2021 IEEE 12th International Conference on Mechanical and Intelligent Manufacturing Technologies (ICMIMT 2021)

Cape Town, South Africa
13 – 15 May 2021
# Table of Contents

2021 IEEE 12th International Conference on Mechanical and Intelligent Manufacturing Technologies (ICMIMT 2021)

**Preface** ............................................................................................................................................................ ix

**Committees** ...................................................................................................................................................... x

✦ **Materials Science and Engineering**

An In-depth Study of Optimization of Glass-Epoxy Unidirectional Fiber-Reinforced Laminated Composites Under Mechanical Loading .............................................................................................................................. 1

*Junho Park, Christopher Chou*

Analysis of defect formation during rotary friction welding of titanium alloy .......................................................................................................................... 7

*MC Zulu, PM Mashinini*

Preparation of Carbon Fibre Reinforced Copper Matrix Composite using Electroplating in Laboratory for Electrical Power Applications ......................................................................................................................... 12

*Ruoyu Xu, Mingyu Zhou, Yi Ding, Xuejun Wang, Yu Han, Haitian Wang, Chenwei Zhang, Werner Hufenbach*

Study of Microstructure and Hardness of Austenitic Stainless Steel 309L Multipass Weld Beads ................. 19

*Kevin Mogano, Daniel Madyira*

Analysis of Solid Rocket Motor Materials ....................................................................................................... 25

*Hexiang Zhang*

Microstructural Characteristics and Hardness Property of Laser Cladded Ti and TiB$_2$ Nanocomposites on Steel Rail ........................................................................................................................................................ 30

*V. I. Aladesanmi, O.S Fatoba, T. C. Jen, E.T. Akinlabi*

Analysis of Buckling and Characteristics in Wings of Aircraft ........................................................................ 36

*Zichun Zeng*

Python Data Analysis and Regression Plots of Wear and Hardness Characteristics of Laser Cladded Ti and TiB$_2$ Nanocomposites on Steel Rail ............................................................................................................... 40

*V. I. Aladesanmi, O.S Fatoba, T. C. Jen, E.T. Akinlabi*
Factors for optimizing time performance of Modular Construction: a review and evidence from Huoshenshan Hospital construction ...................................................................................................................................... 45

Yao Tong

Seismic Behavior and Design of Precast Concrete Structures ......................................................................................................................................... 49

Tairan Li

Analysis of Geometrical Characteristics and Microstructural Evolution of Laser Deposited Titanium Alloy Based Composite Coatings ..................................................................................................................................... 53

O. S Fatoba, T. C. Jen, B. A. Tadesse, E. A. Mekonen, E. T. Akinlabi

Research on the Influence of Sector Angle and Flow Rate on Each Reactant Gas in MOCVD Reactor ..... 59

Yang Shuntao, Li Zhiming, Feng Lansheng, Guo Runqiu, Li Hailing, Liu Changjiang, Li Yang, Fu Xiaoqian, Zhang Chunwei

Development of Program for Solving Plane Rigid Frame Based on MATLAB .............................................. 64

Zhixiang Li

Mechanical Design and Processing

Machine Learning Based Predictive Modeling of Ball Nose End Milling using Exogeneous Autoregressive Moving Average Approach ..................................................................................................................................... 68

Vijaykumar S. Jatti, Ravi Sekhar, Pritesh Shah

A Framework for a Reconfigurable Welding Jig for Sheet Metal Panel Component of a Railcar .......... 73

Ilesanmi Daniyan, Khumbulani Mpofu, Boitumelo Ramatsetse, Olasumbo Makinde

Research on precision picking technology of Aircraft Assembly Standard Parts ........................................... 81

Yulong Lan, Guangku Xue, Ying Xie, Shiyong Liu, Jie Li, Yangbin Guo, Zhijun Peng

Collaborative Optimization of Vehicle Chassis Integration System ..................................................................................................................................... 85

Chenyu Wang, Xiaokai Chen, Guobiao Shi, Zifa Yang

Study on Vibration Reduction Indicator of Metal Bellows Using Finite Element Analysis ......................... 91

Yongqiang Lin, Jianrun Zhang, Dacheng Huang

Structural Design of Twin Towers with Vibration Absorbers ..................................................................................................................................... 96

Peng Liurui

Analysis of radial compression performance of Poly (L-lactic acid) helical stents ........................................... 103

Jiaming Liu, Muqing Liu, Yuan Tian, Jie Cheng, Wentao Liu, Gutian Zhao
Finite Element Analysis of Plate Based on Linear and Quadratic Triangular Elements.............................. 109
Jianxun Xie, Jingyang Wu

✧ Applied Mechanics and Friction

Fluid Forces as an Additional Source of Vibration in a Rotor-Stator Rub System (Part I) ......................115
Bernard Xavier Tchomeni Kouejou, Alfayo Anyika Alugongo

Theoretical and experimental study of friction torque of ball screw mechanism considering lubrication.... 122
Min Wang, Bo Chai, Tiewei Sun

Mechanical and microstructural behavior effect of 304 and 316L austenitic stainless during the rotary friction welding process...................................................................................................................... 128
Zamukwanda Vincent Gambu, Peter Madindwa Mashinini, Doctor Mukhawana

Experimental Study of the Impact of the Fluid Forces on Disturbances Induced by the Rotor-Stator Rubbing (Part II) .......................................................................................................................................................... 133
Bernard Xavier Tchomeni kouejou, Alfayo Anyika Alugongo

Effect of Process Parameters on the Joint Properties of Similar Friction Welded 316L Steel Rods........... 139
Zamukwanda Vincent Gambu, Peter Madindwa Mashinini, Doctor Mukhawana

Dynamic Analysis of Vertical Rotor Mass-Visco Fluid System Enhancing Subsequent Rub ................. 144
Desejo Filipeson Sozinando, Bernard Xavier Tchomeni kouejou, Alfayo Anyika Alugongo

An Experimental Study of the Stress Wave Propagation in Heterogeneous Solids............................ 150
Xuanye Hu, Kangpei Meng, Q. M. Li

Investigation of Mechanical Properties of Friction and Laser Welded Ti-6Al-4V rods.......................... 158
T. D Tlale, P. M Mashinini, D. M Mukhawana

✧ Advanced Manufacturing Engineering and Technology

Using Layer-by-Layer Self-Assembly in the fabrication of thin films ....................................................... 165
Lokesh Sangabattula

Design and Manufacture of A Delta Type Parallel Robot from the Study of Materials ......................... 169
Aruquipa A. Grover, Rojas S. Gabriel

Research on Fast Change Temperature TCU in IC Manufacturing......................................................... 175
Shouzhen Rui, Nijing Pi, Maodong He, Mengjie He, Xiaokang Cao, Chunhui Dong, Ziyang Liu, Tao Feng, Xin Chang
Harnessing Industry 4.0 Technology to Improve Productivity in Manufacturing Industries: a Case of CNC Based Welding Factory

Adedotun Adetunla, Nelson Madonsela

Comparative Evaluation of Machine Learning Regressors for the Layer Geometry Prediction in Wire arc Additive manufacturing

Germán Omar Barrionuevo, Sergio Ríos, Stewart W. Williams, Jorge Andrés Ramos-Grez

Optimization of P-GMAW parameters using Grey relational analysis and Taguchi method

Jeyaganesh D., Aiman Ziout, Jaber Abu Qudeiri

Mechanical and Electronic Engineering

Experimental Investigation of Effects of Motor Speed on Isothermal Efficiency of Water Cooler Two-Stage Compressor

M. Pita, T. Gaonnwe

Overview of Digital Twin Technology in Wind Turbine Fault Diagnosis and Condition Monitoring

Obafemi O. Olatunji, Paul A. Adedeji, Nkosinathi Madushele, Tien-Chien Jen

Sealing Performance of Packer Element at Worn Casing Section

Jie-Li Wang, Bao-Kui Gao, Chao Ma, and Xing-Wang Chen

Advances in Electrical Conductivity Calculation Method of Thermal Ionization Plasma

Qijin Zhao, Baoquan Mao, Xianghua Bai, Yuying Yang, Rui Zhu, Chunlin Chen

Application of Fuzzy Mamdani Model for Effective Prediction of Traffic Flow of Vehicles at Signalized Road Intersections

Isaac O. Olayode, Lagouge K. Tartibu, Modestus O. Okwu

Modeling of a mass absorber to suppress wind-induced vibrations of transmission line conductors

Zakhele Mathews Zondi, Modify A.E. Kaunda

Experimental Research of Eddy Current Testing Technology Based on Resonant Circuit in Carbon Fiber Reinforced Polymer Testing

Guo-cai Zhang, Yan-qing Feng, Shuai Xue, Jing Zhang

Power Mechanical Engineering
Dynamic Performance Optimization Research of Impeller-Baffle Compound Structure Under Water …… 239

Xianghua Bai, Chunlin Chen, Jiangang Lv, Fei Gao, Qijin Zhao

Experimental Investigation of TH 150 Mini Gas turbine power plant efficiency at different gas Generator Speeds ………………………………………………………………………………………………………… 244

M. Pita, L. Lebea

Research on Adaptive Controller for Portable Electro Discharge Machining Perforation Machine ……… 248

Yue Pan, Chunming Geng

Evolutionary-based Hyperparameter Tuning in Machine Learning Models for Condition Monitoring in Wind Turbines – A Survey ………………………………………………………………………… 254

Paul A. Adedeji, Obafemi O. Olatunji, Nkosinathi Madushele, Tien-Chien Jen

Crack Fault Diagnosis for Spur Gears Using Gear Frequency-RPM spectrum …………………………… 259

Kemajou Herbert Yakeu Happi, Bernard Xavier Tchomeni kouejou, Alfayo Anyika Alugongo

Research on spindle fault diagnosis technology of sixaxis five-linkage Bridge CNC machine tool ……… 265

Yulong Lan, Guangku Xue, Xifeng Fan, Shiyong Liu, Ying Xie, Jie Li, Yun Zhang

Optimization of deformity correction modes and their control methods for hexapod robot based external fixator…………………………………………………………………………………………… 270

Yunfei Ge, Qing Zhang, Yuantao Sun, Xianrong Qing

Constraint Identification from STEP AP242 files for Automated Robotic Welding* ……………… 277

Shafi K. Mohammed, Mathias H. Arbo, Lars Tingelstad

Modern Information Technology and Engineering

Feasibility Study on Enhanced Oil Recovery Using Fuzzy-Ball Fluid in Offshore Heterogeneous Sandstone Reservoir …………………………………………………………………………………………… 283

Chao Wang, Lihui Zheng

Traffic flow Prediction at Signalized Road Intersections: A case of Markov Chain and Artificial Neural Network Model…………………………………………………………………………………………… 287

Isaac O. Olayode, Lagouge K. Tartibu, Modestus O. Okwu

Tactics for the Precision Marketing on the Background of the Big Data………………… 293

Zhihong Li

A Survey of Maturity Models in Data Management……………………………………………………… 298

Oumaima Belghith, Sabri Skhiri, Sirine Zitoun, Syrine Ferjaoui
Business Process Design of the Proposed PCR Examination at the PCR Laboratory of Pertamina Balikpapan Hospital Using the Business Process Improvement (BPI) Method .............................................. 310

*Fatya Hafizha Aulia Rahma, Endang Chumaidiyah, Wawan Tripiawan*

Students' Capability in Bridging the Entrepreneurial and Innovation Chasm ......................................................... 315

*Vusumzi Malele, Manthiba Elizabeth Letsoalo, Mhlambululi Mafu*
