly Developed Statistical Thermal Aging Model

M. Uddin, C. Sallaberry, G. Wilkowski

Introduction of CASS Pipe Flaw Evaluation of JSME Rules on Fitness for Service

Kiminobu Hojo

RECENT DEVELOPMENTS IN EUROPEAN CODES AND STANDARDS

PVP2019-93033........................................................................................................... V001T01A080
New French Nuclear Pressure Equipment Regulation in 2019 and Use of Codes
Philippe Malouines, Andrew Wasylyk, Pascal Duranton

PVP2019-93154........................................................................................................... V001T01A081
Optimising the Safe Design of Pressurised Components
Alison N. O'Connor, Catrin M. Davies, Stephen J. Garwood, Isabel Hadley

PVP2019-93343........................................................................................................... V001T01A082
RCC-M Code: Recent Evolutions and Perspectives
Manuela Triay, Eric Meister, Benoit Lefever, Sylvain Puybouffat, Julien Quere, Emmanuel Chantelat, David Muller, Julien Cadith, Stephane Marie, Nicolas de Mathan

PVP2019-93435........................................................................................................... V001T01A083
ASME XI-RSE-M: General Comparison of Flaw Evaluation Rules
Claude Faidy

PVP2019-93861........................................................................................................... V001T01A084
UK Programme on Codes, Standards and Procedure Needs for SMR and Gen IV Reactors: Phase 1 Output
P. M. James, N. J. Underwood, J. K. Sharples

PVP2019-93910........................................................................................................... V001T01A085
Outline of the Recent Consolidated Revision of EN13445-3, Clause 18 and Related Annexes: Detailed Assessment of Fatigue Life
Jurgen Rudolph, Guy Baylac, Ralf Trieglaff, Rudiger Gawlick, Michael Kramer, Yves Simonet, Manuela Triay

REPAIR, REPLACEMENT, AND MITIGATION FOR FITNESS-FOR-SERVICE RULES

PVP2019-93232........................................................................................................... V001T01A086
New Code Case Development for the Mitigation of PWSCC and CISCC in ASME Section III Components by Advanced Surface Stress Improvement Technology
Sungwoo Cho, Nicholas Mohr, Young Sik Pyun, Auezhan Amanov, John Broussard

PVP2019-93316........................................................................................................... V001T01A087
Hot Cell Pulsed Laser Welding of Neutron Irradiated Type 304 Stainless Steel With a Maximum Damage Dose of 28 DPA
Paula D. Freyer, Jonathan K. Tatman, Frank A. Garner, Greg J. Frederick, Benjamin J. Sutton

PVP2019-93330........................................................................................................... V001T01A088
A Development of the Technical Basis for the New Code Case "Mitigation of PWSCC and CISCC in ASME Section III Components by the Advanced Surface Stress Improvement Technology"
Technical Basis for Weld Overlay Repair to Address Thermal Fatigue Cracking in Class 1, 2, and 3 Nuclear Reactor Piping
Stephen Marlette, Steven L. McCracken, David Segletes

Evaluation of Laser Peening for Mitigation of Primary Water Stress Corrosion Cracking in Pressurized Water Reactors
Stephen Marlette, Stan Bovid

Review of Ferrite Number (FN) Requirements and Proposed Changes to Code Case N-504-4 and Nonmandatory Appendix Q
Steven L. McCracken, David Segletes

Full Structural Weld Overlay on a Super Emergency Feedwater Nozzle at the Dukovany Nuclear Power Plant
Steven L. McCracken, Marek Palan, Pavel Mlynar, Nicholas Mohr

Auxiliary Beam Stress Improved Laser Welding for Repair of Irradiated Light Water Reactor Components
Jian Chen, Jonathan Tatman, Zhili Feng, Roger Miller, Wei Tang, Maxim Gussev, Keith Leonard, Benjamin Sutton, Greg Frederick

Friction Stir Welding and Preliminary Characterization of Irradiated 304 Stainless Steel
Wei Tang, Maxim Gussev, Zhili Feng, Brian Gibson, Roger Miller, Jian Chen, Scarlett Clark, Keith Leonard, Jon Tatman, Ben Sutton, Greg Frederick

Welding Process Development for Spent Nuclear Fuel Canister Repair
Wei Tang, Stylianos Chatzidakis, Roger Miller, Jian Chen, Doug Kyle, John Scaglione, Caleb Schrad

Investigation of Relationship Between Microhardness and Charpy Impact Energy for Temper Bead Welding Qualification: Part 1
Boeing Smith, Antonio J. Ramirez, Steven L. McCracken, Stephen Tate

STRUCTURAL INTEGRITY OF PRESSURE COMPONENTS

Review of Pressure Vessel Code Rules on Cold Forming Limits and Heat Treatment Requirements
Kang Xu, Mahendra D. Rana, James White
