CONTENTS

Proceedings of ASME Turbo Expo 2021: Turbomachinery Technical Conference and Exposition

Heat Transfer: Combustors

GT2021-59217 ................................................................. V05AT11A001
Analysis of Swirl Number Effects on Effusion Flow Behaviour Using Time Resolved PIV
  T. Lenzi, A. Picchi, A. Andreini, and B. Facchini

GT2021-59312 ................................................................. V05AT11A002
Effect of Spanwise Hole to Hole Spacing on Overall Cooling Effectiveness of Effusion Cooled Combustor Liners for a Swirl Stabilized Can Combustor
  Shoaib Ahmed, Benjamin H. Wahl, Srinath Ekka, Hanjie Lee, and Yin-Hsiang Ho

GT2021-59384 ................................................................. V05AT11A003
Reduced-Order Models for Effusion Modelling in Gas Turbine Combustors
  S. Paccati, L. Mazzei, A. Andreini, and B. Facchini

GT2021-59429 ................................................................. V05AT11A004
Influence of Opposing Dilution Jets on Effusion Cooling
  M. Riley Creer and Karen A. Thole

GT2021-59687 ................................................................. V05AT11A005
High-Resolution Thermal Profiling of a Combustor in a Non-Dedicated Test Using Thermal History Coatings
  David Peral, Ahmed Zaid, Christoph Benninghoven, Silvia Araguas-Rodríguez, David Klüß, Solon Karagiannopoulos, Robert Krewinkel, and Jörg Feist

Heat Transfer: Film Cooling

GT2021-58451 ................................................................. V05AT12A001
Film Cooling Effectiveness Enhancement Using Multi-Longitudinal Vortex Generated by Alternating Elliptical Film Holes
  Kun Xiao, Juan He, and Zhenping Feng

GT2021-58661 ................................................................. V05AT12A002
Analysis of LES and 1D Hot-Wire Data to Determine Actively Generated Main Flow Turbulence in a Film Cooling Test Rig
  Lukas Fischer, Michael Straußwald, and Michael Pfitzner

GT2021-58889 ................................................................. V05AT12A003
Unsteady Film Cooling Performance on the High Pressure Turbine Shroud Under Rotor-Stator Interaction for an Aero-Engine
  Zihao Bao, Zhihai Kou, Bo Han, and Guangchao Li

GT2021-58950 ................................................................. V05AT12A004
Experimental and Computational Investigation of Integrated Internal and Film Cooling Designs Incorporating a Thermal Barrier Coating
  Matthew J. Horner, Christopher Yoon, Michael Furgeson, Todd A. Oliver, and David G. Bogard

GT2021-58991 ................................................................. V05AT12A005
Additively Manufactured Porous Geometries for Hybrid Turbine Cooling
  Nathan D. Fier and David G. Bogard

GT2021-59015 ................................................................. V05AT12A006
Improving the Film Cooling Performance of a Turbine Endwall With Multi-Fidelity Modeling Considering Conjugate Heat Transfer
  Hongyan Bu, Yufeng Yang, Liming Song, and Jun Li
Film Cooling Effectiveness Measurement of Fan-Shaped Holes Manufactured Using EDM Technique
S. Rouina, H. Abdeh, G. Barigozzi, V. Odemondo, L. Abba, and M. Iannone

Experimental Investigation and Optimal Design on the Film Cooling Performance of Fan-Shaped Hole With Vortex Generator Fed by Crossflow
Jie Wang, Chao Zhang, Xuebin Liu, Liming Song, Jun Li, and Zhenping Feng

DDES Numerical Investigations on Coherent Structures in Trailing-Edge Film Cooling Combined With Pressure-Side Film Hole
Xiangtao Xiao, Pei Wang, Qiang Du, Qingzong Xu, and Jun Liu

Autonomous Large Eddy Simulations Setup for Cooling Hole Shape Optimization
Shubham Agarwal, Laurent Gicquel, Florent Duchaine, Nicolas Odier, Jérôme Dombard, Damien Bonneau, and Michel Slusarz

Comparison of Film Cooling Performance for Different Purge Slot Configurations in a Cylindrical and State-of-the-Art Nozzle Guide Vane
Christian Landfester, Gunther Müller, Robert Krewinkel, Clemens Domnick, and Martin Böhle

Uncertainty Analysis of Film Cooling of Fan-Shaped Holes on a Stator Vane Under Realistic Inlet Conditions
Hai Wang, Chun-hua Wang, Xing-dan Zhu, Jian Pu, Hai-ying Lu, Ming-hou Liu, and Jian-hua Wang

Parametric Optimization of Film Cooling Hole Geometry
Fraser B. Jones, Dale W. Fox, Todd Oliver, and David G. Bogard

Adjoint Optimization of Film Cooling Hole Geometry
Fraser B. Jones, Todd Oliver, and David G. Bogard

Influence of Coolant Density on Turbine Blade Film Cooling at Transonic Cascade Flow Conditions Using the Pressure Sensitive Paint Technique
Izhar Ullah, Sulaiman M. Alsaleem, Lesley M. Wright, Chao-Cheng Shiau, and Je-Chin Han

Enhanced Film Cooling Effect Downstream of a Cylindrical Hole Using SDBD and DBD-VGs Plasma Actuations
Yuefeng Huang, Zihan Zhang, Kun He, and Xin Yan

Conjugate Heat Transfer Characteristics of Double Wall Cooling With Gradient Diameter of Film and Impingement Holes
Juan He, Qinghua Deng, and Zhenping Feng

The Influence of Purge Flow Parameters on Heat Transfer and Film Cooling in Turbine Center Frames
Patrick R. Jagerhofer, Marios Patinios, Tobias Glasenapp, Emil Göttlich, and Federica Farisco

Implementation of Vortex Generator and Ramp to Improve Film Cooling Effectiveness on Blade Endwall
Sadam Hussain and Xin Yan
Effect of a Ceramic Matrix Composite Surface on Film Cooling
   Peter H. Wilkins, Stephen P. Lynch, Karen A. Thole, San Quach, Tyler Vincent, and
   Dominic Mongillo

Flow Check and Adiabatic Effectiveness Measurements on Traditionally Versus Additively
   Manufactured Film-Cooling Holes
   S. Cubeda, L. Andrei, L. Innocenti, F. Paone, L. Cocchi, A. Picchi, and B. Facchini

Effect of Self-Sustained Pulsation of Coolant Flow on Adiabatic Effectiveness and Net Heat Flux
   Reduction on a Flat Plate
   Nicola Rosafio, Simone Salvadori, Daniela Anna Misul, Mirko Baratta, Mauro Carnevale, and
   Christian Saumweber

CFD Evaluation of Internal Flow Effects on Turbine Blade Leading-Edge Film Cooling With Shaped
   Hole Geometries
   Christopher C. Easterby, Jacob D. Moore, and David G. Bogard

Coupling of Mainstream Velocity Fluctuations With Plenum Fed Film Cooling Jets
   Spencer Sperling, Louis Christensen, Richard Celestina, Randall Mathison, Hakan Aksoy,
   Jong Liu, and Jeremy Nickol

Film Cooling and Aerodynamic Performance on Multi-Cavity Squealer Tip of a Turbine Blade
   Feng Li, Zhao Liu, and Zhenping Feng

Effects on Film Cooling Performance in the Showerhead From Geometric Parameterization of
   Shaped Hole Designs
   Jacob D. Moore, Christopher C. Easterby, and David G. Bogard

Experimental and Computational Investigation of Film Cooling Performance and External Flowfield
   Effects due to Impingement Coolant Feed in the Leading Edge of a Turbine Blade
   Jacob D. Moore, Christopher C. Easterby, and David G. Bogard

An Experimental Study of Turbine Vane Film Cooling Using Endoscope-Based PSP Technique in a
   Single-Passage Wind Tunnel
   Kechen Wang, Hongyi Shao, Xu Zhang, Di Peng, Yingzheng Liu, and Wenwu Zhou
