MCWASP XV: International Conference on Modelling of Casting, Welding and Advanced Solidification Processes

IOP Conference Series: Materials Science and Engineering
Volume 861

Jonkoping, Sweden
22 - 23 June 2020

ISBN: 978-1-7138-1813-7
ISSN: 1757-8981
# TABLE OF CONTENTS

## KEYNOTES

DOES MCWASP STILL FOLLOW MOORE'S LAW? FORTY YEARS OF ADVANCES IN MICROSTRUCTURE MODELING ................................................................. 1  
  M Rappaz

COMPARING MESOSCOPIC MODELS FOR DENDRITIC GROWTH ........................................ 11  
  D Tourret, L Sturz, A Viardin, M Založnik

REDUCED ORDER MODELS FOR WELDING AND SOLIDIFICATION PROCESSES .............. 25  
  P F Mendez

THE VIRTUAL CORE - MODELLING AND OPTIMIZATION OF CORE MANUFACTURING AND APPLICATION ................................................................. 48  
  J Thorborg, S Kumar, I Wagner, J C Sturm

## ADDITIVE MANUFACTURING

SOLIDIFICATION MICROSTRUCTURE SELECTION MAPS FOR LASER POWDER BED FUSION OF MULTICOMPONENT ALLOYS........................................................................ 64  
  P Mohammadpour, A B Phillion

RESOLVING THE EFFECTS OF LOCAL CONVECTIVE HEAT TRANSFER VIA ADJUSTMENT OF THERMO-PHYSICAL PROPERTIES IN PURE HEAT CONDUCTION SIMULATION OF LASER POWDER BED FUSION (L-PBF) .................................................... 72  
  M Bayat, V K Nadimpalli, S Mohanty, J H Hattel

COLUMNAR-TO-EQUIAXED TRANSITION IN A LASER SCAN FOR METAL ADDITIVE MANUFACTURING ................................................................. 80  
  L Yuan, A S Sabau, D St John, A Prasad, P D Lee

THERMOMECHANICAL MODELING OF ADDITIVELY MANUFACTURED STRUCTURAL PARTS - DIFFERENT APPROACHES ON THE MACROSCALE .................................................... 88  
  J Thorborg, P Esser, M Bayat

STUDY OF THERMOELECTRIC MAGNETOHYDRODYNAMIC CONVECTION ON SOLUTE REDISTRIBUTION DURING LASER ADDITIVE MANUFACTURING ........................................ 96  
  A Kao, T Gan, C Tonry, I Krastins, K Pericleous

CAPTURING MARANGONI FLOW VIA SYNCHROTRON IMAGING OF SELECTIVE LASER MELTING ................................................................. 104  
  S J Clark, C L A Leung, Y Chen, L Sinclair, S Marussi, P D Lee

EFFECT OF EVAPORATED GAS FLOW ON POROSITY AND MICROSTRUCTURE OF IN718 PARTS PRODUCED BY LPBF-PROCESSES ........................................ 110  
  J Jakumeit, C Huang, R Laqua, J Zielinski, J H Schleifenbaum

MELT POOL MORPHOLOGY IN DIRECTED ENERGY DEPOSITION ADDITIVE MANUFACTURING PROCESS .................................................... 118  
  Y Chen, S Clark, A C L Leung, L Sinclair, S Marussi, R Atwood, T Conoley, M Jones, G Baxter, P D Lee
PART-SCALE MECHANICAL MODELLING OF LPBF INCLUDING MICROSTRUCTURAL EVOLUTION EFFECTS .................................................................................................................. 124
D De Baere, M Bayat, S Mohanty, J H Hattel

CONTINUOUS CASTING

COLUMNAR-EQUIAXED TRANSITION IN CONTINUOUS CASTING BASED ON A MICRO-MACRO SOLIDIFICATION MODEL WITH LONG-RANGE SOLUTAL MIXING ............ 132
M Uddagiri, J Spee, S Hubig, I Steinbach

MODELLING VISCOPLASTIC BEHAVIOR OF SOLIDIFYING SHELL UNDER APPLIED ELECTROMAGNETIC BREAKING DURING CONTINUOUS CASTING ............................................ 140
A Vakhrushev, A Kharicha, M Wu, A Ludwig, G Nitzl, Y Tang, G Hackl, J Watzinger, C M G Rodrigues

SIMULATION OF LONGITUDINAL SURFACE DEFECT IN STEEL CONTINUOUS CASTING .............................................................................................................. 147
M L S Zappulla, B G Thomas

INTEGRATED NUMERICAL SIMULATION OF THE INDUSTRIAL CONTINUOUS CASTING PROCESS .................................................................................................... 155
J Fainberg, E Hepp, W Schäfer, C Kraftshöfer

A MESHLESS THERMOMECHANICAL TRAVELLING-SLICE MODEL OF CONTINUOUS CASTING OF STEEL .................................................................................. 163
B Mavrič, T Dobravec, R Vertnik, B Šarler

PERFORMANCE OF TURBULENCE MODELS FOR FLOW PREDICTION IN A MOULD OF CONTINUOUS STEEL CASTER ......................................................................... 171
J Gregorc, A Kunavar, B Šarler

DEFECTS

MODELLING OF LOCALISED SHRINKAGE PRESSURE IN A DIRECTIONALLY SOLIDIFYING DOMAIN .................................................................................................... 179
B Nenchev, S Gill

MULTIPHASE-FIELD MODELLING OF HYDROGEN PORE EVOLUTION DURING ALLOY SOLIDIFICATION ...................................................................................... 186
A Zhang, Z Guo, Q Wang, S Xiong

ADVANCED MODELING OF SHRINKAGE POROSITY IN CASTINGS ................................................................................................................................. 194
P Esser, C Schankies, V Khalajzadeh, C Beckermann

THREE-DIMENSIONAL NUMERICAL SIMULATION OF SOLIDIFICATION MICROPOROSITY AND MICROSTRUCTURE OF ALUMINUM ALLOYS .................................................. 202
C Gu, A A Luo

ELECTROMAGNETIC COUPLING

MODELING MIXED COLUMNAR-EQUIAXED SOLIDIFICATION OF SN-10WT%PB ALLOY UNDER FORCED CONVECTION DRIVEN BY TRAVELLING MAGNETIC STIRRING ............................................................................................................ 209
Z Zhang, M Wu, H Zhang, E Karimi-Sibaki, A Ludwig, A Kharicha
IN SITU OBSERVATION OF DIRECTIONAL SOLIDIFICATION IN GA-IN ALLOY UNDER A TRANSVERSE DC MAGNETIC FIELD
S He, N Shevchenko, S Eckert

COMPARISON OF TWO-PHASE AND THREE-PHASE MACROSCOPIC MODELS OF EQUIAxed GRAIN GROWTH IN SOLIDIFICATION OF BINARY ALLOY WITH ELECTROMAGNETIC STIRRING
T Wang, S Semenov, E Wang, Y Delannoy, Y Fautrelle, O Budenkova

HEAT TRANSFER AND FLUID FLOW

PREDICTING THE INTERFACIAL HEAT TRANSFER COEFFICIENT OF CAST MG-AL ALLOYS USING BECK’S INVERSE ANALYSIS
M U Bilal, N Hort

A MESHLESS SOLUTION OF A OF LID-DRIVEN CAVITY CONTAINING A HETEROGENEOUS POROUS MEDIUM
V Hatić, Z Rek, K Mramar, B Mavrić, B Šarler

PERMEABILITY TENSOR FOR VARIOUS COLUMNAR DENDRITE STRUCTURES
Y Mitsuyama, T Takaki, S Sakane, Y Shibuta, M Ohno

INGOT AND SHAPE CASTING

MODELLING OF AN INDUSTRIAL DIE CASTING PROCESS FOR THE PRODUCTION OF ALUMINUM AUTOMOTIVE PARTS
J Ou, C Wei, D Maijer, S Cockcroft, L A, Y Zhang, Z Chen, Z Zhu

OPTIMISATION OF THE FILLING PROCESS IN COUNTER-GRAVITY CASTING
M Papanikolaou, P Saxena, E Pagone, K Salonitis, M Jolly

PREDICTION OF SOLIDIFICATION STRUCTURES IN A 9.8 TONNE STEEL INGOT
B Gerin, H Combeau, M Založnik, I Poitrault, M Cherif

MODELLING AND SIMULATION OF INGOT SOLIDIFICATION WITH THE OPEN-SOURCE SOFTWARE CODE_SATURNE
C Demay, M Ferrand, S Belouah, V Robin

MULTISCALE SOLIDIFICATION SIMULATION OF SR-MODIFIED Al-Si-Mg ALLOY IN DIE CASTING
B Zhou, G Laschet, J Eiken, H Behnken, M Apel

MULTI-SCALE SIMULATION OF HYBRID LIGHT METAL STRUCTURES PRODUCED BY HIGH PRESSURE DIE CASTING
J Jakumeit, H Behnken, R Laqua, J Eiken, J Brachmann

A VERIFICATION OF THERMOPHYSICAL PROPERTIES OF A POROUS CERAMIC INVESTMENT CASTING MOULD USING COMMERCIAL COMPUTATIONAL FLUID DYNAMICS SOFTWARE
C A Jones, M R Jolly, A E W Jarfors, M Irwin, R Svenningsson, J Steggo, J Eriksson
MECHANICAL BEHAVIOUR

X-RAY TOMOGRAPHY, DIGITAL VOLUME CORRELATION AND FE MODELLING: A SYNERGISTIC COMBINATION TO STUDY THE PROCESSING-STRUCTURE-PROPERTY RELATIONS IN DUCTILE IRON ................................................................. 313
T Andriollo, Y Zhang, S Fæster, J Thorborg, N S Tiedje, V Kouznetsova, J Hattel

IMPACT OF LOCAL SI SEGREGATION ON STRAIN LOCALIZATION IN DUCTILE CAST IRON ................................................................. 321
C L Xu, T Andriollo, F Lin, Y B Zhang, J Hattel, N Tiedje

IN SITU ANALYSIS OF CAST IRONS MECHANICAL BEHAVIOUR USING SYNCHROTRON X-RAY TOMOGRAPHY AND 3D-XRD ................................................................. 326
T Sjögren, S Hall, L Elmquist, E Dartfeldt, E Larsson, M Majkut, J Elfsberg, P Skoglund, J Engqvist

MODELLING MACROSEGREGATION MODIFICATION IN DC CASTING OF ALUMINIUM ALLOYS IN SHEET INGOTS ACCOUNTING FOR INLET MELT FLOW, EQUIAXED GRAIN MORPHOLOGY AND TRANSPORT ................................................................. 333
A Pakanati, M M’Hamdi, H Combeau, M Založnik

NUMERICAL INVESTIGATION OF AN IN-SITU OBSERVED FLOW REGIMES DURING SOLIDIFICATION OF AN NH4CL – 70 WT%H2O SOLUTION ................................................................. 341
M Wu, M Stefan-Kharicha, A Kharicha, A Ludwig

IMPACT OF CRYSTAL SEDIMENTATION AND VISCOPLASTIC SEMI-SOLID DYNAMICS ON MACROSEGREGATION ................................................................. 349
C M G Rodrigues, A Ludwig, M Wu, A Kharicha, A Vakhrushev

MICRO- AND MACRO-SEGREGATION

MODELLING THE EVOLUTION OF MNS INCLUSIONS AND MACROSEGREGATION DURING SOLIDIFICATION USING A THREE-PHASE MODEL ................................................................. 357
D Cai, J Li, H Dong, J Li

SENSITIVITY OF MACROSCOPIC TRANSPORT CALCULATIONS TO UNCERTAIN MICROSCALE RELATIONSHIPS DURING METAL ALLOY SOLIDIFICATION ................................................................. 364
J Coleman, M J M Krane

MICROSEGREGATION MODEL INCLUDING SORET EFFECT: AN APPLICATION FOR SN-BI ALLOY ................................................................. 371
J E Santos Filho, R Heringer

STRUCTURE FORMATION ON MICROSCALE

CELLULAR AUTOMATON MODELLING OF M7C3 CARBIDE GROWTH DURING SOLIDIFICATION OF Fe-C-CR ALLOY ................................................................. 379
H W Zhang, S Zhang, Y C Wang, Y Z Hao, M Miao, K Nakajima, H Lei, Q Wang, J C He

EFFECT OF AL-V-B GRAIN REFINER ON REFINING ALUMINIUM ALLOYS: ESTIMATION FROM AB INITIO CALCULATIONS ................................................................. 387
S Ma, N Zong, H Dong, T Jing
INFLUENCE OF CRYSTAL FRAGMENTATION ON THE FORMATION OF MICROSTRUCTURE AND MACROSEGREGATION DURING DIRECTIONAL SOLIDIFICATION UNDER FORCED CONVECTION CONDITION ................................................................. 395
H Zhang, M Wu, Z Zhang, A Ludwig, A Kharicha

THREE-DIMENSIONAL NEEDLE NETWORK MODEL FOR DENDRITIC GROWTH WITH FLUID FLOW ........................................................................................................................................... 403
T Isensee, D Tourret

COMPARISON OF SOLIDIFICATION KINETICS OF COMPACTED AND LAMELLAR CAST IRONS ......................................................................................................................................................... 411
J Lacaze, U de la Torre, J Sertucha, A Regordosa

IN SITU OBSERVATION OF AUSTENITE COARSENING INDUCED BY MASSIVE-LIKE TRANSFORMATION DURING SOLIDIFICATION IN Fe–C ALLOYS ............................................................................................................ 419
H Yasuda, T Suga, K Ichida, T Narumi, K Morishita

3D CELLULAR AUTOMATON MODELLING OF SILICON CRYSTALLIZATION INCLUDING GRAINS IN TWIN RELATIONSHIP ........................................................................................................................................ 427
A Pineau, G Guillemot, G Reinhart, G Regula, N Mangelinck-Noël, Ch-A Gandin

MOLECULAR DYNAMICS SIMULATION OF HETEROGENEOUS NUCLEATION FROM CONCAVE CAVITY AT SURFACE OF GRAIN REFINER ............................................................................................................. 435
T Fujinaga, Y Shibuta

THE INTEGRATION OF STRUCTURAL MECHANICS INTO MICROSTRUCTURE SOLIDIFICATION MODELLING .............................................................................................................................................. 441
P Soar, A Kao, G Djambazov, N Shevchenko, S Eckert, K Pericleous

CALPHAD-BASED PHASE-FIELD STUDY OF THE INTERPLAY BETWEEN SPHEROIDAL GRAPHITE GROWTH AND CHEMICAL SEGREGATION IN DUCTILE CAST IRON ......................................................................................... 449
J Eiken

EFFECTS OF Bi ADDITION ON Si FEATURES, TENSILE PROPERTIES AND WEAR RESISTANCE OF HYPEREUTECTIC Al-15Si ALLOY ........................................................................................................................................ 457
C L Pereira, L F Gomes, J E Spinelli

APPLICATIONS OF PATTERN RECOGNITION FOR DENDRITIC MICROSTRUCTURES ...................................................................................................................................................... 465
J Strickland, B Nenchev, H B Dong

MODELLING OF INTERMETALLIC LAYERS FORMATION DURING SOLID-LIQUID JOINING OF DISSIMILAR METALLIC MATERIALS ......................................................................................................................................................... 471
V Glück Nardi, T Greß, B Tomn, W Volk

CELLULAR AUTOMATON MODELLING TO PREDICT MULTI-PHASE SOLIDIFICATION MICROSTRUCTURES FOR Fe-C PERITECTIC ALLOYS ........................................................................................................................................ 479
J Ogawa, Y Natsume

PHASE FIELD MODELLING OF DENDRITIC SOLIDIFICATION BY USING AN ADAPTIVE MESHLESS SOLUTION PROCEDURE ........................................................................................................................................ 487
T Dobravec, B Mavrič, B Šarler

A CELLULAR AUTOMATON APPROACH FOR THE PREDICTION OF GRAIN SIZE IN GRAIN REFINED ALLOYS ......................................................................................................................................................... 494
A Jacot
THERMOMECHANICS AND THERMOPHYSICAL PROPERTIES

TOWARD THE DEVELOPMENT OF A THERMAL-STRESS MODEL OF AN INDUSTRIAL COUNTER PRESSURE CASTING PROCESS ................................................................. 502
C Wei, J Ou, P Fan, F Mehr, D Maijer, S Cockcroft, Y Zhang, Z Chen, L A, Z Zhu

CASTINGS DISTORTION OF GAS TURBINE ENGINE PARTS DURING SOLIDIFICATION AND COOLING ......................................................................................... 510
A Inozemtsev, A Dubrovskaya, K Dongauzer, A Alapanova, A Maleev

MOLECULAR DYNAMICS STUDY OF COMPOSITION DEPENDENCE OF SOLID-LIQUID INTERFACIAL ENERGY OF FE-NI BINARY ALLOY ........................................ 518
K Ueno, Y Shibuta

OBSERVATION OF SEMISOLID DEFORMATION BY USING 4D-CT AND 3DXRD ................................................................. 525
T Narumi, T Nakata, H Yasuda

MODELLING OF SHEAR BANDS DURING SOLIDIFICATION .................................................................................................................. 533
A Ludwig, C M G Rodrigues, M Wu, A Kharicha

APPLICATION OF MULTI-PHASE-FIELD LATTICE BOLTZMANN METHOD TO SEMI-SOLID DEFORMATION ............................................................................... 541
N Yamanaka, S Sakane, T Takaki

CONCURRENT AND COUPLED RESOLUTION OF Fluid FLOW AND SOLID DEFORMATION IN SOLIDIFICATION PROCESSES ............................................................ 548
S Zhang, G Guillemot, C-A Gandin, M Bellet

ULTRASONICS

THE ULTRASOUND EFFECTS ON THE FORMATION OF THE SOLIDIFICATION STRUCTURE OF A356 INGOTS PROCESSED VIA A 2-ZONE INDUCTION MELTING FURNACE ........................................................................................................ 556
A Dong, L Nastac

PROGRESS IN THE DEVELOPMENT OF A CONTACTLESS ULTRASONIC PROCESSING ROUTE FOR ALLOY GRAIN REFINEMENT .................................................. 564
K A Pericleous, C Beckwith, V Bojarevics, G Djambazov, A Dybalska, W D Griffiths, C Tonry

WELDING

IN SITU X-RAY OBSERVATIONS OF TRANSIENT STATES IN ARC WELD POOLS .......... 572
F Wu, K V Falch, M Drakopoulos, W U Mirihanage

PHASE-FIELD STUDY ON MICROSTRUCTURE FORMATION IN MAR-M247 DURING ELECTRON BEAM WELDING AND CORRELATION TO HOT CRACKING SUSCEPTIBILITY .................................................................................................................. 578
B Böttger, M Apel, T Jokisch, A Senger

PREDICTING SOLIDIFICATION CRACKING SUSCEPTIBILITY OF STAINLESS STEELS USING MACHINE LEARNING ................................................................. 586
S Feng, H B Dong
