2020 IEEE-RAS 20th International Conference on Humanoid Robots (Humanoids 2020)

Munich, Germany
19-21 July 2021
# TABLE OF CONTENTS

The MIT Humanoid Robot: Design, Motion Planning, and Control for Acrobatic Behaviors
Matthew Chignoli, Donghyun Kim, Elijah Stanger-Jones, Sangbae Kim ........................................ 1

LOLA v1.1 - An Upgrade in Hardware and Software Design for Dynamic Multi-Contact Locomotion
Philipp Setiwal, Shun-Cheng Wu, Felix Sygulla, Tobias Franz Christian Berninger, Nora-Sophie Staufenberg, Moritz Ferdinand Sattler, Nicolas Neuburger, Daniel Rixen, Federico Tombari .......................................................... 9

Development of Musculoskeletal Legs with Planar Interskeletal Structures to Realize Human Comparable Moving Function
Moritaka Onitsuka, Manabu Nishiura, Kento Kawaharazuka, Kei Tsuzuki, Yasunori Toshimitsu, Yusuke Omura, Yuki Asano, Kei Okada, Koji Kawasaki, Masayuki Inaba .......................................................... 17

An Integrated, Force-Sensitive, Impedance Controlled, Tendon-Driven Wrist: Design, Modeling, and Control
Alexander Toedtheide, Johannes Kuehn, Edmundo Pozo Fortunie, Sami Haddadin ........................................ 25

Optimization-Based Quadrupedal Hybrid Wheeled-Legged Locomotion
Italo Belli, Matteo Parigi Polverini, Arturo Laurenzi, Enrico Mingo Hoffman, Paolo Rocco, Nikos Tsagarakis .......................................................... 41

Whole-Body Walking Pattern Using Pelvis-Rotation for Long Stride and Arm Swing for Yaw Angular Momentum Compensation
Beomyeong Park, Myeong-Ju Kim, Eunho Sung, Junhyung Kim, Jaeheung Park ........................................ 47

Multi-Fidelity Receding Horizon Planning for Multi-Contact Locomotion
Jiayi Wang, Sanghyun Kim, Sethu Vijayakumar, Steve Tonneau .......................................................... 53

Stochastic and Robust MPC for Bipedal Locomotion: A Comparative Study on Robustness and Performance
Ahmad Gazar, Majid Khadiv, Andrea Del Prete, Ludovic Righetti .......................................................... 61

Design and Development of a Flying Humanoid Robot Platform with Bi-Copter Flight Unit
Tomoki Anzai, Yuta Kojo, Tasuku Makabe, Kei Okada, Masayuki Inaba .......................................................... 69

Pick-and-place in dynamic environments with a mobile dual-arm robot equipped with distributed distance sensors
Sotiris Stavridis, Pietro Falco, Zoe Doulgeri .......................................................... 76

Motion Modification Method of Musculoskeletal Humanoids by Human Teaching Using Muscle-Based Compensation Control
Kento Kawaharazuka, Yuuya Koga, Manabu Nishiura, Yusuke Omura, Yuki Asano, Kei Okada, Koji Kawasaki, Masayuki Inaba .......................................................... 83

Wolfgang-OP: A Robust Humanoid Robot Platform for Research and Competitions
Marc Bestmann, Jasper Guldenstein, Florian Vahl, Jianwei Zhang .......................................................... 90

Calibration of an Elastic Humanoid Upper Body and Efficient Compensation for Motion Planning
Johannes Tenhumberg, Berthold Bauml .......................................................... 98

Development of Amphibious Humanoid for Behavior Acquisition on Land and Underwater
Tasuku Makabe, Tomoki Anzai, Yohei Kakiuchi, Kei Okada, Masayuki Inaba .......................................................... 104
Online Virtual Repellent Point Adaptation for Biped Walking Using Iterative Learning Control

Shengzhi Wang, George Mesesan, Johannes Englsberger, Dongheui Lee, Christian Ott

Safe Data-Driven Contact-Rich Manipulation

Ioanna Mitsioni, Pouria Tajvar, Danica Kragic, Jana Tumova, Christian Pek

Feature-Based Deep Learning of Proprioceptive Models for Robotic Force Estimation

Erik Berger, Alexander Uhlig

Open-Ended Fine-Grained 3D Object Categorization by Combining Shape and Texture Features in Multiple Colorspaces

Nils Keunecke, Hamidreza Kasaei

SURENA IV: Towards a Cost-Effective Full-Size Humanoid Robot for Real-World Scenarios

Combining Task and Motion Planning Using Policy Improvement with Path Integrals

Dominik Urbaniak, Alejandro Agostini, Dongheui Lee

A HZD-Based Framework for the Real-Time, Optimization-Free Enforcement of Gait Feasibility Constraints

Pravin Dangol, Andrew Lessieur, Eric Sihite, Alireza Ramezani

Closed-Loop Variable Stiffness Control of Dynamical Systems

Xiao Chen, Youssef Michel, Dongheui Lee

From Space to Earth - Relative-CoM-To-Foot (RCF) Control Yields High Contact Robustness

Johannes Englsberger, Alessandro Massimo Giordano, Achraf Hiddane, Robert Schuller, Florian Loeffl, George Mesesan, Christian Ott

Footstep and Timing Adaptation for Humanoid Robots Utilizing Pre-Computation of Capture Regions

Yuichi Tazaki

Policy Decomposition: Approximate Optimal Control with Suboptimality Estimates

Ashwin Khadke, Hartmut Geyer

HubRobo: A Lightweight Multi-Limbed Climbing Robot for Exploration in Challenging Terrain

Kentaro Uno, Naomasa Takada, Taku Okawara, Keigo Haji, Candalot Arthur, Warley Francisco Rocha Ribeiro, Kenji Nagaoka, Kazuya Yoshida

Minimum Energy-Cost Walking Exploiting Natural Dynamics of Multiple Spring-Mass Model

Sangjin Bae, Chan Lee, Sehoon Oh

The Elliott and Connolly Benchmark: A Test for Evaluating the In-Hand Dexterity of Robot Hands

Ryan Coulson, Chao Li, Carmel Majidi, Nancy S Pollard

A Vertical Jump Optimization Strategy for One-Legged Robot with Variable Reduction Ratio Joint

Haoxiang Qi, Xuechao Chen, Zhangguo Yu, Giao Huang, Libo Meng, Kenji Hashimoto, Wenxi Liao, Qiang Huang

MPC-Based Locomotion Control of Bipedal Robots with Line-Feet Contact Using Centroidal Dynamics

Gabriel Enrique Garcia Chavez, Robert J. Griffin, Jerry Pratt

Design, Analysis and Control of the Series-Parallel Hybrid RH5 Humanoid Robot ........................................ 400
Julian Eßer, Shivesh Kumar, Heiner Peters, Vinzenz Bargsten, Jose De Gea Fernandez, Carlos Mastalli, Olivier Stasse, Frank Kirchner

Garbage Collection and Sorting with a Mobile Manipulator Using Deep Learning and Whole-Body Control.................................................................................................................. 408
Jingyi Liu, Pietro Balatti, Kirsty Ellis, Denis Hadjivelichkov, Danail Stoyanov, Arash Ajoudani, Dimitrios Kanoulas

Energy pumping-and-damping for gait robustification of underactuated planar biped robots within the hybrid zero dynamics framework .................................................................................. 415
Pierluigi Arpenti, Alejandro Donaire, Fabio Ruggiero, Vincenzo Lippiello

Pushing Cylinders: Expanding on Object-Based Manipulation ........................................................................ 422
Daniel Garcia-Vaglio, Javier Peralta-Saenz, Federico Ruiz-Ugalde

Optimal Grasp Selection, and Control for Stabilising a Grasped Object, with Respect to Slippage and External Forces ........................................................................................................ 429
Tommaso Pardi, Amir Masoud Ghalamzan Esfahani, Valerio Ortenzi, Rustam Stolkin

Spatial Calibration of Whole-Body Artificial Skin on a Humanoid Robot: Comparing Self-Contact, 3D Reconstruction, and CAD-Based Calibration ................................................................. 445
Lukas Rustler, Bohumila Potocna, Michal Polic, Karla Stepanova, Matej Hoffmann

Walking-In-Place Foot Interface for Locomotion Control and Telepresence of Humanoid Robots .............. 453
Ata Otaran, Ildar Farkhatdinov

Multisensorial Robot Calibration Framework and Toolbox .................................................................................. 459
Jakub Rozlivek, Lukas Rustler, Karla Stepanova, Matej Hoffmann

The KIT Bimanual Manipulation Dataset ........................................................................................................ 499
Franziska Krebs, Andre Meixner, Isabel Patzer, Tamim Asfour

Identification of Common Force-Based Robot Skills from the Human and Robot Perspective ..................... 507
Thomas Eiband, Dongheui Lee

Guided Robot Skill Learning: A User-Study on Learning Probabilistic Movement Primitives with Non-Experts ............................................................................................................... 514
Moritz Knaust, Dorothea Koert

A Human-Aware Method to Plan Complex Cooperative and Autonomous Tasks Using Behavior Trees ......................................................................................................................... 522
Fabio Fusaro, Edoardo Lamon, Elena De Momi, Arash Ajoudani
