Internal Flows and FIV

**OMAE2021-60717**. Internal Flows and FIV

Rigid Spool & Riser Slugging Induced Vibrations

Raghid Aljarah, Kevin Le Prin, Claire Saunier, and Matthieu Minguez

**OMAE2021-62506**. Response of Multiple Bend System to Multi Phase Flow

H. Pereboom, S. P. C. Belfroid, N. Gonzalez-Diez, and J. Reijtenbagh

**OMAE2021-62797**. Influence of Pressure on Speed of Sound in Oil-Offloading Hoses

Lennert Bijls, Irma Meijer, Hajo Pereboom, Stian Garlid, and Knud Lunde

**OMAE2021-62873**. Multi-phase Flow Induced Vibrations at High Pressure: CFD Analysis of Multi-phase Forces

Paul Emmerson, Mike Lewis, Neil Barton, Steinar Orre, Knud Lunde, Arnout Klinkenberg, Olivier Macchioni, Niranjan Reddy Challabotla, and Stefan Belfroid

**OMAE2021-62938**. Translational Periodic CFD Model: A Practical Solution to Capture Hydrodynamic Slugging in Horizontal Pipes

Madhusuden Agrawal, Samir Khanna, Ardjan Kopliku, and Timothy Lockett

**OMAE2021-63918**. Numerical Prediction of 3-D Vortex-Induced Vibration of Catenary Riser In Planar and Non-Planar Flows

Bowen Ma and Narakorn Srinil

**OMAE2021-62145**. Enhancing Machine Learning Models With Prior Physical Knowledge to Aid in VIV Response Prediction

Leixin Ma, Themistocles L. Resvanis, and J. Kim Vandiver

**OMAE2021-62571**. Numerical Simulations of Sinusoidally Oscillating Cross-Flow Around a Circular Cylinder

Muhammad W. Gamaleldin and Alexander V. Babanin

**OMAE2021-62617**. Numerical Investigation on Flow-Induced Vibrations of Circular Sections in Tandem Arrangement Varying Relative Distance

Aline Peres Leal, Paulo Vitor Reis Guilherme, Rodolfo Trentin Gonçalves, and André Luis Condino Fujarra

**OMAE2021-62931**. Experimental Investigation of Vortex-Induced Vibrations of a Flexibly Mounted Circular Cylinder in Combined Current and Wave Flows

Pierre-Adrien Opinel and Narakorn Srinil

**OMAE2021-63890**. Optimization of Hydrodynamic Coefficients for VIV Prediction

Decao Yin, Jie Wu, Halvor Lie, Jingzhe Jin, Elizabeth Passano, Svein Sævik, Signe Riemer-Sorensen, Anne Marthine Rustad, Michael A. Tognarelli, Guttorm Grytyr, Torgrim Andersen, Daniel Karunakaran, Ragnar Igland, and Collin Gaskill
Parametric Numerical Study on the Self-Propulsive Performance of The DARPA Suboff Submarine via the Body-Force Propeller Method
Kenshiro Takahashi and Takayuki Mori

Effect of Bilge Radius and Bilge Keel Height on Roll Damping Performance of Floating Structures
Chang Seop Kwon, Joo-Sung Kim, and Hyun Joe Kim

Validation of Forced Heave Simulations on a Planing Hull
Nicholas Husser, Carolyn Judge, and Stefano Brizzolara

Hydrodynamic Response of Buoy Form Spar With Heave Plate Near Free Surface
Pooya Hegde and S. Nallayarasu

Development and Verification of Modeling Practice for CFD Decay Calculations to Obtain Roll Damping of FPSO
Arjen Koop, Pierre Crepier, Sebastien Loubeyre, Corentin Dobral, Kai Yu, Haihua Xu, Yingying Zheng, Jang Kim, and Jerry Huang

Parametric Evaluation of Forces Due to a Passing Ship on a Moored Ship Using CFD Simulation
Sreedevi Radhakrishnan and S. Nallayarasu

Free Surface Effect Assessment of the Flow Around the DARPA SUBOFF-5470 Submarine Using OpenFOAM
María T. Quintuña and Rubén J. Paredes

2D Numerical Study on Wake Scenarios for a Flapping Foil
Hui-li Xu, Marilena Greco, and Claudio Lugni

Analysis of Square Wave Characteristic Based on Viscous Flow CFD
Yuanhao Wu, Liwei Liu, Luqun Wang, Yongyan Ma, and Zhiguo Zhang

Direct CFD Simulation and Experimental Study on Coupled Motion Characteristics of Ship and Tank Sloshing in Waves
Weigang Huang, Tao He, Jiawei Yu, Qing Wang, and Xianzhou Wang

Head Wave Simulation of a KCS Model Using OpenFOAM for the Assessment of Sea-Margin
Hafizul Islam and C. Guedes Soares

Weigang Huang, Donglei Zhang, Jiawei Yu, Tao He, and Xianzhou Wang

Numerical Simulation of ONRT Turning Motion in Regular Waves
Bin Ye, Jiawei Yu, Liwei Liu, Qing Wang, and Zhiguo Zhang

A CFD Research on the Effect of Pre-Swirl Stator Blades Number on a Pumpjet Propulsor
Wang Guodong, Yang Jun, Yu Jiawei, Yang Wenjing, and Feng Dakui

Numerical Simulation of Full-Scale Ship Self-Propulsion for Japan Bulk Carrier
Jing Xu, Yujie Zhou, Jiawei Yu, Weihua Deng, and Dakui Feng
