Demonstrations

Cyber-Physical Systems

Demo: SLEMI: Finding Simulink Compiler Bugs through Equivalence Modulo Input (EMI)  
Shafiul Azam Chowdhury (The University of Texas at Arlington), Sohil Lal Shrestha (The University of Texas at Arlington), Taylor T. Johnson (Vanderbilt University), and Christoph Csallner (The University of Texas at Arlington)

PROMISE: High-Level Mission Specification for Multiple Robots  
Sergio Garcia (Chalmers, University of Gothenburg, Sweden), Patrizio Pelliccione (Chalmers, University of Gothenburg, Sweden and University of L’Aquila, Italy), Claudio Menghi (University of Luxembourg, Luxembourg), Thorsten Berger (Chalmers, University of Gothenburg, Sweden), and Tomas Bures (Charles University, Czech Republic)

Web Testing

SMRL: A Metamorphic Security Testing Tool for Web Systems  
Phu X. Mai (University of Luxembourg, Luxembourg), Arda Goknil (University of Luxembourg, Luxembourg), Fabrizio Pastore (University of Luxembourg, Luxembourg), and Lionel C. Briand (University of Luxembourg, Luxembourg & University of Ottawa, Canada)
WasmView: Visual Testing for WebAssembly Applications

*Alan Romano (University at Buffalo, SUNY) and Weihang Wang (University at Buffalo, SUNY)*

Android Application Testing

AppTestMigrator: A Tool for Automated Test Migration for Android Apps

*Farnaz Behrang (Georgia Institute of Technology) and Alessandro Orso (Georgia Institute of Technology)*

Contracts

Seraph: Enabling Cross-Platform Security Analysis for EVM and WASM Smart Contracts

*Zhiqiang Yang (Oxford-Hainan Blockchain Research Institute), Han Liu (Oxford-Hainan Blockchain Research Institute), Yue Li (Oxford-Hainan Blockchain Research Institute), Huixuan Zheng (Oxford-Hainan Blockchain Research Institute), Lei Wang (Oxford-Hainan Blockchain Research Institute, Shanghai Jiao Tong University), and Bangdao Chen (Oxford-Hainan Blockchain Research Institute)*

Software Architecture

The SmartSHARK Ecosystem for Software Repository Mining

*Alexander Trautsch (University of Goettingen), Fabian Trautsch (University of Goettingen), Steffen Herbold (University of Goettingen), Benjamin Ledel (University of Goettingen), and Jens Grabowski (University of Goettingen)*

Deep Learning Testing and Debugging

DeepMutation: A Neural Mutation Tool

*Michele Tufano (Microsoft), Jason Kimko (William & Mary), Shiya Wang (William & Mary), Cody Watson (Washington and Lee University), Gabriele Bavota (Università della Svizzera Italiana (USI)), Massimiliano Di Penta (University of Sannio), and Denys Poshyvanyk (William & Mary)*

Traceability

TimeTracer: A Tool for Back in Time Traceability Replaying

*Christoph Mayr-Dorn (Johannes Kepler University Linz), Michael Vierhauser (Johannes Kepler University Linz), Felix Keplinger (Johannes Kepler University Linz), Stefan Bichler (Johannes Kepler University Linz), and Alexander Egyed (Johannes Kepler University Linz)*
API

SimilarAPI: Mining Analogical APIs for Library Migration 37
Chunyang Chen (Monash University)

Deep Learning Testing and Debugging 2

FeatureNET: Diversity-Driven Generation of Deep Learning Models 41
Salah Ghamizi (SnT - University of Luxembourg), Maxime Cordy (SnT - University of Luxembourg), Mike Papadakis (SnT - University of Luxembourg), and Yves Le Traon (SnT - University of Luxembourg)

EvalDNN: A Toolbox for Evaluating Deep Neural Network Models 45
Yongqiang Tian (The Hong Kong University of Science and Technology, China), Zhihua Zeng (Zhejiang University, China), Ming Wen (Huazhong University of Science and Technology, China), Yepang Liu (Southern University of Science and Technology, China), Tzu-yang Kuo (The Hong Kong University of Science and Technology, China), and Shing-Chi Cheung (The Hong Kong University of Science and Technology, China)

Fuzzing 2

FuRong: Fusing Report of Automated Android Testing on Multi-Devices 49
Yuanhan Tian (Nanjing University, China), ShengCheng Yu (Nanjing University, China), Chunrong Fang (Nanjing University, China), and Peiyuan Li (Nanjing University, China)

Static Analysis 2

Phoenix: A Tool for Automated Data-Driven Synthesis of Repairs for Static Analysis Violations 53
Hiroaki Yoshida (Fujitsu Laboratories of America, Inc., USA), Rohan Bavishi (University of California Berkeley, USA), Keisuke Hotta (Fujitsu Laboratories Ltd., Japan), Yusuke Nemoto (Fujitsu Laboratories Ltd., Japan), Mukul Prasad (Fujitsu Laboratories of America, Inc., USA), and Shinji Kikuchi (Fujitsu Laboratories Ltd., Japan)

Big Data

VITALSE: Visualizing Eye Tracking and Biometric Data 57
Devjeet Roy (Washington State University), Sarah Fakhoury (Washington State University), and Venera Arnaoudova (Washington State University)
Symbolic Execution

BigTest: A Symbolic Execution Based Systematic Test Generation Tool for Apache Spark 61
Muhammad Ali Gulzar (University of California Los Angeles), Madanal Musuvathi (Microsoft Research), and Miryung Kim (University of California Los Angeles)

PG-KLEE: Trading Soundness for Coverage 65
Richard Rutledge (Georgia Institute of Technology) and Alessandro Orso (Georgia Institute of Technology)

Testing 1

RTj: A Java Framework for Detecting and Refactoring Rotten Green Test Cases 69
Matias Martinez (Université Polytechnique Hauts-de-France, LAMIH UMR CNRS 8201), Anne Etien (Université de Lille, CNRS, Inria, Centrale Lille, UMR 9189 – CRIStal), Stéphane Ducasse (Inria, Université de Lille, CNRS, Centrale Lille, UMR 9189 – CRIStal), and Christopher Fuhrman (École de technologie supérieure, Montréal, Québec)

GeekyNote: A Technical Documentation Tool with Coverage, Backtracking, Traces, and Couplings 73
Yung-Pin Cheng (National Central University, Taiwan), Wei-Nien Hsiung (National Central University, Taiwan), Yu-Shan Wu (IsCoolLab Co. Ltd, Taiwan), and Li-Hsuan Chen (IsCoolLab Co. Ltd, Taiwan)

Android

DroidMutator: An Effective Mutation Analysis Tool for Android Applications 77
Jian Liu (East China Normal University), Xusheng Xiao (Case Western Reserve University United States), Lihua Xu (NewYork University Shanghai, China), Liang Dou (East China Normal University, China), and Andy Podgurski (Case Western Reserve University United States)

Meta Studies

An SLR-Tool: Search Process in Practice 81
Andreas Hinderks (University of Seville), Francisco José Domínguez Mayo (University of Seville), Jörg Thomasewski (University of Applied Sciences Emden/Leer), and María José Escalona (University of Seville)

Performance

Nimbus: Improving the Developer Experience for Serverless Applications 85
Robert Chatley (Imperial College London) and Thomas Allerton (Starling Bank)
Software Verification

mCoq: Mutation Analysis for Coq Verification Projects ......................................................... 89
Kush Jain (The University of Texas at Austin), Karl Palmskog (KTH Royal Institute of Technology), Ahmet Celik (Facebook, Inc.), Emilio Jesús Gallego Arias (Équipe πr 2, Inria, IRIF, Univ. de Paris), and Milos Gligoric (The University of Texas at Austin)

MPI-SV: A Symbolic Verifier for MPI Programs ................................................................. 93
Zhenbang Chen (National University of Defense Technology, Changsha, China), Hengbiao Yu (National University of Defense Technology, Changsha, China), Xianjin Fu (National University of Defense Technology, Changsha, China; National University of Defense Technology, Changsha, China), and Ji Wang (National University of Defense Technology, Changsha, China; National University of Defense Technology, Changsha, China)

Testing 2

DCO Analyzer: Local Controllability and Observability Analysis and Enforcement of Distributed Test Scenarios ................................................................. 97
Bruno Lima (INESC TEC and University of Porto) and João Pascoal Faria (INESC TEC and University of Porto)

ACM Student Research Competition

Uncertainty-Guided Testing and Robustness Enhancement for Deep Learning Systems ................................................................. 101
Xiyue Zhang (Peking University, China)

Evaluation of Brain Activity While Pair Programming ................................................................. 104
Ananga Thapaliya Thapaliya (Innopolis University)

Machine Translation Testing via Pathological Invariance ................................................................. 107
Shashij Gupta (IIT Bombay, India)

Automatic Generation of Simulink Models to Find Bugs in a Cyber-Physical System Tool Chain using Deep Learning ................................................................. 110
Sohil Shrestha (University of Texas at Arlington)

Playing with Your Project Data in Scrum Retrospectives ................................................................. 113
Christoph Matthies (Hasso Plattner Institute, University of Potsdam, Germany)

An Empirical Study of the First Contributions of Developers to Open Source Projects on Github ........................................................................................................... 116
Vikram N. Subramanian (University of Waterloo)

Stress Testing SMT Solvers via Type-Aware Mutation ................................................................. 119
Chengyu Zhang (East China Normal University, China)

The Role of Egocentric Bias in Undergraduate Agile Software Development Teams ................................................................. 122
Frederike Ramin (Hasso Plattner Institute, University of Potsdam)

Studying and Suggesting Logging Locations in Code Blocks ................................................................. 125
Zhenhao Li (Concordia University)
Exploring the Relationship between Dockerfile Quality and Project Characteristics 128
Yiwen Wu (National University of Defense Technology, China)

Hanging by the Thread: An Empirical Study of Donations in Open Source 131
Cassandra Overney (Olin College of Engineering)

An Automated Framework for Gaming Platform to Test Multiple Games 134
Zihe Song (The University of Texas at Dallas)

Improving Bug Detection and Fixing via Code Representation Learning 137
Yi Li (New Jersey Institute of Technology)

Automated Analysis of Inter-Parameter Dependencies in Web APIs 140
Alberto Martin-Lopez (Universidad de Sevilla, Spain)

Detection and Mitigation of JIT-Induced Side Channels 143
Tegan Brennan (University of California, Santa Barbara)

Does Fixing Bug Increase Robustness in Deep Learning? 146
Rangeet Pan (Iowa State University, USA)

An Empirical Study on the Evolution of Test Smell 149
Dong Jae Kim (Concordia University)

Efficient Test Execution in End to End Testing 152
Cristian Augusto Alonso (University of Oviedo, Spain)

Towards Automated Migration for Blockchain-Based Decentralized Application 155
Xiufeng Xu (Peking University, China)

Doctoral Symposium

Skill-Based Engineering in Industrial Automation Domain: Skills Modeling and Orchestration 158
Kirill Dorofeev (fortiss GmbH)

Scalable and Approximate Program Dependence Analysis 162
Seongmin Lee (Korea Advanced Institute of Science and Technology, Republic of Korea)

The Effects of Required Security on Software Development Effort 166
Elaine Venson (Center for Systems and Software Engineering (CSSE) / University of Southern California (USC))

Towards Greener Android Application Development 170
Hina Anwar (University of Tartu, Estonia)

Towards DO-178C Certification of Adaptive Learning UAV Agents Designed with a Cognitive Architecture 174
John Pyrgies (uNamur)

Bridging the Divide between API Users and API Developers by Mining Public Code Repositories 178
Maxime Lamothe (Concordia University, Canada)

Refactoring Operations Grounded in Manual Code Changes 182
Anna Maria Eilertsen (University of Bergen, Norway)

A Composed Technical Debt Identification Methodology to Predict Software Vulnerabilities 186
Ruşen Halep mollas (Istanbul Technical University, Turkey)
Variability Aware Requirements Reuse Analysis \textsuperscript{190}
\hspace{1em} Muhammad Abbas (Mälardalens University, Västerås, Sweden)

KNOCAP: Capturing and Delivering Important Design Bits in Whiteboard Design Meetings \textsuperscript{194}
\hspace{1em} Adriana Meza Soria (UC Irvine)

Towards Providing Automated Supports to Developers on Writing Logging Statements \textsuperscript{198}
\hspace{1em} Zhenhao Li (Concordia University)

AI-Driven Web API Testing \textsuperscript{202}
\hspace{1em} Alberto Martin-Lopez (Universidad de Sevilla, Spain)

Performance Regression Detection in DevOps \textsuperscript{206}
\hspace{1em} Jinfu Chen (Concordia University)

Formalization and Analysis of Quantitative Attributes of Distributed Systems \textsuperscript{210}
\hspace{1em} Agustín E. Martinez Suñé (Departamento de Computación, Universidad de Buenos Aires, Argentina)

Bridging Fault Localisation and Defect Prediction \textsuperscript{214}
\hspace{1em} Jeongju Sohn (Korea Advanced Institute of Science and Technology)

Improving Students’ Testing Practices \textsuperscript{218}
\hspace{1em} Gina R. Bai (North Carolina State University)

The Sustainability of Quality in Free and Open Source Software \textsuperscript{222}
\hspace{1em} Adam Alami (IT University of Copenhagen)

Understanding Software Changes: Extracting, Classifying, and Presenting Fine-Grained Source Code Changes \textsuperscript{226}
\hspace{1em} Veit Frick (Alpen-Adria-Universität Klagenfurt, Austria)

Search-Based Test Generation for Android Apps \textsuperscript{230}
\hspace{1em} Iván Arcuschin Moreno (Universidad de Buenos Aires, Argentina)

Extracting Archival-Quality Information from Software-Related Chats \textsuperscript{234}
\hspace{1em} Preetha Chatterjee (University of Delaware, USA)

Software Startups in Growth Phase SE Practices Adopted to SEE \textsuperscript{238}
\hspace{1em} Orges Cico (Norwegian University of Science and Technology)

Towards Better Technical Debt Detection with NLP and Machine Learning Methods \textsuperscript{242}
\hspace{1em} Leevi Rantala (University of Oulu)

Towards Data Integrity in Cassandra Database Applications Using Conceptual Models \textsuperscript{246}
\hspace{1em} Pablo Suárez-Otero (University of Oviedo)

Posters

Experiential Learning in Computing Accessibility Education \textsuperscript{250}
\hspace{1em} Weishi Shi (RIT), Saad Khan (RIT), Yasmine El-Ôlay (RIT), Samuel Malachowsky (RIT), Qi Yu (RIT), and Daniel Krutz (RIT)

Large-Scale Patch Recommendation at Alibaba \textsuperscript{252}
\hspace{1em} Xindong Zhang (Alibaba Group, China), Chenguang Zhu (University of Texas at Austin, United States), Yi Li (Nanyang Technological University, Singapore), Jianmei Guo (Alibaba Group, China), Lihua Liu (Alibaba Group, China), and Haobo Gu (Alibaba Group, China)
Do Preparatory Programming Lab Sessions Contribute to Even Work Distribution in Student Teams? 254

Markus Borg (Lund University)

A Practical, Collaborative Approach for Modeling Big Data Analytics Application Requirements 256

Hourieh Khalajzadeh (Monash University, Australia), Andrew Simmons (Deakin University, Australia), Mohamed Abdelrazek (Deakin University, Australia), John Grundy (Monash University, Australia), John Hosking (University of Auckland, New Zealand), Qiang He (Swinburne University, Australia), Prasanna Ratnakanthan (The Alfred Hospital, Australia), Adil Zia (The Alfred Hospital, Australia), and Meng Law (The Alfred Hospital, Australia)

A Mixed Methods Research Agenda to Identify Undergraduate Misconceptions in Software Engineering, Lecturers’ Handling, and Didactical Implications 258

Carolin Gold-Veerkamp (University of Applied Sciences Aschaffenburg, Germany), Ira Diethelm (Carl von Ossietzky University, Germany), and Jörg Abke (University of Applied Sciences Aschaffenburg, Germany)

Understanding DevOps Education with Grounded Theory 260

Candy Pang (MacEwan University, Canada), Abram Hindle (University of Alberta, Canada), and Denilson Barbosa (University of Alberta, Canada)

Understanding and Handling Alert Storm for Online Service Systems 262

Nengwen Zhao (Tsinghua University), Junjie Chen (Tianjin University), Xiao Peng (China EverBright Bank), Honglin Wang (BizSeer), Xinya Wu (BizSeer), Yuanzong Zhang (BizSeer), Zikai Chen (Tsinghua University), Xiangzhong Zheng (BizSeer), Xiaohui Nie (Tsinghua University), Gang Wang (China EverBright Bank), Yong Wu (China EverBright Bank), Fang Zhou (China EverBright Bank), Wenchi Zhang (BizSeer), Kaixin Sui (BizSeer), and Dan Pei (Tsinghua University)

Factors Influencing Software Engineering Career Choice of Andean Indigenous 264

Mary Sánchez-Gordón (Østfold University College, Norway) and Ricardo Colomo-Palacios (Østfold University College, Norway)

ProvBuild: Improving Data Scientist Efficiency with Provenance (An Extended Abstract) 266

Jingmei Hu (Harvard University, USA), Jiwon Joung (University of Michigan, USA), Maia Jacobs (Harvard University, USA), Krzysztof Gajos (Harvard University, USA), and Margo Seltzer (University of British Columbia, Canada)

Poster: How Has Forking Changed in the Last 20 Years? A Study of Hard Forks on GitHub 268

Shurui Zhou (Carnegie Mellon University), Bogdan Vasilescu (Carnegie Mellon University), and Christian Kästner (Carnegie Mellon University)

Scaling Application-Level Dynamic Taint Analysis to Enterprise-Scale Distributed Systems 270

Xiaoqin Fu (Washington State University) and Haipeng Cai (Washington State University)

Evolutionary Hot-Spots in Software Systems 272

Robert Benkoczi (University of Lethbridge), Daya Gaur (University of Lethbridge), Shahadat Hossain (University of Lethbridge), Muhammad A. Khan (Inbridge Inc), and Ajay Raj Tedlapu (University of Lethbridge)
Clairvoyance: Cross-Contract Static Analysis for Detecting Practical Reentrancy
Vulnerabilities in Smart Contracts  274
Jiaming Ye (University of Science and Technology of China), Mingliang Ma (University of Science and Technology of China), Yun Lin (National University of Singapore), Yulei Sui (University of Technology Sydney), and Yinxing Xue (University of Science and Technology of China)

Towards Automatic Assessment of Object-Oriented Programs  276
Pasquale Ardimento (University of Bari Aldo Moro), Mario Luca Bernardi (Giustino Fortunato University), and Marta Cimitile (UnitelmaSapienza)

Bugine: A Bug Report Recommendation System for Android Apps  278
Ziqiang Li (Southern University of Science and Technology) and Shin Hwei Tan (Southern University of Science and Technology)

Identifying Compatibility-Related APIs by Exploring Biased Distribution in Android Apps  280
Chen Xu (University of Science and Technology of China), Yan Xiong (University of Science and Technology of China), Wenchao Huang (University of Science and Technology of China), Zhaoqi Meng (University of Science and Technology of China), Fuyou Miao (University of Science and Technology of China), Cheng Su (University of Science and Technology of China), and Guangshuai Mo (University of Science and Technology of China)

Lean Kanban in an Industrial Context: A Success Story  282
Roberto Hens Pato (Alten, Spain), David Granada (University Rey Juan Carlos, Spain), Juan M. Vara (University Rey Juan Carlos, Spain), and Esperanza Marcos (University Rey Juan Carlos, Spain)

Preliminary Findings on FOSS Dependencies and Security: A Qualitative Study on Developers' Attitudes and Experience  284
Ivan Pashchenko (University of Trento), Duc-Ly Vu (University of Trento), and Fabio Massacci (University of Trento)

What Disconnects Practitioner Belief and Empirical Evidence ?  286
Shrikanth N.C. (North Carolina State University, USA) and Tim Menzies (North Carolina State University, USA)

Restoring Reproducibility of Jupyter Notebooks  288
Jiawei Wang (Monash University), Tzu-yang Kuo (Hong Kong University of Science and Technology), Li Li (Monash University), and Andreas Zeller (CISPA Helmholtz Center for Information Security)

Identification of Cultural Influences on Requirements Engineering Activities  290
Tawfeeq Alsanoosy (RMIT University), Maria Spichkova (RMIT University), and James Harland (RMIT University)

An Exploratory Study on Improving Automated Issue Triage with Attached Screenshots  292
Ethem Utku Aktas (Softtech Inc., Turkey) and Cemal Yilmaz (Sabanci University, Turkey)

Open-Vocabulary Models for Source Code (Extended Abstract)  294
Rafael-Michael Karampatsis (University of Edinburgh, United Kingdom), Hlib Babii (Free University of Bozen-Bolzano, Italy), Romain Robbes (Free University of Bozen-Bolzano, Italy), Charles Sutton (Google AI, United States), and Andrea Janes (Free University of Bozen-Bolzano, Italy)
Building a Theory of Software Teams Organization in a Continuous Delivery Context  296
Leonardo Leite (University of São Paulo), Fabio Kon (University of São Paulo), Gustavo Pinto (Federal University of Pará), and Paulo Meirelles (Federal University of São Paulo)

An Intelligent Tool for Combatting Contract Cheating Behaviour by Facilitating Scalable Student-Tutor Discussions  298
Jake Renzella (Deakin University, Australia), Andrew Cain (Deakin University, Australia), and Jean-Guy Schneider (Deakin University, Australia)

Poster: Debugging Inputs  300
Lukas Kirschner (CISPA – Helmholtz Center for Information Security, Germany), Ezekiel Soremekun (CISPA – Helmholtz Center for Information Security, Germany), and Andreas Zeller (CISPA – Helmholtz Center for Information Security, Germany)

Managing Data Constraints in Database-Backed Web Applications  302
Junwen Yang (University of Chicago), Utsav Sethi (University of Chicago), Cong Yan (University of Washington), Alvin Cheung (University of California, Berkeley), and Shan Lu (University of Chicago)

Testing DNN Image Classifiers for Confusion & Bias Errors  304
Yuchi Tian (Columbia University, USA), Ziyuan Zhong (Columbia University, USA), Vicente Ordonez (University of Virginia, USA), Gail Kaiser (Columbia University, USA), and Baishakhi Ray (Columbia University, USA)

Fluid Intelligence Doesn't Matter! Effects of Code Examples on the Usability of Crypto APIs  306
Kai Mindermann (IC Consult, Germany) and Stefan Wagner (University of Stuttgart, Germany)

Semantic Analysis of Issues on Google Play and Twitter  308
Aman Yadav (National Institute of Technology Sikkim) and Fatemeh H. Fard (University of British Columbia)

Summary-Guided Incremental Symbolic Execution  310
Qiuping Yi (Texas State University), Junye Wen (Texas State University), and Guowei Yang (Texas State University)

Elite Developers’ Activities at Open Source Ecosystem Level  312
Zhendong Wang (University of California, Irvine), Yang Feng (University of California, Irvine), Yi Wang (Rochester Institute of Technology), James A. Jones (University of California, Irvine), and David Redmiles (University of California, Irvine)

GUI-Focused Overviews of Mobile Development Videos  314
Mohammad Alahmadi (Florida State University, USA), Abdulkarim Khormi (Florida State University, USA), and Sonia Haiduc (Florida State University, USA)

Improving Automated Program Repair using Two-Layer Tree-Based Neural Networks  316
Yi Li (New Jersey Institute of Technology, USA), Shaohua Wang (New Jersey Institute of Technology, USA), and Tien Nguyen (University of Texas at Dallas, USA)
An Empirical Study on the Characteristics of Question-Answering Process on Developer Forums 318............................
Yi Li (New Jersey Institute of Technology, USA), Shaohua Wang (New Jersey Institute of Technology, USA), and Tien Nguyen (University of Texas at Dallas, USA)

Towards Understanding and Fixing Upstream Merge Induced Conflicts in Divergent Forks: An Industrial Case Study 320............................
Chungha Sung (University of Southern California, USA), Shuvendu K. Lahiri (Microsoft Corporation, USA), Mike Kaufman (Microsoft Corporation, USA), Pallavi Choudhury (Microsoft Corporation, USA), Jessica Wolk (Microsoft Corporation, USA), and Chao Wang (University of Southern California, USA)

Importance-Driven Deep Learning System Testing 322............................
Hasan Ferit Eniser (MPI-SWS), Simos Gerasimou (University of York), Alper Sen (Bogazici University), and Alper Cakan (Bogazici University)

Refactor4Green: A Game for Novice Programmers to Learn Code Smells 324............................
Vartika Agrahari (IIT Tirupati) and Sridhar Chimalakonda (IIT Tirupati)

Industry Agile Practices in Large-Scale Capstone Projects 326............................
Jean-Guy Schneider (Deakin University, Australia), Peter W. Eklund (Deakin University, Australia), Kevin Lee (Deakin University, Australia), Feifei Chen (Deakin University, Australia), Andrew Cain (Deakin University, Australia), and Mohamed Abdelrazek (Deakin University, Australia)

Real-World Ethics for Self-Driving Cars 328............................
Tobias Holstein (Mälardalen University (Sweden), Hochschule Darmstadt (Germany)), Gordana Dodig-Crnkovic (Mälardalen University, Chalmers University of Technology, University of Gothenburg (Sweden)), and Patrizio Pelliccione (Chalmers University of Technology, University of Gothenburg (Sweden), University of L’Aquila (Italy))

Author Index 331............................
