Thermophysics

Papers Presented at the AIAA SciTech Forum and Exposition 2021

Online
11 - 15 & 19 - 21 January 2021

ISBN: 978-1-7138-2646-0
# TABLE OF CONTENTS

## RADIATION MODELING AND EXPERIMENTS I

> CHARACTERIZATION OF RADIATIVE HEATING ANOMALY IN HIGH ENTHALPY SHOCK TUNNELS ................................. Brett A. Cruden, Chun Y. Tang, Joseph Olejniczak, Adam J. Amar, Hideyuki Tanno

  1

> INFRARED RADIATION MEASUREMENTS OF A RECOMBINING CO2 PLASMA AT ATMOSPHERIC PRESSURE ........................ Corentin Grimaldi, Sean McGuire, Augustin C. Tibe-Inglesse, Christophe O. Laux

  13

> MODELING OF NO EMISSIONS FROM A HYPERSONIC GROUND-BASED FACILITY ........................... Ozgur Tumuklu, Matthew Jouffray, Deborah A. Levin

  27

## RADIATION MODELING AND EXPERIMENTS II

> MODELING OF TURBULENT-RADIATION INTERACTION IN TURBULENT COMBUSTION FLOWS USING THE VELOCITY-FREQUENCY-COMPOSITION JOINT PDF METHOD ................................................................. Masoud Darbandi, Mohamad B. Barezban, G E. Schneider

  85

> NUMERICAL ANALYSIS OF FLOW AND RADIATIVE TRANSFER WITH EXCITATION NONEQUILIBRIUM IN AN ARC-JET FACILITY ................................................................. Kazuyuki Sunabe, Yousuke Ogino, Takeharu Sakai

  94

> ELECTRON NUMBER DENSITY MEASUREMENTS IN A SATURN ENTRY CONDITION .................... Yu Liu, Christopher M. James, Richard G. Morgan, Peter Jacobs, Rowan Gollan, Timothy McIntyre

  104

## NON-EQUILIBRIUM FLOWS I

> A METHOD OF CHARACTERISTICS SOLVER FOR UNSTEADY QUASI-ONE-DIMENSIONAL CHEMICALLY REACTING GAS FLOWS ................................................................. Ananthkumar Jayamani, Frank K. Lu

  122

> A STATE-TO-STATE AND MULTI-TEMPERATURE STUDY OF AIR THERMOCHEMISTRY ........................... Alexander J. Fangman, Daniil Andrienko

  135

> DETAILED COMPARISON OF DIFFUSIVE TRANSPORT PHENOMENA BETWEEN CFD AND DSMC ON A TWO-DIMENSIONAL CYLINDER ............................................................. Chiara Amato, Michael D. Kroells, Thomas E. Schwartzentruber, Graham V. Candler

  148

> DIRECT MOLECULAR SIMULATION OF DISSOCIATING OXYGEN UNDER ADIABATIC AND NORMAL SHOCK WAVE CONDITIONS ............................................................. Erik Torres, Thomas E. Schwartzentruber

  163
NON-EQUILIBRIUM FLOWS II

ELECTRONIC-SPECIFIC MODELING OF NITRIC OXIDE IN A RECOMBINING AIR PLASMA.................................................................................................................. 176

Ulysse Dubuet, Pierre Mariotto, Marie-Yvonne Perrin, Christophe O. Laux

EXPERIMENTAL METHODS FOR STUDYING POST SHOCK RELAXATION................................. 199

Steve F. Apirana, Christopher M. James, Steven Lewis, Richard G. Morgan

FIRST-PRINCIPLE SIMULATION OF VIBRATIONAL ACTIVATION AND DISSOCIATION IN OXYGEN SHOCK FLOWS ................................................................. 211

Varishsh T. Baluckram, Daniil Andrienko

SIMULTANEOUS VIBRATIONAL, ROTATIONAL, AND TRANSLATIONAL THERMOMETRY BASED ON LASER ABSORPTION OF CO IN SHOCK-INDUCED NON-EQUILIBRIUM.................................................................................................................. 233

Christopher Jelloian, Fabio A. Bendana, Chuyu Wei, Raymond M. Spearrin, Megan E. Macdonald

NON-EQUILIBRIUM FLOWS III

MODELING OF IONIZED GAS FLOWS WITH A VELOCITY-SPACE HYBRID BOLTZMANN SOLVER .................................................................................................................. 248

Georgii Oblapenko, David B. Goldstein, Philip Varghese, Christopher Moore

ANALYSIS OF CHEMICAL KINETIC PARAMETERS FOR HYDROGEN ATMOSPHERES.............. 259

Kaelan Hansson, Alex T. Carroll, Savio J. Poovathingal, Iain D. Boyd

OBJECTIVE MOLECULAR DYNAMICS OF DISSOCIATING NITROGEN UNDER HIGH TEMPERATURE CONDITIONS ................................................................. 275

Gunjan Pahlani, Erik Torres, Thomas E. Schwartzentruber, Richard D. James

NON-EQUILIBRIUM FLOWS IV

QUASI-NEUTRALITY IN HYPERSONIC IONIZING REENTRY FLOWS ........................................ 285

Carolyn R. Kaplan, Elaine S. Oran

THREE-BODY COLLISION BASED RECOMBINATION RATE CONSTANTS FROM QUASI CLASSICAL TRAJECTORY CALCULATIONS ......................................................... 293

Eric C. Geistfeld, Thomas E. Schwartzentruber

ABLATION MODELING AND EXPERIMENTS I

A COUPLED ABLATION APPROACH USING ICARUS AND US3D ........................................... 315

Olivia M. Schroeder, Joseph Brock, Eric Stern, Graham V. Candler

AIR-CARBON ABLATION MODEL FOR HYPERSONIC FLIGHT FROM MOLECULAR BEAM DATA .................................................................................................................. 329

Krishna Sandeep Prata, Timothy K. Minton, Thomas E. Schwartzentruber

AN IMMERSED BOUNDARY METHOD FOR HYPERSONIC VISCOUS FLOWS ................................ 353

Joel A. McQuaid, Aleksander L. Zibitsker, Bijaylakshmi Saikia, Alexandre Martin, Christoph Brehm
MACHINE LEARNING IN THERMOPHYSICS I

A CRITICAL ASSESSMENT OF ADAPTIVE TABULATION FOR FLUID PROPERTIES USING NEURAL NETWORKS
Daniel T. Banuti

ARTIFICIAL INTELLIGENCE APPLICATION IN COMBUSTION MODELING

ABLATION MODELING AND EXPERIMENTS II

CRACK MODELING IN CHARRING ABLATION MATERIALS
Rui Fu, Sean McDaniel, Matthew Beck, Alexandre Martin

DEVELOPMENT OF KINETIC-BASED ABLATIVE REACTION MODELS IN THERMAL ANALYSIS OF SUPER/HYPersonic VEHICLES
Sean M. Babiniec, Joel Seibert, Matthew Musselman

DSMC SIMULATION OF ABLATING MICROSTRUCTURES AT FLIGHT RELEVANT CONDITIONS
Sahadeo Ramjatan, Michael D. Kroells, Thomas E. Schwartzentruber

HEAT TRANSFER ENHANCEMENT AND ENERGY HARVESTING AND THERMAL MANAGEMENT AND CONTROL IN AIRCRAFT AND SPACECRAFT: DEVICES AND APPLICATIONS

ENERGY HARVESTING MECHANISMS FOR A SOLAR PHOTOVOLTAIC PLANT MONITORING DRONE: THERMAL SOARING AND BIOINSPIRATION
Mariah Gammill, Michelle Sherman, Ali Raissi, Mostafa Hassanalian

EXPERIMENTAL DEMONSTRATION OF HIGH-AMPLITUDE THERMOACOUSTIC INSTABILITIES UNDER TRANSCRITICAL TEMPERATURE CONDITIONS IN A STANDING-WAVE DEVICE
Ariana G. Martinez, Benjamin Kuras, Mario Tindaro Migliorino, Carlo Scalo, Stephen D. Heister

ABLATION MODELING AND EXPERIMENTS III

NUMERICAL RECONSTRUCTION OF SPAALLED PARTICLE TRAJECTORIES IN AN ARC-JET ENVIRONMENT
Raghava Davuluri, Sean Bailey, Kaveh Tagavi, Alexandre Martin

SURFACE OXIDATION OF CARBON/CARBON COMPOSITES IN HYPERSONIC ENVIRONMENTS
Ares Barrios-Lobelle, Raghava Davuluri, Rui Fu, Alexandre Martin, Savio J. Poovathingal

NONINTRUSIVE MANUFACTURED SOLUTIONS FOR ABLATION
Brian A. Freno, Brian Carnes, Neil R. Matula
THEORETICAL, EXPERIMENTAL AND COMPUTATIONAL HEAT TRANSFER I

EQUIVALENT GIBBS FUNCTION CONTINUATION FOR MULTI-TEMPERATURE PLASMAS IN CHEMICAL EQUILIBRIUM .......................................................... 505
Pedro Dinis Caseiro Jorge, James B. Scoggins, Thierry E. Magin, Nagi N. Mansour

ELECTROHYDRODYNAMIC GAS PUMP IN A SQUARE CHANNEL WITH ELECTRODES MOUNTED ON TWO PARALLEL WALLS ............................................ 519
Sheam-Chyun Lin, Y. J. Chang, C. Y. Wu, Feng C. Lai

MODELING OF THE SUPERCritical BOILING CURVE BY FORCED CONVECTION FOR SUPERCritical FLUIDS IN RELATION TO REGENERATIVE COOLING ................................................. 529
Nelson P. Longmire, Daniel T. Banuti

AEROTHERMODYNAMICS AND THERMAL PROTECTION SYSTEMS I

ON THE ENERGY TRANSFER MECHANISMS FOR THE SUPersonic MODE .................................. 539
Bijaylakshmi Saikia, Sayed Mohammad Abdullah Al Hasnine, Leonard Dueñas, Christoph Brehm

DISCONTINUOUS GALERKIN SIMULATIONS OF DUSTY FLOWS OVER A FULL-SCALE CAPSULE DURING MARS ATMOSPHERIC ENTRY ............................................. 565
Eric J. Ching, Matthias Ihme

GEOMETRY DEPENDENCE OF TRANSPIRATION COOLING FOR HYPERSONIC SYSTEMS .................................................. 585
Jason Connolly

AEROTHERMODYNAMICS AND THERMAL PROTECTION SYSTEMS II

HIGH-FIDELITY SIMULATIONS OF HYMETS ARC-JET FLOWS FOR PICA-N MODELING ............... 598
Patricia Ventura Diaz, Jeremie B. Meurisse, Aaron M. Brandis, Brody K. Bessire, Michael Barnhardt, Steven Yoon

INSTRUMENTED HYPERSONIC TESTING USING ADDITIVE MANUFACTURING ..................... 618
Robert W. Eldridge, Tan Phan, Christopher M. James, Steve F. Apirana

INVESTIGATION OF IN-DEPTH PENETRATION OF RADIATIVE HEATING IN THERMAL PROTECTION SYSTEM (TPS) ............................................................. 636
Ayan Banerjee, Savio J. Poovathingal

MULTI-FIDELITY HEATING PREDICTION OF ADAPTABLE, DEPLOYABLE ENTRY PLACEMENT TECHNOLOGY VEHICLES ...................................................... 651
Mario Santos, Serhat Hosder, Thomas K. West

AEROTHERMODYNAMICS AND THERMAL PROTECTION SYSTEMS III

PARAMETRIC ASSESSMENT OF EFFECT OF DESIGNED-IN FEATURES ON THERMAL RESPONSE OF TPS FOR SELF-HEALING APPLICATIONS ................................. 669
Nathaniel Skolnik, Zachary R. Putnam
PROJECT-BASED MODEL REDUCTION FOR FINITE-ELEMENT SIMULATIONS OF THERMAL PROTECTION SYSTEMS .......................................................... 684
   Marco Arienti, Patrick J. Blonigan, Francesco Rizzi, John Tencer, Micah Howard

STRAIN-DEPENDENCE OF THERMAL CONDUCTIVITY IN FLEXIBLE FIBROUS INSULATION MATERIALS .......................................................... 700
   Christopher Barrow, John F. Maddox, Kaveh Tagavi
